Aircraft will enter at the Muscle Shoals, Alabama VOR at 23,000 feet MSL; then proceed via the 323° radial of the Muscle Shoals VOR maintaining 23,000 feet MSL until 15 nautical miles northwest; then descend on the 323° radial of the Muscle Shoals VOR so as to reach 4,000 feet MSL at a point 47 nautical miles northwest of the Muscle Shoals VOR; then proceed direct to a point 49 nautical miles north of Jacks Creek, Tennessee on the 360° radial of the Jacks Creek VOR descending so as to cross the 234° radial of the Graham, Tennessee VOR at 2000 feet MSL; then direct to a point 21 nautical miles North on the Malden, Missouri VOR 350° radial maintaining 2000 feet MSL with a "Short Look" mission at 4700 feet MSL between a point 24 nautical miles out on the Malden VOR 049° radial and another point 19 nautical miles out on the Malden 019° radial; then direct at 2000 feet MSL to a point 41 nautical miles South on the Farmington, Missouri VOR 182° radial; then direct at 2800 feet MSL to a point 17 nautical miles out on the Maples, Missouri VOR 200° radial; then direct at 2900 feet MSL to a point 27 nautical miles out on the Springfield, Missouri VOR 352° radial; then direct at 2800 feet MSL to a point 25 nautical miles out on the Springfield, Missouri VOR 300° radial.

At this point "Short Look" missions will proceed to the target at 37°14'N-94°34'W, maintaining 2800 feet MSL to a point 38 nautical miles out on the Neosho, Missouri VOR 013° radial, then climb so as to reach 3500 feet MSL by a point 32 nautical miles out on the Neosho, Missouri VOR 004° radial, to start a climb to 4700 feet MSL three miles north of the Joplin, Missouri low frequency beacon (Waco intersection) and cross the target at 4700 feet MSL.

"Long Look" missions will start a climb at a point 25 nautical miles out on the Springfield VOR 300° radial to a predetermined altitude, above the RBS site as filed in the flight plan. This altitude will never exceed 20,000 feet MSL.

After completing the simulated bomb runs, both "Short Look" and "Long Look" missions will proceed to Bartlesville, Oklahoma VOR, maintaining bombing altitude. Normally aircraft will be routed by ATC via the Tulsa, Oklahoma VOR.

The hours of operation on this route are 0200Z to 1400Z Tuesday through Saturday.

Alternate Entry Point-Aircraft will enter at Vichy, Missouri, VOR at or above 20,000 feet MSL, then proceed via the 249° radial of the Vichy VOR at 20,000 feet MSL or above to a point 15 nautical miles southwest of Vichy VOR where descent will start to 2,800 feet MSL, reaching 2,800 feet MSL at a point 46 nautical miles out on the 034° radial of the Springfield, Missouri, VOR thence via the 249° radial of Vichy VOR to a point 27 nautical miles out on the 352° radial of the Springfield VOR at 37°48'30"N-93°20'W thence continue on Flat Rock route.

U. S. Coast and Geodetic Survey

SPECIAL NOTICE

OIL BURNER

ROUTES BEAR CLAWS AND ARROW POINT

EFFECTIVE MARCH 27, 1960

BEAR CLAWS

Aircraft will enter at Lewistown, Montana VOR at flight level 270 or above; then proceed via the 040° radial of the Lewistown VOR at assigned flight level until 20 nautical miles Northeast; then descend to 4700 feet MSL to the entry point of the low level route at 47°30′N-108°30′W; then proceed at 4700 feet MSL to 47°45′N-107°22′W; then proceed at 4700 feet MSL to 47°00′N-106°00′W; then proceed at 4700 feet MSL to 48°00′N-104°27′W; then proceed at 4800 feet MSL to 47°38′N-102°20′W; then proceed at 4400 feet MSL to 47°28′N-101°25′W. At this point, "Short Look" missions will climb to 6400 feet MSL and proceed direct to the RBS site at Bismarck, North Dakota. Aircraft will maintain 6400 feet MSL until clear of controlled airspace, climbing to flight level 260 towards Dupree to reach flight level 260 at a point 15 nautical miles Northeast of the Dupree VOR. "Long Look" missions will not be made on this route. The hours of operation on this route are 1400Z to 2100Z Monday through Friday, and 0200Z to 0900Z Tuesday through Saturday.

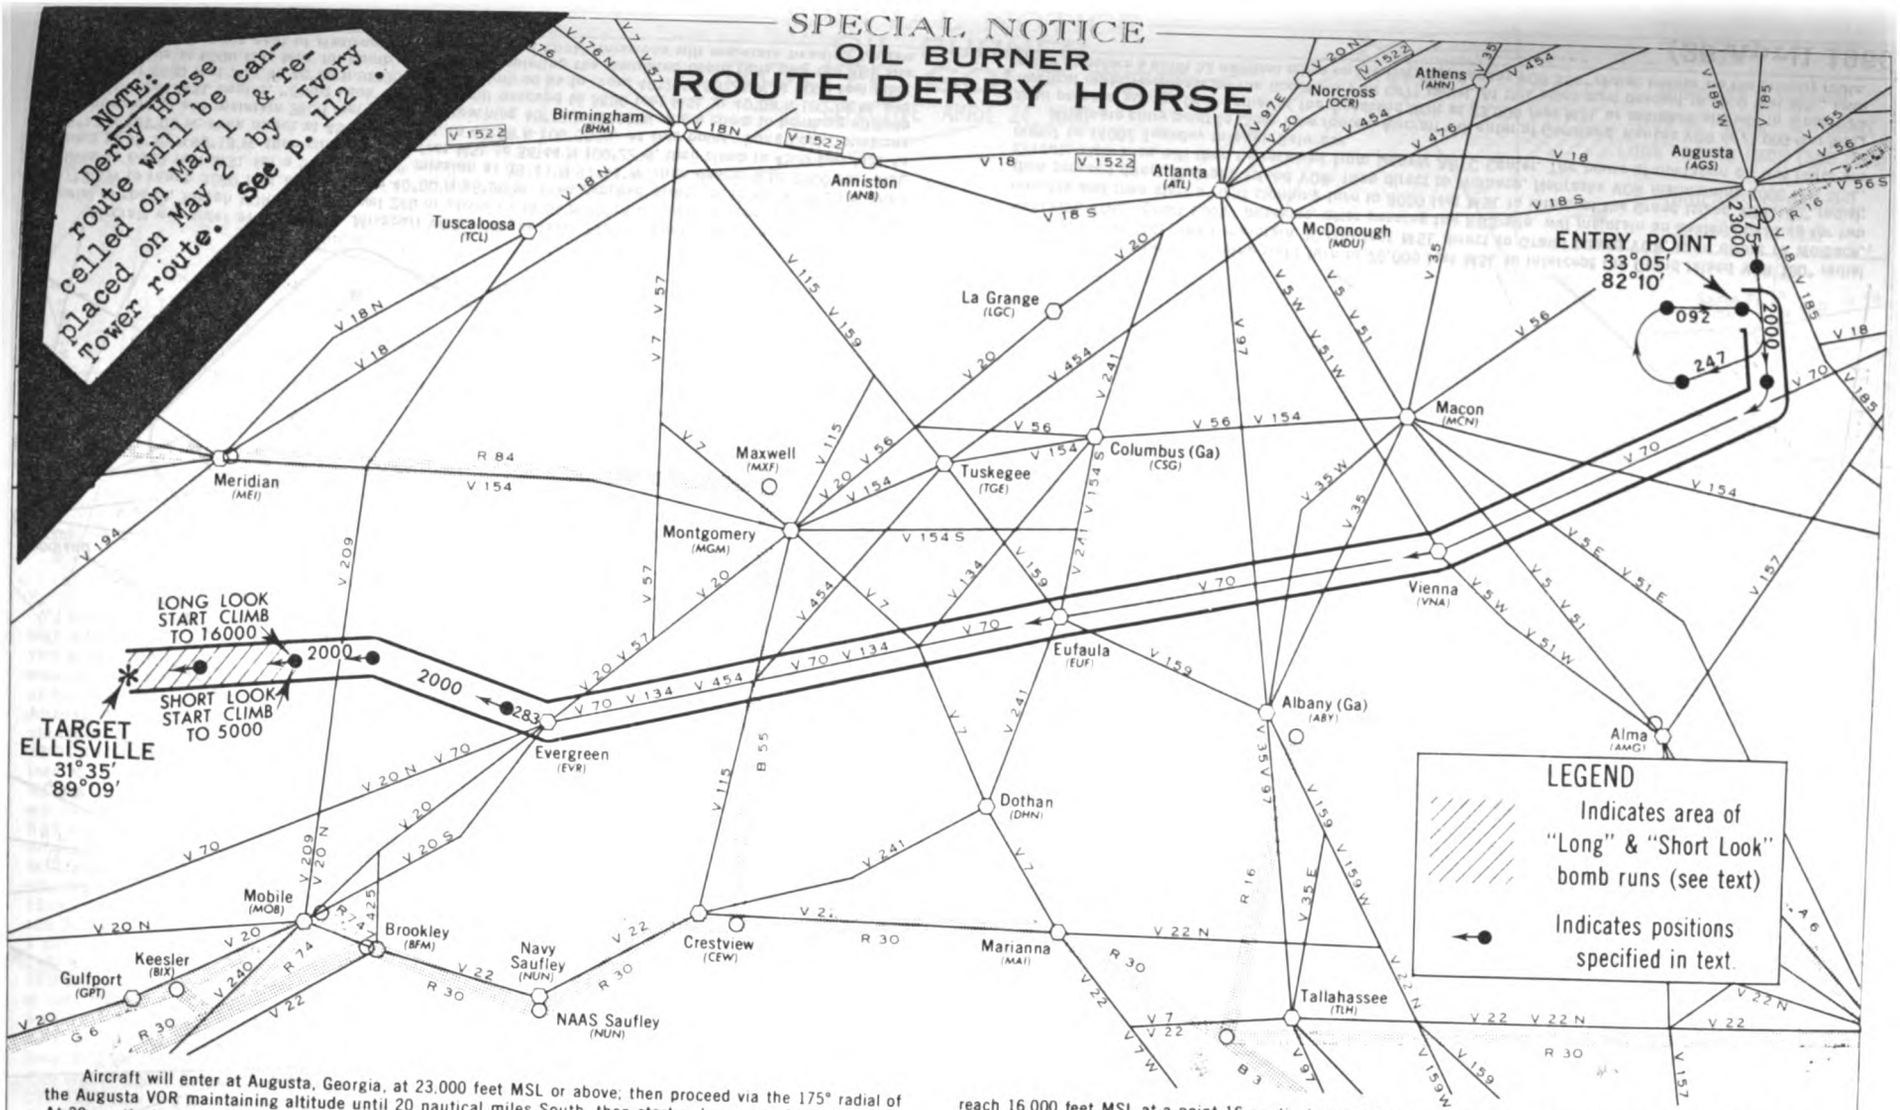
Alternate entry point to Bear Claws route—Aircraft will enter at Dickinson, North Dakota VOR at or above 20,000 feet MSL; then proceed via the 360° radial of the Dickinson VOR at 20,000 feet MSL or above to a point 20 nautical miles North of the VOR where descent will start to 4400 feet MSL to join the Bear Claws route at 4400 feet MSL on the 360° radial of the Dickinson VOR; thence continue on Bear Claws route above.

ARROW POINT

Aircraft will enter at North Platte, Nebraska VOR at 20,000 feet MSL or above; then proceed via the North Platte VOR 360° radial at assigned altitude until 35 nautical miles North; then descend to 4500 feet MSL to the entry point of the low level route at 42°13′N-100°18′W; then proceed at 4500 feet MSL to 43°05′N-98°42′W; then proceed at 3200 feet MSL to 43°43′N-99°14′W; then proceed at 4400 feet MSL to 44°35′N-99°35′W; then proceed at 3100 feet MSL to 45°05′N-99°18′W; then proceed at 3400 feet MSL to 46°14′N-99°15′W; then climb to 5100 feet MSL to 46°51′N-100°35′W. At this point "Short Look" missions will climb to 6400 feet MSL and proceed direct to the RBS site at Bismarck, North Dakota. After the simulated bomb run, "Short Look" missions will maintain 6400 feet MSL until clear of controlled airspace, climbing to flight level 260 towards Dupree to reach flight level 260 at a point 15 nautical miles Northeast of the Dupree VOR. "Long Look" missions will not be made on this route. The hours of operation on this route are 1400Z to 2100Z Monday through Friday, and 0200Z to 0900Z Tuesday through Saturday.

Alternate entry point to Arrow Point route—Aircraft will cross the Jamestown, North Dakota VOR at cruising altitude, descending to 3400 feet MSL on the 195° radial of the Jamestown VOR to join the Arrow Point route at 3400 feet MSL at 46°02′N-99°15′W; thence continue on Arrow Point route above.

NOTE: Arrow Point route will be cancelled on May 1 and replaced on May 2 by the Walnut Grove route --- see chart on page 111.



Prepared at Washington, D.C., by the U.S. Coast and Geodetic Survey

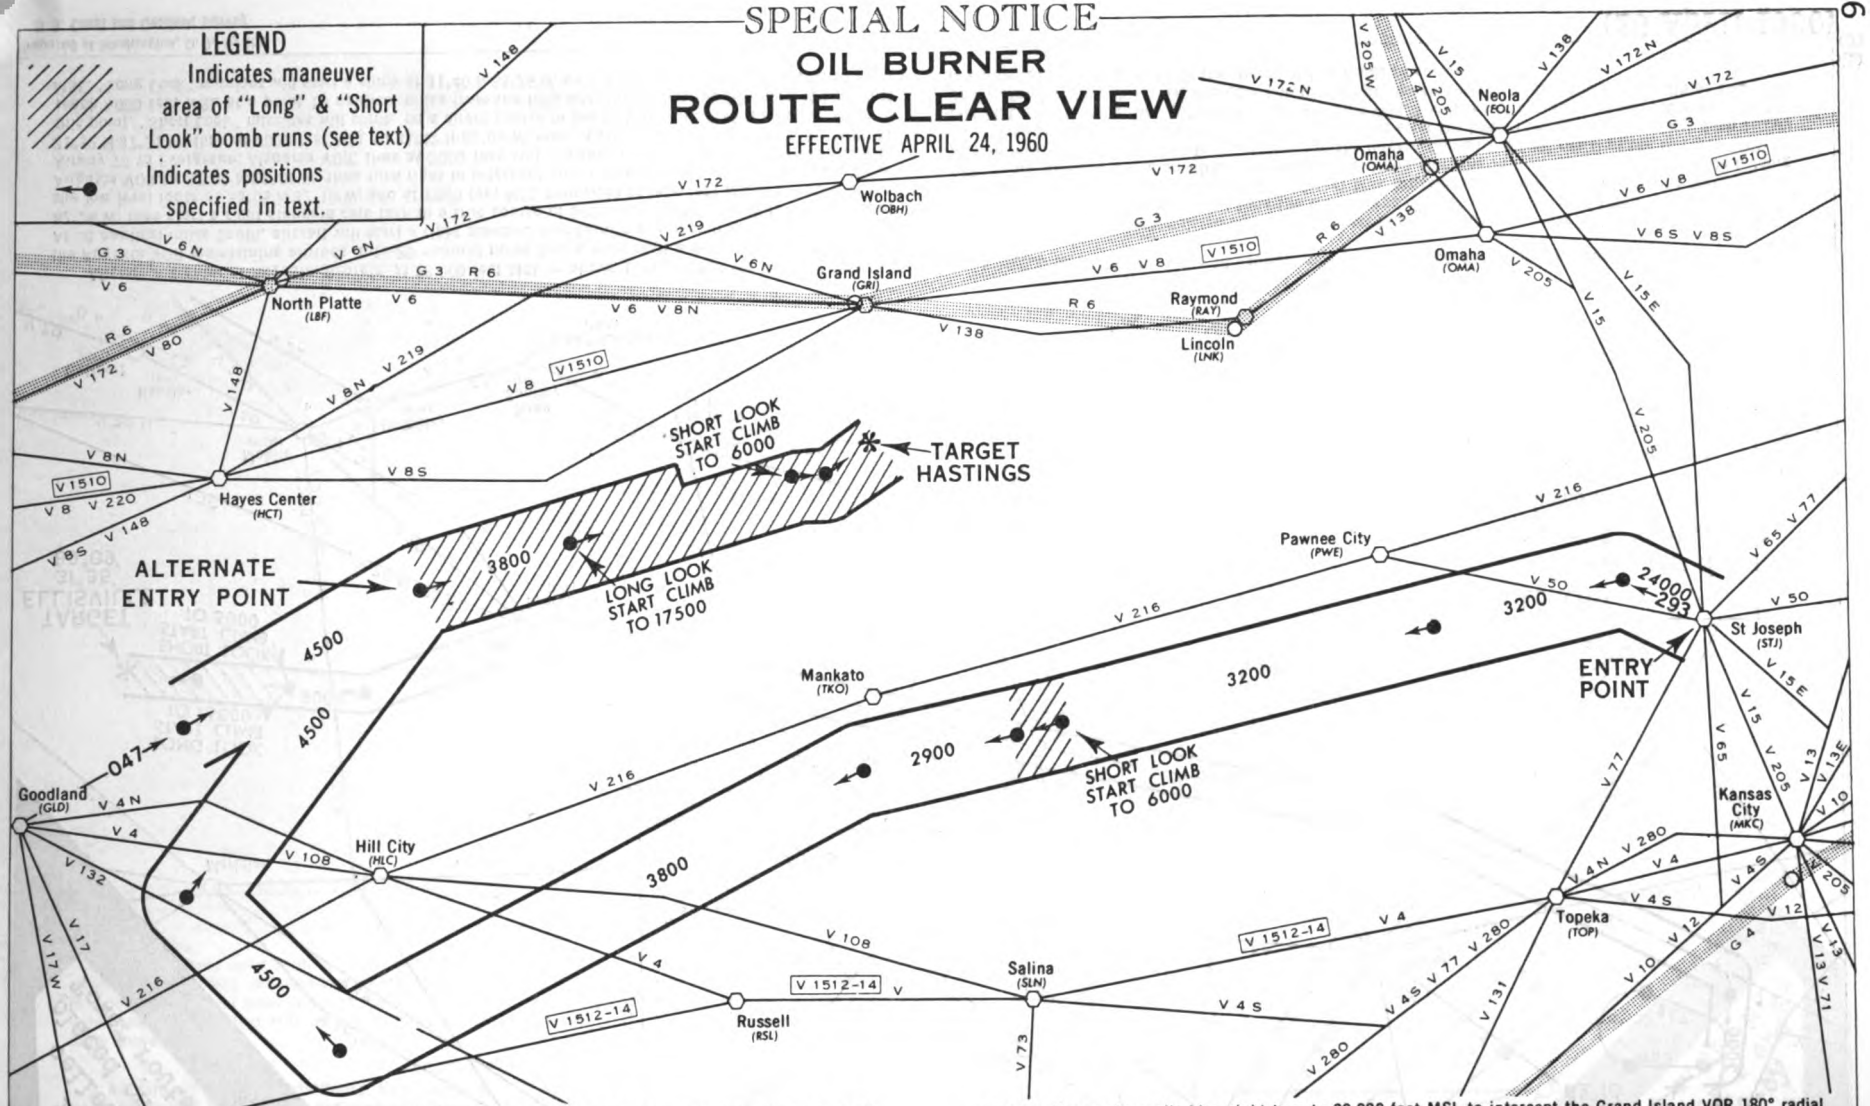
SPECIAL NOTICE
OIL BURNER
ROUTE DERBY HORSE

Aircraft will enter at Augusta, Georgia, at 23,000 feet MSL or above; then proceed via the 175° radial of the Augusta VOR maintaining altitude until 20 nautical miles South, then start a descent to 2000 feet MSL. At 30 nautical miles South, aircraft will start a right standard rate turn to a true course of 247° to 32°49'N-82°26'W; then start a right standard rate turn to a true course of 092° at 33°06'N-82°30'W to entry point of the low level route at 33°05'N-82°10'W, and at 2000 feet MSL turn right to intercept the 175° radial of the Augusta VOR to 32°50'N-82°04'W; then turn right to intercept Victor Airway 70 Westbound; then via Victor Airway 70 to Evergreen, Alabama VOR; then at 2000 feet MSL via the 283° radial of the Evergreen VOR to 31°32'N-87°31'W; then at 2000 feet MSL to 31°42'N-88°06'W; then at 2000 feet MSL to 31°40'N-88°26'W. At this point, "Short Look" missions will climb, on a direct course to the RBS site at 31°35'N-89°09'W, so as to reach 5000 feet MSL at a point 16 nautical miles from the RBS site; then cross the RBS site at 5000 feet MSL. "Long Look" missions will start a climb at 31°40'N-88°26'W, on a direct course to the RBS site, so as to reach 16,000 feet MSL at a point 16 nautical miles from the RBS site; then cross the RBS site at 16,000 feet MSL.

After completing the simulated bomb runs, "Short Look" missions will make a right turn to a true course of 096° at 31°43'N-89°09'W, proceed via the true course of 096° until passing the 180° radial of Meridian, Mississippi VOR; then start a climb to 22,000 feet MSL proceeding to the intersection of the McComb VOR 068° radial and the Meridian VOR 160° radial to continue climbing in a non-standard one minute holding pattern making all turns to the left, Southwest of the intersection on the 068° radial of the McComb VOR.



"Long Look" missions will follow the same procedure after the bomb run, starting their climb from 16,000 feet MSL after passing the 180° radial of the Meridian VOR. The hours of operation on this route are 2000Z to 2400Z Monday through Friday, and 0000Z to 0800Z Tuesday through Saturday. The route width on this route is limited to 10 statute miles, 5 statute miles either side of course.

U. S. Coast and Geodetic Survey

SPECIAL NOTICE

OIL BURNER
ROUTE CLEAR VIEW

EFFECTIVE APRIL 24, 1960

Aircraft will enter at St. Joseph, Missouri VOR at flight level 240 or above; then proceed via the 293° radial of the St. Joseph VOR at flight level 240 or above to 40°06'N-95°14'W; then descend direct to 39°43'N-97°30'W to reach 3200 feet MSL prior to 40°00'N-96°00'W, then proceed direct to 39°43'N-97°30'W, then climb to 6000 feet MSL for a "Short Look" mission at 39°41'N-97°41'W; then descend to 2900 feet MSL direct to 39°35'N-98°18'W; then climb to 3800 feet MSL to 38°44'N-100°22'W; then climb to 4500 feet MSL to 39°11'N-101°00'W; then direct at 4500 feet MSL to 40°08'N-100°06'W. At this point "Long Look" missions will descend to and maintain 3800 feet MSL until reaching 40°17'N-99°30'W where climb to bombing altitude of 17,500 feet MSL begins. "Short Look" missions will descend to 3800 feet MSL at 40°08'N-100°06'W, and proceed at 3800 feet MSL to 40°28'N-98°35'W; then climb so as to cross 40°29'N-98°26'W at 6000 feet MSL; then continue at 6000 feet MSL for bomb run. After completing the simulated bomb runs over the RBS site approximately 5 miles east of Hastings, Nebraska, "Long Look" missions will maintain heading for two minutes; then make a climbing right turn to 20,000 feet MSL to intercept the Grand Island VOR 180° radial at 20,000 feet MSL; then maintain 20,000 feet MSL direct to Grand Island VOR; then direct to Wolbach, Nebraska VOR. "Short Look" missions, after passing the RBS site, will maintain an easterly heading for two minutes and then start a right climbing turn to 8000 feet MSL to intercept the Grand Island VOR 180° radial; then proceed direct to Grand Island VOR; then direct to Wolbach, Nebraska VOR maintaining 8000 feet MSL. Enroute clearance will then be received from Denver ARTC Center. The hours of operation on this route are 0000Z to 1400Z Tuesday through Saturday.

Alternate entry point to Clear View route—Aircraft will enter at Goodland, Kansas VOR at 23,000 feet MSL; then proceed via the 047° radial of the Goodland VOR at 23,000 feet MSL or assigned altitude to a point 35 nautical miles Northeast on the Goodland VOR 047° radial. At this point start descent to 4500 feet MSL, level off at or before a point 52 nautical miles on the Hill City, Kansas VOR 358° radial; thence via the primary route.

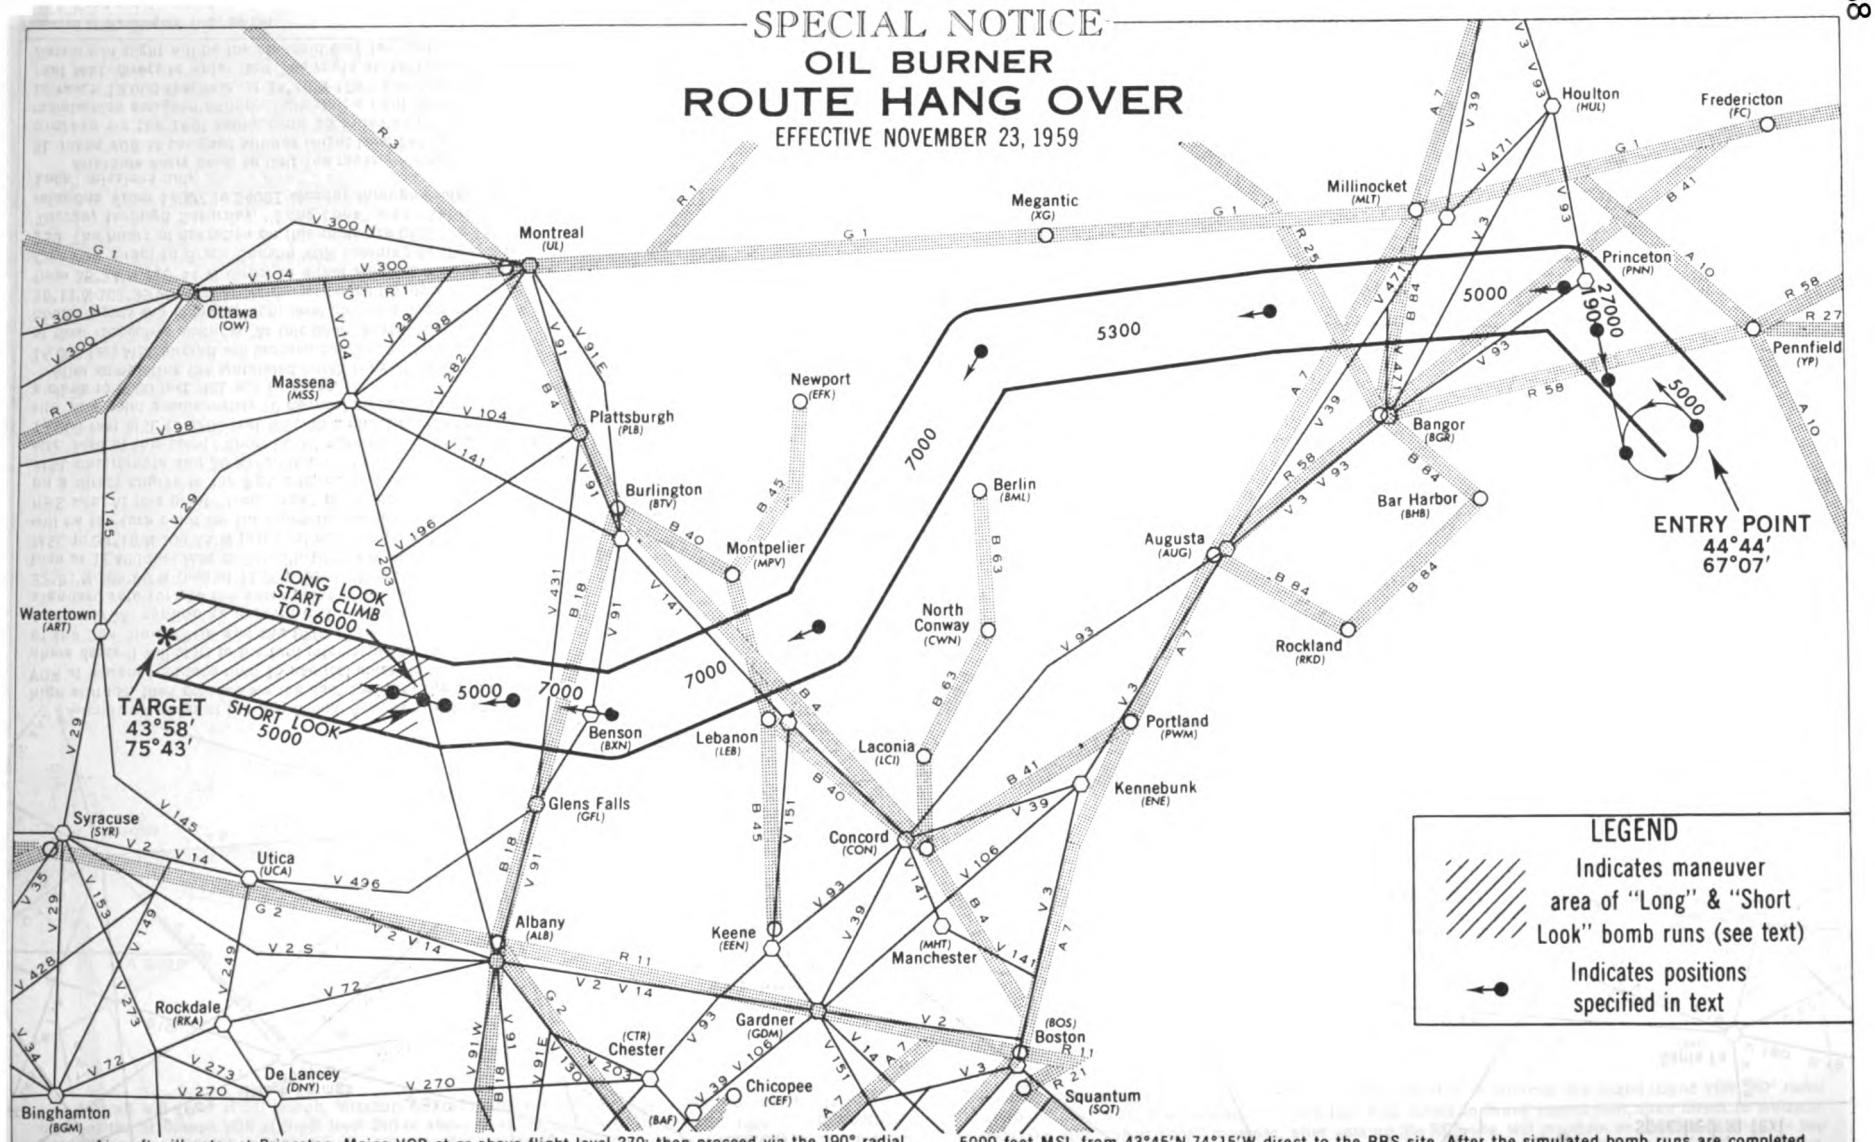
SPECIAL NOTICE

OIL BURNER
ROUTE GOLF TEE

EFFECTIVE APRIL 24, 1960

Aircraft will enter at the San Simon, Arizona VOR at assigned high altitude, then proceed via the 330° radial of the San Simon VOR at assigned altitude until 15 nautical miles North of the VOR, where descent will start to the turn intersection of the 330° radial of the San Simon VOR and the 020° radial of the Chochise Arizona VOR; continuing descent to 11,000 feet MSL in a right standard rate turn to the entry point of the low level route at 32°31'N-109°00'W then at 11,000 feet MSL to 32°30'N-106°55'W; then at 12,400 feet MSL to 34°05'N-107°39'W; then at 13,000 feet MSL to 34°16'N-109°55'W just East of Show Low, Arizona, which will be the turn point for the bomb run on the Winslow, Arizona RBS site. At this point "Long Look" missions will start a climb, on a direct course to the RBS site, so as to reach 16,000 feet MSL one minute and 30 seconds prior to arrival over the RBS site. Also at this point "Short Look" missions will descend from 13,000 feet MSL to 8200 feet MSL on a direct course to the RBS site. At a point approximately 10 nautical miles from the RBS site, a climb to 9500 feet MSL will be made.

After completing the simulated bomb runs at either 9500 or 16,000 feet MSL aircraft will proceed direct to 35°24'N-110°44'W at their respective altitudes. At this point, North, East, or South bound flights will climb to flight level 250 on a direct course to 36°11'N-109°35'W. West or Northwest bound flights will proceed from 35°24'N-110°44'W direct to either Needles VOR or Tuba City VOR direct to Bryce Canyon VOR climbing to flight level 250. The hours of operation on this route are 0600Z to 1300Z, Tuesday through Saturday, "Long Look" and "Short Look" missions. From 1700Z to 2400Z Monday through Friday "Long Look" missions only.



Alternate entry point to Golf Tee route—Aircraft will cross St. Johns VOR at assigned altitude (flight level 240 or above) and proceed via the 180° radial until 15 miles south of the VOR maintaining assigned altitude; then start a right descending turn to reach 13,000 feet MSL at 34°10'N-109°25'W; then at 13,000 feet MSL direct to enter Golf Tee route at 34°15'N-109°30'W. Balance of flight will be the standard Golf Tee route.

SPECIAL NOTICE

OIL BURNER
ROUTE HANG OVER

EFFECTIVE NOVEMBER 23, 1959

Aircraft will enter at Princeton, Maine VOR at or above flight level 270; then proceed via the 190° radial of the Princeton VOR at flight level 270 until 45°08′N-67°39′W. Descent will then be made Southbound on the 190° radial of the Princeton VOR to cross 44°56′N-67°36′W at or above 20,000 feet MSL; then continuing descent to 44°39′N-67°32′W; then start a complete orbit in a left-hand pattern to reach 5000 feet MSL at the entry point of the low level route at 44°44′N-67°07′W; then to 45°19′N-67°49′W at 5000 feet MSL; then to 45°16′N-69°30′W at 5000 feet MSL; then climb to 5300 feet MSL to 45°08′N-71°09′W; then climb to 7000 feet MSL to 44°03′N-72°04′W; then to 43°42′N-73°12′W at 7000 feet MSL; then to 43°45′N-73°45′W at 7000 feet MSL; then descend to 5000 feet MSL to 43°44′N-74°07′W; then to 43°45′N-74°15′W at 5000 feet MSL; then to 43°46′N-74°25′W at 5000 feet MSL; then to the RBS site at 43°58′N-75°43′W. "Long Look" missions will start climb at 43°45′N-74°15′W so as to cross the RBS site at 16,000 feet MSL. "Short Look" missions will maintain 5000 feet MSL from 43°45′N-74°15′W direct to the RBS site. After the simulated bomb runs are completed, "Short Look" missions will make a right turn to the 060° radial of the Watertown, New York VOR to 44°13′N-75°38′W; then climb clear of Victor Airway 29 on the 060° radial of the Watertown VOR to intercept the 296° radial of the Burlington, Vt. VOR at 17,000 feet MSL; then proceed via the 296° radial of the Burlington VOR to cross the 190° radial of the Massena, New York VOR at altitude of 20,000 feet MSL; to cross the 240° radial of the Plattsburgh, New York VOR at flight level 280; then to the Burlington VOR. "Long Look" missions will maintain 16,000 feet MSL, turn right to the 060° radial of the Watertown, New York VOR to 44°13′N-75°38′W; then via the same route and altitudes as "Short Look". The hours of operation on this route are 1830Z-2400Z Monday through Friday, and 0000Z-0630Z Tuesday through Saturday.

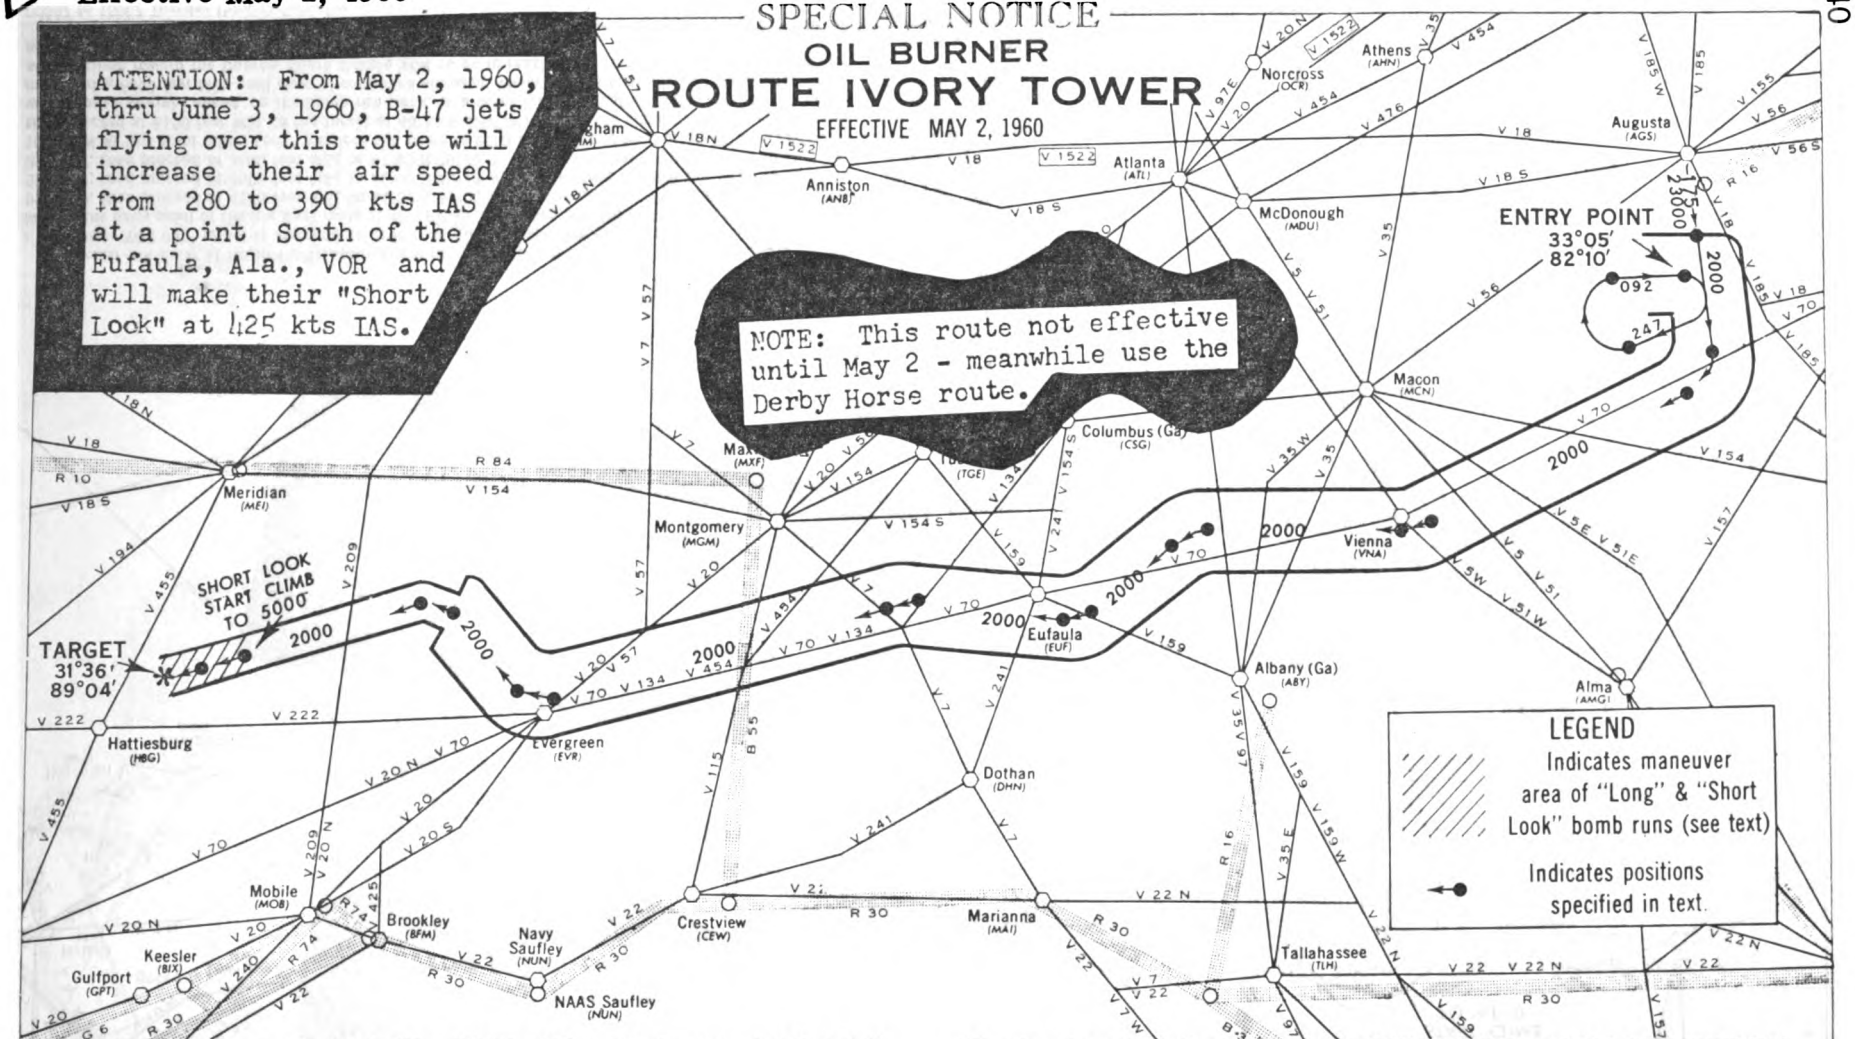
EFFECTIVE MAY 2, 1960

Aircraft will enter at North Platte, Nebraska VOR at 20,000 feet MSL or above; then proceed via the North Platte VOR 002° radial at assigned altitude until 26 nautical miles North; then descend to 4500 feet MSL to the entry point of the low level route at 42°11′N-99°35′W; then proceed at 4500 feet MSL to 43°44′N-99°45′W; then proceed at 4500 feet MSL to 44°38′N-99°05′W; then proceed at 3500 feet MSL to 45°18′N-99°51′W; then proceed at 3500 feet MSL to 46°30′N-99°18′W; then proceed at 3500 feet MSL to 46°56′N-99°18′W; then proceed at 3500 feet MSL to 47°03′N-99°30′W; then proceed at 3500 feet MSL to 46°59′N-100°17′W. At this point "Short Look" missions will climb to 6100 feet MSL and level off at 46°57′N-100°31′W; then proceed at 6100 feet MSL to the target at 46°56′N-100°39′W. After the simulated bomb run, aircraft will proceed straight ahead, on the bomb run track, to a point ten (10) nautical miles West of the target maintaining 6100 feet MSL until clear of controlled airspace. When clear of controlled airspace, aircraft will start a climb toward the Dupree, South Dakota VOR so as to reach flight level 260 at a point fifteen (15) nautical miles North of the Dupree VOR.

Only "Short Look" missions are conducted on this route. The hours of operation on this route are 0000Z to 1600Z Tuesday through Saturday.

Prepared at Washington, D.C., by the
U. S. Coast and Geodetic Survey



(26 April 1960)

Effective May 2, 1960

SPECIAL NOTICE
OIL BURNER
ROUTE IVORY TOWER
EFFECTIVE MAY 2, 1960

ATTENTION: From May 2, 1960, thru June 3, 1960, B-47 jets flying over this route will increase their air speed from 280 to 390 kts IAS at a point South of the Eufaula, Ala., VOR and will make their "Short Look" at 425 kts IAS.

NOTE: This route not effective until May 2 - meanwhile use the Derby Horse route.

Aircraft will enter at Augusta, Georgia VOR at 23,000 feet MSL or above; then proceed via the Augusta VOR 175° radial at assigned altitude until 20 nautical miles South, then start a descent to 2000 feet MSL. At 30 nautical miles South, aircraft will start a right standard rate turn to a true course of 247° to 32°49′N-82°26′W; then start a right standard rate turn to a true course of 092° at 33°06′N-82°30′W to the entry point of the low level route at 33°05′N-82°10′W, and at 2000 feet MSL, turn right to intercept the 175° radial of the Augusta VOR to 32°47′N-82°04′W. Aircraft will then make a nine nautical mile radius right turn to 32°37′N-82°12′W at 2000 feet MSL; then proceed at 2000 feet MSL Southwest along the South edge of Victor Airway 70 to 32°10′N-83°25′W; then at 2000 feet MSL, make a nine nautical mile radius right turn to 32°09′N-83°30′W; then at 2000 feet MSL, proceed direct to 32°09′N-84°25′W; then at 2000 feet MSL, make a nine nautical mile radius left turn to 32°07′N-84°32′W, then at 2000 feet MSL proceed direct to 31°53′N-84°54′W; then at 2000 feet MSL, make a nine nautical mile radius right turn to 31°51′N-85°01′W, then at 2000 feet MSL proceed direct to 31°54′N-85°46′W; then at 2000 feet MSL, make a nine nautical mile radius left turn to 31°54′N-85°49′W; then at 2000 feet MSL proceed direct to 31°34′N-87°18′W; then at 2000 feet MSL make a nine nautical mile radius right turn to 31°36′N-87°28′W; then at 2000 feet MSL proceed direct to 31°53′N-87°46′W; then at 2000 feet MSL make a nine nautical mile radius left turn to 31°55′N-87°55′W; then proceed at 2000 feet MSL to 31°43′N-88°43′W. At this point, "Short Look" missions will start a climb so as to reach 5000 feet MSL at 31°39′N-88°55′W; then at 5000 feet MSL proceed direct to the target at 31°36′N-89°04′W.

After the simulated bomb run, aircraft will proceed straight ahead, on the bomb run track, and climb to 6000 feet MSL. Upon reaching 6000 feet MSL, aircraft will make a right turn to a true course of 106° and maintain 6000 feet MSL until past the 180° radial of the Meridian, Mississippi VOR; then start a climb to 22,000 feet MSL proceeding direct to the intersection of the McComb, Mississippi VOR 068° radial and the Meridian VOR 160° radial; then continue climbing in a non-standard, one minute holding pattern (making all turns to the left) Southwest of the intersection on the 068° radial of the McComb VOR.

Only "Short Look" missions are conducted on this route. The hours of operation on this route are 0000Z to 1600Z Tuesday through Saturday.

Prepared at Washington, D.C., by the U.S. Coast and Geodetic Survey

(26 April 1960)

FLIGHT ADVISORY SERVICE IN SPECIFIED AREAS: This service has been established as a means of providing an increased degree of safety for civil turbojet air carrier flights while operating within defined flight advisory areas. The service is performed by certain selected radar equipped facilities and provides the civil turbojet air carrier pilot with information to assist him in avoiding other pertinent traffic. Areas where radar is used to provide advisory service are referred to as "radar advisory areas." Areas within which advisory service is provided without the use of radar are referred to as "nonradar advisory areas." The following procedures applicable to said areas are designated by the Administrator of the Federal Aviation Agency as standing air traffic control instructions:

A. The procedures applicable to all aircraft operating VFR or operating on an ATC clearance to climb or descend in VFR conditions or to maintain VFR-on-top with respect to the radar advisory areas or nonradar advisory areas are defined as follows:

NOTE: The radar advisory areas and nonradar advisory areas and the flight levels comprising these areas are depicted on charts entitled "Flight Information Publication - En Route - High Altitude (U.S.)," published by the Aeronautical Chart and Information Center, Air Photographic and Charting Service(MATS) USAF, and "High Altitude - En Route" published by the U.S. Coast and Geodetic Survey, Washington, D.C.

These charts are available to users through the U.S. Coast and Geodetic Survey.

1. Radar Advisory Areas
   a. No additional operational restriction, control or communication requirement is placed on civil or military flights conducted under visual flight rules (VFR flights or flights cleared to climb or descend in VFR conditions or cleared to maintain VFR-on-top) provided such flights when operated within the areas specified as radar advisory areas from flight level 240 to flight level 390 inclusive are equipped with a functioning radar beacon transponder. Basic Mark X equipped military flights operating within radar advisory areas will adjust transponders to operate on Mode 3. Unless otherwise instructed by air traffic control, Mark X SIF equipped flights will adjust transponder to Mode 3, Code 62, except that ADC flights will adjust transponder to Mode 3, Code 00. Those military flights operating on a mode other than Mode 3 will adjust transponder to operate on Mode 3 and the assigned mode simultaneously. Civil turbojet transponders will be adjusted to reply on Mode A, Code 40. Other civil aircraft will adjust transponder to reply on Mode A, Code 05.
   b. Any aircraft not equipped with a functioning beacon operating VFR, or cleared to climb or descend in VFR conditions, or cleared to maintain VFR-on-top from flight level 240 to flight level 390, inclusive desiring to operate within radar advisory areas must obtain specific authorization from the appropriate ARTC center prior to the time of entering such areas. ATC clearance to climb or descend in VFR conditions or ATC clearance to maintain VFR-on-top does not constitute specific authorization to operate within or across radar advisory areas without a functioning beacon.
   c. In the event of two-way communications failure which precludes obtaining authorization to operate within radar advisory areas, the pilot may proceed across these routes maintaining an appropriate VFR cruising altitude as specified in CAR 60 or AFR 60-16 for the direction of flight.

2. Nonradar Advisory Areas
   The following operational procedures apply to aircraft operating VFR, as well as those cleared by ATC to climb or descend in VFR conditions or cleared to maintain VFR-on-top, while between flight levels 270 and 310 inclusive with desire to fly across or within those areas specified as nonradar advisory areas.
   a. Specific authorization must be obtained directly from the appropriate ARTC center or through the nearest FSS prior to entering these specified areas. ATC clearance to climb or descend in VFR conditions or ATC clearance to maintain VFR-on-top does not constitute specific authorization to operate within or across nonradar advisory areas.
   b. Request for specific authorization to proceed VFR or VFR-on-top on or across these segments must include a position report, type of aircraft, and estimated time of entry and exit from these segments. Unrestricted authorization will be granted, except that when conflict with a civil turbojet air carrier flight is indicated, aircraft operating VFR-on-top will be advised of the civil jet traffic and said approval will restrict operation to specific flight level(s), time or place as appropriate to preclude conflict with civil jet traffic.

B. These services should not be considered as providing positive separation. Within the limitation of the service, civil turbojet air carrier aircraft will be provided with traffic information, when possible, and with radar vectors when requested by the pilot. Consequently, these services do not relieve pilots of their responsibilities to see and avoid other aircraft.

C. Radio and radar failure procedures applicable to civil air carrier turbojet flights while operating within radar advisory areas follow:

1. In the event of a ground radar failure the pilot will continue in accordance with ATC clearance remaining on the facility's frequency unless otherwise advised;
2. In the event of loss of communication with a USAF(ADC) radar facility on the designated control frequency the pilot should attempt to re-establish communication with the facility on 121.5 mc. If unable, he should utilize either direct center frequency, the nearest FSS, or company radio.

The above procedures are applicable to the following jet routes and areas:

1. VOR/VORTAC Jet Route No. 1 (Los Angeles, Calif., to Oakland, Calif.)
2. VOR/VORTAC Jet Route No. 1 (Oakland, Calif., to Seattle, Wash.)
3. VOR/VORTAC Jet Route No. 2 (Houston, Texas to Lake Charles, La.) (Houston, Texas to New Orleans, La. Effective 5 May 1960.)
4. VOR/VORTAC Jet Route No. 3 (Oakland, Calif., to Spokane, Wash.)
5. VOR/VORTAC Jet Route No. 4 (Los Angeles, Calif., to Phoenix, Ariz. Effective 5 May 1960.)
6. VOR/VORTAC Jet Route No. 8 (Tulsa, Okla., to New York, N.Y.)
7. VOR/VORTAC Jet Route No. 12 (Baltimore, Md., to Pittsburgh, Pa.)
8. VOR/VORTAC Jet Route No. 14 (Cleveland, Ohio to Idlewild, N.Y.. Effective 5 May 1960).
9. VOR/VORTAC Jet Route No. 16 (Portland, Ore., to Chicago, Ill.) Nonradar Advisory area from 60 nmi W of Dillon, Mont., VOR to 90 nmi E of Dillon. (Portland, Ore., to Pullman, Mich.,; Albany, N.Y., to Boston, Mass. Effective 5 May 1960).
10. VOR/VORTAC Jet Route No. 21 (Omaha, Neb., to Duluth, Minn.) (Dallas, Tex., to San Antonio, Tex.)
11. VOR/VORTAC Jet Route No. 22 (Lake Charles, La., to Gordonsville, Va.)
12. VOR/VORTAC Jet Route No. 24 (Phoenix, Ariz., to Albuquerque, N.M. Effective 5 May 1960).
13. VOR/VORTAC Jet Route No. 25 (Dallas, Tex., to Tulsa, Okla. Effective 5 May 1960).
14. VOR/VORTAC Jet Route No. 26 (Amarillo, Tex., to Joliet, Ill.) (Amarillo, Tex., to Appleton, Ohio. Effective 5 May 1960).
15. VOR/VORTAC Jet Route No. 29 (Houston, Tex., to Memphis, Tenn.) Eff. 5/1/60.
16. VOR/VORTAC Jet Route No. 31 (Dallas, Tex., to Chicago, Ill.)
17. VOR/VORTAC Jet Route No. 33 (Shreveport, La., to the Int. of J33V with J31V.) Eff. 5/1/60.
18. VOR/VORTAC Jet Route No. 34 (Cleveland, Ohio to Pittsburgh, Pa.)
19. VOR/VORTAC Jet Route No. 35 (New Orleans, La., to St. Louis, Mo.) Eff. 5/1/60.
20. VOR/VORTAC Jet Route No. 37 (New Orleans, La., to Spartanburg, S.C.)
21. VOR/VORTAC Jet Route No. 42 (Dallas, Tex., to New York, N.Y.)
22. VOR/VORTAC Jet Route No. 45 (Alma, Ga., to St. Louis, Mo.)
23. VOR/VORTAC Jet Route No. 49 (Alma, Ga., to Spartanburg, S.C.)
24. VOR/VORTAC Jet Route No. 52 (Dallas, Tex., to Atlanta, Ga.) via Texarkana, Ark., VOR; Greenwood, Miss., VOR; Birmingham, Ala., VOR. (Dallas, Tex-Birmingham, Ala., extension to J52V.
25. VOR/VORTAC Jet Route No. 53 (Miami, Fla., to the Int. of J53V and J81V.)
26. VOR/VORTAC Jet Route No. 53 (Spartanburg, S.C., to Pittsburgh, Pa.)
27. VOR/VORTAC Jet Route No. 58 (San Francisco, Calif., to New Orleans, La.) Nonradar advisory area from 20 nmi W of Pioche, Nev., VOR to 90 nmi SE of Alamosa, Colo., VOR.) Eff 5/1/60.
28. VOR/VORTAC Jet Route No. 60 (Los Angeles, Calif., to New York, N.Y.) Nonradar advisory area from 25 nmi SW of Bryce Canyon, Utah VOR to 70 mi WSW of Denver, Colo., and from 120 nmi ENE of Denver, Colo., VOR to 50 nmi WSW of Wolbach, Neb., VOR.
29. VOR/VORTAC Jet Route No. 62 (Idlewild, N.Y., to Nantucket VOR.)
30. VOR/VORTAC Jet Route No. 64 (Los Angeles, Calif., to Chicago, Ill.) Nonradar advisory area from 20 nmi SW of Alamosa, Colo., VOR to 25 nmi SW of Hill City, Kansas VOR.
31. VOR/VORTAC Jet Route No. 67 (Idlewild, N.Y., to U.S.-Canadian Border.)
32. VOR/VORTAC Jet Route No. 69 (Spartanburg, S.C., to Gordonsville, Va.)
33. VOR/VORTAC Jet Route No. 71 (Appleton, Ohio to Front Royal, Va. Effective 5 May 1960).
34. VOR/VORTAC Jet Route No. 75 (Miami, Fla., to U.S.-Canadian Border)
35. VOR/VORTAC Jet Route No. 77 (Miami, Fla., to U.S.-Canadian Border)
36. VOR/VORTAC Jet Route No. 78 (Los Angeles, Calif., to New York, N.Y.)

37. VOR/VORTAC Jet Route No. 79 (Miami, Fla., to Idlewild, N. Y.)
38. VOR/VORTAC Jet Route No. 80 (Denver, Colo., to New York, N. Y.) Nonradar advisory area that portion of JR-80 from 120 nmi ESE of Denver, Colo., VOR to 25 nmi W of Hill City, Kansas VOR.
39. VOR/VORTAC Jet Route No. 81 (The intersection of J81V and J53V to Barracuda Int.)
40. VOR/VORTAC Jet Route No. 82 (Chicago, Ill., to Boston, Mass.)
41. VOR/VORTAC Jet Route No. 84 (Oakland, Calif., to the U.S.-Canadian Border) nonradar advisory areas from 50 nmi E of Rock Springs, Wyo. to 150 nmi E of Rock Springs and from 40 nmi E of Scottsbluff, Nebr., to 50 nmi W of Wolbach, Nebr. Advisory Service on Jet 84 Victor will be provided flight level 270 and above from 100 nmi W to 40 nmi E of Scottsbluff, Nebr.
42. VOR/VORTAC Jet Route No. 85 (Miami, Fla., to the U.S.-Canadian Border.)
43. VOR/VORTAC Jet Route No. 87 (Dallas, Tex., to Houston, Tex.) (Houston, Tex., to Northbrook, Ill. Effective 5 May 1960).
44. VOR/VORTAC Jet Route No. 89 (Northbrook, Ill., to Miami, Fla.)
45. Control 1150 (West Palm Beach, Fla., to Wilmington, N. C.)
46. VOR/VORTAC Jet Route No. 90 (Seattle, Wash., to Chicago, Ill.)

AREAS

1. That area 20 n mi either side of a line from Des Moines, Iowa VOR; intersection of Des Moines, Iowa 060° & Northbrook, Ill., 274° M radials; Northbrook, Ill., VOR; Pullman, Mich., VOR; Waterville, Ohio VOR; Joliet, Ill., VOR; Des Moines, Iowa VOR plus the area bounded by this line.
2. Duluth, Minnesota to the U.S.-Canadian Border via the Duluth 047° M radial(direct route between Duluth & Lakehead, Canada.)
3. Spokane, Washington to the U.S.-Canadian Border via the Spokane 028° M radial (direct route between Spokane & Cowley, Canada.)
4. Los Angeles, Calif., VOR; intersection of Los Angeles, Calif. 170° & Long Beach, Calif., 208° M radials; thence via the Long Beach, Calif 208° M radial(Control Area Extension 1177) for a distance of 180 n mi.
5. Los Angeles, Calif. VOR; thence via the Los Angeles, Calif. 236° M radial (Control Area Extension 1316) for a distance of 180 n mi.
6. **Los Angeles, Calif. VOR; Santa Barbara, Calif. VOR; thence via the Santa Barbara, Calif. 232° M radial (Control Area Extension 1176) for a distance of 180 n mi.**
7. **Oakland, Calif. VOR; thence via the Oakland, Calif. 218° M radial (Control Area Extension 1173 over Sunset Intersection) for a distance of 150 n mi.**
8. **Oakland, Calif. VOR; thence via the Oakland, Calif 250° M radial(Control Area Extension 1173 over Francis Intersection) for a distance of 150 n mi.**
9. **Seattle, Wash. VOR; intersection of Seattle, Wash. 175° & Portland, Oregon 332° M radials; Portland, Oregon VOR; Newport, Oregon VOR; thence via the Newport, Oregon 216° M radial (Control Area Extension 1419) for a distance of 110 n mi.**
10. **Honolulu, Hawaii VOR; Koko Head, Hawaii VOR; thence via the Koko Head, Hawaii 039° M radial for a distance of 118 n mi.**
11. **Honolulu, Hawaii VOR; Koko Head, Hawaii VOR; thence via the Koko Head, Hawaii 054° M radial for a distance of 114 n mi.**
12. **Honolulu, Hawaii VOR; intersection of Honolulu, Hawaii 168° and Molokai, Hawaii 257° M radials; Molokai, Hawaii VOR; thence via the Molokai, Hawaii 056° M radial for a distance of 101 n mi.**
13. **Honolulu, Hawaii VOR; thence via the Honolulu, Hawaii 250° M radial for a distance of 87 n mi.**
14. **Honolulu, Hawaii VOR; intersection of Honolulu, Hawaii 168° and Koko Head, Hawaii 243° M radials; thence via the Koko Head, Hawaii 243° M radial for a distance of 107 n mi.**
15. **Honolulu, Hawaii VOR: thence via the Honolulu, Hawaii 168° M radial for a distance of 99 n mi.**
16. **Honolulu, Hawaii LFR; thence NW via Red Airway 87 for a distance of 183 n mi.**
17. **Newark, New Jersey LFR; via the Newark LFR SE crs. (Control Area Extension 1147) to the Tuna Intersection.**
18. **Miami, Florida VOR; via the Miami VOR 118° M radial for a distance of 92 n mi (boundary of the Miami Oceanic Control Area) Effective 15 November 1959.**
19. **Seattle, Washington VOR to the U.S.-Canadian Border via the Seattle VOR direct radial to the Victoria (Patricia Bay). B. C., Canada RR.**
20. Boston, Mass., Terminal Area-- That area within 20 nmi to either side of J-16-V between Albany, N. Y., & Boston, Mass. Effective 17 December 1959.
21. New York City, N. Y., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
    a. Bridgeport, Conn. Int. via Poughkeepsie, N. Y., VOR to Albany, N. Y., VOR.
    b. Idlewild, N. Y., VORTAC via Huguenot, N. Y., VOR; Wilkes-Barre, Pa., VOR; to Philipsburg, Pa., VORTAC.
    Effective 17 December 1959.
22. Baltimore, Md., Terminal Area -- That area within 20 nmi to either side of a direct crs from Baltimore, Md., VOR via Harrisburg, Pa., VOR to Philipsburg, Pa., VOR
    Baltimore, Md., Terminal Area-- Effective 5 May 1960
    a. That area within 20 nmi from the sides and within the triangle formed by a direct course from the Baltimore, Md., VOR to the Idlewild, N. Y., VOR to the Salisbury, Md., VOR; to the Baltimore, Md., VOR.
    b. That area within 20 nmi to either side of the center line of Control Area Extension 1148.
23. St. Louis, Mo., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
    a. Int. of J-80-V & Terre Haute, Ind., 268° M radial; via the Int. of Terre Haute VOR 268° & St. Louis VOR 057° M radials; to St. Louis VOR.
    b. St. Louis, Mo., VOR via Troy, Ill., VOR; V-12 Bible Grove, Ill., VOR; to Int. of Bible Grove VOR 040° M radial and J-80-V.
    c. Maryland Heights, Mo., VOR via V-12 Readsville, Mo., VOR; to Int. of Readsville VOR 302° M radial and J-80-V.
    d. Springfield, Ill., VOR via V-69 to Gillespie, Ill. Int.
    e. Marion, Ill., Int. via V-179 and V-4 to St. Louis, Mo., VOR.
    Effective 17 December 1959.
24. Los Angeles, Calif., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
    a. Los Angeles, Calif., VOR via V-208 Thermal, Calif., VOR; V-432 to Rice, Calif. VOR.
    b. Los Angeles, Calif., VOR via V-201 Palmdale, Calif., VOR; V-12 to Hector, Calif., VOR.
    c. Los Angeles, Calif., VOR via Int. of V-299 and Palmdale, Calif, 265° M radial; to Int. of Palmdale, Calif., 265° M radial and J-1-V.
    d. Los Angeles, Calif., VOR via V-25 Santa Barbara, Calif., VOR; to Int. of Santa Barbara VOR 336° M radial and J-1-V
    e. Peach Springs, Ariz., VOR via Twenty-Nine Palms, Calif., VOR; V-264 and V-16 to Los Angeles, Calif., VOR.
25. Oakland, Calif., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
    a. San Francisco, Calif., VOR via V-199 Ukiah, Calif., VOR; V-107 to Red Bluff, Calif., VOR.
    b. Pedro, Calif., Int. via V-27-W Salinas, Calif., VOR; to Int. of Salinas VOR 102° M radial and J-1-V.
    c. Oakland, Calif., VOR via V-195 Benecia, Calif., Int.; Linden, Calif., VOR; to Int. of Linden VOR 100° M radial and J-58-V.
26. Dallas, Tex., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
    a. Wichita Falls, Tex., VOR via Bridgeport, Tex., VOR to Dallas, Tex., VOR.
    b. Texarkana, Ark., VOR via V-278 to Dallas, Tex., VOR.
    c. Dallas, Tex., VOR via V-18 Quitman, Tex., VOR; V-54 to Texarkana, Ark. VOR.
    d. Dallas, Tex., VOR via the Int. of the Dallas VOR 230° and the Waco, Tex., VOR 344° M radials; to the Waco, Tex., VOR.
    e. Dallas, Tex., VOR via the Int. of the Dallas VOR 178° and the Waco, Tex., VOR 028° M radials; to the Waco, Tex., VOR.
27. Atlanta, Ga., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
    a. Nashville, Tenn., VOR to Crossville, Tenn. VOR.
    b. Spartanburg, S. C., VOR via V-20-N to Norcross, Ga., VOR.
    c. Atlanta, Ga., VOR via V-454 and V-185 to Spartanburg, S. C., VOR.
28. Miami, Fla., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
    a. Orlando, Fla., VOR via J-81-V to Miami, Fla., VOR.

b. Lakeland, Fla., VOR via V-7, V-35, V-35-W, V-157-W, and V-51 to Biscayne, Bay, Fla., VOR.
c. West Palm Beach, Fla., to Biscayne Bay, Fla., VOR.

29. Detroit, Mich., Terminal Area -- That area within the United States which is 20 nmi to either side of a line drawn from the Pullman, Mich., VOR via direct Lansing, Mich., VOR; direct Salem, Mich., VOR; via Salem VOR 109° M radial to the U.S. - Canadian border; plus that area within the United States which is S of the above described line and N of J-60-V.

30. Denver, Colo., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
a. Denver, Colo., VOR via V-160 to a point 100 nmi NE of Denver VOR.
b. Denver, Colo., VOR via V-148 Thurman, Colo., VOR; thence via Thurman VOR 028° M radial to a point 68 nmi NE of Thurman VOR.
c. Kiowa, Colo., VOR via V-19 Pueblo, Colo., VOR thence via J-13-V to the northern edge of the currently depicted Category "B" area of J-64-V.
d. Roggen, Colo., Int. via V-220 to Kremmling, Colo., VOR.
e. Kiowa, Colo., VOR via Kiowa VOR 250° M radial to a point 80 nmi SW of Kiowa VOR.

31. From the Miami, Florida, VOR via the Marathon, Florida, Rdo Bcn; thence via Ctl Area Extension 1234 for a distance of 56 nmi--bndry of the Havana, Cuba Ctl Area.

32. Houston, Tex., Terminal Area--That area within 20 nmi to either side of a direct crs from the:
a. Houston, Tex., VOR via the Int of the Houston 036° and the Lake Charles, La, 265° M radials to the Lake Charles VOR (V-222N).
b. Houston, Tex., VOR via the Int of the Houston VOR 082° and the Lake Charles, La., VOR 233° M radials to the Lake Charles VOR (V20S).
c. Houston, Tex., VOR via the Int of the Houston VOR 315° and the Leona, Tex., VOR 162° M radials; to the Leona, Tex., VOR.
d. Houston, Tex., VOR via the Int of the Houston VOR 345° and the Leona, Tex., VOR 132° M radials; to the Leona, Tex., VOR.

33. San Antonio, Tex., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
a. San Antonio, Tex., VOR via the Int of the San Antonio VOR 048° and the Austin, Tex., VOR 166° M radials to the Austin, Tex., VOR.
b. San Antonio, Tex., VOR via the Int of the San Antonio VOR 353° and the Austin, Tex., VOR 248° M radials; to the Austin, Tex., VOR.

34. ✓ New Orleans, La., Terminal Area-- That area within 20 nmi to either side of a direct course from the:
a. New Orleans, La., VOR via the Int. of the New Orleans, La., VOR 320° and the Alexandria, La., VOR 098° M radials; to the Alexandria, La., VOR. (Overlies V-114-N.)
b. New Orleans, La., VOR via the Int. of the New Orleans, La., VOR 030° and the McComb, Miss., VOR 142° M radials; to the McComb, Miss., VOR. (Overlies V-9-E).
c. McComb, Miss., VOR to the Int. of the McComb, Miss., VOR 222° and the New Orleans, La., VOR 320° M radials. (Overlies V-194).
d. New Orleans, La., VOR via the Int. of the New Orleans, La., VOR 094° and the Mobile, Ala., VOR 219° M radials; to the Mobile, Ala., VOR. (Overlies V-240).
e. Mobile, Ala., VOR to the Int. of the Mobile, Ala., VOR 258° and the New Orleans, La., VOR 030° M radials. (Overlies V-20-N.).
f. Alexandria, La., VOR to the Baton Rouge, La., VOR. (Overlies V-114).
g. Baton Rouge, La., VOR via the Int. of the Baton Rouge, La., VOR 126° and the New Orleans, La., VOR 269° M radials; to the New Orleans, La., VOR.
Effective 5 May 1960.

35. ✓ Tampa, Fla., Terminal Area - That area within 20 nmi to either side of a direct course from the:
1. St. Petersburg, Florida VOR direct to the Orlando, Fla., VOR. (Overlies V-152).
2. St. Petersburg, Fla., VOR via the Int. of the St. Petersburg, Fla., VOR 038° and the Orlando, Fla., VOR 257° M radials; to the Orlando, Fla., VOR. (Overlies V152N).
3. St. Petersburg, Fla., VOR via the Lakeland, Fla., VOR; to the Orlando, Fla., VOR. (Overlies V-152S).
Effective 5 May 1960.

✓ FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual Volume 13 dated December 1959, as follows:
Radiated Test Signals:
(1) Page 15 add, *Birmingham, Alabama (Municipal 111.0 mc).
(2) Page 15 add, *Chicago, Illinois (O'Hare International 112.0 mc).
(3) Page 15 add, *El Paso, Texas (International 111.0 mc).
Receiver Check Points:
(1) Page 20, Yuma, Arizona (County)- change to: Yuma, Arizona (MCAAS-Yuma County).
(2) Page 21, Athens, Georgia - change to: 0.3 mi on circle in front of arpt terminal bldg.
(3) Page 23, Mason City, Iowa - change bearing to: 356°.
(4) Page 18, delete Monroe, Louisiana.
(5) Page 23, add Monroe, Louisiana(Selman): -- 033°; on arpt ramp in front of old twr structure adjacent to the taxiway leading to intersection of runways 17-35 and 4-22.
FAA and WB Telephone Numbers:
(1) Page 36, Phoenix, Arizona - change FAA telephone number to: BR 5-7505.
(2) Page 36, Burbank, California - change FAA telephone number to: THornwall 6-0400.
(3) Page 37, Springfield, Illinois - change FAA telephone number to: KIngswood 4-9012.
(4) Page 37, Indianapolis, Indiana - change FAA telephone number to: CH 4-9561.
(5) Page 37, Mason City, Iowa - change FAA telephone number to: GArden 3-7512.
(6) Page 38, Meridian, Mississippi - change WB telephone number to: 3-3725.
(7) Page 38, Imperial, Nebraska - change FAA telephone number to: TU 2-4887.
(8) Page 40, Spartanburg, South Carolina - change WB telephone number to: 5-2966.
(9) Page 39, Ardmore, Oklahoma - add FAA telephone number: (Gene Autry Exchange) CY 4-3800.
(10) Page 40, Montpelier, Vermont - change FAA telephone number to: CApitol 3-2376.
Standard Broadcast Stations:
(1) Page 97, West Frankfort, Illinois WFRX - change elevation to: 608'; height to: 208' and location to: 1 nmi S, 37-52-59.37, 88-55-46.94.
(2) Page 99, Ishpeming, Michigan WJPD - change coordinance to: 46-30-15, 87-40-10 and hours of operation to: 0600-LS.
ATC Procedures:
(1) Pages 74, 75, 78 and 83- See this issue of Airgi page 32.
Flight Test Areas:
(1) Page 119 - add Farmingdale, N. Y-Republic Airport- See this issue of Airgi page 15.
(2) Page 119 - add Bethpage, N. Y. -Grumman-Bethpage Airport - See this issue of Airgi page 15.
(3) Page 119- add Calverton, N. Y. -Grumman-Peconic Airport - See this issue of Airgi page 15.
(4) Page 119- change Columbus, Ohio-Port Columbus Airport(Area #3) - See this issue of Airgi page 17.

U.S. Entry and Departure Requirements - See this issue of Airgi page 30.

NAVIGATIONAL WARNING: The following are low level "FAIRBALL" routes used by the USAF when conducting low level navigation flights in jet aircraft at 500 to 2,000 feet above the terrain. At the termination of the low level flight, aircraft will climb to altitudes between 14,000 to 20,000 feet MSL. Aircraft will fly hemispheric rules. Flights will be operated at random intervals and under VFR conditions during daylight hours only.

Route 2-J-2: Start at 43-22-30N, 94-04-00W, (entry-call Mason City Radio), 43-28N, 91-00W, 42-21N, 90-54-30W; 40-25N, 92-07-30W; 40-22N, 92-31W(end nav. leg) to target 40-14N, 93-36W. Note: for a bomb run only, entry reporting will be 41-00N, 91-45W(call Ottumwa Radio); remainder of route is identical with above.

Route 2-K-1: Start at 31-00N, 95-04W (entry-call Lufkin Radio), 31-55N, 95-24; 31-52N, 97-23W; 32-02N, 98-24W; 32-53N, 98-40W; 34-51N, 98-55W;(end nav. leg), terminate operations over Chickasha, Okla. Note: for a bomb run only, entry reporting point will be 34-00 N, 98-48W (call-Wichita Falls Radio); remainder of route is identical with above.

Route 2-M-1: Start at 31-45N, 91-49W (entry-call Alexandria Radio), 31-35N, 94-20W; 34-00N, 95-02W; 34-27N, 94-38W; 34-35N, 93-20W(end nav. leg), to target-Little Rock. Note: for a bomb run only, entry reporting point will be 34-27N, 94-38W, (call-Fort Smith Radio), remainder of route is identical with above.

Route 2-P-1: Start at 39-11N, 86-52W (entry-call Terre Haute Radio), 38-02N, 86-31W; 38-18N, 87-55W; 39-23N, 90-37W; 38-52N, 92-18W (end nav. leg). 38-44N, 92-44W; start climb to target-Clinton, Mo. Note: for a bomb run only, entry reporting point will be 38-52N, 92-18W (call-Columbia Radio), remainder of route is identical with above.

Route 2-Q-3: Entry point 35-18N, 88-00W (Entry reporting point -Jacks Creek Radio); 36-34N, 88-12W; 37-20N, 91-42W; 37-33N, 93-23W (end nav. leg.); to target Joplin, Mo.

Route 2-R-2: Start at 35-38N, 99-11W; to start climb point 36-12N, 98-14W; to termination 36-45N, 98-11W. Entry reporting point- Sayre Radio.

Route 2-R-3: Start at 36-22N, 92-14W; to 36-26N, 93-50W. Entry reporting point-Springfield Radio.

Route 2-S-1: Start at 29-29, 91-46, (entry reporting point-Baton Rouge VOR); to turning point 28-00, 91-30; to turning point 27-00, 92-30; to turning point 27-50, 94-00; to navigation termination point, bomb run entry point, and LONG LOOK start climb (if applicable) 27-50, 95-45; to SHORT LOOK start climb (if applicable) 28-11, 96-34; to target at Matagorda Island 28-13-30, 96-39-00. After bombs away, proceed to 28-21-30, 96-42-00, then right turn to Palacios VOR. On SHORT LOOK mission do not exceed 5000' MSL until past Port O'Connor, Texas. On LONG LOOK do not descend below 18,000' MSL until past Port O'Connor, Texas.

Route 2-T-1: Start at 42-00N, 96-12W; to target 42-51N, 97-29W. (Entry reporting point-Sioux City Radio).

Route 2-T-2: Start at 42-30N, 97-49W to target 41-26.5N, 96-36W. (Entry reporting point Point-O'Neil Radio).

Route 8-P-1: Start at 43-42N, 69-50W; terminate at 44-20N, 68-04W.

Route 8-P-2: Start at 43-42N, 69-50W; 43-53N, 69-07W; terminate at 44-20N, 68-04W.

Route 8-R-1: Start at 18-05N, 67-54W; 17-56N, 67-11W; 17-56N, 66-18W; 18-00N, 66-00W. Entry reporting point San Juan ARTCC.

Route 15-A-1: Cross Salt Flat VOR at flight altitude (entry point - Call Salt Flat Radio), descend to start low level 30-50N, 103-00W; 30-10N, 102-10W; 30-30N, 100-05W; 32-00N, 99-15W; 33-05N, 99-30W; 34-25N, 100-30W. Start climb 34-39N, 100-56W; level off 35-01N, 101-33W, target Amarillo.

Route 15 - A - 3: Cross Douglas VOR at flight altitude (entry point - Call Douglas Radio), descend to start low level 43-00N, 103-00W; 41-30N, 101-30W; 39-25N, 102-10W; 38-00N, 101-40W, 36-00N, 100-45W. Start climb 35-50N, 101-00W; level off 35-25N, 101-36W, target Amarillo.

Route 15-B-2: Cross Peach Springs VOR at flight altitude (entry point-Call Las Vegas Radio), descend to start low level 37-07N, 114-30W; 38-45N, 116-30W; 39-40N, 115-10W; 41-00N, 114-50W; 42-10N, 113-55W; 43-10N, 114-25W. Start climb 43-18N, 115-02W; level off 43-30N, 115-52W, target Boise.

Route 15-C-1: Start descent Reno VOR, entry point 40-11N, 121-05W. Start climb 40-47N, 121-04W, target 41-55N, 121-04W.

Route 15-D-2: Entry at 32-37N, 102-37W to target at 32-34N, 101-08W.

Route 15-E-1: Start descent 44-28N, 100-40W, entry point 44-34 1/2N, 101-30W. Start climb 44-43N, 103-28W, target 44-44 1/2N, 103-36W.

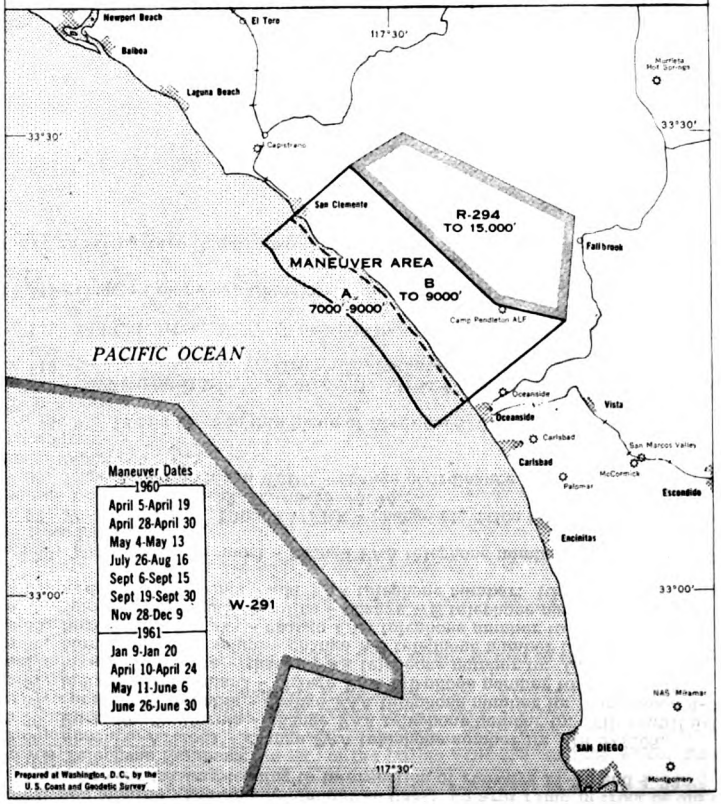
Route 15-F-1: Fairchild Air Force Base to 47-26N, 118-16W, target 47-52N, 119-07W.

Route 15-G-1: Cross Ukiah, California VOR at flight altitude (entry point) - (Call Ukiah Radio), descend to start low level 39-06N, 124-17W to 39-08N, 124-45W; 40-24N, 125-29W; 42-20N, 125-35W; 43-08N, 126-00W to climb point 43-32N, 124-48W to start climb for Long Look at 43-43N, 124-17W or to start climb for Short Look at 43-54N, 123-20W to target 43-58N, 123-05W, S of Eugene, Oregon.

Route 15-H-1: Entry at 43-21N, 117-18W to 42-24-30N, 118-36W.

Route 15-H-2: Entry at 42-31N, 120-14W to 42-44N, 119-38W to 43-34N, 118-12W.

Route 15-M-2: 36-18 1/2N, 121-54W to target, 35-19N, 120-52W, to target 36-18 1/2N, 121-54W. Route will be flown in both directions.



Route 15-R-1: Entry at 33-00N, 103-00W; to 34-00N, 102-28W; to target at 34-38-30N, 102-43W.

Route 15-T-1: Entry at 32-58N, 111-23W; to 32-54N, 109-50W.

SPECIAL NOTICE

CALIFORNIA
OCEANSIDE
MARINE CORPS MANEUVER AREA

Maneuvers, including air support to Marine Corps landing exercises are being conducted in the charted area. Pilots should contact Oceanside, San Diego, Thermal, Long Beach, Ontario and Los Angeles FSS for information pertaining to air activity during daylight hours on the maneuver dates.

Route 15-H-2: Entry at 42-31N, 117-18W to 42-24-30N, 118-36W.
Route 15-M-2: Entry at 42-31N, 120-14W to 42-44N, 119-38W to 43-34N, 118-12W.
Route 15-R-1: Entry at 38-30N, 103-00W to target, 38-19N, 120-52W, to target 36-18 1/2N, 102-25W to 38-30N, 103-00W.

FEDERAL AIRWAYS, CONTROL AREAS, CONTROL AREA EXTENSIONS, CONTROL ZONES, REPORTING POINTS, POSITIVE CONTROL ROUTE SEGMENTS AND JET ROUTES: Note: All bearings and radials are TRUE unless otherwise indicated.

Effective 0001 EST 13 April 1960:

(1) Federal Airway: VOR 232 (Sandusky, Ohio, to Somerset, Pa.) amended as follows: In the caption delete "(Sandusky, Ohio, to Somerset, Pa.)." and substitute therefor "(Sandusky, Ohio, to Somerset, N.J.)."

(2) Control Area: VOR 232 (Sandusky, Ohio, to Somerset, Pa.) amended as follows: In the caption delete "(Sandusky, Ohio, to Somerset, Pa.)." and substitute therefor "(Sandusky, Ohio, to Somerset, N.J.)."

Effective 0001 EST 5 May 1960:

(1) Federal Airway: Amber 1 (United States-Mexican Border to Nome, Alaska) amended as follows: (a) In the caption, delete "(United States-Mexican Border to Nome, Alaska)" and substitute therefor "(Oceanside, Calif., to Nome, Alaska)". (b) In the text, delete "That airspace over the United States territory from the Int. of the SE crs of the San Diego, Calif., rdo rng and the United States-Mexican Border via the San Diego, Calif., rdo rng stn.; the Int. of the NW crs of the San Diego, Calif., rdo rng and the SE crs. of the Long Beach, Calif., rdo rng.; Long Beach, Calif., rdo rng stn.;" and substitute therefor "That airspace over the United States territory from the Oceanside, Calif., Rbn via the Long Beach, Calif., RR;"

(2) Federal Airway: Red 9 (San Diego, Calif., to Casa Grande, Ariz.) amended as follows: (a) In the caption delete "(San Diego, Calif., to Casa Grande, Ariz.)" and substitute therefor, "(Campo, Calif., to Casa Grande, Ariz.)" (b) In the text, delete "From the Int. of a line bearing 178° from the Oceanside, Calif., Rbn and a line bearing 275° from the San Diego RR via the San Diego, Calif., RR; Int. of the E crs. of the San Diego RR and the W crs of the El Centro RR; El Centro, Calif., RR;" and substitute therefor "From the Int. of a line bearing 165° from the Julian, Calif., Rbn and the W crs of the El Centro, Calif., RR via the El Centro, RR;".

(3) Control Area: Amber 1 (United States-Mexican Border to Nome, Alaska) amended as follows: (a) In the caption, delete "(United States-Mexican Border to Nome, Alaska)." and substitute therefor "(Oceanside, Calif., to Nome, Alaska)."

(4) Control Area: Red 9 (San Diego, Calif., to Casa Grande, Ariz.) amended as follows: (a) In the caption, delete "(San Diego, Calif., to Casa Grande, Ariz.)" and substitute therefor "(Campo, Calif., to Casa Grande, Ariz.)"

(5) Reporting Point: Amber 1 (United States-Mexican Border to Nome, Alaska) amended as follows: (a) In the caption, delete "(United States-Mexican Border to Nome, Alaska)" and substitute therefor "(Oceanside, Calif., to Nome, Alaska)" (b) In the text, delete "San Diego, Calif., rdo rng stn.; the Int. of the NW crs of the San Diego, Calif., rdo rng and the SE crs of the Long Beach, Calif., rdo rng.;".

(6) Reporting Point: Red 9 (San Diego, Calif., to Casa Grande, Ariz.) amended as follows: (a) In the caption, delete "(San Diego, Calif., to Casa Grande, Ariz.)" and substitute therefor "(Campo, Calif., to Casa Grande, Ariz.)".

(7) Jet Route: L/MF Jet Route No. 1 (San Diego, Calif., to Seattle, Wash.) amended as follows: (a) In the caption, delete "(San Diego, Calif., to Seattle, Wash.)." and substitute therefor "(Oceanside, Calif., to Seattle, Wash.)." (b) In the text, delete "From the San Diego, Calif., RR via the Oceanside, Calif., Rbn; Long Beach, Calif., RR." and substitute therefor "From the Oceanside, Calif., Rbn via the Long Beach, Calif., RR;".

(8) Jet Route: L/MF Jet Route No. 2 (San Diego, Calif., to Jacksonville, Fla.) amended as follows: (a) In the caption, delete "(San Diego, Calif., to Jacksonville, Fla.)" and substitute therefor "(El Centro, Calif., to Jacksonville, Fla.)". (b) In the text, delete "From the San Diego, Calif., RR via the Yuma, Ariz., RR;" and substitute therefor "From the El Centro, Calif., RR via the Yuma, Ariz., RR;".

(9) Jet Route: L/MF Jet Route No. 3 (San Diego, Calif., to Spokane, Wash.) amended as follows: (a) In the caption, delete "(San Diego, Calif., to Spokane, Wash.)" and substitute therefor "(Oceanside, Calif., to Spokane, Wash.)". (b) In the text, delete "From the San Diego, Calif., RR via the Oceanside, Calif., Rbn; Long Beach, Calif., RR;" and substitute therefor "From the Oceanside, Calif., Rbn via the Long Beach, Calif., RR;".

(10) Control Area Extension: (Miramar, Calif.) amended to read: "The airspace E of Miramar bounded on the N by VOR Federal airway No. 208 on the E by long. 116-05-00N, on the S by the United States-Mexican Border and on the W by the 160° T radial of the Oceanside, Calif., VORTAC."

Effective 0001 EST 2 June 1960:

(1) Federal Airway: Blue 2 (Sitka, Alaska, to Sisters Island, Alaska) added to read: "From the Sitka, Alaska, RR to the Sisters Island, Alaska, Rbn."

(2) Control Area: Blue 2 (Sitka, Alaska, to Sisters Island, Alaska) added to read: "All of Blue Federal airway No. 2."

(3) Five Mile radius zones amended by adding the following: "Juneau, Alaska: Juneau Municipal Airport(lat 58-21-30N, long. 134-35-00W.)

(4) Federal Airway: VOR 34 (Rochester, N. Y., to Wilton, Conn.) amended as follows: In the text delete "The portion of this airway below 6000' above MSL, within the West Point Restricted Area (R-93), is excluded daily from sunrise to sunset during the period from March 1, to November 1, each year." and substitute therefor "The portion of this airway which lies within the geographic limits of, and between the designated altitudes of, the West Point Restricted Area (R-93) is excluded during the Restricted Area's time of designation."

(5) Federal Airway: VOR 97 (Knoxville, Tenn., to Cincinnati, Ohio) amended as follows: In the text of "London, Ky., omnirng stn.; Lexington, Ky., omnirng stn.; Cincinnati, Ohio, omnirng stn., including an E alternate via the Falmouth, Ky., VOR;" is deleted and "London, Ky., VOR including an E alternate via the Knoxville VOR 013°T and the London VOR 141° T radials and also a W alternate via the Knoxville VOR 321° T and the London VOR 201°T radials; Lexington, Ky., VOR; Cincinnati, Ohio, VOR, including an E alternate from the London VOR to the Cincinnati VOR via the Int. of the London VOR 004° T with the Lexington VOR 107° T radials, and the Falmouth, Ky., VOR;" is substituted therefor.

(6) Federal Airway: VOR 134 (Evergreen, Ala., to Atlanta, Ga.,) amended to read: "From the Evergreen, Ala., VOR via the Int. of the Evergreen VOR 075° T and the Tuskegee, Ala., VOR 220° T radials; Tuskegee, Ala., VOR; Int. of the Tuskegee VOR 053° T and the Columbus, Ga., VOR 011° T radials; Int. of the Columbus VOR 011° T and the Atlanta VORTAC 233° T radials; to the Atlanta, Ga., VORTAC."

(7) Control Area: VOR 134 (Evergreen, Ala., to Atlanta, Ga.) amended to read: "All of VOR Federal airway No. 134."

(8) Federal Airway: VOR 14 (Roswell, N. Mex., to Boston, Mass.) amended as follows: In the text delete "Int of the Indianapolis VOR 054° and the Findlay VOR 250° radials;" and substitute therefor "Int. of the Indianapolis VORTAC 054°T and the Findlay VOR 249°T radials;".

(9) Federal Airway: VOR 38 (Iowa City, Iowa to Elkins, W. Va.) amended as follows: In the text delete "Int of the Findlay VOR 128° and the Appleton VOR 310° radials;" and substitute therefor "Int of the Findlay VOR 131°T and the Appleton VOR 312°T radials;".

(10) Federal Airway: VOR 144 (Chicago, Ill., to Washington, D. C.) amended as follows: In the text delete "Int of the Findlay VOR 128° and the Appleton VOR 310° radials;" and substitute therefor "Int of the Findlay VOR 131°T and the Appleton VOR 312°T radials;".

(11) Control Zone: (Findlay, Ohio) amended as follows: In the text delete "and within 2 mi either side of a line bearing 218° T extending from the Findlay nondirectional rdo bcn to a point 10 mi SW of the Findlay omnirng stn." and substitute therefor "and within 2 mi either side of a line bearing 229°T extending from the Findlay Rbn to a point 12 mi SW of the Findlay VOR."

(12) VOR Reporting Points: Domestic VOR reporting points amended as follows: (a) In the text delete "Coldwater Int.: Int. of the Fort Wayne, Ind., omnirng 148°T and the Findlay, Ohio, omnirng 250°T radials". and substitute therefor "Coldwater Int.: The Int. of the Fort Wayne, Ind., VORTAC 148°T and the Findlay, Ohio, VOR 249°T radials." (b) In the text add: "Antwerp Int.: The Int. of the Fort Wayne, Ind., VORTAC 068°T and the Findlay, Ohio VOR 289°T radials."

RESTRICTED AREA AMENDMENTS: The following Restricted Area Amendments shall become effective on 2 June 1960:

(Part 608 - Amendment 97)

(1) In Section 608.40, the West Point, New York, Restricted Area (R-93) is amended as follows: Designated altitudes: Delete "Surface to 6000' MSL." and substitute therefor "Surface to 7000' MSL." Time of designation: Delete "Daylight hours only, March 1 thru November 1, annually." and substitute therefor "0600 to 1600 EST, Monday thru Saturday, May 1 thru August 31, annually."

(Part 608 - Amendment 68)

(2) In Section 608.42, Minot, North Dakota(Minot AFB) Restricted Area/Military Climb Corridor (R-588) is added to read: Description: That area centered on the 308° T radial of the Minot AFB TACAN extending from 5 statute miles NW of the airbase to 32 statute miles NW of the airbase having a width of 2 statute miles at the beginning and 4.6 statute miles at the outer extremity. Designated altitudes: 3,650' MSL to 16,650' MSL from 5 smi NW of the airbase to 6 smi NW of the airbase. 3,650' MSL to 25,650' MSL from 6 to 7 smi NW of the airbase. 3,650' MSL to 27,000' MSL from 7 to 10 smi NW of the airbase. 7,650' MSL to 27,000' MSL from 10 to 15 smi NW of the airbase. 11,650' MSL to 27,000' MSL from 15 to 20 smi NW of the airbase. 16,650' MSL to 27,000' MSL from 20 to 25 smi NW of the airbase. 20,650' MSL to 27,000' MSL from 25 to 32 smi NW of the airbase. Time of designation: Continuous. Controlling Agency: Minot AFB Approach Control.

ON REQUEST REPORTING POINTS: The following on-request reporting points have been established, modified, cancelled or renamed as indicated effective 2 June 1960:

ESTABLISHED:

(1) COLLEY, PA(VHF) INT: 289 M rad Wilkes-Barre, Pa. VOR; 320 M rad Thornhurst, Pa. VOR.

(2) RUSSELL, MICH(VHF) INT: 093 M rad Lansing, Mich. VOR; 172 M rad Flint, Mich. VOR.

(3) LANIER, GA(VHF) INT: 025 M rad Norcross, Ga. VOR; 300 M rad Athens, Ga. VOR.

(4) SUPERIOR, COLO(VHF) INT: 208 M rad Gill, Colo. VOR; 263 M rad Denver, Colo. VOR.

(5) REBEL, N C(VHF) INT: SE crs Greensboro, N. C. ILS lclzr; 090 M rad Greensboro, N. C. VOR.

(6) WAVE, P R(VHF) INT: 341 M rad San Juan, P. R. VOR; 032 M brg from San Pat, P. R. Rbn.

(7) TIDE, P R(VHF) INT: 322 M rad San Juan, P. R. VOR; 041 M brg from San Pat, P. R. Rbn.

(8) OCEAN, P R(VHF) INT: 359 M rad San Juan, P. R. VOR; 041 M brg from San Pat, P. R. Rbn.

(9) MALONE, FLA(VHF) INT: 146 M rad Dothan, Ala. VOR; 232 M rad Albany, Ga. VOR.

(10) JOHNSONVILLE, S C(VHF) INT: 290 M rad Myrtle Beach, S. C. VOR; 149 M rad Florence, S. C. VOR.

(11) HOPEFUL, GA(VHF) INT: 069 M rad Marianna, Fla. VOR; 352 M rad Tallahassee, Fla. VOR.

(12) SNOW CAMP, N C(VHF) INT: 202 M rad South Boston, Va. VOR; 103 M rad Greensboro, N. C. VOR.

(13) SANDY RIVER, VA(VHF) INT: 029 M rad Greensboro, N. C. VOR; 270 M rad South Boston, Va. VOR.

(14) RUFFIN, N C(VHF) INT: 251 M rad South Boston, Va. VOR; 324 M rad Raleigh, N. C. VOR.

(15) MILTON, N C(VHF) INT: 235 M rad South Boston, Va. VOR; 324 M rad Raleigh, N. C. VOR.

(16) CUTLER, FLA(VHF) INT: 152 M rad Miami, Fla. VOR; 224 M rad Biscayne Bay, Fla. VOR.

(17) JULIAN, N C(VHF) INT: 125 M rad Greensboro, N. C. VOR; 219 M rad South Boston, Va. VOR.

(18) DENTON, N C(VHF) INT: 195 M rad Greensboro, N. C. VOR; 099 M rad Hickory, N. C. VOR.

(19) BURCH, N C(VHF) INT: 188 M rad Pulaski, Va. VOR; 051 M rad Hickory, N. C. VOR.

(20) YANKEE, FLA(VHF) INT: 151 M rad W. Palm Beach, Fla. VOR; 075 M rad Miami, Fla. VOR.

(21) TYRO, N C(VHF) INT: 099 M rad Hickory, N. C. VOR; 241 M rad Greensboro, N. C. VOR.

(22) McFARLAN, S C(VHF) INT: 047 M rad Columbia, S. C. VOR; 336 M rad Florence, S. C. VOR.

(23) DUBLIN, PA(VHF) INT: 294 M rad Yardley, Pa. VOR; 187 M rad Stroudsburg, Pa. VOR.

(24) SEYMOUR, CONN(VHF) INT: 072 M rad Wilton, Conn. VOR; 335 M rad Riverhead, N. Y. VOR.

(25) KEYSTONE, PA(VHF) INT: 134 M rad Bradford, Pa. VOR; 205 M rad Wellsville, N. Y. VOR.

(26) W. DOVER, VT(VHF) INT: 088 M rad Albany, N. Y. VOR; 300 M rad Keene, N. H. VOR.

(27) BIG BEND, WIS(VHF) INT: 159 M rad Milwaukee, Wis. VOR; 060 M rad Janesville, Wis. VOR.

(28) STATEN ISLAND, N Y(VHF) INT: 050 M rad Robbinsville, N. J. VOR ;128 M rad Stroudsburg, Pa. VOR.

(29) LOGLICK, KY(VHF) INT: 004 M rad London, Ky. VOR; 107 M rad Lexington, Ky. VOR.

(30) CHROME, ARIZ(VHF) INT: 320 M rad Tucson, Ariz. VOR; 091 M rad Casa Grande, Ariz. VOR.

(31) CALUMET, COLO(VHF) INT: 056 M rad Alamosa, Colo. VOR; 190 M rad Pueblo, Colo. VOR.

(32) BROOKLYN, MICH(VHF) INT: 083 M rad Litchfield, Mich. VOR; 144 M rad Jackson, Mich. VOR.

(33) BREMEN, IND(VHF) INT: 089 M rad Joliet, Ill. VOR; 176 M rad Pullman, Mich. VOR. (Depict on High Terminal Area Chart only).

(34) STERLING, ILL(VHF) INT: 269 M rad Joliet, Ill. VOR; 355 M rad Bradford, Ill. VOR. (Depict on High Terminal Area Chart only).

(35) PARK, ARIZ(VHF) INT: 232 M rad Phoenix, Ariz. VOR; 320 M rad Casa Grande, Ariz. VOR.

(36) POTTER, ARIZ(VHF) INT: 190 M rad Phoenix, Ariz. VOR; 262 M rad Casa Grande, Ariz. VOR.

(37) SPRAGUE, ORE(VHF) INT: 351 M rad Klamath Falls, Ore VOR; 253 M rad Lakeview, Ore. VOR.

(38) PINEHURST, ORE(VHF) INT: 248 M rad Klamath Falls, Ore. VOR; 012 M rad Ft. Jones, Calif. VOR.

(39) FOWLER, MICH(VHF) INT: 093 M rad Lansing, Mich. VOR; 310 M rad Salem, Mich. VOR.

(40) BAKERHILL, ALA(VHF) INT: 280 M rad Albany, Ga. VOR; 198 M rad Eufaula, Ala VOR. (Depict flag MRA 1700').

(41) ECHO, ALA(VHF) INT: 333 M rad Dothan, Ala. VOR; 211 M rad Eufaula, Ala. VOR.

(42) RATCLIFF, ARK(VHF) INT: 030 M rad Page, Okla. VOR; 090 M rad Fort Smith, Ark. VOR.

(43) DANVILLE, GA(VHF) INT: 009 M rad Vienna, Ga. VOR; 102 M rad Macon, Ga. VOR.

(44) BONAIRE, GA(VHF) INT: 327 M rad Vienna, Ga. VOR; 180 M rad Macon, Ga. VOR.

(45) CLINTON, GA(VHF) INT: 011 M rad Macon, Ga. VOR; 135 M rad McDonough, Ga. VOR. (Depict flag MRA 2500').

(46) ELLAVILLE, GA(VHF) INT: 008 M rad Albany, Ga. VOR; 259 M rad Vienna, Ga. VOR.

(47) COCHRAN, GA(VHF) INT: 065 M rad Vienna, Ga. VOR; 139 M rad Macon, Ga. VOR.

(48) JEFFERSONVILLE, GA(VHF) INT: 080 M rad Macon, Ga. VOR; 033 M rad Vienna, Ga. VOR.

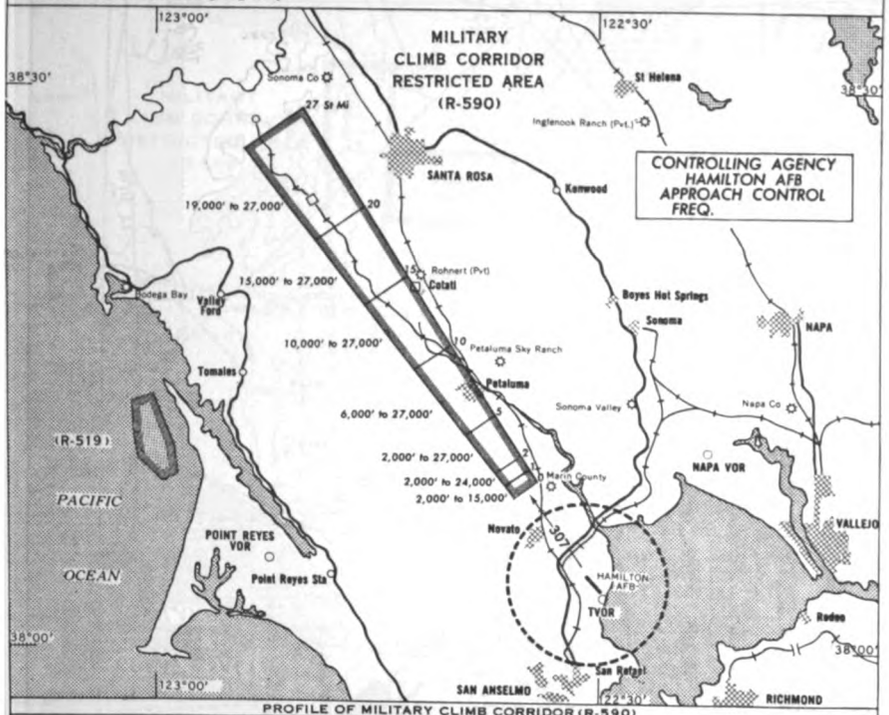
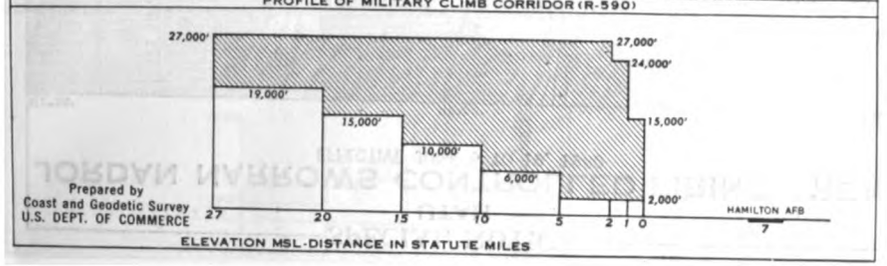
SPECIAL NOTICE
CALIFORNIA



SAN RAFAEL (HAMILTON AFB) MILITARY CLIMB CORRIDOR



EFFECTIVE 0001 E.S.T. MAY 5, 1960

(This Special Notice will not normally be revised or reissued,)

(Refer to Aeronautical Charts for current information)

Pilots of Century Series aircraft on active air defense missions are unable to see and safely avoid other aircraft during the climb phase of a scramble. In the interest of safety, the Dept. of Defense and the FAA have agreed to establish restricted corridors to segregate such operations from other air traffic. ALL FLIGHTS through these areas should obtain prior approval from the Controlling Agency.

SPECIAL NOTICE

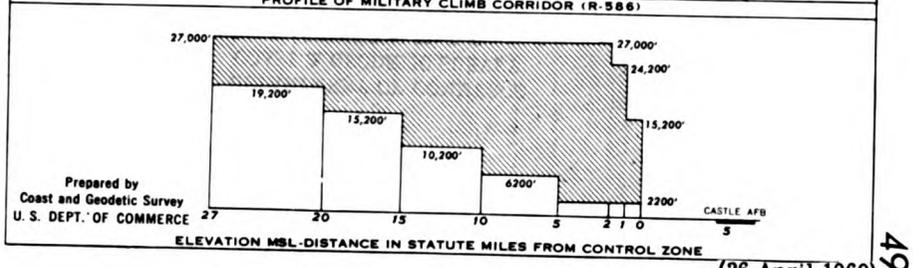
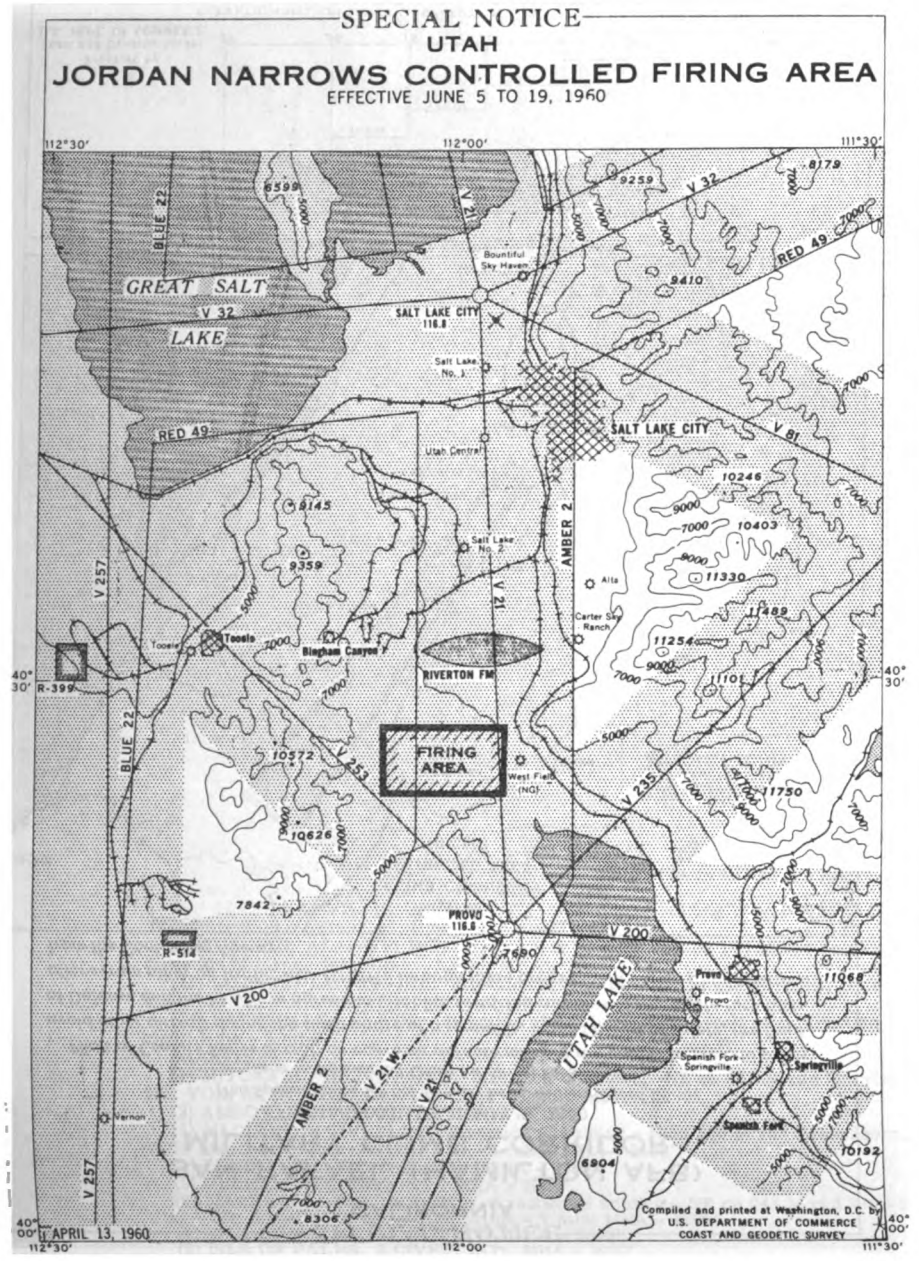
MERCED (CASTLE AFB) MILITARY CLIMB CORRIDOR



EFFECTIVE 0001 E.S.T. MAY 5, 1960



(This Special Notice will not normally be revised or reissued,)

(Refer to Aeronautical Charts for current information)

Pilots of Century Series aircraft on active air defense missions are unable to see and safely avoid other aircraft during the climb phase of a scramble. In the interest of safety, the Dept. of Defense and the FAA have agreed to establish restricted corridors to segregate such operations from other air traffic. ALL FLIGHTS through these areas should obtain prior approval from the Controlling Agency.

DEPARTMENT OF COMMERCE
COAST & GEODETIC SURVEY
WASHINGTON 25, D. C.

Temporary Controlled Firing Area – Jordan Narrows, Utah

Firing to cease upon approach of aircraft over firing area.

Designated Altitude – Surface to 15,000 ft. above terrain.

Time of use	– Sunrise to sunset only during period of June 5-19, 1960 inclusive
Activity	– Artillery firing
Using Agency	– Utah National Guard

Firing to be conducted in accordance with the following:

1. Visual surveillance will be continuously maintained over the entire area by safety officers during firing operations to detect approaching aircraft and communication will be established with gun positions to order cessation of firing upon the approach of aircraft.

2. Firing will be conducted only when there are no clouds below 16,000 ft. greater than 2/10 coverage and when visibility is at least 10 miles.

3. No projectile shall enter or pass through any clouds.

4. All firing to be conducted to the west.

5. Radar surveillance of the Jordan Narrows Valley will be provided during all periods of firing.

✓ CUMULUS CLOUD RESEARCH PROJECT: Beginning May 15 and ending August 31 annually, a cumulus cloud research operation will be conducted within a 50 statute mile radius of a weather radar station located 11 statute miles east of West Plains, Missouri, at N lat 36-45, W long. 91-39, excluding airways.

All flight operations will be conducted outside of controlled airspace. Hours of operation will be from 1300Z to 0300Z. Three Cessna 172 aircraft will operate VFR in the western portion of the area at selected altitudes between the surface and 10,000 feet MSL. One Beechcraft D-18 will operate VFR or IFR throughout the area between the surface and 23,000 feet MSL, generally within a selected group of five altitudes.

Flight operations will be conducted on days selected at random during the three and one-half month period each year. Specific information concerning these operations will be issued by NOTAM on each day the flights will operate.

Other aircraft proposing flight within the designated area may obtain current information concerning these operations from the following FAA facilities:

St. Louis, Mo. FSS
Vichy, Mo. FSS
Springfield, Mo. FSS
Farmington, Mo. FSS
Malden, Mo. FSS
Flippin, Ark. FSS
Walnut Ridge, Ark. FSS
St. Louis, Mo. ARTCC
Memphis, Tenn. ARTCC

The flight service stations listed above will broadcast appropriate information concerning the operation following regular weather broadcasts during the periods this area is in use.

(26 April 1960)

IMPORTANT NOTICE - NEW FREQUENCY ASSIGNMENTS

Commensurate with FAA's efforts to improve the overall air traffic control communications system and to relieve congestion on the existing communications channels, an additional five megacycles of spectrum space is being made available to the aeronautical user effective July 1, 1960. In order to obtain maximum utilization of these additional radio frequencies, FAA is initiating a program of new frequency assignments within the band 118-135 MC/S at 0800 GMT on July 7, 1960.

This implementation invloves several hundred frequency changes throughout the United States, not including Alaska and Hawaii. To facilitate the users' transition to the new frequencies and to provide the greatest advance notice of the specific changes, we are presenting the following tabulation in terms of location, traffic control function, new frequency to be activated July 7, 1960, and existing frequency. Further, note also that many frequencies now assigned (shown in the "old frequency" column) have either been changed or will serve a different function.

LEGEND: H - High Altitude 24,000' and above
I - Non-Radar Sectors 23,000' and below
Ir - Radar Sectors 23,000' and below
A - Center Area Discrete 23,000' and below

MEA, MCA, MOCA, MRA, INTERSECTIONS, AND REPORTING POINTS: (1) The following corrections are made to MEA Amdt. 59, effective date of May 5, 1960: Delete the MEAs for V-18S from Quitman, Tex. VOR to Marshall Int., Tex. to Shreveport, La. VOR. Ignore A-9 and revert back to presently published MEAs. (2) Until further advised effective immediately the following reporting points and MEAs are established: Aspen Int., Wyo. MRA 15,000'; Evanston Int., Wyo. MRA 14,000'; Almy Int., Wyo MRA 13,000'; Blacksmith Int., Utah MRA 13,000'; Corinne Int., Utah MRA 13,000'. V-288, Lucin, Utah VOR to Corinne Int., Utah MEA 13,000', MOCA 10,000'; Corinne Int., to Blacksmith Int., Utah 13,000'; Blacksmith Int., to Ft. Bridger, Wyo. VOR, W-bound 13,000', E-bound 12,000'. V-6N, Ogden, Utah VOR to Blacksmith Int., Utah MEA 13,000', MOCA 12,000'; Blacksmith Int., to Ft. Bridger, Wyo. VOR, W-bound 13,000', E-bound 12,000'. (3) Effective 5 May 1960, the following MEAs are cancelled: A-1, U.S. Mexican Border to San Diego, Calif., LFR 2500'; San Diego LFR to Oceanside, Calif Rbn 2500'. R-9, Sargo Int., Calif to San Diego, Calif. LFR 1500'; San Diego LFR to El Centro, Calif. LFR 8000', MCA 3000' San Diego LFR, E-bound; Barrett Lake FM to Jamul Rbn, W-bound only 6000'; Jamul Rbn to San Diego LFR, W-bound only 4500'. Add the following MEA: R-9, Campo Int., Calif. to El Centro, Calif. LFR 8000', MCA 4000' El Centro LFR, W-bound. Also cancel the following LF Ints.: San Marcos, Surf, Mt. Dad, Clairmont, Sargo, Nautilus, San Ysidro, Lemon Grove, and Barrett Lake.

REVISIONS TO STANDARD INSTRUMENT APPROACH PROCEDURES

Bearings, headings, courses & radials are magnetic. Elevations & altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

NOTE: Destroy copy of CANCELLATION of ADF Procedure No. 1, Orig., Effective 12 March 55, for Fallon, Nev.-Mun Arpt., issued with Trans. Ltr. No. 60-9. Range still in effect.

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE ADF

If an instrument approach procedure of the above type is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of the FAA. Initial approaches shall be made over specified routes. Minimum altitudes shall correspond with those established for en route operation in the particular area or as set forth below.

TRANSITION				CEILING AND VISIBILITY MINIMUMS			
					Two Engine or Less		
From	To	Course and Distance	Minimum Altitude	Condition	65 Knots or Less	More Than 65 Knots	More Than Two Engine, More Than 65 Knots
CDR VOR	CDR "H"	017°-18.9	5900	T-dn	300-1	300-1	200-½
				C-dn	700-1	700-1	700-1½
				A-dn	800-2	800-2	800-2

Procedure turn W side of final approach crs - 357° Outbnd, 177° Inbnd. 4600' Within 10 miles.
Facility on airport. Minimum altitude over facility 4000'.
If visual contact not established upon descent to authorized landing minimums or if landing not accomplished . . . . .
within 0.0 miles turn right climb to 4600' on course 357° within 20 miles.

NOTAMS page 34

Special Notices page 57

Postdeadline Data page 56

FEDERAL AVIATION AGENCY

ISSUANCE: The Airman's Guide is issued every two weeks. Every issue contains a NOTAM section; every other issue additionally contains a Radar-Radio Listings section; and once every three months the Airport Directory appears in an issue containing both NOTAMS and the Radar-Radio Listings. See below for contents of these sections.

RETENTION: To enable users to know which issues should be retained, a suitable notice is carried on the front cover indicating which ones are still current.

CONTENTS: The contents (by section or other appropriate breakdown) of each issue are noted by tab and page number on the front cover. The first page of each section carries the Legend for interpreting codified information. Material usually included in each section is as follows:

(1) NOTAMS (including Special Notices): Under appropriate geographical headings (state and/or city, as applicable) there is given the current condition (if there has been a temporary or permanent change concerning which a NOTAM has been issued) of facilities and obstructions, plus any special data (including flight regulations or restrictions). Where NOTAMS cannot be associated with a specific geographical location or where the application is generalized, they are carried in a subdivision of NOTAMS entitled "Special Notices." The Special Notices section follows the NOTAMS and, like the NOTAMS, is separately listed by a tab and page number on the front cover. Important or unusual Special Notices are additionally indicated on the front cover in the box provided, giving the subject and page number where the data is to be found. Included as Special Notices are data and/or amendments concerning restricted areas, location identifiers, minimum en route altitudes, civil airways, airway structure during VOR shutdowns, control areas, control zones, reporting points, VOR check points, standard instrument approach procedures, control area/flight advisory area boundaries, civil air regulations, preferential routes, flight test areas, military maneuvers, aeronautical charts, etc. Also included are amendments and changes to the Flight Information Manual as well as to previously issued Airman's Guides.

(2) Radar-Radio Listings: Lists radar facilities, instrument landing systems, and aeronautical radio facilities with (as appropriate) their transmitting and guarded frequencies, identification, station class, range courses, other appropriate data, and remarks.

(3) Airport Directory: This codified directory provides the following data on airports: type, location (with reference to associated town or city), elevation, number of runways, length of longest runway (indicating surfacing), lighting, servicing, availability of weather reports and or Unicom, fuel octanes, and appropriate remarks.

PRICE: See information in box below.

REPORTING INFORMATION TO EDITORS: Data for inclusion in the Airman's Guide should be reported to the editors at the following address: Federal Aviation Agency, Washington 25, D. C., Attention: MS-120. Appropriate instructions for reporting data are contained in FAA's Manual ATM-2-B, entitled "Communications Procedures." However, since some airport data, unlike most other data, may not originate from official sources, the following explanatory information is provided.

The Airman's Guide covers primarily two broad fields of civil airport information: permanent data changes and temporary hazardous conditions. Permanent airport data refers to new airports or changes in field layout, servicing, lighting, restrictions or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions which make airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, thaws or construction; or merely a burned out obstruction light or a runway unusable or partially unusable because of construction.

Since the aeronautical public should be immediately advised of such hazardous conditions, reporters should utilize the FAA Flight Service Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest FAA service station for dissemination as a NOTAM and for further transmission to the editors of the Airman's Guide. If this is not feasible, the item should be reported directly to the Federal Aviation Agency, Washington 25, D. C., Attention: MS-120.

Permanent airport data changes should be reported to the appropriate FAA Regional Office for coordination before they are included in the Airman's Guide.

NOTE: The Federal Government disclaims responsibility for non-Federal air navigation facilities, including airports.

Abbreviations

The editors are now in the process of making changes in the contractions and abbreviations used in the Airman's Guide. We are doing this in order to conform to the new, standardized material contained in the FAA publication entitled CONTRACTIONS. This publication, which is dated July 1959 and issued in the ATM Manual series, is available from the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C., at 75 cents per copy.

Many of the abbreviations and contractions used in the Airman's Guide are already in conformity with the CONTRACTIONS publication. However, from among those which have changed, we have selected a few which we frequently use in the Airman's Guide. They appear in the list which follows.

ALWAYS CHECK NOTICES TO AIRMEN SECTION

RADAR - RADIO LISTINGS

FSS = Flight Service Station (FAA) (Formerly ATCS)

VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES:
Category I = Course alignment and signal level are monitored continuously. Category II = (No longer in use; formerly applied to VAR). Category III = Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an FSS, and located too distant from FSS to be monitored with a VHF receiver will fall into Category III. NOTE: Category I, II, III shown by (1), (2), (3) before name in Location Column.

LEGEND

NOTE: The Federal Government disclaims responsibility for non-Federal air navigation facilities.

(A) = Air Force facility
(N) = Navy facility
(P) = Private facility
(S) = State facility
(0700-2300) = Hours of operation local time
(3) = Monitoring category
➔ = New or revised data
■ = Information deleted

RADIO CLASS DESIGNATIONS

Identification of VOR/VORTAC/TACAN Stations by Class: (Operational Limitations)

Class	Normally Anticipated Altitude Service	Normally Anticipated Interference-free Distance Service
H-VOR	75,000' MSL	180 smi (156.31 nmi)
M-VOR	30,000' MSL	90 smi (78.16 nmi)
L-VOR	15,000' MSL	45 smi (39.08 nmi)

AC . . . . . Approach Control Tower, FAA (transmits on voice channel or associated ranges and ILS in addition to frequencies listed
B . . . . . Scheduled Broadcast Station (broadcasts weather at 15 and 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C . . . . . Control Tower, FAA
CI . . . . . Control Tower (City, County, Private, etc.)
CM . . . . . Control Tower (Military, listing only civil frequencies available)
CONSOLAN . . . LF/MF long range navigation aid; aircraft must have BFO oscillator
D . . . . . Distantly controlled
DME . . . . . Distance Measuring Equipment
DMET . . . . . TACAN compatible DME
FM . . . . . VHF fan marker (100 watts)
GCA . . . . . Ground Controlled Approach System
H . . . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH . . . . . Non-directional radio beacon (homing), power 2000 watts or more
ILS . . . . . Instrument Landing System (voice on localizer channel)
J . . . . . L/MF (200-415 kc) voice facility on other than range frequency
LFM . . . . . VHF fan marker, low powered (5 watts)
LMM . . . . . Compass locator station when installed at middle marker site
LOM . . . . . Compass locator station when installed at outer marker site
MA . . . . . Range (adcock, vertical radiators), power less than 50 watts
MH . . . . . Non-directional radio beacon (homing) power less than 50 watts
ML . . . . . Range (loop radiators), power less than 50 watts
MM . . . . . VHF middle marker
MRA . . . . . Range (adcock, vertical radiators), power 50 watts or more, but less than 150 watts
MRL . . . . . Range (loop radiators), power 50 watts or more, but less than 150 watts
OM . . . . . VHF outer marker
RA . . . . . Range (adcock, vertical radiators), power 150 watts or more
RL . . . . . Range (loop radiators), power 150 watts or more
S . . . . . Simultaneous range, homing signal and/or voice
T . . . . . Teletype
TACAN . . . . . UHF omni-directional bearing and distance type facility
TX . . . . . Principal teletype
V . . . . . Additional VHF voice feature on other than range frequency
VOR . . . . . VHF omni-directional range (omni-range)
VORTAC . . . . . Combination of VOR and TACAN
W . . . . . Without voice facilities on range frequency
Z . . . . . VHF station location marker at a range station

NOTES

1. Range courses are magnetic in-bearings
2. All FAA MH facilities operate continuously unless cited as follows: (on req)
3. All FAA ranges operate continuously. Those which are not manned continuously are cited in the remarks column with hours of operation in parentheses, e.g., (0600-2400)
4. VHF/LMF ranges listed with the same identifier are controlled by the same FSS. Due to space limitations the DTV and communication frequencies which are listed with the LF/LMF facility are not repeated with the VOR facility.

RADAR AVAILABLE

PAR = Precision Approach Radar. ASR = Airport Surveillance Radar.
ARSR = Air Route Surveillance Radar

FAA RADAR UNITS - Operate continuously at the locations listed below. Available to all pilots, civil and military. Contact associated FAA control tower on any frequency guarded for initial instructions, or in an emergency any FAA facility for information on nearest Radar Control. Weather minimums, associated runway and GCA procedures are listed in the Airman's Guide.

RADAR APPROACH CONTROL (RAPCON) - At certain USAF locations, approach control and the ASR portion of RAPCONS is operated by the FAA and service is available to all aircraft.

RADAR AIR TRAFFIC CONTROL CENTER (RATCC) - At certain US Navy locations, approach control and the ASR portion of the RATCCS is operated by the FAA and service is available to all aircraft.

RADAR BEACONS - Secondary radar beacon ground equipment is normally associated with a surveillance radar system and is used for target reinforcement and identification of aircraft equipped with a radar beacon transponder, either military or civil. One of two types of ground equipment is now available for operation at all FAA operated RAPCON facilities, some FAA air route traffic control centers, and at all ADC long range radar facilities.

AIR TRAFFIC CONTROL RADAR BEACON SYSTEM (ATCRBS) - ATCRBS is similar to and compatible with the military coded radar beacon equipment (Mark X (SIF)). Civil Mode A is identical to military Mode 3. Civil and Military transponders will be adjusted to reply in Mode A (military Mode 3) as follows:

1. Civil turbojet aircraft transponders - reply on Code 40 at all times while in flight, unless otherwise advised.
2. Civil aircraft (other than turbojet powered) and military aircraft - reply on Code 02 when operating on IFR flight plan unless otherwise advised by ground radar facilities.
3. Civil aircraft (other than turbojet powered) and military aircraft - reply on Code 62 while operating VFR or VFR-on-top unless advised otherwise by air traffic control (ATC). Code 62 will also be used by such aircraft when operating VFR or VFR-on-top within radar advisory areas between flight levels 240 and 390, inclusive. (See ACIC En Route - High Altitude charts for radar advisory areas and procedures relating thereto.)
4. Under no circumstances shall civil aircraft operate on Code 00.
5. Civil and military transponders will be operated in "STANDBY" while taxiing for take-off and after landing, or when requested by ATC. This action is necessary to eliminate undesirable interference and clutter on certain radar displays. Therefore, departing pilots should turn transponder to "ON" as late as practicable before commencing take-off, and landing pilots should turn transponder to "STANDBY" as soon as practicable after completing landing roll.
6. Civil and military pilots, when filing a domestic IFR flight plan, shall make known the fact that their aircraft are equipped with a functioning transponder by adding the word "transponder" immediately following the aircraft identification. An aircraft with a transponder not having coding capability (Basic Mark X) will be indicated by adding the words "no code" in the "Remarks" section of the flight plan.
7. Aircraft departing from within a United States domestic control area to points outside the United States will comply with 6 above. Transponder equipped aircraft entering a United States domestic control area from outside the United States will, when making the first radio report to the United States air traffic control center, advise of availability of such equipment by adding the word/s "transponder" or "no code transponder," as appropriate, to its identification.

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground approaches - Precision and Surveillance.

PRECISION APPROACHES - Aircraft are guided to final approach to the designated instrument runway. The final approach glide path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway.

SURVEILLANCE or ASR APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide slope desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR, the weather minimums for a surveillance approach are usually higher than for a precision approach.

RADAR ARRIVAL AND DEPARTURE CONTROL - Radar is utilized by certain radar equipped facilities to control the flight paths of arriving or departing IFR aircraft for the purpose of expediting the flow of traffic. Aircraft operating on IFR flight plans will be afforded a minimum of three miles horizontal separation unless standard non-radar vertical, lateral or longitudinal separation exists. This should not be confused with GCA which is an instrument approach aid, NOTE: Radar arrival and departure control available all locations, unless otherwise cited.

FAA OPERATED RADAR UNITS

NOTE: Transmitting frequencies below 118 mc are not guarded; others listed plus 3023.5 kc are guarded unless otherwise shown under Remarks. Frequency 122.5 mc is guarded unless either 122.6 mc or 122.7 mc is shown. (Guarding frequencies not applicable to ARSR facilities) Emergency frequency 121.5 mc transmits and guards at all locations.

NOTAMS

LEGEND

(7-21) -- Month and day the information was reported.

** -- New or revised airport or miscellaneous data. Pilots should inscribe this information on charts and records.

✱ -- New or revised radio or radar data. Pilots should inscribe this information on charts and records.

NOTE: Because of space limitations, such "permanent" data will usually be cited only once. Temporary data, however, will be continuously cited until no longer in effect.

ALABAMA: ALBERTVILLE ARPT: 150' lgtd temp twr erected approx 1 mi SE at lat 34-16-12, long. 86-12-36. Will be dismantled about Aug 15. (3-5)
ANNISTON RADIO: About June 6, VOR will be shut down until aprx June 11 - class chg to L-VOR and freq chg to 108.8 mc. (5-4)
BIRMINGHAM RADIO: Caution - E course LF rng has severe multiples.
BIRMINGHAM ARPT TOWER: About July 18, freq 126.18 mc will be chgd to 126.2 mc.
**BIRMINGHAM MUN ARPT: Due non-visibility twr unable to ctl gnd tfc on Hayes ramp. Due to comsng apch lgt system rnwy 5, ILS minimum day and ngt rnwy lowered to 200'-1/2.
ELBA ARPT: New arpt reported. Lctn: 1.5 mi W; lat 31-25, long. 86-05; No. of rnwys: 2; Lngst rnwy & facils: h30-B*L4; Rmks: Unattended. Tree E. (4-7)
FORT RUCKER SPECIAL NOTICE: May 1 thru 15, U.S. Army Aviation Board will conduct tests of a Personal Rescue Rdo Set on 243.0 mc with voice and tone tsmtns at 75 milliwatts pwr durg hrs 0900-1200 and 1800-2100 within 100 mi radius. (3-16)
★GADSDEN RADIO: VOR comsnd. Freq: 112.0 mc. Ident: GAD. Lctd lat 33-58-33, 3-58-long. 86-05-05. Montrg category (1). Ctld from Anniston FSS Class: M-BVOR. Rcvd too late for inclusion ANRA page.
GADSDEN ARPT: 150' unlgtd temp twr erected approx 7 mi NE at lat 34-04-00, long. 86-01-31. Will be dismantled about Aug 15. (3-5)
HUNTSVILLE RADIO: About May 23, VOR will be shut down until aprx May 28, freq chg to 108.2 mc and class chg to L-VOR. (5-5)
MOBILE RADIO: VOR radials 018° clockwise thru 028° unusable. (4-29) DMET operg test basis; channel 80. (7-10)
MOBILE, BATES FLD TOWER: About July 18, freq 126.18 mc will be chgd to 126.2 mc.
MOBILE-BROOKLEY AFB RADIO: USAF VOR radials 212° thru 222° clockwise unusable-acct severe scalloping. (7-10)
MOBILE-BROCKLEY AFB RADAR APPROACH CONTROL: About July 18, freq 126.18 mc will be chgd to 126.2 mc. (4-25)
MOBILE, BROOKLEY AFB SPECIAL NOTICE: Due to concentrated opern of hi-performance jet acft, all tfc other than that for Brookley, should remain clear of the Brookley Ctl Zone during VFR flgt below 2700', unless otherwise cleared by the Brookley Ctl Twr. (1-12)
MONTGOMERY SPECIAL NOTICE: Due to extsv jet tfc, all acft are cautioned to maintain cont rdo ctc with appropriate ctl twr when operg in Danelly Fld or Maxwell AFB ctl zone.
MUSCLE SHOALS RADIO: DMET operg test basis; channel 112. (5-5)
SCOTTSBORO, WORD FLD: 115'(785'MSL) lgtd twr being erected approx 1500' SE (135°T) at lat 34-41-10, longl 86-00-07. (3-28)
TUSCALOOSA RADIO: DMET operg test basis; channel 82. (7-1)
TUSCUMBIA, TRI CITIES ARPT: 503'(962'MSL) lgtd stack being erected 6.5 nmi W(282°T) at lat 34-44-35, long. 87-50-58. (12-10)
TUSKEGEE RADIO: DMET operg on test basis; channel 120. (11-5)
ARIZONA: BENSON SPECIAL NOTICE: Pilots cautioned to avoid flying over or near Apache Power Co., nitro-glycerin plant approx 4 mi SSE of St. David because of potential explosion hazard. (11-6)
CLIFTON, GREENLEE COUNTY ARPT: N/S rnwy useable with caution, weeds. (5-4)
COCHISE RADIO: DMET operg on test basis; channel 41. (10-11)
GILA BEND RADIO: DMET operg test basis; channel 113. (1-27)

ARIZONA: GILA BEND ARPT: New arpt reported. Lctd 2.0 SE. 2 rnwys, longest rnwy & facils 40-S5. Fuel: F3.
**MARICOPA SPECIAL NOTICE: CAUTION - DO NOT MISTAKE FOR LNDG AREA. Space Surveillance Stn at lat-33-06-31, long. 112-01-46 4 mi N Maricopa. 1200' W and parallel to hwy. Site is strip 300' x 1800' with paved portion lengthwise thru cntr 100' in width and studded with 6' steel posts. This permanent hazard lctd 22 nmi S Phoenix-Sky Harbor Arpt.
PEACH SPRINGS RADIO: TACAN operg on test basis, unmonitored; channel 117. Not synchronized with VOR ident. (8-10) About May 15, VORTAC will be comsnd. TACAN Channel 117. Class: M-VORTACW. (5-3)
PHOENIX SPECIAL NOTICE: Hi Density Jet Tfc: Pilots on other than IFR clearance should either avoid or use extreme caution when traversing the following areas within which Luke AFB hi-density tfc is operg. Normal trng hrs are from 0600-1800 MST Mon thru Fri. Hi-density tfc will be operg VFR on R83, V94, V66 and R9 within a 10 mi radius of the Gila Bend VOR & btn the Gila Bend VOR & a point 52 nmi W on R9 and V66 at alts below 2000' and at 5000', 6000', 7000', 15,000', 16,000' and above 25,000' MSL. On R83 and V94 btn a point 10 nmi S of the Hassayampa VOR & the Gila Bend VOR at & below 4000' MSL & 25,000' and above. All provisions of Special Air Regulation #421 apply within the following area: G5 & V16 W of Phoenix btn 112° - 10'W and 112°-35'W. (6-1)
**PHOENIX, AIRHAVEN ARPT: Abandoned.
PHOENIX, DEER VALLEY ARPT: 5000' extsn E end E/W rnwy clsd. (5-5)
SCOTTSDALE, THUNDERBIRD ACADEMY ARPT: N/S & NW/SE rnwys clsd. (4-7)
TUCSON SPECIAL NOTICE: High Density Jet Traffic: Pilots on other than IFR clearance should either avoid or use extreme caution when traversing the following area at an alt above 19,000' MSL. Hi-density jet tfc operg at and above 20,000' MSL within the area from Douglas VOR to Cochise VOR to the Cortaro Int. to the Robles Int. to the Kinsley Int. to the Douglas VOR. Hrs of opern, const daily. (6-4)
TUCSON RADIO: VORTAC unusable beyond 25 mi, 320° clockwise thru 080° at MOCA.
**TUCSON, DOWNTOWN ARPT: Delete; private fld. (5-4)
TUCSON ARPT SPECIAL NOTICE: Target towing by jet acft during dalgt hrs under VFR conditions on wk-ends and intermittently thru week on a direct route from Ajo, Ariz. descending from 20,000' so as to reach 5500' prior to joining ctl area vicinity San Pedro, Ariz thence direct to San Xavier mission, thence direct to Tucson arpt. Ctc Tucson rdo or ctl twr for info concerning towing activity. (2-10)
TUCSON MUN ARPT: 6' obstacle exists on jet arresting barriers at the ends of rnwy 12 and 30. (1-7)
WINSLOW RADIO: TACAN operg test basis; channel 81. (9-10)
WINSLOW MUNICIPAL ARPT: Rnwy 17-35 open days. (4-26)
YUMA-MCAAS/YUMA CO. Rnwy 17-35 clsd. Hi-density jet tfc vncty of arpt. Hvy constr in progress both sides rnwy 3-21. Constr on txwys. Lgts on rnwy 3-31 only. 2-way rdo rqrd. (4-6)
ARKANSAS: BENTON, SALINE CO. ARPT: Rnwy lgts and unicom inop. No fuel avbl. (2-23)
BRINKLEY, FEDERER MEMORIAL ARPT: Both strips hazardous. N/S clsd. E/W strip emgcy only.
EL DORADO RADIO: DMET operg test basis; channel 108. (7-13) VOR 034° radial rough & scalloping above 10,000'; Hampton Int on V1522 formed by El Dorado 034° and Texarkana 082° unusable above 10,000'. (1-27)
FAYETTEVILLE RADIO: DMET operg on test basis; channel 96.
FAYETTEVILLE, DRAKE ARPT: N/S taxiway W side surfaced rnwy under constr; use hard surfaced rnwy only; open trenches within 50' both ends hard surfaced rnwy. (5-4)
FORREST CITY, HUTCHERSON FLYING SERVICE: New arpt reported, lctd 3.0 mi S; one 3000' N/S hard surfaced rnwy, elev: 248', rnwys lgts, green & white rotg bcn. 80 & 100 oct fuel avbl. UNICOM 122.8 mc. (2-16)
FT SMITH MUN ARPT TOWER: About July 18, freq 126.18 mc will be chgd to 126.2 mc.
LITTLE ROCK, ADAMS FLD-TOWER: About July 18, freq 126.18 mc will be chgd to 126.2 mc.
MARIANNA ARPT: New arpt reported. Lctd 1.0 mi W; elev: 240'; one sod rnwy - 2600'; storage; minor A & P rprs; 80 oct fuel avbl. (3-24)
PARAGOULD MUN ARPT: E/W rnwy clsd. (2-16)
PINE BLUFF, GRIDER ARPT: Rnwy end identification lgt system decmsnd-modification.
TEXARKANA RADIO: TACAN operg on test basis; channel 118. (9-15)
TEXARKANA ARPT: Men and equipment on field; flagmen stationed where vehicles cross runways. (10-1)

[redacted]: AGNEW RADIO: VOR MRA V110 between Mission and Livermore Ints increased to 6000'-acct scalloping. (4-9)
ARCATA RADIO: VHF/DF coverage 40 nmi at MEA excp 030°-040°, 11,000'; 040°-060°, 12,000'; 060°-090°, 13,500'. (8-9)
BAKERSFIELD, MEADOWS FLD TOWER: ILS lclzr, glide slope and LMM shut down until aprx June 20- relctn. Lclzr will be moved 3370' NW of present site. Glide slope will be moved 2400' NW and 800' SW to opposite side NW/SE rnwy; LMM willbe 3347' SE of end NW/SE rnwy. OM will be 5.16 smi from SE end NW/SE rnwy. (5-5)
BAKERSFIELD, MEADOWS FLD: Rnwy 12-30 efctv length of 5700' for ngt lndgs only, 12-30 clsd days so that sealing and painting operns may be completed. Rnwy 16-34 open. Rnwy 7-25 clsd all operns, excpt tkofs rnwy 25 for acft of 12,500 lbs and under. (4-19)
BLYTHE RADIO: DMET operg test basis; channel 121. (5-2)
BURBANK, LOCKHEED AIR TERMINAL TOWER: VHF/DF coverage beyond tolerance and unusable 015° clockwise to 075°, 25 nmi at 18,000'; 075°-090°, 30 nmi below 9000'; 090°-265° below 6000'; 265°-290° below 9000'; 290°-015° below 13,000'. (1-15)
** BUTTON WILLOW-KERN COUNTY # 15 ARPT: Low intensity rnwy lgts comsnd Apr 4.
CAMARILLO RADIO: All LF rng courses have multiples. (6-17)
CHINO ARPT TOWER: Twr unmanned; on standby basis indef. (7-16)
CHINO ARPT: Caution hvy acft intermittent flt tests on rnwy 3-21. (4-12)
CLEAR LAKE HIGHLANDS, PEARCE FLD: Closed.
CORONA MUN ARPT: New arpt reported, lat 33-53, long. 117-36; Lctn: 2.5 NW. 1 oil strip 2000 x 40'. No lgtg F3 fuel; minor repairs & 91/96 oct fuel. Atended 0800-1700. P-line W.
**DAGGETT ARPT: 20' lgtd wind mast lctd 2290' ENE of int rnwy 3 and 7, 600' SE of centerline of rnwy 3 and 940' N centerline rnwy 7. (3-30)
EL CENTRO RADIO: TACAN operg test basis, channel 86. (9-21)
ELSINORE, SKYLARK FLD: Caution, gliders in vcnty of fld, parachute jumpers drop zone btn end of rnwy and the lake. (8-4)
FAIRFIELD-TRAVIS AFB RADIO: LF rng has splits and multiples beyond 20 mi. (8-27)
FORTUNA RADIO: VOR has lgt to moderate scalloping beyond 26 nmi. Only awys radials flt-checked. (10-6)
** FREMONT, CENTER FLD: Caution-extsv glider activity conducted every Wed thru Sun.
FRESNO RADIO: DMET operg test basis, channel 76. (4-25)
FRENSO AIR TERMINAL TOWER: ILS LMM unusable beyond 10 mi. (2-24) About June 1, ILS LMM, and MM will be shut down until aprx July 5- relctn to 0.68 smi from the apch end of rnwy. (4-8)
FRIANT RADIO: Mar 1, constr began on VOR. Freq: 115.6 mc. Ident: FRA. Lctd at lat 37-06-16, long. 119-35-42. Mag. var.: 16°23'E. Elev: 2350' MSL. Montrg category (1) Ctld from Fresno CS/T. Class: M-BVOR. (3-28)
FULLERTON MUN ARPT: Due non-visibility twr unable to ctl tfc on extreme S, E/W txwy in an area 200' either E or W of ctl twr. Caution: acft parked close proximity all txwys. Caution when ope rg VFR conditions S and SW Fullerton in vcnty Los Alamitos NAS acct mil jet and reciprocating acft tfc. (7-7)
GAVIOTA RADIO: DMET operg on test basis, channel 70. (10-1)
HAYWARD MUN ARPT: All VFR flgts exercise caution when arriving, departing or operg in the vcnty. Extensive simulated and actual IFR apchs on all apch navaids to Oakland Intl Arpt pass in the proximity of Hayward Mun Arpt. (4-25) Due non-visibility twr unable to ctl tfc on main N/S taxi strip on E side of fld. 65' twr under const 800 yds 065° from int rnwys 28R and 22.
HEMET, RYAN ARPT: Controlled parachute jumps under VFR conditions from 7000' over NW corner occasionally daily; operns accelerated on week ends. (1-14)
HERLONG SPECIAL NOTICE: Caution within a 10 mi radius. Hvy demolition activities being conducted between 0800 and 2400 PST Mon thru Fri. Danger of fragments below 8,000' MSL. (3-29)
LINDEN RADIO: TACAN operg on test basis, channel 102. (11-2)
LIVERMORE, SKY RANCH ARPT: Caution in the vcnty of fld, be watchful for sport parachutists in the air. Parachuting activities are conductd durg VFR dalgt conditions, greatest activity on week ends. (11-25)
LONG BEACH SPECIAL NOTICE: Caution-when operg under VFR conditions in vcnty Los Alamitos NAS. Mil jet and reciprocating acft crossing shoreline 2000' and below on arrival and departure btn Huntington Beach and Long Beach LFR. (5-1)
LONG BEACH RADIO: About June 13, TACAN will be shut down until aprx July 13- reconstr. (5-5)
★LONG BEACH ARPT TOWER: ILS glide slope adjusted to 2.7°. Alt: 1500'MSL. Alt over [redacted]: OM 1330'MSL; over MM 230'MSL. (5-8)
**LONG BEACH MUN ARPT: First 150' of rnwy 25L and txwy on N side adjt not visible from twr acct of perm bldg.
LOS ANGELES RADIO: VOR has moderate to hvy scalloping below 4000'MSL. Unusable for apchs and below 6000'MSL between Bonita and Catalina Ints. Manual bcsts cont on LAX VOR; also BUR LF rng, LGB LF rng and VOR, FIM VOR and SXC VOR. (2-24)
LOS ANGELES AIR ROUTE TRAFFIC CONTROL CENTER: Apr 4, ARSR-1 & IFF bcn shut down until aprx June 4. (4-4) Radar advisory unavbl civil jet acft ctl 1316, 1176, 1177 LAX to 150 nmi W of LAX until aprx June 4. (5-4)
LOS ANGELES INTL ARPT TOWER: PAR operg 25R; unavbl W of LMM. Minimum ceiling 300'; visibility 3/4 mi. ILS lclzr & glide slope operg on rnwy 25R. Other components remain aligned rnwy 25L, 750' to left of extended centerline of rnwy 25R.
LOS ANGELES INTL ARPT: Rnwy 7R-25L clsd to all operns, due resurfacing. Hi-intensity lgts, sequence flashers and threshold lgtg rnwy 25L and westerly extsn under constr. Constr, 8' blast wall in progress threshold rnwy 25L portions of rnwy 7R-25L avbl for taxiing, etc ctl twr for instrs. Rnwy 6-24, 8925' long clsd, maint avbl emgcy req from SR-SS under VFR to the following types acft; all single and twin eng prop type acft, Electras and Viscounts. During period when rnwys 7L-25R are clsd or acft emgcy conditions exist rnwy 6-24 avbl in both directions to all type acft all hrs. After dark rnwy tmpryly lgtd upon 10 min notice. No overrun area W end this rnwy, normal operns limited to lndg toward the E and tkofs to the W only. Use caution; men, eqpmt along edges of all pavements. Use same tfc patns as outline for rnwys 7L-25R when using rnwy 6-24 unless otherwise directed by ATC. All opern rnwy 6-24 will be at pilots discretion due non visibility from ctl twr. Acft weighting 12,500 lbs or less not restricted as to direction of tkof or lndg rnwy 6-24. Unmrkd 40' poles 776'from E end and 8' fence 206' from E end of rnwy. Rnwy 7L has rnwy ident strobe lgts lctd both side threshold 7L operated at req of ctl twr. All acft making low passes over or taking off on rnwy 25R or lndg on rnwy 7L shall maint a course along the extended centerline of this rnwy to the shoreline. All acft are to remain S of the flashing green beacon site lctd on the san dunes aprx 1.0 mi beyond the W end of this rnwy. 8' blast wall erected threshold rnwy 25R. Rnwy 16-34 avbl dalgt hrs only upon 20 min notice when N or S wind component exceeds 15 knots. Rnwy width 102', rnwy 34 avbl lndg length 5075', tkof length 6754'. Rnwy 16 avbl lndg length 6754', tkof length 5075'. Southerly portion of 34 unavbl for lndg and 16 unavbl for tkof due to hi-terrain and p-line along S arpt bndry. Use extreme caution unmarked ditches and ruf ground along edges of rnwy. No rnwy markings. (5-5)
LOS ANGELES, VAN NUYS ARPT: Rnwy 8-26 clsd. Men, eqpmt working adjt N edge of W 1000' of rnwy 8-26. Open ditch, taxi with caution. Work in progress, baled hay btn rnwys & txwys. (5-6)
MADERA MUN ARPT: Rnwy 7-25 will be clsd due to auto drag races on the folg dates: June 12, July 10, Aug 14, Sept 11, Oct 9, Nov 13 and Dec 11. Rnwy 12-30 will remain open.
MAXWELL RADIO: TACAN operg test basis, channel 72. (6-8)
MERCED, CASTLE AFB SPECIAL NOTICE: Extreme caution, hvy multi-jet trng operns in vcnty 1400-0800Z wkdays. Jets climbing and descending W of awys Amber 1 & V-23 within 40 nmi radius. Castle apch ctl operg 118.9 mc for civil tfc. (4-9)
MONTEREY RADIO: DMET operg test basis, channel 87. (2-23) About May 25, VOR name & ident will be chgd to Big Sur, BSR. (4-22)
MONTEREY, PENINSULA ARPT RADIO: ILS unsuitable for auto apchs. Unusable between LMM and apch end rnwy. (10-21)
MONTEREY, PENINSULA ARPT: Rnwy 28 downgrade one and one-half percent. Lndg acft non-reversible props. caution during hrs of darkness. (3-2)
MOUNTAIN VIEW-MOFFETT NAS RADIO: Navy LF rng courses displaced beyond tolerance Use for homing only. (5-1)
MOUNTAIN VIEW, MOFFETT FLD SPECIAL NOTICE: Tfc patn 1500'. Due to hvy jet tfc, acft operg vcnty Moffett Fld ctl zone in VFR or VFR-on-top conditions exercise extreme cuation passing thru control zone at alts below 2000' VFR and below 4000' durg stratus conditions. (1-27)
NEEDLES RADIO: About May 9, TACAN portion VORTAC will be shut down until aprx June 9 - reconstr.
OAKLAND SPECIAL NOTICE: Pilots proposing transbay flt should ascertain that VFR wea exists within both San Francisco and Oakland ctl zones, or should obtain ATC clearance for flt within a ctl zone when wea is less than VFR, since ceiling and visibility mid-bay is frequently less than at the two trmls. Rotg beam ceilometer in opern. Hereafter,

CALIFORNIA: ceiling observations of less than 1500' will usually pertain to the MM lctn. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extsv tfc including jets oper in tfc patn up to 2000'; within 1.7 nmi radius of fld. Exercise extreme caution in these areas. (10-27) To avoid excessive delays, pilots operg in VFR conditions are reqd to file IFR flt plans with the appropriate cntr or comm stn prior to entering the Oakland area when wea is less than VFR. (11-17) All VFR flts exercise extreme caution when operg in vcnty of Hayward Arpt. Extsv simulated and actual IFR apchs on all apch navigational aids to Oakland Intl Arpt passing in the proximity of Hayward Arpt. (4-26)

OAKLAND RADIO SPECIAL NOTICE: Military acft planning to use VHF communications and proposing IFR flt into Oakland, Alameda NAS or Hayward should contact Oakland Apch Ctl on 118.1 mc, or proposing IFR flt into San Francisco should contact San Francisco Apch Ctl on 118.5 mc. Communications durg IFR flt should not be conducted with Oakland Apch Ctl or San Francisco Apch Ctl utilizing 126.18 mc unless 118.1 or 118.5 mc is not avbl. Due to extreme congestion, 126.18 mc is not considered a suitable communications channel for IFR flt into Oakland, Alameda NAS, Hayward or San Francisco. (10-2)

OAKLAND RADIO: No auto change over eqpmt provided for TACAN. (6-15) Transcribed wea bcst operg on test basis (LFR 362 kc). (4-7) About June 6, TACAN portion of VORTAC will be shut down until aprx July 6, reconstr. (5-2)

★OAKLAND AIR ROUTE TRAFFIC CONTROL CENTER: VHF/DF coverage 40 nmi at MEA excp 020°-050°, 8000'. (1-17) May 6, enroute radar ATC svc provided within area bounded on N by warning area 513; on E by western edge of V199 and V27; on S by warning area 283 and on W by Sunset and Francis Ints. Dptg oceanic flts normally cleared short range to Rainbow Int. (5-7)

OAKLAND, METROPOLITAN-OAKLAND INTL ARPT TOWER: VHF/DF coverage 40 nmi at MEA excp 340°-030°, 6500'; 030°-040°, 7000'. UHF/DF coverage 350°-040°, 7000' at MEA. (5-30)

OAKLAND, METROPOLITAN-OAKLAND INTL ARPT: Rnwy 11-29 clsd constr. Pilots practicing apch use extreme caution, unlgtd and unmrkd conveyor belt 50' high on apch end of rnwy 29. (2-18)

OCEANSIDE RADIO: About May 30, TACAN will be shut down until aprx Jun 30 - reconstr.

ONTARIO INTL ARPT TOWER: Apr 25, ILS LMM and LOM shut down until aprx June 3, relctn glide slope to 750' from apch end of rnwy; MM and LMM 0.6 smi; OM and LOM 7 smi LMM voice comms on 215 kc inop. (4-25)

ONTARIO INTL ARPT: Caution turning on or off rnwy excp txwy ints. Configuration A apch lgts inop. Unlgtd distance mrkr 4-1 2' high erected 75' from both sides rnwy 7-25 at aprx 1000' intervals. (2-24) Transmissometer inop. (4-25)

ONTARIO CHINO SPECIAL NOTICE: Hi-density jet tfc: Pilots on other than IFR clearance should either avoid or use extreme caution when traversing following area within which hi-density jet and reciprocating tfc is operg: from over Pacific Airmotive Arpt via a 135° M heading to Fallbrook, Calif. alts 11,000'MSL and below to the S edge of V64; 4000'MSL and above S of V64 to Fallbrook. Hrs of opern: cont daily. (6-4)

OXNARD RADIO: DMET operg on test basis; channel 19. (4-22)

OXNARD, VENTURA COUNTY ARPT TOWER: About June 1, apch ctl will be implemented on freqs 124.7, 319.2 mc; and twr will oper 24 hrs. (5-2)

G - Guards

FILE FLIGHT PLANS BEFORE TAKE-OFF: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communs channels. These channels should be reserved for essential in-flight communs. All pilots will benefit by following this practice.

EN ROUTE OPERATIONS: Pilots are urged to follow IFR procedures even when operating VFR. See page 52, item 9 and page 73 - Position Reporting, in the Flight Information Manual, Volume 13, dated December 1959.
Check in regularly with FAA Flight Service Stations. The life that might be saved could be your own.

CLOSING OF VFR FLIGHT PLANS: Pilots are urged to file VFR arrival reports with a Flt Serv Station whenever it is practical to do so. This procedure is necessary in order to reduce congestion on control tower communs channels. All pilots will benefit by following this practice.

Failure to close a flight plan may result in a civil penalty because it is a violation of the Civil Air Regulations. More important, needless expense and trouble involved in unnecessary search and rescue missions can be avoided by the proper closing of flight plans.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

RADIO INTERFERENCE(General): You can do your part toward reducing radio interference to aeronautical services from non-aeronautical sources which may be noted during flight if such is reported promptly to a FAA facility (preferably after landing) or to any FCC field office. Reports should state the frequency or channel affected, description of the interference, and the geographical area where the interference was observed. If known, reports should give the apparent cause of the interference such as radio stations, call letters when such can be identified, industrial plants, diathermy machines, power lines, television receivers, etc. Do not report interference caused by normal frequency congestion, i.e., signals from other aircraft using the frequency."

IDENTIFICATION OF AIRCRAFT: Pilots are requested to exercise care that the identification of their aircraft is clearly transmitted in each contact with an ATC facility. Also, pilots should be certain that their aircraft are clearly identified in ATC transmissions before taking action on an ATC clearance. Garbled aircraft identifications in radiotelephone transmissions should never be taken for granted but should always be checked.

FLYING BENEATH AIRSHIPS: All airships operating in the Atlantic Ocean area have the capability of either towing sonar or picking up sea water as ballast. Either operation creates an invisible hazard to other aircraft in that a wire cable extends from the airship to the water in both cases. Therefore, other aircraft should remain well clear of all airships and should not, under any circumstances, fly beneath them when over water.

CIVIL USE OF MILITARY FIELDS: U.S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Directorate of Operations DCS/O, Hqs USAF, Washington 25, D.C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Office of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

WASHINGTON, D.C. AREA-SPECIAL NOTICE: Aircraft operating VFR be alert for all types of tfc from Washington Nat'l Arpt, Bolling AFB, Anacostia NAS, Andrews AFB, Hyde Field and Washington - Virginia Airport. Suggested arrival and departure routes are issued as a guide for all acft operg VFR to maintain a safe, orderly flow of air tfc in the Washington, D.C. area. WASHINGTON NATIONAL ARPT: Northwest: Arrivals proceed well right of Potomac River until Cabin John. Departures proceed well right of Potomac River until past Herndon FM. West: Arrivals proceed well right of U.S. Route 29 until past Falls Church. Departures proceed well right of U.S. Route 29 until past Centerville. Southwest: Arrivals proceed on the right side of Potomac River until past Mount Vernon, then via the river to the Washington Range. Departures proceed well right of Potomac River until past Occoquan River. Southeast: Arrivals proceed via Charlotte Hall-Waldorf-Fort Washington. Departures proceed via Fort Washington-La Plata. Caution: Jet Penetration Route 187° radial of Andrews VOR crossing Andrews LFR at 1500'. East: Arrivals proceed from Shadyside via Andrews LFR to Fort Washington, avoid Andrews AFB Ctl Zone. Caution: Jet departures from Andrews AFB make their climb out on the 060° radial of the Andrews VOR. Northeast: Arrivals proceed well right of the Washington-Baltimore Parkway until past Beltsville, then NW of the city to Chain bridge. Departures proceed well right of the Washington-Baltimore Parkway until past Beltsville Airport. All acft flying in VFR conditions departing or arriving Washington National are requested to remain well clear of the Andrews AFB Ctl Zone, Bolling AFB and the Anacostia NAS VFR Corridors. ANACOSTIA/BOLLING AIRPORTS: VFR air tfc operg to and from Anacostia and Bolling AFB shall proceed to and from the local tfc patterns via established air corridors. North Corridor: Two miles wide extending from the Anacostia N boundary along the SE bank of the Anacostia River to a point on the E bank abeam of the Riverdale Rdo Bcn. Departures from both fields proceed via the corridor at 1500' MSL. Arrival tfc from N and NE enter the corridor E of the Anacostia River and abeam of the Riverdale Rdo Bcn at 2000' MSL. South Corridor: Two miles wide aligned along a 165/345° magnetic track from the Bolling Rdo Bcn to a point 1-1/2 miles E of Fort Washington Inlet. Departures will proceed at 1500' MSL until past Fort Washington. Arrivals will maintain 2000' MSL. Military pilots are requested not to exceed 160 knots IAS, while in the corridors. (9-9)

JET ACROBATIC AREAS - VICINITY WASHINGTON, D.C. - Acrobatic maneuvers by jet aircraft are conducted daily, VFR daylight hours only, between the altitudes of 10,000' and 20,000' MSL inclusive, within the following areas:

Area #1: The uncontrolled portion of that airspace which is bounded on the N by V-174; on the E and SE by B-47 and V-140; and on the S by V-156.

Area #2: The uncontrolled portion of that airspace which is bounded on the N by V-156; on the E by V-140; on the S by V-290; and on the W by V-103.

REGULATIONS OF THE ADMINISTRATOR PART 570: Rules of Washington National Airport-"570.49"-No pilots other than those possessed of at least a private pilot rating or the equivalent shall operate aircraft on the airport."

SIMULTANEOUS VOICE TRANSMISSIONS FROM A SINGLE LOCATION: At several FAA facilities, simultaneous voice transmissions are made from a single location. For example, the New York FSS controls the transmitters at Idlewild, La Guardia, Newark, Colts Neck, Solberg and Wilton L/MF or VOR facilities.

To provide a uniformly brief announcement, generally for broadcast purposes, the name of the controlling facility, followed by the word AREA will be used, e.g., THIS IS NEW YORK AREA RADIO, etc.

Call from aircraft will be answered using the name of the station as stated by the pilot, e.g., a pilot calling "Newark Radio" will be answered by the New York FSS, "THIS IS NEWARK RADIO, etc."

The word "AREA" signifies that the transmission from the named (controlling) location is emanating simultaneously from one or more remotely controlled facilities, having a different name or names, as indicated in the ANRA Section of the AIRGI and/or applicable RF Charts.

A NOTAM will be issued from those facilities affected by the foregoing when the change to this procedure is made.

PENETRATION OF RESTRICTED AREAS: Unauthorized flight is not permitted within a Restricted Area during the time of use and between the altitudes noted in the tabulation on the back of Sectional Aeronautical Charts issued by the U.S. Coast and Geodetic Survey or in the Flight Information Manual. Application for flight authorization should be made to the controlling agency.

"SHUT DOWN" OR "UNUSABLE" NAVIGATIONAL FACILITIES: Navigational Facilities which are notamed as being "shut down," or radials of a VOR notamed as "unusable" should not be utilized for navigational purposes. Pilots planning IFR flights should check all available information during pre-flight planning to ensure their proposed flight plan will not require use of facilities during the period of "shut down," as Air Traffic Control will be unable to approve such flight plans. During periods of prolonged "shut down," "revised MEA's and/or alternate routes are established for designated airways, utilizing adjacent facilities. This information is contained in appropriate NOTAMS and the Airman's Guide.

TRANSCRIBED WEATHER BROADCASTS: Equipment is being provided at selected FAA FSS by which meterological and Notice to Airmen data will be recorded on tapes and broadcast continuously over the low-freqnency (200-400 kc) navigational aid (L/MF range or H facility.)

Broadcasts are made from a series of individual tape recordings. The first three tapes identify the station, give general wea conditions in the area, pilot reports (PIREP) and radar reports, when available, and winds aloft data. The remaining tapes contain weather at selected locations within a 400 mile radius of the central point. Changes, as they occur, are transcribed onto the tapes.

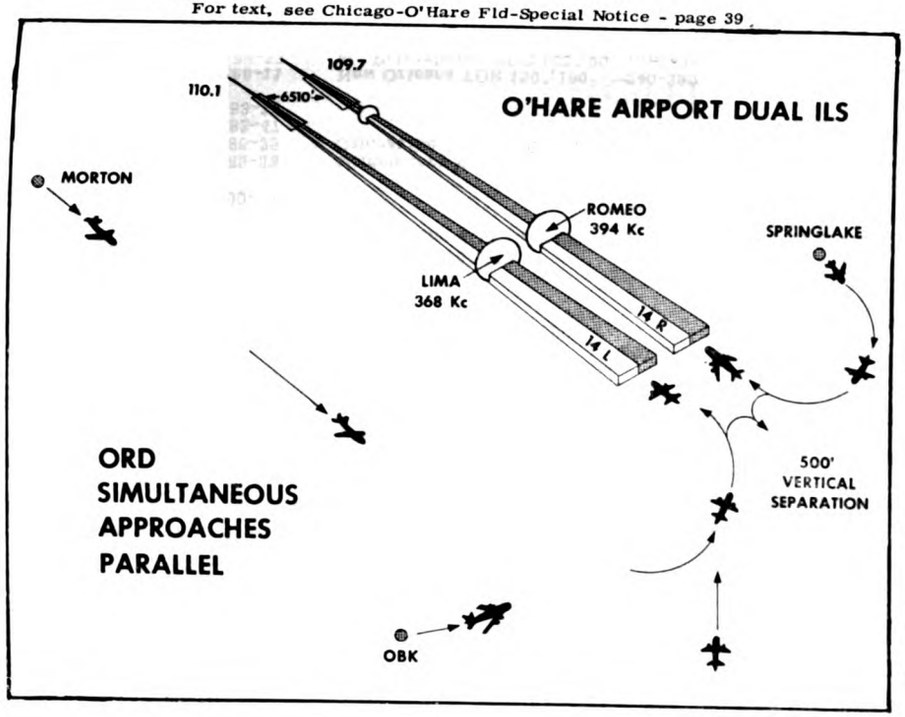
Transcribed weather broadcasts are presently being made at the following locations as indicated:

Location	Freq.
Chicago, (Joliet), Ill.	350 kc, 257 kc
Indianapolis, Ind.	266 kc
Los Angeles, Calif.	332 kc
New York, N.Y.	209 kc
Washington, D.C.	332 kc
Boston, Mass.	382 kc
Cleveland, Ohio	344 kc
Denver, Colo.	379 kc
Fort Worth, Texas	365 kc
Pittsburgh, Penna.	254 kc
Boise, Idaho	359 kc
Cincinnati, Ohio	335 kc
Wichita, Kansas	332 kc
Milwaukee, Wisconsin	242 kc
Minneapolis, Minnesota	266 kc

*Operating on test basis.

INTERFERENCE TO AIRCRAFT COMMUNICATIONS AND NAVIGATION EQUIPMENT: Several reports have recently been received involving interference to aircraft communications navigation and integrated flight instrumentation systems. This interference has been traced directly to passenger operated portable recorders and radio receivers. The interference, in some cases, resulted in the oscillation of the glide slope and VOR indicator needles. While all reports received to date have come from the airlines, it is recognized that many unreported cases may exist as any aircraft equipped with electronic devices is susceptible to this type of interference.

Due to the seriousness of interference of this nature and pending further investigation and resolution of the problem, the Federal Aviation Agency strongly urges that action be taken by all aircraft operators to preclude the use of such portable electronic devices during flight. To assist in the resolution of this problem, detailed reports of any instances of interference of this nature should be forwarded to the Federal Aviation Agency, Washington 25, D.C. (Attention: W-200).



(This does not apply to hearing aids)

change to this procedure is made.

taken by all aircraft operators to preclude the use of such portable electronic devices during flight. To assist in the resolution of this problem, detailed reports of any instances of interference of this nature should be forwarded to the Federal Aviation Agency, Washington 25, D. C. (Attention: W-200).

(10 May 1960)

For text, see Chicago-O'Hare Fld-Special Notice - page 39

PREFERRED ROUTES BETWEEN METROPOLITAN AREAS - Effective May 12, 1959 a complete list of preferred routes between major metropolitan areas will be published at periodic intervals in the Airman's Guide. The effective date of the published list and the date the next complete list is scheduled for publication will be provided.

Pilots are requested to use the preferred routes when filing IFR flight plans whenever possible. These routes have been developed to increase the efficiency of the air traffic control system.

1. Pilots can normally expect to receive clearance via the routes listed, thereby simplifying flight planning.
2. Considerable reduction in air/ground communication will ensue.
3. Departure and en route delays will be reduced.

Only those routes which are essential to achieve the above objectives have been included. Frequent review will be made to maintain accuracy of these routes on a national basis. Necessary revisions will be published in each issue of the Airman's Guide. Pilots are requested to make ink corrections to the last published list and retain and use, until a complete revised list is published.

VOR RECEIVER CHECK POINTS: The following means are available for checking the accuracy of VOR receivers: radiated test signals, airborne check points and ground check points. Pertinent details on the radiated signals and a tabulation of the check points (by facility, including complete location of the check points) will be found on pages 15-25 of the Flight Information Manual, Vol. 13, dated December 1959. As required, amendments to the radiated signals or check points are carried in the Airman's Guide under the heading "Flight Information Manual Corrections." Likewise, the radiated signals and the list of airports at which check points are located (tabulated by city and airport but without the specific details on the check points) are carried in the Airman's Guide from time to time.

USAF HIGH ALTITUDE AIR REFUELING AREAS (SAC/TAC)

USAF jet aircraft have implemented, on a continuing basis, high altitude refueling operations in the areas described below, and at the altitudes and times specified for each area. During the scheduled refueling period, other IFR traffic will not be cleared through an active refueling area unless the refueling aircraft and the aircraft proposing to traverse the area can be provided radar separation by the FAA. Additional refueling areas on the east coast will be published in the near future. Effective date of changes (which are indicated by ✓) is May 22, 1960.

ALTIMETER SETTINGS - VFR FLIGHTS: In order to maintain proper separation between IFR and VFR cruising altitudes, it is essential that VFR pilots keep altimeters corrected in accordance with altimeter setting issued by nearest weather reporting station. Current altimeter settings are available to VFR pilots from FAA Flight Service Stations, Airport Traffic Control Towers, and aviation broadcasts.

CAUTION-AIRCRAFT ARRESTING BARRIERS AT JOINT USE MILITARY/CIVIL AIRPORTS: Aircraft Arresting Barriers are installed at some joint use military/civil airports. Pilots, particularly those of the light propeller driven category of aircraft are advised to operate with caution while operating near or over a lowered barrier. Aircraft operations at minimum practical power settings and taxi speeds are recommended until clear of the arresting barrier system.

NAVIGATIONAL WARNING - USAF OPERATION "OIL BURNER": USAF (Strategic Air Command) is conducting low level navigational flights in B-47 and B-52 jet acft in both VFR and IFR weather conditions within 10 statute miles either side of the centerline of the routes on the following pages, and at the alts specified therein. At the termination of the low level flights, the acft climb to alts between 4000 and 22,000 feet MSL for simulated bomb runs on a target, which is located in the vicinity of a Radar Bomb Scoring site. The low alt simulated bomb run is referred to as a "Short Look;" the intermediate alt one as a "Long Look." "Oil Burner" flights are conducted during both the hours of daylight and darkness, only during the times specified for each route.

low level flights, the acft climb to alts between 4000 and 22,000 feet MSL for simulated bomb runs on a target, which is located in the vicinity of a Radar Bomb Scoring site. The low alt simulated bomb run is referred to as a "Short Look." The "Long Look," "Oil Burner" flights are conducted during both the hours of daylight and darkness, only during the times specified for each route.

(10 May 1960)

SPECIAL NOTICE
OIL BURNER
ROUTE WALNUT GROVE
EFFECTIVE MAY 2, 1960

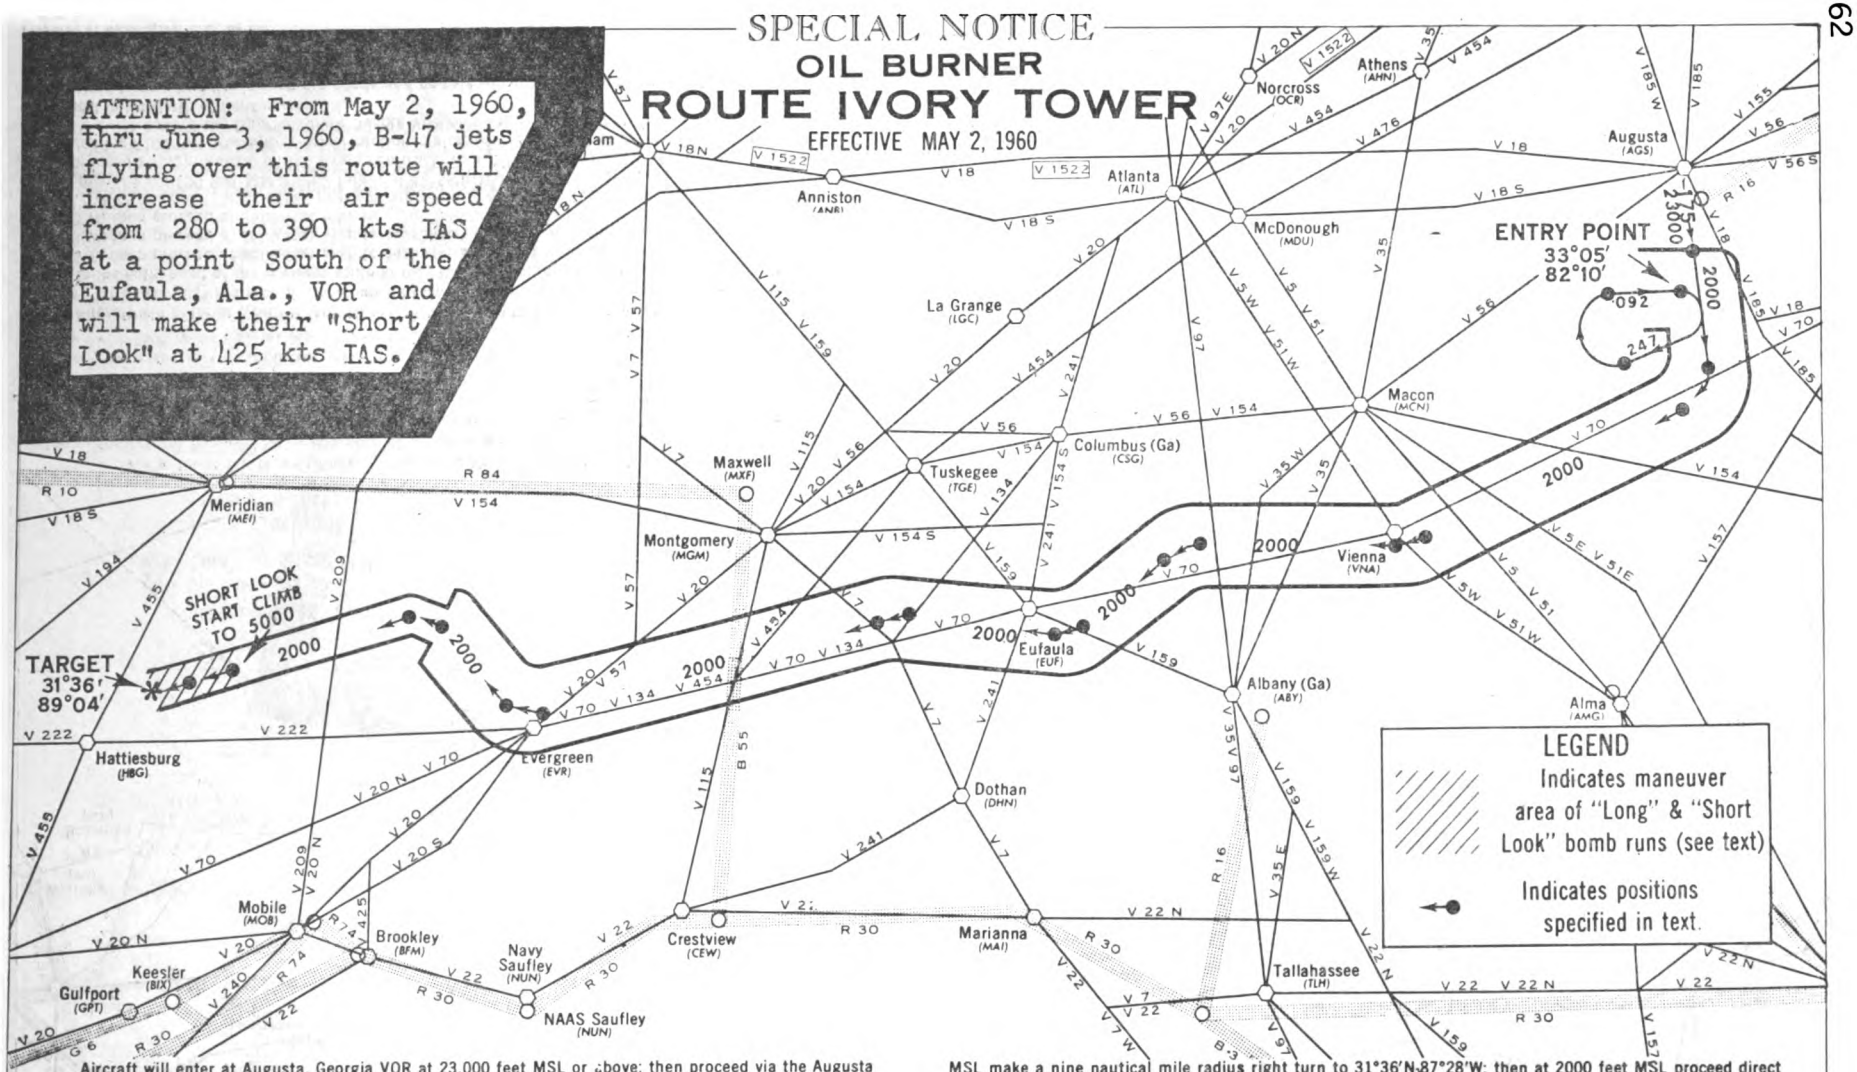
ATTENTION: From May 2, 1960, thru June 3, 1960, B-47 jets flying over this route will increase their airspeed from 280 to 390 kts IAS at a point West of the Huron, S.Dak. VOR and will make their "Short Look" at 425 kts IAS.

Aircraft will enter at North Platte, Nebraska VOR at 20,000 feet MSL or above; then proceed via the North Platte VOR 002° radial at assigned altitude until 26 nautical miles North; then descend to 4500 feet MSL to the entry point of the low level route at 42°11'N-99°35'W; then proceed at 4500 feet MSL to 43°44'N-99°45'W; then proceed at 4500 feet MSL to 44°38'N-99°05'W; then proceed at 3500 feet MSL to 45°18'N-99°51'W; then proceed at 3500 feet MSL to 46°30'N-99°18'W; then proceed at 3500 feet MSL to 46°56'N-99°18'W; then proceed at 3500 feet MSL to 47°03'N-99°30'W; then proceed at 3500 feet MSL to 46°59'N-100°17'W. At this point "Short Look" missions will climb to 6100 feet MSL and level off at 46°57'N-100°31'W; then proceed at 6100 feet MSL to the target at 46°56'N-100°39'W. After the simulated bomb run, aircraft will proceed straight ahead, on the bomb run track, to a point ten (10) nautical miles West of the target maintaining 6100 feet MSL until clear of controlled airspace. When clear of controlled airspace, aircraft will start a climb toward the Dupree, South Dakota VOR so as to reach flight level 260 at a point fifteen (15) nautical miles North of the Dupree VOR.

Only "Short Look" missions are conducted on this route. The hours of operation on this route are 0000Z to 1600Z Tuesday through Saturday.

Prepared at Washington, D.C., by the U.S. Coast and Geodetic Survey

(10 May 1960)



SPECIAL NOTICE

OIL BURNER

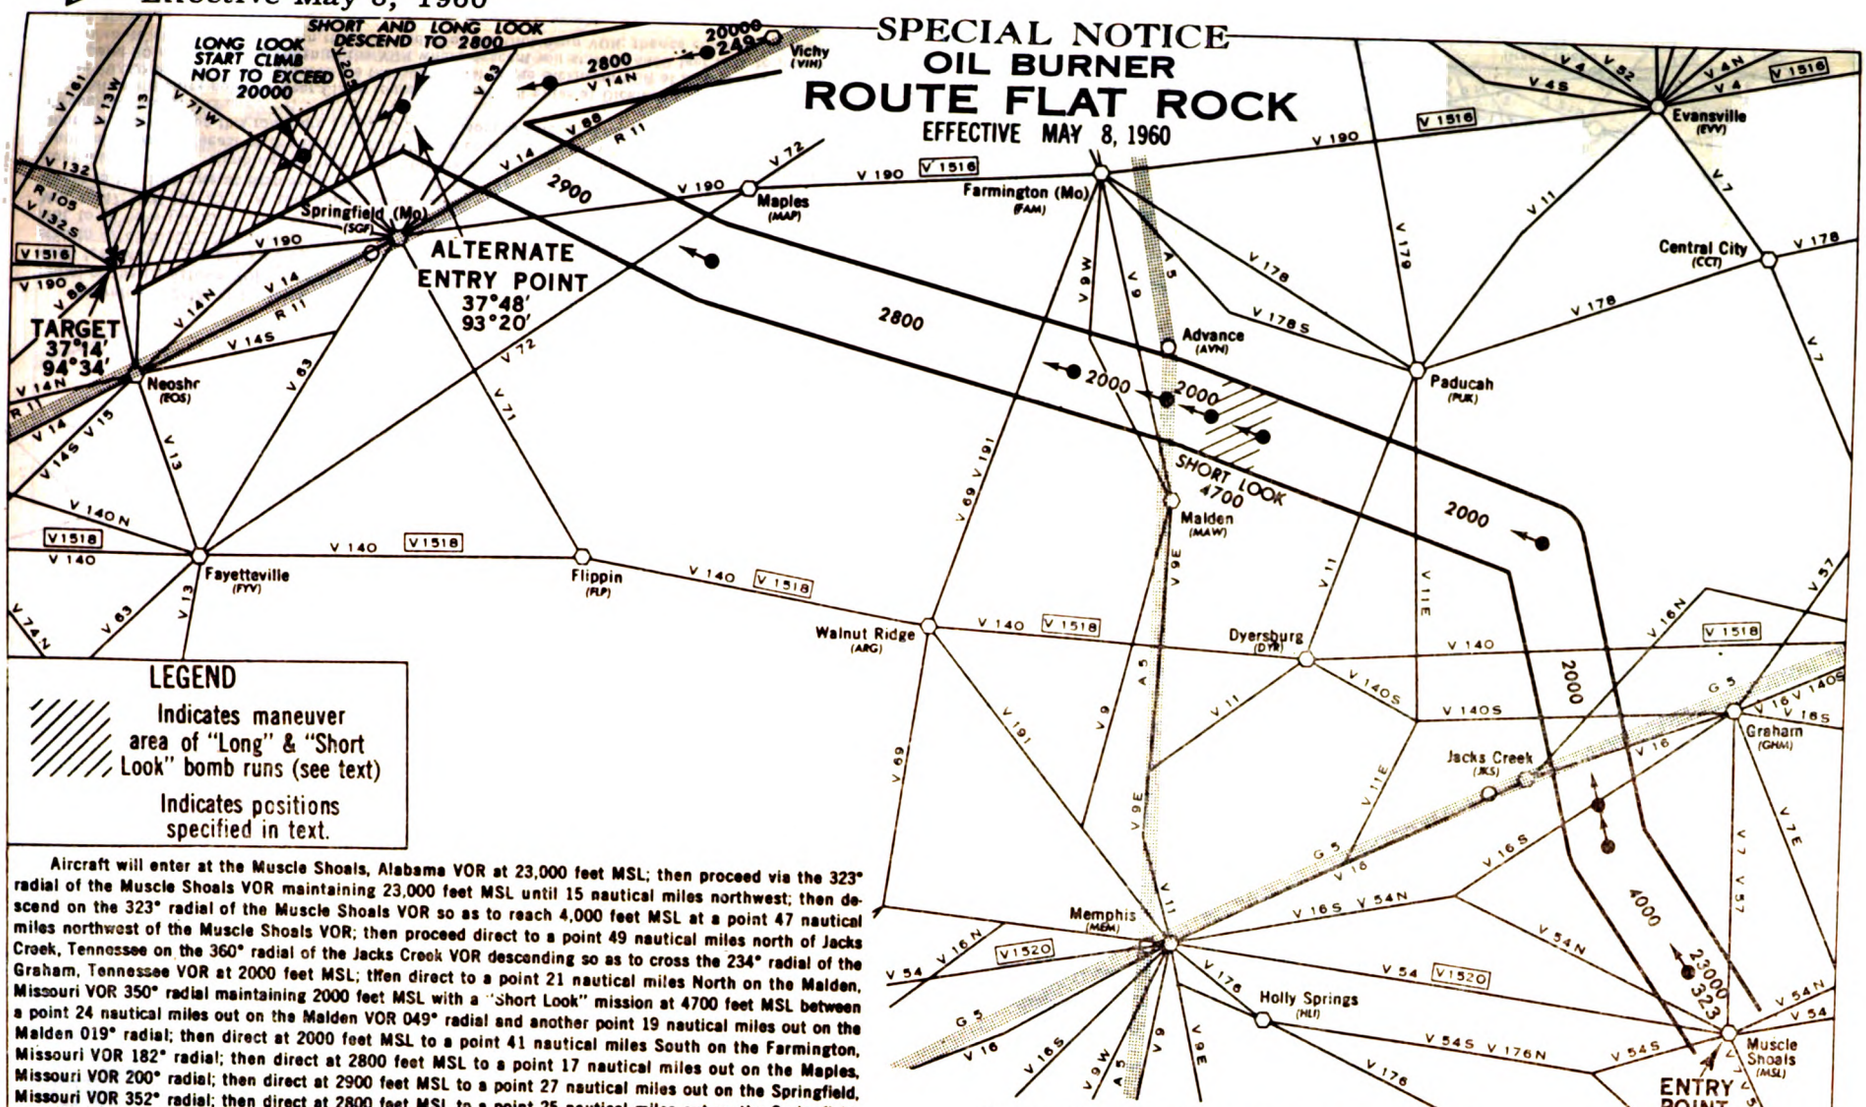
ROUTE IVORY TOWER

EFFECTIVE MAY 2, 1960

ATTENTION: From May 2, 1960, thru June 3, 1960, B-47 jets flying over this route will increase their air speed from 280 to 390 kts IAS at a point South of the Eufaula, Ala., VOR and will make their "Short Look" at 425 kts IAS.

Aircraft will enter at Augusta, Georgia VOR at 23,000 feet MSL or above; then proceed via the Augusta VOR 175° radial at assigned altitude until 20 nautical miles South, then start a descent to 2000 feet MSL. At 30 nautical miles South, aircraft will start a right standard rate turn to a true course of 247° to 32°49'N-82°26'W; then start a right standard rate turn to a true course of 092° at 33°06'N-82°30'W to the entry point of the low level route at 33°05'N-82°10'W, and at 2000 feet MSL, turn right to intercept the 175° radial of the Augusta VOR to 32°47'N-82°04'W. Aircraft will then make a nine nautical mile radius right turn to 32°37'N-82°12'W at 2000 feet MSL; then proceed at 2000 feet MSL Southwest along the South edge of Victor Airway 70 to 32°10'N-83°25'W; then at 2000 feet MSL, make a nine nautical mile radius right turn to 32°09'N-83°30'W; then at 2000 feet MSL, proceed direct to 32°09'N-84°25'W; then at 2000 feet MSL, make a nine nautical mile radius left turn to 32°07'N-84°32'W, then at 2000 feet MSL proceed direct to 31°53'N-84°54'W; then at 2000 feet MSL, make a nine nautical mile radius right turn to 31°51'N-85°01'W, then at 2000 feet MSL proceed direct to 31°54'N-85°46'W; then at 2000 feet MSL, make a nine nautical mile radius left turn to 31°54'N-85°49'W; then at 2000 feet MSL proceed direct to 31°34'N-87°18'W; then at 2000 feet MSL make a nine nautical mile radius right turn to 31°36'N-87°28'W; then at 2000 feet MSL proceed direct to 31°53'N-87°46'W; then at 2000 feet MSL make a nine nautical mile radius left turn to 31°55'N-87°55'W; then proceed at 2000 feet MSL to 31°43'N-88°43'W. At this point, "Short Look" missions will start a climb so as to reach 5000 feet MSL at 31°39'N-88°55'W; then at 5000 feet MSL proceed direct to the target at 31°36'N-89°04'W.

After the simulated bomb run, aircraft will proceed straight ahead, on the bomb run track, and climb to 6000 feet MSL. Upon reaching 6000 feet MSL, aircraft will make a right turn to a true course of 106° and maintain 6000 feet MSL until past the 180° radial of the Meridian, Mississippi VOR; then start a climb to 22,000 feet MSL proceeding direct to the intersection of the McComb, Mississippi VOR 068° radial and the Meridian VOR 160° radial; then continue climbing in a non-standard, one minute holding pattern (making all turns to the left) Southwest of the intersection on the 068° radial of the McComb VOR.



Only "Short Look" missions are conducted on this route. The hours of operation on this route are 0000Z to 1600Z Tuesday through Saturday.

ROUTE FLAT ROCK
EFFECTIVE MAY 8, 1960

LEGEND

Indicates maneuver area of "Long" & "Short Look" bomb runs (see text)

Indicates positions specified in text.

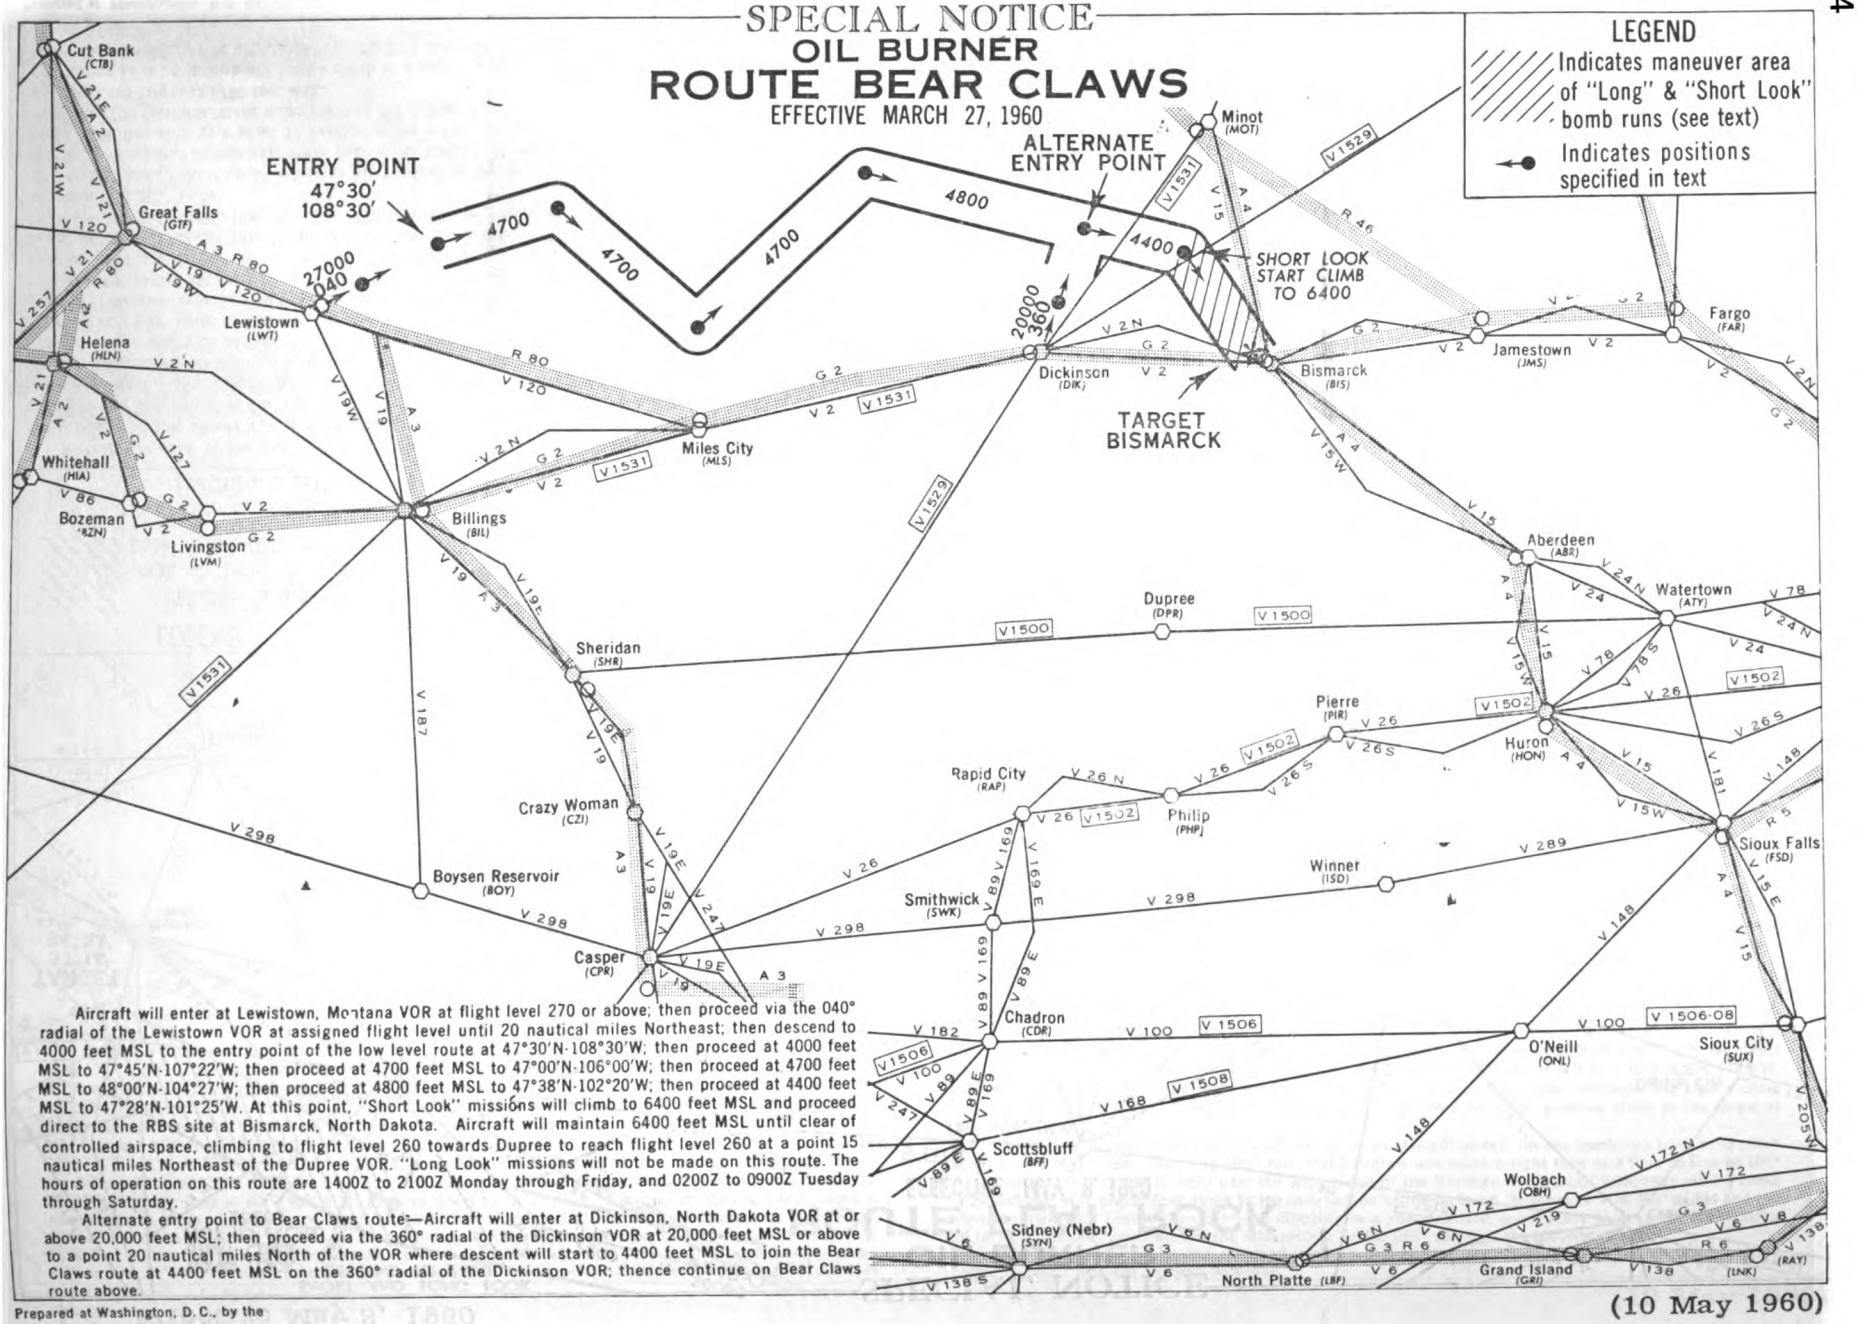
Aircraft will enter at the Muscle Shoals, Alabama VOR at 23,000 feet MSL; then proceed via the 323° radial of the Muscle Shoals VOR maintaining 23,000 feet MSL until 15 nautical miles northwest; then descend on the 323° radial of the Muscle Shoals VOR so as to reach 4,000 feet MSL at a point 47 nautical miles northwest of the Muscle Shoals VOR; then proceed direct to a point 49 nautical miles north of Jacks Creek, Tennessee on the 360° radial of the Jacks Creek VOR descending so as to cross the 234° radial of the Graham, Tennessee VOR at 2000 feet MSL; then direct to a point 21 nautical miles North on the Malden, Missouri VOR 350° radial maintaining 2000 feet MSL with a "Short Look" mission at 4700 feet MSL between a point 24 nautical miles out on the Malden VOR 049° radial and another point 19 nautical miles out on the Malden 019° radial; then direct at 2000 feet MSL to a point 41 nautical miles South on the Farmington, Missouri VOR 182° radial; then direct at 2800 feet MSL to a point 17 nautical miles out on the Maples, Missouri VOR 200° radial; then direct at 2900 feet MSL to a point 27 nautical miles out on the Springfield, Missouri VOR 352° radial; then direct at 2800 feet MSL to a point 25 nautical miles out on the Springfield, Missouri VOR 300° radial.

At this point "Short Look" missions will proceed to the target at 37°14'N-94°34'W, maintaining 2800 feet MSL to a point 38 nautical miles out on the Neosho, Missouri VOR 013° radial, then climb so as to reach 3500 feet MSL by a point 32 nautical miles out on the Neosho, Missouri VOR 004° radial, to start a climb to 4700 feet MSL three miles north of the Joplin, Missouri low frequency beacon (Waco intersection) and cross the target at 4700 feet MSL.

"Long Look" missions will start a climb at a point 25 nautical miles out on the Springfield VOR 300° radial to a predetermined altitude, above the RBS site as filed in the flight plan. This altitude will never exceed 20,000 feet MSL.

After completing the simulated bomb runs, both "Short Look" and "Long Look" missions will proceed to Bartlesville, Oklahoma VOR, maintaining bombing altitude. Normally aircraft will be routed by ATC via the Tulsa, Oklahoma VOR.

The hours of operation on this route are 0200Z to 1400Z Tuesday through Saturday.



Alternate Entry Point-Aircraft will enter at Vichy, Missouri, VOR at or above 20,000 feet MSL, then proceed via the 249° radial of the Vichy VOR at 20,000 feet MSL or above to a point 15 nautical miles southwest of Vichy VOR where descent will start to 2,800 feet MSL, reaching 2,800 feet MSL at a point 46 nautical miles out on the 034° radial of the Springfield, Missouri, VOR thence via the 249° radial of Vichy VOR to a point 27 nautical miles out on the 352° radial of the Springfield VOR at 37°48'30"N-93°20'W thence continue on Flat Rock route.

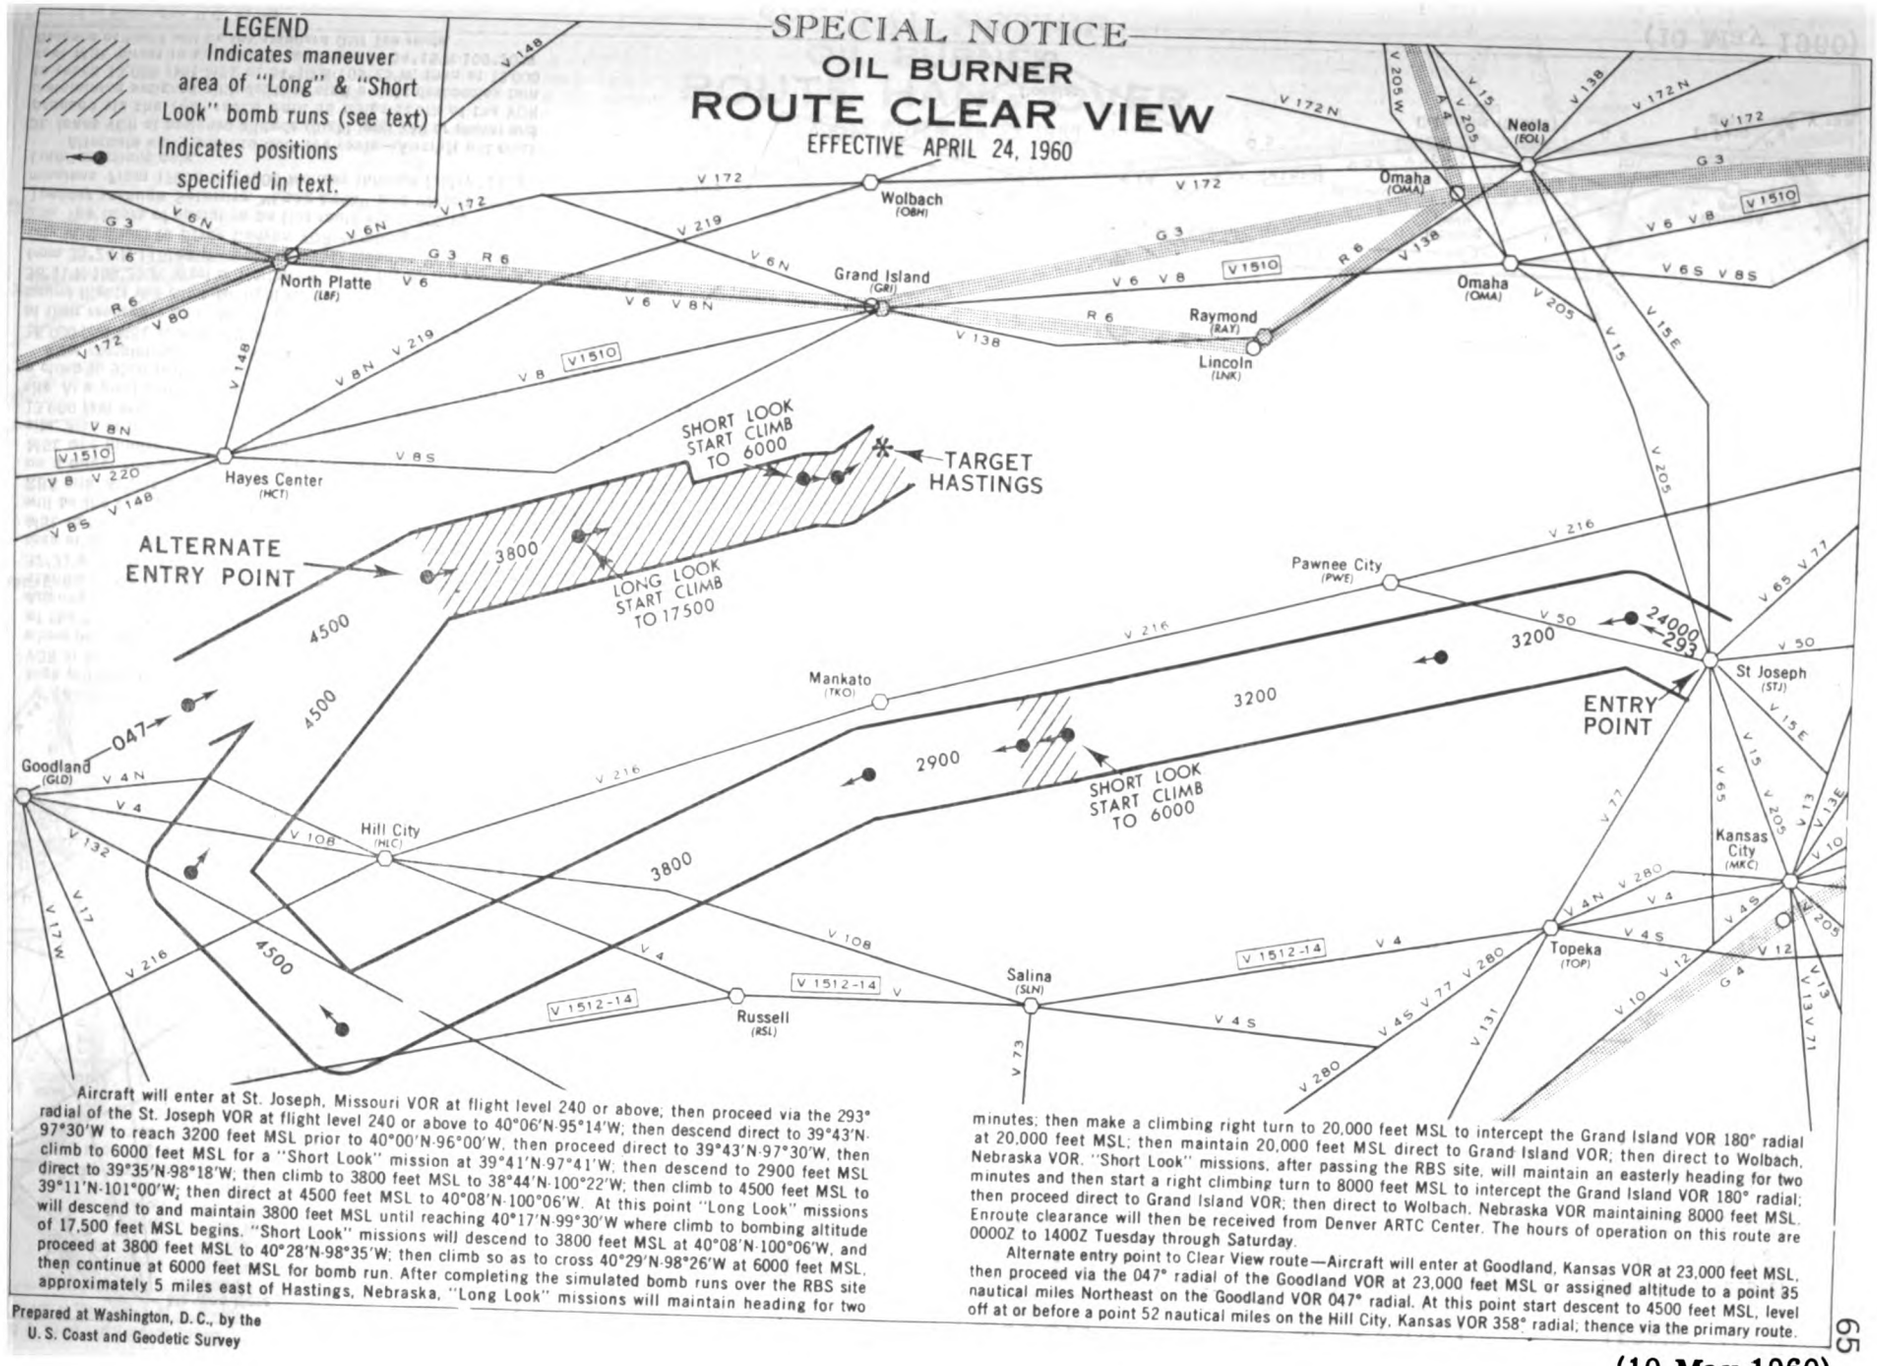
U. S. Coast and Geodetic Survey

SPECIAL NOTICE

OIL BURNER
ROUTE BEAR CLAWS

EFFECTIVE MARCH 27, 1960

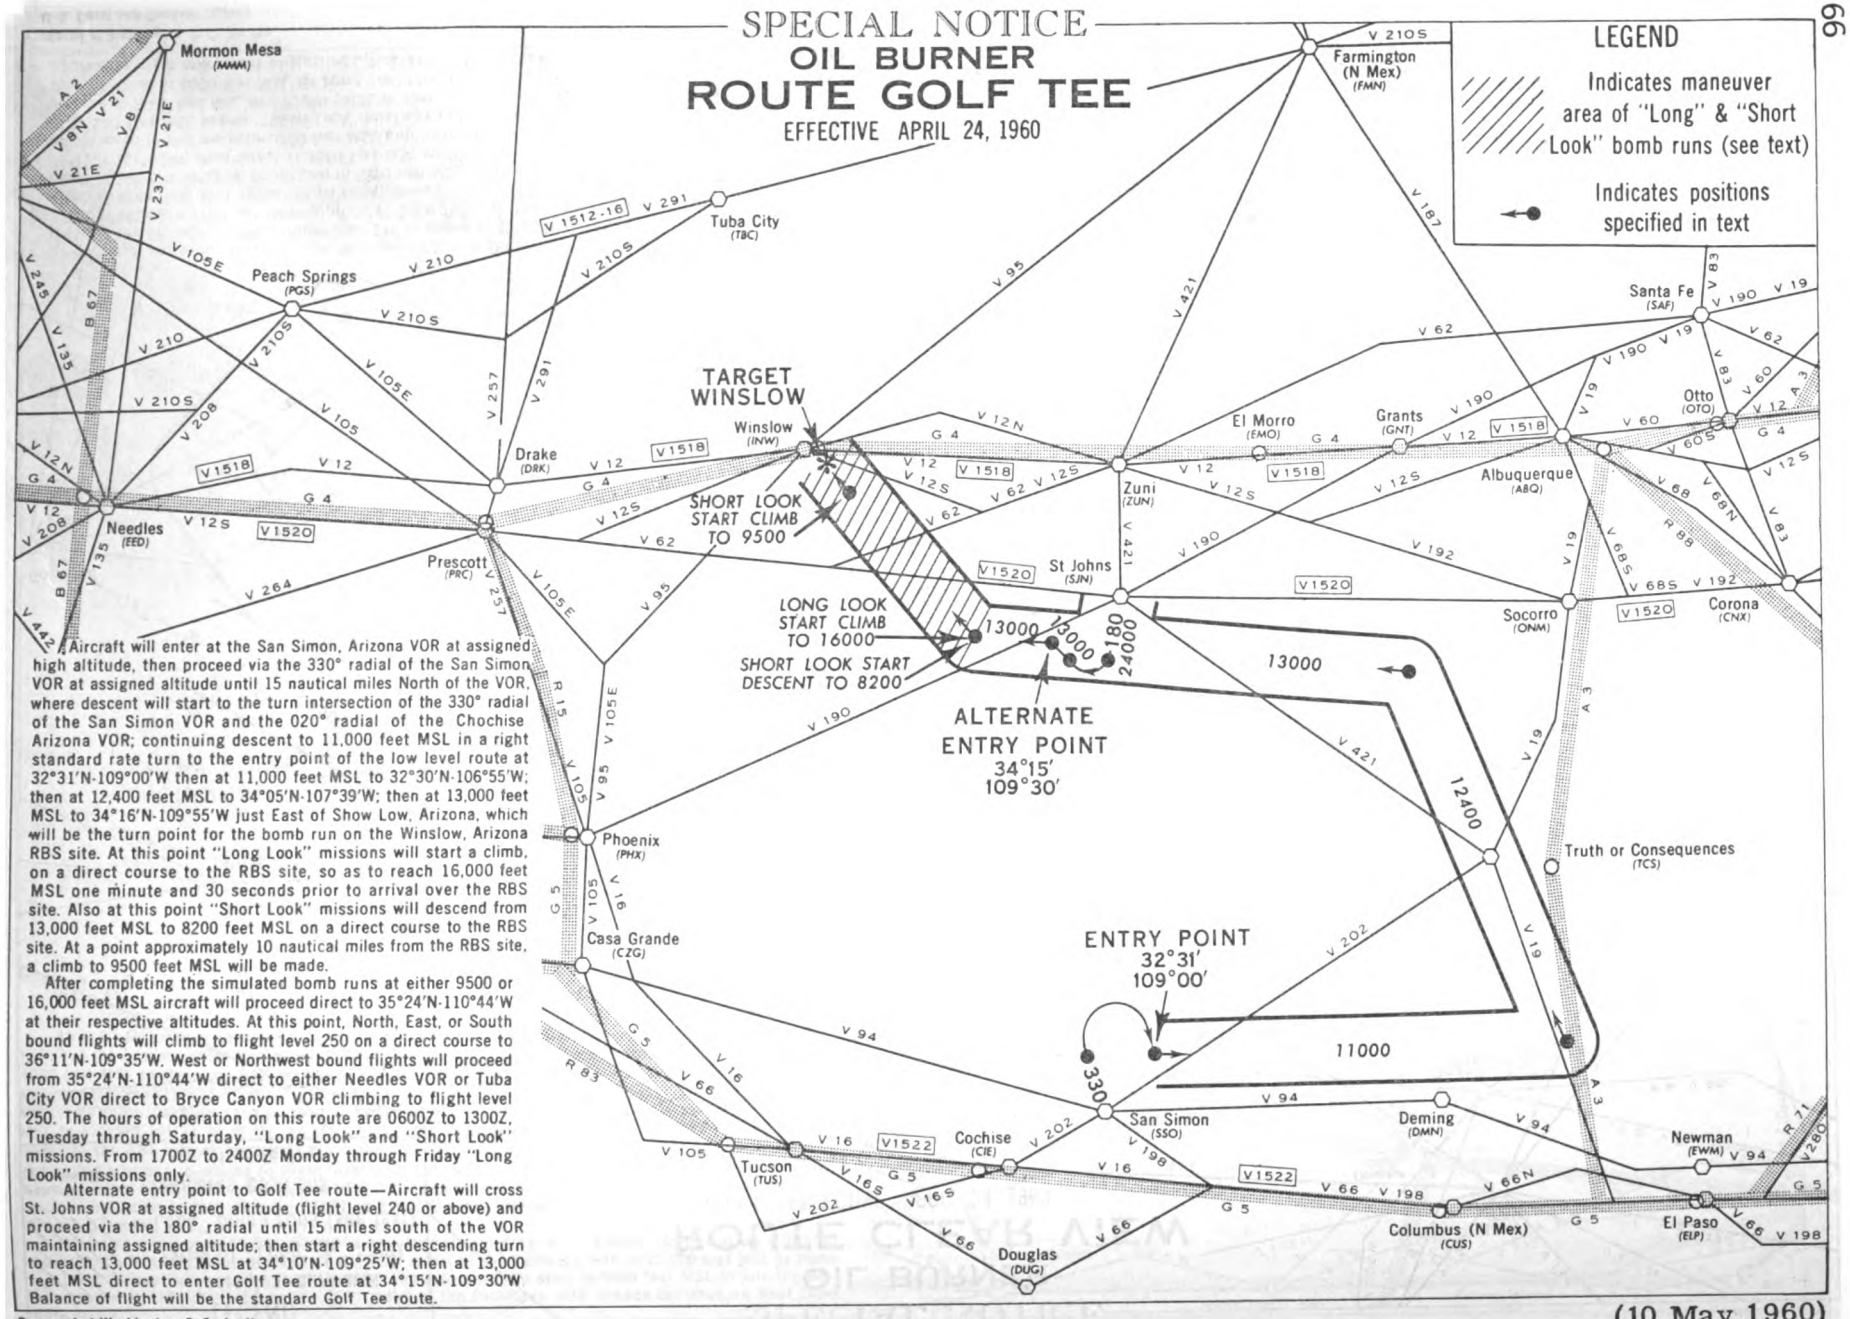


Aircraft will enter at Lewistown, Montana VOR at flight level 270 or above; then proceed via the 040° radial of the Lewistown VOR at assigned flight level until 20 nautical miles Northeast; then descend to 4000 feet MSL to the entry point of the low level route at 47°30′N-108°30′W; then proceed at 4000 feet MSL to 47°45′N-107°22′W; then proceed at 4700 feet MSL to 47°00′N-106°00′W; then proceed at 4700 feet MSL to 48°00′N-104°27′W; then proceed at 4800 feet MSL to 47°38′N-102°20′W; then proceed at 4400 feet MSL to 47°28′N-101°25′W. At this point, "Short Look" missions will climb to 6400 feet MSL and proceed direct to the RBS site at Bismarck, North Dakota. Aircraft will maintain 6400 feet MSL until clear of controlled airspace, climbing to flight level 260 towards Dupree to reach flight level 260 at a point 15 nautical miles Northeast of the Dupree VOR. "Long Look" missions will not be made on this route. The hours of operation on this route are 1400Z to 2100Z Monday through Friday, and 0200Z to 0900Z Tuesday through Saturday.

Alternate entry point to Bear Claws route—Aircraft will enter at Dickinson, North Dakota VOR at or above 20,000 feet MSL; then proceed via the 360° radial of the Dickinson VOR at 20,000 feet MSL or above to a point 20 nautical miles North of the VOR where descent will start to 4400 feet MSL to join the Bear Claws route at 4400 feet MSL on the 360° radial of the Dickinson VOR; thence continue on Bear Claws route above.

Prepared at Washington, D. C., by the U. S. Coast and Geodetic Survey

(10 May 1960)



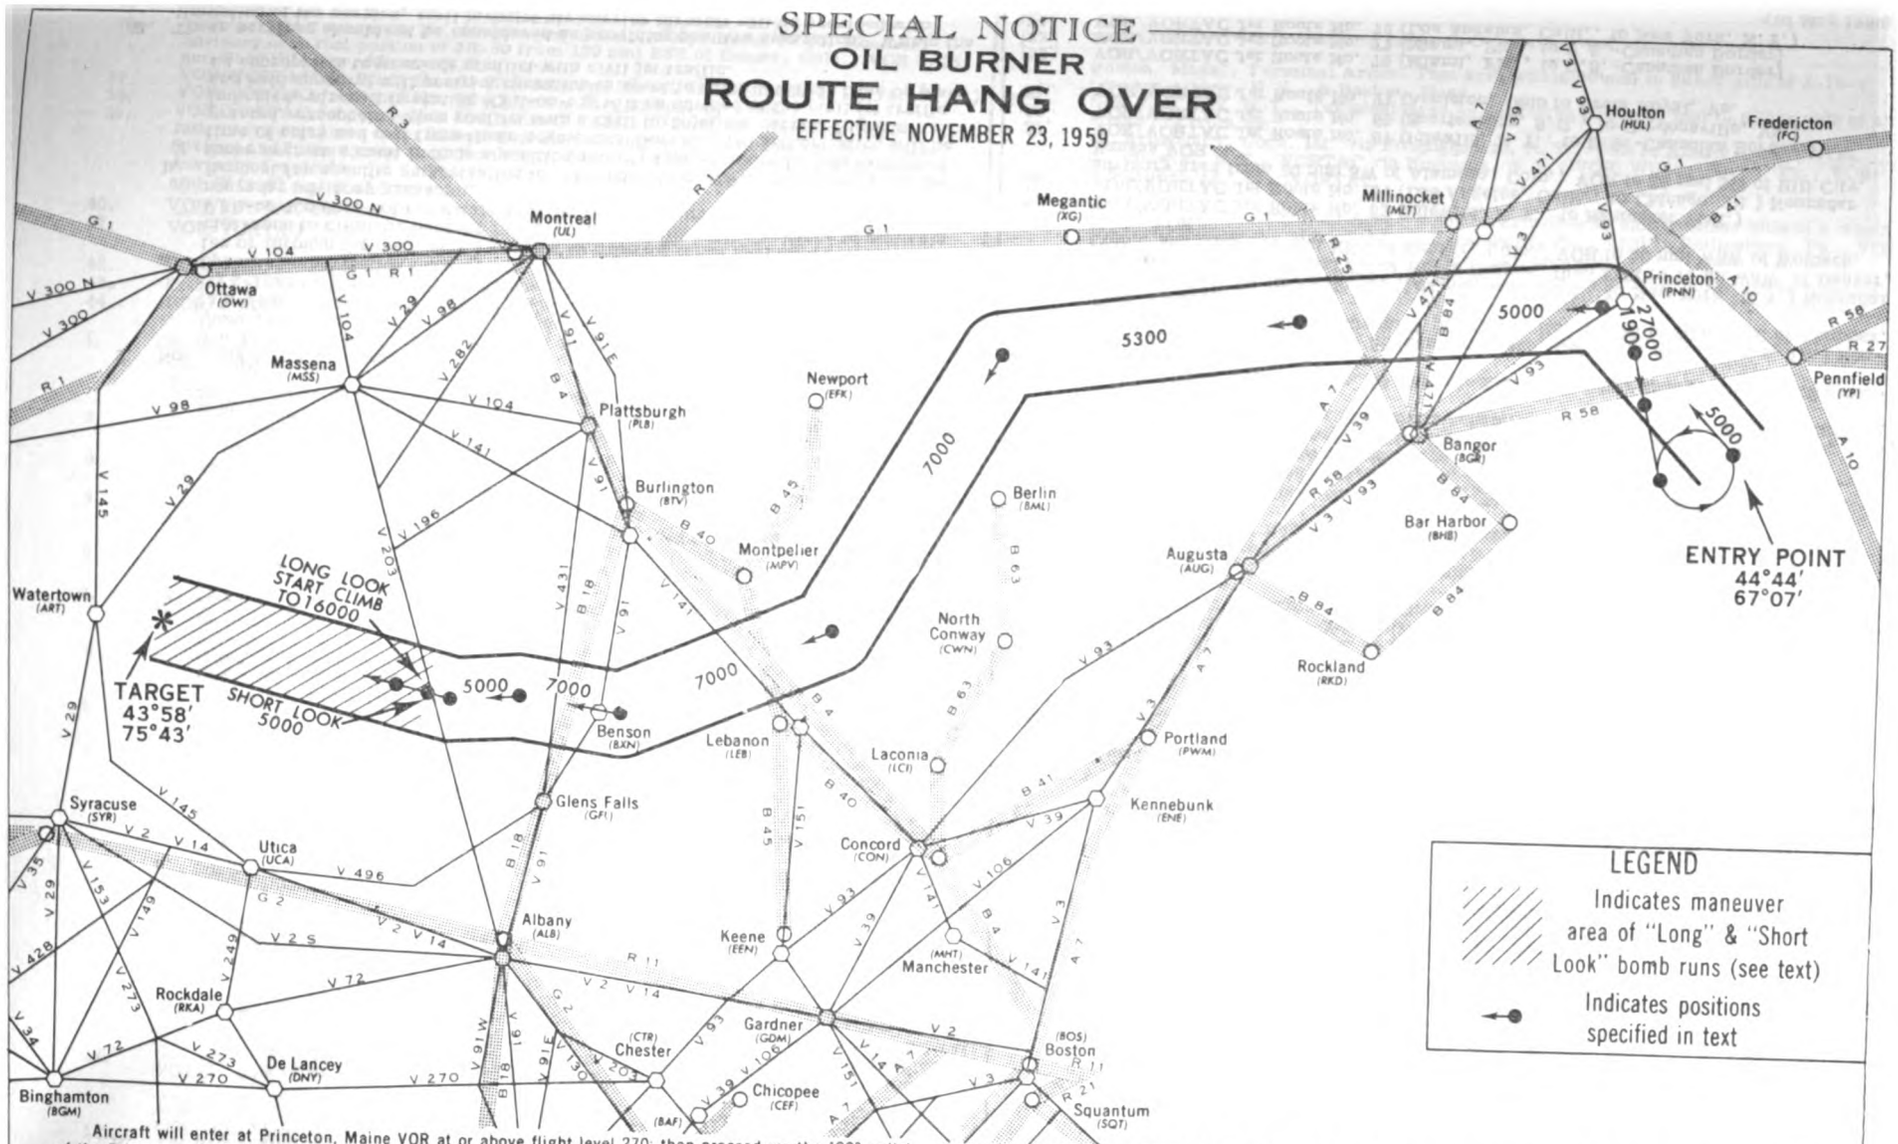
Aircraft will enter at St. Joseph, Missouri VOR at flight level 240 or above; then proceed via the 293° radial of the St. Joseph VOR at flight level 240 or above to 40°06'N-95°14'W; then descend direct to 39°43'N-97°30'W to reach 3200 feet MSL prior to 40°00'N-96°00'W, then proceed direct to 39°43'N-97°30'W, then climb to 6000 feet MSL for a "Short Look" mission at 39°41'N-97°41'W; then descend to 2900 feet MSL direct to 39°35'N-98°18'W; then climb to 3800 feet MSL to 38°44'N-100°22'W; then climb to 4500 feet MSL to 39°11'N-101°00'W; then direct at 4500 feet MSL to 40°08'N-100°06'W. At this point "Long Look" missions will descend to and maintain 3800 feet MSL until reaching 40°17'N-99°30'W where climb to bombing altitude of 17,500 feet MSL begins. "Short Look" missions will descend to 3800 feet MSL at 40°08'N-100°06'W, and proceed at 3800 feet MSL to 40°28'N-98°35'W; then climb so as to cross 40°29'N-98°26'W at 6000 feet MSL, then continue at 6000 feet MSL for bomb run. After completing the simulated bomb runs over the RBS site approximately 5 miles east of Hastings, Nebraska, "Long Look" missions will maintain heading for two minutes; then make a climbing right turn to 20,000 feet MSL to intercept the Grand Island VOR 180° radial at 20,000 feet MSL; then maintain 20,000 feet MSL direct to Grand Island VOR; then direct to Wolbach, Nebraska VOR. "Short Look" missions, after passing the RBS site, will maintain an easterly heading for two minutes and then start a right climbing turn to 8000 feet MSL to intercept the Grand Island VOR 180° radial; then proceed direct to Grand Island VOR; then direct to Wolbach, Nebraska VOR maintaining 8000 feet MSL. Enroute clearance will then be received from Denver ARTC Center. The hours of operation on this route are 0000Z to 1400Z Tuesday through Saturday.

Alternate entry point to Clear View route—Aircraft will enter at Goodland, Kansas VOR at 23,000 feet MSL, then proceed via the 047° radial of the Goodland VOR at 23,000 feet MSL or assigned altitude to a point 35 nautical miles Northeast on the Goodland VOR 047° radial. At this point start descent to 4500 feet MSL, level off at or before a point 52 nautical miles on the Hill City, Kansas VOR 358° radial; thence via the primary route.

Prepared at Washington, D.C., by the
U. S. Coast and Geodetic Survey

(10 May 1960)

SPECIAL NOTICE
OIL BURNER
ROUTE GOLF TEE
EFFECTIVE APRIL 24, 1960



Aircraft will enter at the San Simon, Arizona VOR at assigned high altitude, then proceed via the 330° radial of the San Simon VOR at assigned altitude until 15 nautical miles North of the VOR, where descent will start to the turn intersection of the 330° radial of the San Simon VOR and the 020° radial of the Chochise Arizona VOR; continuing descent to 11,000 feet MSL in a right standard rate turn to the entry point of the low level route at 32°31′N-109°00′W then at 11,000 feet MSL to 32°30′N-106°55′W; then at 12,400 feet MSL to 34°05′N-107°39′W; then at 13,000 feet MSL to 34°16′N-109°55′W just East of Show Low, Arizona, which will be the turn point for the bomb run on the Winslow, Arizona RBS site. At this point "Long Look" missions will start a climb, on a direct course to the RBS site, so as to reach 16,000 feet MSL one minute and 30 seconds prior to arrival over the RBS site. Also at this point "Short Look" missions will descend from 13,000 feet MSL to 8200 feet MSL on a direct course to the RBS site. At a point approximately 10 nautical miles from the RBS site, a climb to 9500 feet MSL will be made.

After completing the simulated bomb runs at either 9500 or 16,000 feet MSL aircraft will proceed direct to 35°24′N-110°44′W at their respective altitudes. At this point, North, East, or South bound flights will climb to flight level 250 on a direct course to 36°11′N-109°35′W. West or Northwest bound flights will proceed from 35°24′N-110°44′W direct to either Needles VOR or Tuba City VOR direct to Bryce Canyon VOR climbing to flight level 250. The hours of operation on this route are 0600Z to 1300Z, Tuesday through Saturday, "Long Look" and "Short Look" missions. From 1700Z to 2400Z Monday through Friday "Long Look" missions only.

Alternate entry point to Golf Tee route—Aircraft will cross St. Johns VOR at assigned altitude (flight level 240 or above) and proceed via the 180° radial until 15 miles south of the VOR maintaining assigned altitude; then start a right descending turn to reach 13,000 feet MSL at 34°10′N-109°25′W; then at 13,000 feet MSL direct to enter Golf Tee route at 34°15′N-109°30′W. Balance of flight will be the standard Golf Tee route.

Prepared at Washington, D.C., by the U.S. Coast and Geodetic Survey

(10 May 1960)

Aircraft will enter at Princeton, Maine VOR at or above flight level 270; then proceed via the 190° radial of the Princeton VOR at flight level 270 until 45°08'N 67°39'W. Descent will then be made Southbound on the 190° radial of the Princeton VOR to cross 44°56'N-67°36'W at or above 20,000 feet MSL; then continuing descent to 44°39'N-67°32'W; then start a complete orbit in a left-hand pattern to reach 5000 feet MSL at the entry point of the low level route at 44°44'N-67°07'W; then to 45°19'N-67°49'W at 5000 feet MSL; then to 45°16'N-69°30'W at 5000 feet MSL; then climb to 5300 feet MSL to 45°08'N-71°09'W; then climb to 7000 feet MSL to 44°03'N-72°04'W; then to 43°42'N-73°12'W at 7000 feet MSL; then to 43°45'N-73°45'W at 7000 feet MSL; then descend to 5000 feet MSL to 43°44'N-74°07'W; then to 43°45'N-74°15'W at 5000 feet MSL; then to 43°46'N-74°25'W at 5000 feet MSL; then to the RBS site at 43°58'N-75°43'W. "Long Look" missions will start climb at 43°45'N-74°15'W so as to cross the RBS site at 16,000 feet MSL. "Short Look" missions will maintain 5000 feet MSL from 43°45'N-74°15'W direct to the RBS site. After the simulated bomb runs are completed, "Short Look" missions will make a right turn to the 060° radial of the Watertown, New York VOR to 44°13'N-75°38'W; then climb clear of Victor Airway 29 on the 060° radial of the Watertown VOR to intercept the 296° radial of the Burlington, Vt. VOR at 17,000 feet MSL; then proceed via the 296° radial to cross the 190° radial of the Massena, New York VOR at altitude of 20,000 feet MSL; to cross the 240° radial of the Plattsburgh, New York VOR at flight level 280; then to the Burlington VOR. "Long Look" missions will maintain 16,000 feet MSL, turn right to the 060° radial of the Watertown, New York VOR to 44°13'N-75°38'W; then via the same route and altitudes as "Short Look". The hours of operation on this route are 1830Z-2400Z Monday through Friday and 0000Z-0630Z Tuesday through Saturday

Prepared at Washington, D.C., by the
U.S. Coast and Geodetic Survey

FLIGHT ADVISORY SERVICE IN SPECIFIED AREAS: This service has been established as a means of providing an increased degree of safety for civil turbojet air carrier flights while operating within defined flight advisory areas. The service is performed by certain selected radar equipped facilities and provides the civil turbojet air carrier pilot with information to assist him in avoiding other pertinent traffic. Areas where radar is used to provide advisory service are referred to as "radar advisory areas." Areas within which advisory service is provided without the use of radar are referred to as "nonradar advisory areas." The following procedures applicable to said areas are designated by the Administrator of the Federal Aviation Agency as standing air traffic control instructions:

A. The procedures applicable to all aircraft operating VFR or operating on an ATC clearance to climb or descend in VFR conditions or to maintain VFR-on-top with respect to the radar advisory areas or nonradar advisory areas are defined as follows:

NOTE: The radar advisory areas and nonradar advisory areas and the flight levels comprising these areas are depicted on charts entitled "Flight Information Publication - En Route - High Altitude (U.S.)," published by the Aeronautical Chart and Information Center, Air Photographic and Charting Service(MATS) USAF, and "High Altitude - En Route " published by the U.S. Coast and Geodetic Survey, Washington, D.C.

These charts are available to users through the U.S. Coast and Geodetic Survey.

1. Radar Advisory Areas
   a. No additional operational restriction, control or communication requirement is placed on civil or military flights conducted under visual flight rules (VFR flights or flights cleared to climb or descend in VFR conditions or cleared to maintain VFR-on-top) provided such flights when operated within the areas specified as radar advisory areas from flight level 240 to flight level 390 inclusive are equipped with a functioning radar beacon transponder. Basic Mark X equipped military flights operating within radar advisory areas will adjust transponders to operate on Mode 3. Unless otherwise instructed by air traffic control, Mark X SIF equipped flights will adjust transponder to Mode 3, Code 62, except that ADC flights will adjust transponder to Mode 3, Code 00. Those military flights operating on a mode other than Mode 3 will adjust transponder to operate on Mode 3 and the assigned mode simultaneously. Civil turbojet transponders will be adjusted to reply on Mode A, Code **40**. Other civil aircraft will adjust transponder to reply on Mode A, Code 62.
   b. Any aircraft not equipped with a functioning beacon operating VFR, or cleared to climb or descend in VFR conditions, or cleared to maintain VFR-on-top from flight level 240 to flight level 390, inclusive desiring to operate within radar advisory areas must obtain specific authorization from the appropriate ARTC center prior to the time of entering such areas. ATC clearance to climb or descend in VFR conditions or ATC clearance to maintain VFR-on-top does not constitute specific authorization to operate within or across radar advisory areas without a functioning beacon.
   c. In the event of two-way communications failure which precludes obtaining authorization to operate within radar advisory areas, the pilot may proceed across these routes maintaining an appropriate VFR cruising altitude as specified in CAR 60 or AFR 60-16 for the direction of flight.

2. Nonradar Advisory Areas
   The following operational procedures apply to aircraft operating VFR, as well as those cleared by ATC to climb or descend in VFR conditions or cleared to maintain VFR-on-top, while between flight levels 270 and 310 inclusive with desire to fly across or within those areas specified as nonradar advisory areas.
   a. Specific authorization must be obtained directly from the appropriate ARTC center or through the nearest FSS prior to entering these specified areas. ATC clearance to climb or descend in VFR conditions or ATC clearance to maintain VFR-on-top does not constitute specific authorization to operate within or across nonradar advisory areas.
   b. Request for specific authorization to proceed VFR or VFR-on-top on or across these segments must include a position report, type of aircraft, and estimated time of entry and exit from these segments. Unrestricted authorization will be granted, except that when conflict with a civil turbojet air carrier flight is indicated, aircraft operating VFR-on-top will be advised of the civil jet traffic and said approval will restrict operation to specific flight level(s), time or place as appropriate to preclude conflict with civil jet traffic.

B. These services should not be considered as providing positive separation. Within the limitation of the service, civil turbojet air carrier aircraft will be provided with traffic information. and radar vectors to avoid observed traffic. Consequently, these services do not relieve pilots of their responsibilities to see and avoid other aircraft.

C. Radio and radar failure procedures applicable to civil air carrier turbojet flights while operating within radar advisory areas follow:

   1. In the event of a ground radar failure the pilot will continue in accordance with ATC clearance remaining on the facility's frequency unless otherwise advised;
   2. In the event of loss of communication with a USAF(ADC) radar facility on the designated control frequency the pilot should attempt to re-establish communication with the facility on 121.5 mc. If unable, he should utilize either direct center frequency, the nearest - FSS, or company radio.

The above procedures are applicable to the following jet routes and areas:

1. VOR/VORTAC Jet Route No. 1 (Los Angeles, Calif., to Seattle, Washington)
2. VOR/VORTAC Jet Route No. 2 (Houston, Texas to Lake Charles, La.) (Houston, Texas to New Orleans, La. Effective 5 May 1960.)
3. VOR/VORTAC Jet Route No. 3 (Oakland, Calif., to Spokane, Wash.)
4. VOR/VORTAC Jet Route No. 4 (Los Angeles, Calif., to Phoenix, Ariz.
5. VOR/VORTAC Jet Route No. 8 (Tulsa, Okla., to New York, N.Y.)
6. VOR/VORTAC Jet Route No. 12 (Baltimore, Md., to Pittsburgh, Pa.)
7. VOR/VORTAC Jet Route No. 14 (Cleveland, Ohio to Idlewild, N.Y..
8. VOR/VORTAC Jet Route No. 16 (Portland, Ore., to Pullman, Mich.,; Albany, N.Y. to Boston, Mass.) Nonradar advisory area from 60 nmi W of Dillon, Mont., VOR to 90 nmi E of Dillon.
9. VOR/VORTAC Jet Route No. 21 (Omaha, Neb., to Duluth, Minn.) (Dallas, Tex., to San Antonio, Tex.)
10. VOR/VORTAC Jet Route No. 22 (Lake Charles, La., to Gordonsville, Va.)
11. VOR/VORTAC Jet Route No. 24 (Phoenix, Ariz., to Albuquerque, N.M.)
12. VOR/VORTAC Jet Route No. 25 (Dallas, Tex., to Tulsa, Okla.)
13. VOR/VORTAC Jet Route No. 26 (Amarillo, Tex., to Appleton, Ohio.)
14. VOR/VORTAC Jet Route No. 29 (Houston, Tex., to Memphis, Tenn.)
15. VOR/VORTAC Jet Route No. 31 (Dallas, Tex., to Chicago, Ill.)
16. VOR/VORTAC Jet Route No. 33 (Shreveport, La., to the Int. of J33V with J31V.)
17. VOR/VORTAC Jet Route No. 34 (Cleveland, Ohio to Pittsburgh, Pa.)
18. VOR/VORTAC Jet Route No. 35 (New Orleans, La., to St. Louis, Mo.)
19. VOR/VORTAC Jet Route No. 37 (New Orleans, La., to Spartanburg, S.C.)
20. VOR/VORTAC Jet Route No. 42 (Dallas, Tex., to New York, N.Y.)
21. VOR/VORTAC Jet Route No. 45 (Alma, Ga., to St. Louis, Mo.)
22. VOR/VORTAC Jet Route No. 49 (Alma, Ga., to Spartanburg, S.C.)
23. VOR/VORTAC Jet Route No. 52 (Dallas, Tex., to Atlanta, Ga.) via Texarkana, Ark., VOR; Greenwood, Miss., VOR; Birmingham, Ala., VOR. (Dallas, Tex-Birmingham, Ala., extension to J52V.
24. VOR/VORTAC Jet Route No. 53 (Miami, Fla., to the Int. of J53V and J81V; Spartanburg, S.C., to Pittsburgh, Pa.)
25. VOR/VORTAC Jet Route No. 58 (San Francisco, Calif., to New Orleans, La.) Nonradar advisory area from 20 nmi W of Pioche, Nev., VOR to 90 nmi SE of Alamosa, Colo., VOR.)
26. VOR/VORTAC Jet Route No. 60 (Los Angeles, Calif., to New York, N.Y.) Nonradar advisory area from 25 nmi SW of Bryce Canyon, Utah VOR to 70 mi WSW of Denver, Colo., and from 120 nmi ENE of Denver, Colo., VOR to 50 nmi WSW of Wolbach, Neb., VOR.
27. VOR/VORTAC Jet Route No. 62 (Idlewild, N.Y., to Nantucket VOR.)
28. VOR/VORTAC Jet Route No. 64 (Los Angeles, Calif., to Chicago, Ill.) Nonradar advisory area from 20 nmi SW of Alamosa, Colo., VOR to 25 nmi SW of Hill City, Kansas VOR.
29. VOR/VORTAC Jet Route No. 67 (Idlewild, N.Y., to U.S.-Canadian Border.)
30. VOR/VORTAC Jet Route No. 69 (Spartanburg, S.C., to Gordonsville, Va.)
31. VOR/VORTAC Jet Route No. 71 (Appleton, Ohio to Front Royal, Va.
32. VOR/VORTAC Jet Route No. 75 (Miami, Fla., to U.S.-Canadian Border)
33. VOR/VORTAC Jet Route No. 77 (Miami, Fla., to U.S.-Canadian Border)
34. VOR/VORTAC Jet Route No. 78 (Los Angeles, Calif., to New York, N.Y.)

(10 May 1960)

b. These servi[illegible] should not be considered as providing positive separation. Within the [illegible] [illegible] will be provided [illegible]

VOR/VORTAC Jet Route No. 71 (Appleton, Ohio to Front Royal, Va.

VOR/VORTAC Jet Route No. 78 (Miami, Fla., to U.S.-Canadian Border)

35. VOR/VORTAC Jet Route No. 79 (Miami, Fla., to Idlewild, N.Y.)
36. VOR/VORTAC Jet Route No. 80 (Denver, Colo., to New York, N.Y.) Nonradar advisory area that portion of JR-80 from 120 nmi ESE of Denver, Colo., VOR to 25 nmi W of Hill City, Kansas VOR.
37. VOR/VORTAC Jet Route No. 81 (The intersection of J81V and J53V to Barracuda Int.)
38. VOR/VORTAC Jet Route No. 82 (Chicago, Ill., to Boston, Mass.)
39. VOR/VORTAC Jet Route No. 84 (Oakland, Calif., to the U.S.-Canadian Border) nonradar advisory areas from 50 nmi E of Rock Springs, Wyo. to 150 nmi E of Rock Springs and from 40 nmi E of Scottsbluff, Nebr., to 50 nmi W of Wolbach, Nebr. Advisory Service on Jet 84 Victor will be provided flight level 270 and above from 100 nmi W to 40 nmi E of Scottsbluff, Nebr.
40. VOR/VORTAC Jet Route No. 85 (Miami, Fla., to the U.S.-Canadian Border.)
41. VOR/VORTAC Jet Route No. 87 (Houston, Tex., to Northbrook, Ill.)
42. VOR/VORTAC Jet Route No. 89 (Northbrook, Ill., to Miami, Fla.)
43. Control 1150 (West Palm Beach, Fla., to Wilmington, N.C.)
44. VOR/VORTAC Jet Route No. 90 (Seattle, Wash., to Chicago, Ill.)

AREAS

1. That area 20 n mi either side of a line from Des Moines, Iowa VOR; intersection of Des Moines, Iowa 060° & Northbrook, Ill., 274° M radials; Northbrook, Ill., VOR; Pullman, Mich., VOR; Waterville, Ohio VOR; Joliet, Ill., VOR; Des Moines, Iowa VOR plus the area bounded by this line.
2. Duluth, Minnesota to the U.S.-Canadian Border via the Duluth 047° M radial(direct route between Duluth & Lakehead, Canada.)
3. Spokane, Washington to the U.S.-Canadian Border via the Spokane 028° M radial (direct route between Spokane & Cowley, Canada.)
4. Los Angeles, Calif., VOR; intersection of Los Angeles, Calif. 170° & Long Beach, Calif., 208° M radials; thence via the Long Beach, Calif 208° M radial(Control Area Extension 1177) for a distance of 180 n mi.
5. Los Angeles, Calif. VOR; thence via the Los Angeles, Calif. 236° M radial (Control Area Extension 1316) for a distance of 180 n mi.
6. Los Angeles, Calif. VOR; Santa Barbara, Calif. VOR; thence via the Santa Barbara, Calif. 232° M radial (Control Area Extension 1176) for a distance of 180 n mi.
7. Oakland, Calif. VOR; thence via the Oakland, Calif. 218° M radial (Control Area Extension 1173 over Sunset Intersection) for a distance of 150 n mi.
8. Oakland, Calif. VOR; thence via the Oakland, Calif 250° M radial(Control Area Extension 1173 over Francis Intersection) for a distance of 150 n mi.
9. Seattle, Wash. VOR; intersection of Seattle, Wash. 175° & Portland, Oregon 332° M radials; Portland, Oregon VOR; Newport, Oregon VOR; thence via the Newport, Oregon 216° M radial (Control Area Extension 1419) for a distance of 110 n mi.
10. Honolulu, Hawaii VOR; Koko Head, Hawaii VOR; thence via the Koko Head, Hawaii 039° M radial for a distance of 118 n mi.
11. Honolulu, Hawaii VOR; Koko Head, Hawaii VOR; thence via the Koko Head, Hawaii 054° M radial for a distance of 114 n mi.
12. Honolulu, Hawaii VOR; intersection of Honolulu, Hawaii 168° and Molokai, Hawaii 257° M radials; Molokai, Hawaii VOR; thence via the Molokai, Hawaii 056° M radial for a distance of 101 n mi.
13. Honolulu, Hawaii VOR; thence via the Honolulu, Hawaii 250° M radial for a distance of 87 n mi.
14. Honolulu, Hawaii VOR; intersection of Honolulu, Hawaii 168° and Koko Head, Hawaii 243° M radials; thence via the Koko Head, Hawaii 243° M radial for a distance of 107 n mi.
15. Honolulu, Hawaii VOR: thence via the Honolulu, Hawaii 168° M radial for a distance of 99 n mi.
16. Honolulu, Hawaii LFR; thence NW via Red Airway 87 for a distance of 183 n mi.
17. Newark, New Jersey LFR; via the Newark LFR SE crs. (Control Area Extension 1147) to the Tuna Intersection.
18. Miami, Florida VOR; via the Miami VOR 118° M radial for a distance of 92 n mi (boundary of the Miami Oceanic Control Area)
19. Seattle, Washington VOR to the U.S.-Canadian Border via the Seattle VOR direct radial to the Victoria (Patricia Bay). B.C., Canada RR.
20. Boston, Mass., Terminal Area-- That area within 20 nmi to either side of J-16-V between Albany, N.Y., & Boston, Mass.
21. New York City, N.Y., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
    a. Bridgeport, Conn. Int. via Poughkeepsie, N.Y., VOR to Albany, N.Y., VOR.
    b. Idlewild, N.Y., VORTAC via Huguenot, N.Y., VOR; Wilkes-Barre, Pa., VOR; to Philipsburg, Pa., VORTAC.
22. Baltimore, Md., Terminal Area -- That area within 20 nmi to either side of a direct crs from Baltimore, Md., VOR via Harrisburg, Pa., VOR to Philipsburg, Pa., VOR
    Baltimore, Md., Terminal Area-- Effective 5 May 1960
    a. That area within 20 nmi from the sides and within the triangle formed by a direct course from the Baltimore, Md., VOR to the Idlewild, N.Y., VOR to the Salisbury, Md., VOR; to the Baltimore, Md., VOR.
    b. That area within 20 nmi to either side of the center line of Control Area Extension 1148.
23. St. Louis, Mo., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
    a. Int. of J-80-V & Terre Haute, Ind., 268° M radial; via the Int. of Terre Haute VOR 268° & St. Louis VOR 057° M radials; to St. Louis VOR.
    b. St. Louis, Mo., VOR via Troy, Ill., VOR; V-12 Bible Grove, Ill., VOR; to Int. of Bible Grove VOR 040° M radial and J-80-V.
    c. Maryland Heights, Mo., VOR via V-12 Readsville, Mo., VOR; to Int. of Readsville VOR 302° M radial and J-80-V.
    d. Springfield, Ill., VOR via V-69 to Gillespie, Ill. Int.
    e. Marion, Ill., Int. via V-179 and V-4 to St. Louis, Mo., VOR.
    Effective 17 December 1959.
24. Los Angeles, Calif., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
    a. Los Angeles, Calif., VOR via V-208 Thermal, Calif., VOR; V-432 to Rice, Calif. VOR.
    b. Los Angeles, Calif., VOR via V-201 Palmdale, Calif., VOR; V-12 to Hector, Calif., VOR.
    c. Los Angeles, Calif., VOR via Int. of V-299 and Palmdale, Calif, 265° M radial; to Int. of Palmdale, Calif., 265° M radial and J-1-V.
    d. Los Angeles, Calif., VOR via V-25 Santa Barbara, Calif., VOR; to Int. of Santa Barbara VOR 336° M radial and J-1-V
    e. Peach Springs, Ariz., VOR via Twenty-Nine Palms, Calif., VOR; V-264 and V-16 to Los Angeles, Calif., VOR.
25. Oakland, Calif., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
    a. San Francisco, Calif., VOR via V-199 to Red Bluff, Calif., VOR.
    b. Pedro, Calif., Int. via V-27-W Salinas, Calif., VOR; to Int. of Salinas VOR 102° M radial and J-1-V.
    c. Oakland, Calif., VOR via V-195 Benecia, Calif., Int.; Linden, Calif., VOR; to Int. of Linden VOR 100° M radial and J-58-V.
26. Dallas, Tex., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
    a. Wichita Falls, Tex., VOR via Bridgeport, Tex., VOR to Dallas, Tex., VOR.
    b. Texarkana, Ark., VOR via V-278 to Dallas, Tex., VOR.
    c. Dallas, Tex., VOR via V-18 Quitman, Tex., VOR; V-54 to Texarkana, Ark. VOR.
    d. Dallas, Tex., VOR via the Int. of the Dallas VOR 230° and the Waco, Tex., VOR 344° M radials; to the Waco, Tex., VOR.
    e. Dallas, Tex., VOR via the Int. of the Dallas VOR 178° and the Waco, Tex., VOR 028° M radials; to the Waco, Tex., VOR.
27. Atlanta, Ga., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
    a. Nashville, Tenn., VOR to Crossville, Tenn. VOR.
    b. Spartanburg, S.C., VOR via V-20-N to Norcross, Ga., VOR.
    c. Atlanta, Ga., VOR via V-454 and V-185 to Spartanburg, S.C., VOR.
28. Miami, Fla., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
    a. Orlando, Fla., VOR via J-81-V to Miami, Fla., VOR.

b. Lakeland, Fla., VOR via V-7, V-35, V-35-W, V-157-W, and V-51 to Biscayne, Bay, Fla., VOR.
c. West Palm Beach, Fla., to Biscayne Bay, Fla., VOR.

29. Detroit, Mich., Terminal Area -- That area within the United States which is 20 nmi to either side of a line drawn from the Pullman, Mich., VOR via direct Lansing, Mich., VOR; direct Salem, Mich., VOR; via Salem VOR 109° M radial to the U.S. - Canadian border; plus that area within the United States which is S of the above described line and N of J-60-V.

30. Denver, Colo., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
a. Denver, Colo., VOR via V-160 to a point 100 nmi NE of Denver VOR.
b. Denver, Colo., VOR via V-148 Thurman, Colo., VOR; thence via Thurman VOR 028° M radial to a point 68 nmi NE of Thurman VOR.
c. Kiowa, Colo., VOR via V-19 Pueblo, Colo., VOR thence via J-13-V to the northern edge of the currently depicted Category "B" area of J-64-V.
d. Roggen, Colo., Int. via V-220 to Kremmling, Colo., VOR.
e. Kiowa, Colo., VOR via Kiowa VOR 250° M radial to a point 80 nmi SW of Kiowa VOR.

31 From the Miami, Florida, VOR via the Marathon, Florida, Rdo Bcn; thence via Ctl Area Extension 1234 for a distance of 56 nmi--bndry of the Havana, Cuba Ctl Area.

32. Houston, Tex., Terminal Area--That area within 20 nmi to either side of a direct crs from the:
a. Houston, Tex., VOR via the Int of the Houston 036° and the Lake Charles, La, 265° M radials to the Lake Charles VOR (V-222N).
b. Houston, Tex., VOR via the Int of the Houston VOR 082° and the Lake Charles, La., VOR 233° M radials to the Lake Charles VOR (V20S).
c. Houston, Tex., VOR via the Int of the Houston VOR 315° and the Leona, Tex., VOR 162° M radials; to the Leona, Tex., VOR.
d. Houston, Tex., VOR via the Int of the Houston VOR 345° and the Leona, Tex., VOR 132° M radials; to the Leona, Tex., VOR.

33. San Antonio, Tex., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
a. San Antonio, Tex., VOR via the Int of the San Antonio VOR 048° and the Austin, Tex., VOR 166° M radials to the Austin, Tex., VOR.
b. San Antonio, Tex., VOR via the Int of the San Antonio VOR 353° and the Austin, Tex., VOR 248° M radials; to the Austin, Tex., VOR.

34. New Orleans, La., Terminal Area-- That area within 20 nmi to either side of a direct course from the:
a. New Orleans, La., VOR via the Int. of the New Orleans, La., VOR 320° and the Alexandria, La., VOR 098° M radials; to the Alexandria, La., VOR. (Overlies V-114-N.)
b. New Orleans, La., VOR via the Int. of the New Orleans, La., VOR 030° and the McComb, Miss., VOR 142° M radials; to the McComb, Miss., VOR. (Overlies V-9-E).
c. McComb, Miss., VOR to the Int. of the McComb, Miss., VOR 222° and the New Orleans, La., VOR 320° M radials. (Overlies V-194).
d. New Orleans, La., VOR via the Int. of the New Orleans, La., VOR 094° and the Mobile, Ala., VOR 219° M radials; to the Mobile, Ala., VOR. (Overlies V-240).
e. Mobile, Ala., VOR to the Int. of the Mobile, Ala., VOR 258° and the New Orleans La., VOR 030° M radials. (Overlies V-20-N.).
f. Alexandria, La., VOR to the Baton Rouge, La., VOR. (Overlies V-114).
g. Baton Rouge, La., VOR via the Int. of the Baton Rouge, La., VOR 126° and the New Orleans, La., VOR 269° M radials; to the New Orleans, La., VOR.
Effective 5 May 1960.

35. Tampa, Fla., Terminal Area - That area within 20 nmi to either side of a direct course from the:
1. St. Petersburg, Florida VOR direct to the Orlando, Fla., VOR. (Overlies V-152).
2. St. Petersburg, Fla., VOR via the Int. of the St. Petersburg, Fla., VOR 038° and the Orlando, Fla., VOR 257° M radials; to the Orlando, Fla., VOR. (Overlies V152N).
3. St. Petersburg, Fla., VOR via the Lakeland, Fla., VOR; to the Orlando, Fla., VOR. (Overlies V-152S).
Effective 5 May 1960.

FLIGHT ASSISTANCE FOREIGN EXCHANGE AND INTERPHONE SERVICE: As an aid to substantial groups of pilots operating from airports not within local calling distance of an FAA Flight Service Station, leased telephones services are provided to the nearest FAA station. One such service, entitled "Foreign Exchange" (FX), permits dialing a local number which will connect to the distant FSS at the cost of a local call. Another is "Interphones" a private line extension to the nearest FAA station and is normally located in the operations office at an airport where it is available to all pilots. Fixed base operators at the same airport may lease extension service on these lines for the convenience of pilots at the cost of a local telephone extension.

The locations provided with the above services follows:

FOREIGN EXCHANGE Location	Number	FSS Providing Service
Charlotte, North Carolina	ED 2-7262	Hickory, North Carolina
Kerrville, Texas	CL 7-7295	Junction, Texas
Burbank, California	TH 6-0400	Los Angeles, California

DEPARTMENT OF COMMERCE
COAST & GEODETIC SURVEY
WASHINGTON 25, D. C.

Temporary Controlled Firing Area – Jordan Narrows, Utah

Firing to cease upon approach of aircraft over firing area.

Designated Altitude – Surface to 15,000 ft. above terrain.

Time of use – Sunrise to sunset only during period of June 5-19, 1960 inclusive

Activity – Artillery firing

Using Agency – Utah National Guard

Firing to be conducted in accordance with the following:

1. Visual surveillance will be continuously maintained over the entire area by safety officers during firing operations to detect approaching aircraft and communication will be established with gun positions to order cessation of firing upon the approach of aircraft.

2. Firing will be conducted only when there are no clouds below 16,000 ft. greater than 2/10 coverage and when visibility is at least 10 miles.

3. No projectile shall enter or pass through any clouds.

4. All firing to be conducted to the west.

5. Radar surveillance of the Jordan Narrows Valley will be provided during all periods of firing.

IMPORTANT NOTICE - NEW FREQUENCY ASSIGNMENTS

Commensurate with FAA's efforts to improve the overall air traffic control communications system and to relieve congestion on the existing communications channels, an additional five megacycles of spectrum space is being made available to the aeronautical user effective July 1, 1960. In order to obtain maximum utilization of these additional radio frequencies, FAA is initiating a program of new frequency assignments within the band 118-135 MC/S at 0800 GMT on July 7, 1960.

This implementation involves several hundred frequency changes throughout the United States, not including Alaska and Hawaii. To facilitate the users' transition to the new frequencies and to provide the greatest advance notice of the specific changes, we are presenting the following tabulation in terms of location, traffic control function, new frequency to be activated July 7, 1960, and existing frequency. Further, note also that many frequencies now assigned (shown in the "old frequency" column) have either been changed or will serve a different function.

LEGEND: H - High Altitude 24,000' and above
I - Non-Radar Sectors 23,000' and below
Ir - Radar Sectors 23,000' and below
A - Center Area Discrete 23,000' and below

(10 May 1960)

B-66 GUST SURVEY PROGRAM: Beginning on or after February 25, 1960, and terminating on or before June 30, 1960, the Douglas Aircraft Company will conduct an aircraft structural survey program. Flight operations will be conducted in a B-66 type aircraft, with USAF identification markings, at altitudes of 200, 600 and 1,000 feet above the surface, during daylight hours only and when the visibility is 5 miles or greater and the ceiling is 3,000 feet or greater.

Unless otherwise noted, all tracks will be flown at 360 knots true airspeed or less and will be approximately 30 nautical miles in length. FAA Flight Service Stations, within whose advisory service area a "gust survey" track exists will, prior to each flight, broadcast information that "B-66 Gust Survey" operations are in progress and the specific tracks to be flown will be enumerated. NOTAM's specifying date, time, place and duration of the operations will be disseminated.

During any special flight activities which require preoccupation by the pilot with cockpit duties that would prevent adequate vigilance outside the cockpit, competent observers in the aircraft, a chase aircraft or other equivalent arrangement will be provided and maintained to insure adequate vigilance for other aircraft.

Tracks to be flown by base of operations are listed below:

Kirtland Air Force Base, New Mexico

Track No.	Location Lat.	Location Long.	Description from Sectional Chart
11A	32-51-05 33-19-25	105-35-00 105-47-15	3 miles from Sacramento Lookout Sta. to 3.25 miles from Sierra Blanca Pk. (12003').
11B	32-54-00 33-20-00	105-51-00 105-38-00	Rotated 49° clockwise with respect to Track 11A.
22A	38-00-00 38-22-00	106-44-00 106-17-45	7 miles from 13725' Pk. near Half-moon Pass to 4.5 miles from Ouray Pk. (13955)
22B	37-56-00 38-21-00	106-22-00 106-43-00	Rotated 102° clockwise with respect to Track 22A.
52	36-40-00 36-10-05	108-40-35 108-35-50	6 miles from Shiprock Airport to about 5.5 miles ENE of Sheep Springs.
62	37-31-35 38-00-00	105-53-50 106-06-15	4 miles from Alamosa to 5.5 miles from Saguache.
71	34-29-15 34-51-00	105-02-40 105-39-00	Over Joffre (11 miles SE of Vaughan) to 6 miles SSE of Santa Rosa.

Shaw Air Force Base, South Carolina

Track No.	Location Lat.	Location Long.	Description from Sectional Chart
11	35-02-30 34-46-30	82-41-00 83-13-30	7 miles WNW of Brevard south of Tower to 6 miles NNE of Clayton.
21	35-15-20 34-57-00	82-51-00 83-20-00	From 9 miles north of Pickens to 8 miles west of Walhalla.
31	33-55-00 33-52-30	78-01-00 78-36-30	From southern edge of Southport on heading to Conway, to 4 miles NE of Crescent Beach.
41	33-45-20 33-42-30	78-01-00 78-36-40	From 9 miles south of Cape Fear River outlet to 15 miles east of Myrtle Beach.
61	34-31-30 34-02-00	80-32-30 80-34-00	From 2 miles SE of Kershaw to 7 miles NW of Shaw AFB.
81	34-07-40 34-10-30	77-57-40 78-33-30	From 3 miles south of Wilmington on W bank of Cape Fear river to 6 miles SSW of Lake Waccamaw.

Edwards Air Force Base, California

Track No.	Location Lat.	Location Long.	Description from Sectional Chart'
11	34-32-00 34-52-30	119-23-00 119-49-35	From 8 miles NW of Meiners Oaks to 7 miles SW of New Cuyama in San Rafael Mts.
23	36-19-40 36-20-00	118-04-50 118-42-25	From about 3 miles W of Cartago to about 3.25 miles SSW of Calhoun Pk. in Sierra, Nevada range
23B	36-10-00 36-29-00	118-12-00 118-40-00	From 4 miles NW of Craig Pk to 2 miles E of Paradise Pk. in Sierra, Nevada range.
32	34-03-00 33-58-30	120-30-00 119-54-25	From 3.5 miles W of San Miguel I to about 3.75 miles beyond Santa Rosa I.
44	33-15-45 32-45-25	118-21-15 118-20-20	9 miles S of Long Pt. light to 4 miles S of Pyramid Head light.
51	35-04-00 35-10-00	117-19-00 117-56-00	From California City to the western tip of Harpers Dry Lake.
63	35-40-45 36-08-50	119-43-10 119-57-20	3.5 miles from Lost Hills Kern Co. Airport to about 4 miles WNW of Westlake Farms Airport.

Gust Plus Maneuver Round-Robin Flight (Edwards AFB)

Leg. No.	Distance (Nautical Miles)	Maximum Speed (KTAS)	Description from Sectional Chart
1.	50	340	From Edwards AFB to 10 miles NE of the Fillmore Omni.
2.	15	500	From 7 miles SW of the Oxnard Rdo Bcn to the eastern point of Santa Cruz Island
3.	43	420	From the eastern point of Santa Cruz Island to the western point of San Miguel I.
4.	20	500	From the western point of San Miguel Island to 15 miles SW of Gaviota Omni.
5.	50	500	From 15 miles NW of the Gaviota Omni to 6 miles W of the Belridge (pvt.) Airport, and
	40	360	From 6 miles W of the Belridge (pvt.) Airport, via a point 5 miles W of the Lost Hills Airport to 7 miles E of Avenal Airport.
6.	70	340	From 10 miles east of Porterville to 10 miles S of Bishop.
7.	51	420	From 10 miles S of Bishop to the center of Owens Lake.
8.	88	260	From the center of Owens Lake to the Edwards AFB.

60. Flight between legs will be conducted in accordance with the Civil Air Regulations, Part During the low-level operations, all airports will be avoided by 3 miles or more.

(Continued)

Patterson Air Force Base, Ohio

Track No.	Location Lat.	Location Long.	Description from Sectional Chart
61	39-52-40 39-27-00	83-18-45 82-58-25	Over London reporting point to crossing of route 23, 7 miles north of Chillicothe.
91	39-06-00 39-36-30	84-03-00 84-03-00	3 miles N of Williamsburg to 2 miles W of Spring Valley.
101	39-02-10 39-03-50	83-02-40 83-41-15	Crossing of Scioto River 1 mile SE of Jasper to intersection of route 62.
41	41-34-40 41-49-00	82-52-00 83-27-00	10 miles NW of Sandusky over tip of Lake Erie to point 14 miles west of Carleton omni.

✓ RADAR - On page 30 of Flight Information Manual Volume 13, dated December 1959, add subtopic No-Gyro Vector or Approach - Aircraft Under Radar Control: A pilot under radar control will occasionally experience circumstances wherein his directional gyro or other stabilized compass is inoperative or inaccurate. When this occurs, he should so advise air traffic control and request a no-gyro vector or approach. Pilots of aircraft not equipped with a directional gyro or other stabilized compass who desire radar handling may also request a no-gyro vector or approach. Prior to commencing such vector/approach the pilot will be advised to make all turns at standard rate, and that turn instructions should be executed immediately upon receipt. For example, "Turn Right"; "Stop Turn." When a surveillance or precision approach is made the pilot will be advised after his aircraft has been turned onto final approach to make turns at half standard rate.

✓ GOOD OPERATING PRACTICES-IFR RADAR DEPARTURE SERVICE AVAILABLE- On page 53 of Flight Information Manual Volume 13 dated December 1959, delete paragraph 12.

✓ RADAR WEATHER ADVISORY SERVICE- On pages 31 and 32 of Flight Information Manual Volume 13 dated December 1959, under Radar Advisory Service Air Defense Command, delete listings under Michigan, Oregon and Washington.

ILS SENSITIVITY ADJUSTMENTS: At a number of facilities in the United States, ILS localizer course width will be reduced from 5 degrees to 4 degrees in the near future. Individual facility NOTAM's will be published as these changes occur.

NEW AIR TRAFFIC CONTROL ADVISORY SERVICE: IFR aircraft operating in accordance with an ATC authorized cruising level of VFR conditions-on-top are required by CAR 60.44 to be flown at the altitudes/flight levels specified in CAR 60.32 for VFR flight. Noncompliance by pilots with the cruising level requirements of CAR 60 compromises intended segregation between aircraft operating at VFR and IFR altitudes/flight levels. Beginning April 5, 1960, pilots of IFR aircraft operating in accordance with an air traffic control authorized cruising level of VFR conditions-on-top and reporting at an altitude/flight level incorrect for direction of flight will be advised by air traffic control facilities of the appropriate level/s for direction of flight. Controllers will provide this advisory service on a "workload permitting" basis. The provision, or lack of provision of this service should not be construed to relieve or diminish pilot responsibility for operation at the correct altitudes/flight levels for direction of flight.

NAVIGATIONAL WARNING: The following are low level "FAIRBALL" routes used by the USAF when conducting low level navigation flights in jet aircraft at 500 to 2,000 feet above the terrain. At the termination of the low level flight, aircraft will climb to altitudes between 14,000 to 20,000 feet MSL. Aircraft will fly hemispheric rules. Flights will be operated at random intervals and under VFR conditions during daylight hours only.

Route 2-J-2: Start at 43-22-30N, 94-04-00W, (entry-call Mason City Radio), 43-28N, 91-00W, 42-21N, 90-54-30W; 40-25N, 92-07-30W; 40-22N, 92-31W(end nav. leg) to target 40-14N, 93-36W. Note: for a bomb run only, entry reporting will be 41-00N, 91-45W(call Ottumwa Radio); remainder of route is identical with above.

Route 2-K-1: Start at 31-00N, 95-04W (entry-call Lufkin Radio), 31-55N, 95-24; 31-52N, 97-23W; 32-02N, 98-24W; 32-53N, 98-40W; 34-51N, 98-55W;(end nav. leg), terminate operations over Chickasha, Okla. Note: for a bomb run only, entry reporting point will be 34-00 N, 98-48W (call-Wichita Falls Radio); remainder of route is identical with above.

Route 2-M-1: Start at 31-45N, 91-49W (entry-call Alexandria Radio), 31-35N, 94-20W; 34-00N, 95-02W; 34-27N, 94-38W; 34-35N, 93-20W(end nav. leg), to target-Little Rock. Note: for a bomb run only, entry reporting point will be 34-27N, 94-38W, (call-Fort Smith Radio), remainder of route is identical with above.

Route 2-P-1: Start at 39-11N, 86-52W (entry-call Terre Haute Radio), 38-02N, 86-31W; 38-18N, 87-55W; 39-23N, 90-37W; 38-52N, 92-18W (end nav. leg). 38-44N, 92-44W; start climb to target-Clinton, Mo. Note: for a bomb run only, entry reporting point will be 38-52N. 92-18W (call-Columbia Radio), remainder of route is identical with above.

Route 2-R-2: Start at 35-38N, 99-11W; to start climb point 36-12N, 98-14W; to termination 36-45N, 98-11W. Entry reporting point- Sayre Radio.

Route 2-R-3: Start at 36-22N, 92-14W; to 36-26N, 93-50W. Entry reporting point-Springfield Radio.

Route 2-S-1: Start at 29-29, 91-46, (entry reporting point-Baton Rouge VOR); to turning point 28-00, 91-30; to turning point 27-00, 92-30; to turning point 27-50, 94-00; to navigation termination point, bomb run entry point, and LONG LOOK start climb (if applicable) 27-50, 95-45; to SHORT LOOK start climb (if applicable) 28-11, 96-34; to target at Matagorda Island 28-13-30, 96-39-00. After bombs away, proceed to 28-21-30, 96-42-00, then right turn to Palacios VOR. On SHORT LOOK mission do not exceed 5000' MSL until past Port O'Connor, Texas. On LONG LOOK do not descend below 18,000' MSL until past Port O'Connor, Texas.

Route 2-T-1: Start at 42-00N, 96-12W; to target 42-51N, 97-29W. (Entry reporting point-Sioux City Radio).

Route 2-T-2: Start at 42-30N, 97-49W to target 41-26.5N, 96-36W. (Entry reporting point Point-O'Neil Radio).

Route 8-P-1: Start at 43-42N, 69-50W; terminate at 44-20N, 68-04W.

Route 8-P-2: Start at 43-42N, 69-50W; 43-53N, 69-07W; terminate at 44-20N, 68-04W.

Route 8-R-1: Start at 18-05N, 67-54W; 17-56N, 67-11W; 17-56N, 66-18W; 18-00N, 66-00W. Entry reporting point San Juan ARTCC.

Route 15-A-1: Cross Salt Flat VOR at flight altitude (entry point - Call Salt Flat Radio), descend to start low level 30-50N, 103-00W; 30-10N, 102-10W; 30-30N, 100-05W; 32-00N, 99-15W; 33-05N, 99-30W; 34-25N, 100-30W. Start climb 34-39N, 100-56W; level off 35-01N, 101-33W, target Amarillo.

Route 15 - A - 3: Cross Douglas VOR at flight altitude (entry point - Call Douglas Radio), descend to start low level 43-00N, 103-00W; 41-30N, 101-30W; 39-25N, 102-10W; 38-00N, 101-40W, 36-00N, 100-45W. Start climb 35-50N, 101-00W; level off 35-25N, 101-36W, target Amarillo.

Route 15-B-2: Cross Peach Springs VOR at flight altitude (entry point-Call Las Vegas Radio), descend to start low level 37-07N, 114-30W; 38-45N, 116-30W; 39-40N, 115-10W; 41-00N, 114-50W; 42-10N, 113-55W; 43-10N, 114-25W. Start climb 43-18N, 115-02W; level off 43-30N, 115-52W, target Boise.

Route 15-C-1: Start descent Reno VOR, entry point 40-11N, 121-05W. Start climb 40-47N, 121-04W, target 41-55N, 121-04W.

Route 15-D-2: Entry at 32-37N, 102-37W to target at 32-34N, 101-08W.

Route 15-D-3: Start descent at Hudspeth VOR, Texas to start low level point at 31-08N, 105-10W to start climb at 30-48N, 104-46W to target at 30-18N, 104-02W.

Route 15-E-1: Start descent 44-28N, 100-40W, entry point 44-34 1/2N, 101-30W. Start climb 44-43N, 103-28W, target 44-44 1/2N, 103-36W.

Route 15-F-1: Fairchild Air Force Base to 47-26N, 118-16W, target 47-52N, 119-07W.

Route 15-G-1: Cross Ukiah, California VOR at flight altitude (entry point) - (Call Ukiah Radio), descend to start low level 39-06N, 124-17W to 39-08N, 124-45W; 40-24N, 125-29W; 42-20N, 125-35W; 43-08N, 126-00W to climb point 43-32N, 124-48W to start climb for Long Look at 43-43N, 124-17W or to start climb for Short Look at 43-54N, 123-20W to target 43-58N, 123-05W, S of Eugene, Oregon.

Route 15-H-1: Entry at 43-21N, 117-18W to 42-24-30N, 118-36W.

Route 15-H-2: Entry at 42-31N, 120-14W to 42-44N, 119-38W to 43-34N, 118-12W.

Route 15-M-2: 36-18 1/2N, 121-54W to target, 35-19N, 120-52W, to target 36-18 1/2N, 121-54W. Route will be flown in both directions.

Route 15-R-1: Entry at 33-00N, 103-00W; to 34-00N, 102-28W; to target at 34-38-30N, 102-43W.

Route 15-T-1: Entry at 32-58N, 111-23W; to 32-54N, 109-50W.

(10 May 1960)

FEDERAL AIRWAYS, CONTROL AREAS, CONTROL AREA EXTENSIONS, CONTROL ZONES, REPORTING POINTS, POSITIVE CONTROL ROUTE SEGMENTS AND JET ROUTES:

Note: All bearings and radials are TRUE unless otherwise indicated.

Effective 0001 EST 29 April 1960:

(1) Control Area Extension: (Laredo, Tex.): amended as follows: In the text "Laredo, Tex., rdo rng stn." is deleted and "Laredo AFB, Laredo, Tex., Rbn" is substituted therefor.

Effective 0001 EST 30 June 1960:

(1) Federal Airway: Blue 6 (Bangor, Mich., to Muskegon, Mich.) is revoked.
(2) Control Area: Blue 6 (Bangor, Mich., to Muskegon, Mich.) is revoked.
(3) Reporting Point: Blue 6 (Bangor, Mich., to Muskegon, Mich.) is revoked.
(4) Federal Airway: Red 10 (Dallas, Tex., to Meridian, Miss.) is revoked.
(5) Control Area: Red 10 (Dallas, Tex., to Meridian, Miss.) is revoked.
(6) Reporting Point: Red 10 (Dallas, Tex., to Meridian, Miss.) is revoked.
(7) Control Area Extension: (Shreveport, La.) amended as follows: In the text delete "on the NW by VOR Federal awy No. 16 and on the S by Red Federal awy No. 10" and substitute therefor: "on the NW by VOR Federal awy No. 289 and on the S by VOR Federal awy No. 114N."

(8) Federal Airway: VOR 456 (Redoubt Bay, Alaska to Anchorage, Alaska) added: "From the Int. of Anchorage, VOR 241° T radial and the W crs of the Kenai, Alaska, RR to the Anchorage, Alaska, VOR."

(9) Control Area: VOR 456(Redoubt Bay, Alaska, to Anchorage, Alaska) added: All of VOR Federal awy No. 456".

(10) VOR Reporting Point: VOR Reporting Point is added to read: " Redoubt Bay Int.: The Int. of the Anchorage, Alaska, VOR 241° T radial and the Kenai, Alaska RR W crs."

(11) Federal Airway: Blue 13 the following changes are made: (a) In the caption "(Texarkana, Ark., to Fort Smith, Ark., and Kansas City, Mo., to Des Moines, Iowa)" is deleted and "(Texarkana, Ark., to Fort Smith, Ark.)" is substituted therefor. (b) In the text "From the Int. of the NE crs. of Kansas City, Mo., rdo rng and the S crs of the Des Moines, Iowa rdo rng to the Des Moines, Iowa, rdo rng stn." is deleted.

(12) Control Area: Blue 13, the following changes are made: In the caption "(Texarkana, Ark., to Fort Smith, Ark., and Kansas City, Mo., to Des Moines, Iowa)." is deleted and "(Texarkana, Ark., to Fort Smith, Ark.)" is substituted therefor.

(13) Reporting Point: Blue 13, the following changes are made: In the caption "(Texarkana Ark., to Fort Smith, Ark., and Kansas City, Mo., to Des Moines, Iowa)" is deleted and "(Texarkana, Ark., to Fort Smith, Ark.)." is substituted therefor.

(14) Federal Airway: VOR 18 (Dallas, Tex., to Charleston, S.C.) amended as follows: In the text delete "Int. of the Anniston VOR 084° radial and Atlanta arpt ILS lclzr W crs; Atlanta, Ga., arpt ILS lclzr; Int. of Atlanta arpt ILS lclzr E crs and Augusta VOR 278° radial; Augusta, Ga., VOR including a S alternate from the Anniston VOR to Augusta VOR via the Int. of the Anniston VOR 104° and Atlanta VOR 262° radials, the Atlanta, Ga., VOR, the McDonough, Ga., VORTAC, and the Int of the McDonough VORTAC 088° and the Augusta VOR 263° radials;" and substitute therefor "Int of Anniston VOR 099° T and the Atlanta VORTAC 267° T radials, the Atlanta, Ga., VORTAC; McDonough, Ga., VOR; Int of McDonough VOR 088°T and the Augusta VOR 263° T radials; Augusta, Ga., VOR, including a N alternate from Anniston VOR to Augusta VOR via the Int of the Anniston VOR 084° T and Atlanta arpt ILS lclzr W crs; Atlanta ILS lclzr; and the Int of the Atlanta ILS lclzr E crs and the Augusta VOR 278° T radial;".

(15) Control Area: VOR 18 (Dallas, Tex., to Charleston, S.C.) is amended to read: All of Federal awy No. 18 including N and S alternates, but excluding the airspace between the main awy and its N alternate from the Anniston, Ala., VOR to the Augusta, Ga., VOR.

(16) Federal Airway: VOR 12 (Santa Barbara, Calif., to Philadelphia, Pa.) amended as follows: In the text, delete "and also a S alternate via the Int of the Pittsburgh VOR 117° and the Johnstown VOR 250° radials;" and substitute therefor "and also a S alternate via the Int of the Pittsburgh VOR 120° T and the Johnstown VOR 250° T radials;".

(17) VOR Reporting Points: Domestic VOR reporting points amended to read: Scottdale Int: The Int. of the Pittsburgh, Pa., VOR 120° T and the Uniontown, Pa., VORTAC 003° T radials.

(18) Federal Airway: VOR 427 (Newcomerstown, Ohio to Kent, Ohio) amended to read: "From the Newcomerstown, Ohio, VOR via the Navarre, Ohio VOR; to the Int of the Navarre VOR 352° T and the Cleveland, Ohio, VOR 109° T radials."

(19) Control Area: VOR 427(Newcomerstown, Ohio, to Kent, Ohio) amended to read: "All of VOR Federal airway No. 427."

(20) Control Zone: (Meridian, Miss.) amended to read: "Within a 5-mi radius of the geographical center of the geographical center of Key Field Merician, Miss.(lat 32-19-55, long. 88-44-55), within 2 mi either side of the NW crs of the Meridian RR extending from the RR to a point 12 mi NW, within 2 mi either side of the 314° T radial of the Meridian VORTAC extending from the VORTAC to a point 12 mi NW and within 2 mi either side of the Meridian ILS lclzr S crs extending from the 5-mi radius zone to the OM."

(21) Control Zone: (Atlantic City, N.J.) amended to read: "Within a 12-mi radius of the geographical center of the NAFEC arpt (lat 39-27-25, long. 74-34-45), including the airspace bounded on the SW by the 176° T radial of the Atlantic City, N.J., VORTAC to a point 3 nmi offshore, bounded on the SE by a line lying 3 nmi offshore, and bounded on the NE by the 112° T radial of Atlantic City VORTAC, and excluding the airspace bounded by the N arc of a 2 mi radius of the geographical center of the Ocean City arpt (lat 39-16-00, long. 74-36-15)."

(22) Federal Airway: VOR 1504 (San Francisco, Calif., to Casper, Wyo., and Lone Rock, Wis., to Washington, D.C.) amended to read: "From the Int of the Oakland VORTAC 221° T and Salinas, Calif., VOR 319°T radials; via Oakland, Calif., VORTAC; Sacramento, Calif., VOR; Int of Sacramento VOR 055° T and Reno VOR 230° T radials; Reno, Nev., VOR; Lovelock, Nev., VORTAC; Battle Mountain, Nev., VOR; Elko, Nev., VOR; Wells, Nev., VOR; Malad City, Idaho VOR; Big Piney, Wyo., VOR; to Casper, Wyo., VOR. From the Lone Rock, Wis., VOR via the Int of Lone Rock VOR 103° T and Milwaukee,VOR 273° T radials; Milwaukee, Wis., VOR; Int of Milwaukee VOR 102° T and Pullman VOR 303°T radials; Pullman, Mich., VOR; Litchfield, Mich., VOR; Int of Litchfield VOR 098° T and Carleton VOR 264° T radials; Carleton, Mich., VOR; Int of Carleton VOR 097° T and Cleveland VOR 327° T radials; Cleveland, Ohio, VOR; Navarre, Ohio, VORTAC; Wheeling, W.Va. VOR; Uniontown, Pa., VORTAC; Grantsville, Md., VOR; Front Royal, Va., VOR; Int of Front Royal VOR 112°T and Washington VOR 245° T radials; to Washington, D.C. VOR."

(23) Control Area: VOR 1504 (San Francisco, Calif., to Casper, Wyo., and Lone Rock, Wis., to Washington, D.C.) amended to read: "All of VOR Federal awy No. 1504."

(24) Positive Control Route Segments: amended to read: In the text delete "VOR Federal awy No. 1504 (San Francisco, Calif., to Washington, D.C.)" and substitute therefor "VOR Federal awy No. 1504 (San Francisco, Calif., to Casper, Wyo., and Lone Rock, Wis., to Washington, D.C.)."

(25) Control Area Extension: (Klamath Falls, Oreg.) added to read: "The airspace within a 40-mi radius of the Klamath Falls, Oreg., VORTAC."

(26) Three-mile radius zones amended as follows: In the text delete: "Klamath Falls, Oreg.: Klamath Falls Municipal Airport."

(27) Five-mile radius zones amended as follows: In the text add: "Klamath Falls, Oreg.: Kingsley Field (lat 42-09-25, long. 121-43-55.)

(28) Jet Route: L/MF Jet Route No. 6 (Prescott, Ariz., to Front Royal, Va.) amended to read: "From the Prescott, Ariz., RR via the El Morro, N. Mex., RR; Albuquerque, N. Mex., RR; Amarillo, Tex., RR; Oklahoma City, Okla ., RR; Little Rock, Ark., RR; Memphis, Tenn., RR; Nashville, Tenn., RR; Charleston, W. Va., RR to the Front Royal, Va., RR."

(29) Jet Route: L/MF Jet Route No. 9 (Las Vegas, Nev., to Great Falls, Mont.) amended to read: "From Las Vegas, Nev., RR via the Enterprise, Utah, RR; Delta, Utah, RR; Salt Lake City, Utah, RR; Ogden, Utah, RR; Dubois, Idaho, RR; Dillon, Mont., RR to the Great Falls, Mont., RR."

(30) Jet Route: L/MF Jet Route No. 10 (Kansas City, Mo., to New York, N.Y.) amended to read: "From Kansas City, Mo., RR via the Belleville, Ill.(Scott AFB), RR; Int of Belleville(Scott AFB), RR NE crs and Effingham, Ill., RR W crs; Effingham RR; Indianapolis, Ind., RR; Dayton, Ohio(Wright-Patterson), RR; Columbus, Ohio, RR; Pittsburgh, Pa., RR; Philipsburg, Pa., RR to New York, N.Y.,(LaGuardia), RR."

(31) Jet Route: L/MF Jet Route No. 18 (Seattle, Wash., to Sault Ste. Marie, Mich.) is revoked.

(32) Jet Route: L/MF Jet Route No. 39 (Crestview, Fla., to Houghton, Mich.) is revoked.

(33) Jet Route: L/MF Jet Route No. 41(Miami, Fla., to Omaha, Nebr.) is revoked.

(34) Jet Route: VOR/VORTAC Jet Route No. 60 (Cleveland, Ohio and Allentown, Pa.) amended as follows: In the text delete "Int of Cleveland VOR 079° and Allentown VOR 288° radials;" and "Philipsburg, Pa., VORTAC;" is substituted therefor.

(35) Federal Airway: Blue 45 (Montpelier, Vt., to Newport, Vt.) amended to read: "From the Montpelier, Vt., RR via Int of NE crs of Montpelier RR and a line brg 180° T from Newport, Vt., Rbn; to the Newport Rbn."

(36) Control Area: Blue 45 (Montpelier, Vt., to Newport, Vt.) amended to read: "All of Blue Federal awy No. 45."

(37) Reporting Point: Blue 45 (Montpelier, Vt., to Newport, Vt.) amended to read: "No reporting point designation."

(38) Jet Route: L/MF Jet Route No. 8 (Oklahoma City, Okla., to Belleville, Ill.) is revoked.

(39) Jet Route: VOR/VORTAC Jet Route No. 49 (Miami, Fla., to Spartanburg, S.C., and Pittsburgh, Pa., to Presque Isle, Me.) amended to read: "From the Miami, Fla., VORTAC via the Int of the Miami VORTAC 316° T and the Gainesville, Fla., VOR 167° T radials; Gainesville VOR; Int of the Gainesville VOR 353° T and the Alma, Ga., VOR 179° T radials; Alma VOR; to the Spartanburg, S.C., VOR. From the Pittsburgh, Pa., VOR, via the Philipsburg, Pa., VORTAC; Albany, N.Y., VORTAC; Bangor, Me., VOR; to the Presque Isle, Me., VOR."

Effective 0001 EST 28 July 1960:

(1) Federal Airway: VOR 194 (Lafayette, La., to Meridian, Miss., and Homer, Ga., to Norfolk, Va.) amended as follows: (a) In the caption delete "(Lafayette, La., to Meridian, Miss., and Homer, Ga., to Norfolk, Va.)" and substitute therefor "(Lafayette, La., to Meridian, Miss., and Homer, Ga., to Cape Charles, Va.)" (b) In the text delete "to the Norfolk, Va., VOR, including a S alternate via the Int of Cofield VOR 084° and Norfolk VOR 209° radials." and substitute therefor "Norfolk, Va., VORTAC, including a S alternate via Int of Cofield VOR 084° T and Norfolk VORTAC 209° T radials; to the Int of Norfolk, Va., VORTAC 001° T and Cape Charles, Va., VOR 313° T radials."

(2) Control Area: VOR 194(Lafayette, La., to Meridian, Miss., and Homer, Ga., to Norfolk, Va.) amended as follows: In the caption delete "(Lafayette, La., to Meridian, Miss., and Homer, Ga., to Norfolk, Va.)" and substitute therefor "(Lafayette, La., to Meridian, Miss., and Homer, Ga., to Cape Charles, Va.)."

(3) Federal Airway: VOR 210 (Los Angeles, Calif., to Imperial, Pa.) amended as follows: (a) In the caption delete "(Los Angeles, Calif., to Imperial, Pa.)" and substitute therefor "(Los Angeles, Calif., to Harrisburg, Pa.)." (b) In the text delete "to the Imperial, Pa., VOR." and substitute therefor "Imperial, Pa., VORTAC; Int of Imperial VORTAC 074° T and the Ellwood City, Pa., VOR 122°T radials; Carrolltown, Pa., VOR; Int of the Carrolltown VOR 112° T and the Harrisburg VOR 273° T radials; to the Harrisburg, Pa., VOR."

(4) Control Area: VOR 210 (Los Angeles, Calif., to Imperial, Pa.,)amended as follows: In the caption delete "(Los Angeles, Calif., to Imperial, Pa.)" and substitute therefor "(Los Angeles, Calif., to Harrisburg, Pa.)".

(5) Federal Airway: VOR 459 (Fresno, Calif., to Linden, Calif.) amended by adding the following: "From the Fresno, Calif., VOR via the Friant, Calif., VOR; Int of the Friant VOR 319°T and the Linden, Calif., VOR 124°T radials; to the Linden, Calif., VOR. "

(6) VOR Reporting Points: Domestic VOR reporting points amended by adding the following In the text add: "Friant, Calif., VOR."

(7) Control Area: VOR 259 (Fresno, Calif., to Linden, Calif.) amended by adding the following: "All of VOR Federal awy No. 459".

Effective 0001 EST 25 August 1960:

(1) Federal Airway: VOR 81 (Midland, Tex., to Salt Lake City, Utah) amended as follows: (a) In the caption delete "(Midland, Tex., to Salt Lake City, Utah)" and substitute therefor "(Midland, Tex., to Denver, Colo., and Grand Junction, Colo., to Salt Lake City, Utah)". (b) In the text delete "Tobe, Colo., VOR;" and substitute therefor "Tobe, Colo., VOR, including a W alternate from Dalhart VOR to Tobe VOR via the Clayton, N. Mex., VOR."

(2) Control Area: VOR 81 (Midland, Tex., to Denver, Colo., and Grand Junction, Colo., to Salt Lake City, Utah) amended to read: "All of VOR Federal awy No. 81 including E alternates and a W alternate."

Effective 0001 EST 20 October 1960:

(1) Federal Airway: VOR 69 (Shreveport, La., to Chicago, Ill.) amended as follows: In the text delete "Int of Farmington omnirng 351° T and Troy VOR 230° T radials;" and substitute therefor "Int of Farmington VOR 351° T and Troy VOR 234° T radials;".

(2) Federal Airway: VOR 72 (Fayetteville, Ark., to Albany, N.Y.) amended as follows: In the text delete "Int of Maples VOR 055° and Troy VOR 230° radials;" and substitute therefor "Richwoods, Mo., VOR;".

(3) Federal Airway: VOR 191 (Memphis, Tenn., to Sag Bridge, Ill., and Chicago, Ill., to Rhinelander, Wis.) amended as follows: In the text delete "Int of Farmington VOR 351° and Troy VOR 230° radials;" and substitute therefor "Int of Farmington VOR 351° T and Troy VOR 234° T radials."

(4) Federal Airway: VOR 1 (Jacksonville, Fla., to New York, N.Y.) amended as follows: In the text delete "Salisbury, Md., VOR; point of Int of Woodstown, N.J., VOR 154° and Coyle VOR 203° radials; Coyle, N.Y., VOR; Idlewild, N.Y., VOR; Int of Idlewild VOR 359° and Wilton VOR 214° radials; to Wilton, Conn., VOR. Those portions of this awy between the point of Int of Coyle, N.J., VOR 203° and Woodstown, N.J., VOR 106° radials and the point of Int of Colts Neck, N.J., VOR 073° and Coyle, N.J.,VOR 031° radials lying more than 3-mi either side of the centerline are excluded. The portions of this awy which lie within the geographic limits of, and between the designated altitudes of, the Patuxent Restricted Area (R-43) and the Warren Grove Restricted Area (R-26) are excluded during the times of designation of these restricted areas." and substitute therefor "Salisbury, Md., VOR; Waterloo, Del., VOR; Int of Waterloo VOR 022° T and Coyle VOR 235° T radials; Coyle, N.J., VOR; Idlewild, N.Y., VORTAC; Int of Idlewild VORTAC 359° T and Wilton VOR 214° T radials; to Wilton, Conn, VOR. The portion of this awy which lies within the geographic limits of, and between the designated altitudes of, the Patuxent Restricted Area (R-43) and Fort Dix, N.J., Restricted Area (R-25), are excluded during the times of designation of these restricted areas."

(5) Federal Airway: VOR 426 (Richwoods, Mo., to Nakomis, Ill.) amended to read: "From the Richwoods, Mo., VOR via the St. Louis, Mo., VOR to Int of St. Louis VOR 062° T rad with the Troy, Ill., VOR direct radial to Decatur, Ill., VOR."

(6) Control Area: VOR 426 (Richwoods, Mo., to Nakomis, Ill.) amended to read: "All of VOR Federal awy No. 426."

Effective 0001 EST 12 January 1961:

(1) Federal Airway: VOR 166 (Martinsburg, W. Va., to Westminster, Md., and New Castle, Del., to Colts Neck, N.J.) amended as follows: (a) In the caption delete "(Martinsburg, W. Va., to Westminster, Md., and New Castle, Del., to Colts Neck, N.J.)" and substitute therefor "(Parkersburg, W. Va., to Norris, Pa., and Hoopes, Del., to Colts Neck, N.J.)." (b) In the text delete "From the Martinsburg, W. Va., VOR via the Westminster, Md., VOR;" and substitute therefor "From the Parkersburg, W. Va., VOR via the Clarksburg, W. Va., VOR; Kessel, W. Va., VOR; Martinsburg, W. Va., VOR; Westminster, Md., VOR;"

(2) Control Area: VOR 166 (Martinsburg, W. Va., to Westminster, Md.. and New Castle, Del., to Colts Neck, N.J.) amended as follows: In the caption delete "(Martinsburg, W. Va., to Westminster, Md., and New Castle, Del., to Colts Neck, N.J.)" and substitute therefor "(Parkersburg, W. Va., to Norris, Pa., and Hoopes, Del., to Colts Neck, N.J.")".

(3) Federal Airway: VOR 487 (Poughkeepsie, N.Y., to Benson, Vt.) added to read: "From Poughkeepsie, N.Y., VOR via Cambridge, N.Y., VOR; to Benson, Vt., VOR."

(4) Federal Airway: VOR 490 (Utica, N.Y., to Keene, N.H.) added to read: "From Utica, N.Y., VOR via Cambridge, N.Y., VOR; to Keene, N.H., VOR.".

(5) Federal Airway: VOR 431(Cambridge, N.Y., to Plattsburgh, N.Y.) amended to read: "From Cambridge, N.Y., VOR via Glens Falls, N.Y., VORTAC; to Plattsburgh, N.Y., VOR."

(6) Federal Airway: VOR 203 (Norwich, Conn., to Massena, N.Y.) amended to read: "From Norwich, Conn., VORTAC via Chester, Mass., VOR; Int of Poughkeepsie, N.Y., VOR direct radial to Cambridge, N.Y., VOR and Chester VOR 293° T radial; Albany, N.Y., VOR; to Massena, N.Y., VOR."

(7) Federal Airway: VOR 91 (New York, N.Y., to Montreal, Quebec) amended to read: In the text delete "including an E alternate via Int of Poughkeepsie VOR 007° and Albany VOR 140° radials, and also a W alternate;" and substitute therefor "including a W alternate."

(8) Control Area: VOR 487 (Poughkeepsie, N.Y., to Benson, Vt.) added to read: "All of VOR Federal awy No. 487."

(9) Control Area: VOR 490 (Utica, N.Y., to Keene, N.H.) added to read: "All of VOR Federal awy No. 490."

(10) Control Area: VOR 431 (Cambridge, N.Y., to Plattsburgh, N.Y.) amended to read: "All of VOR Federal awy No. 431."

(11) Control Area: VOR 91 (New York, N.Y., to Montreal, Quebec) amended to read: "All of VOR Federal awy No. 91 including an E alternate and a W alternate."

Effective 0001 EST 9 February 1961:

(1) Federal Airway: VOR 489 (Paterson, N.J., to Albany, N.Y.) added to read: "From the Int of Wilkes Barre-Scranton, Pa., VOR 117° T and Wilton, Conn., VOR 240° T radials via Clermont, N.Y., VOR; to Albany, N.Y., VORTAC. The portions of this awy which lies within the geographic limits of and between the designated altitudes of, the West Point, N.Y., Restricted Area (R-93) is excluded during the restricted area's time of designation."

(2) Federal Airway: VOR 91 (New York, N.Y., to Montreal, Quebec) added to read: In the text delete "Poughkeepsie, N.Y., VOR; Albany, N.Y., VOR, including a W alternate;" and substitute therefor "Poughkeepsie, N.Y., VOR; Int of Poughkeepsie VOR 342° T and Albany VORTAC 181° T radials; Albany, N.Y., VORTAC;".

(3) Control Area: VOR 489 (Paterson, N.J., to Albany, N.Y.) added to read: "All of VOR Federal awy No. 489."

(4) Control Area: VOR 91 (New York, N.Y., to Montreal, Quebec) amended to read: "All of VOR Federal awy No. 91 including an E alternate."

(5) Five-mile radius zones amended by adding: "Poughkeepsie, N.Y.: Dutchess County Airport. (lat 41-37-40, long. 73-53-00.)

DISCONTINUANCE OF 135.0 MC: Effective 0800 GMT July 1, 1960, transmitting 135.0 mc will be discontinued in Flight Service Stations and Combined Stations/Towers.

FREQUENCY CHANGE - 126.18 MC to 126.20 MC: FAA will change all existing 126.18 mc frequency assignments to 126.20 mc during the month of July 1960. The individual locations affected will be NOTAMED as the changes are accomplished. The military services have advised their commands to make the change not later than July 1, 1960.

ATLANTA/ WASHINGTON, D.C. CENTERS BOUNDARIES: Effective 0001 EST 2 June 1960, the Atlanta/Washington, D.C. Centers Boundaries are amended as follows: Beginning at the present boundary at lat 36-22-30, long. 79-20-00; thence SE to 36-18-00, 79-15-30; S along the the western boundary of V-39 to 35-50-00, 79-28-00.

NEW YORK/CLEVELAND ARTCC CONTROL AREA/FLIGHT ADVISORY BOUNDARY: Effective 0001 2 June 1960, the New York/Cleveland ARTCC Control Area/Flight Advisory Boundary is revised as follows: Beginning at the present boundary at the intersection of the S edge of V 116 and the W edge of V 35, thence southwesterly along the W edge of V 35 to its intersection with the N edge of V 232, thence westerly along the N edge of V 232 to join the present New York/Cleveland ARTCC Control Area/Flight Advisory Boundary at the intersection of the N edge of V 232 and the western edge of V 119.

LOCATION IDENTIFIERS: The following changes affect the use of the location identifiers:

ALM	Alamogordo, N. Mex., Alamogordo Municipal Airport (Descriptive change from Radiobeacon)
CEX	Chena Hot Springs, Alaska- Intermediate Field (Descriptive change from REP)
CTH	Cape Thompson, Alaska, REP (Assignment)
HCA	Big Spring, Tex., Howard County Airport (Assignment)
UNI	University, N.Y., Radiobeacon (Assignment)
UXL	Crystal Falls, Alaska - Intermediate Field (Assignment)
XLV	Cleveland, Ohio, Test VOR

RESTRICTED AREA AMENDMENT: The following Restricted Area Amendment shall become effective 3 May 1960:

(Part 608 - Restricted Area)

In Section 608.40, the Oswego, N.Y., Restricted Area (R-70) is amended by deleting "Designated altitudes. Surface to 59,000 ' MSL. Time of designation: Daylight hours, 7 days per week, on a year-round basis." and substitute therefor "Designated altitudes. Surface to 40,000' MSL. Time of designation: Sunrise to sunset."

AIR FORCE BLACKOUT TRAINING: A waiver to the provisions of section 60.23(A) of part 60 of the Civil Air Regulations has been granted to the Air Defense Command and they are conducting Interceptor Training against target acft without navigation lights at and above flight level 400 within the continental limits of the U.S.A. during hours of darkness. ADC assumes responsibility for radar separation between target and interceptor aircraft and all other aircraft.

ON REQUEST REPORTING POINTS: The following on-request reporting points have been designated, modified or cancelled and shall become effective on 2 June 1960:

DESIGNATED:

(1) KENT, OHIO(VHF) INT: 356 M rad Navarre, Ohio VOR; 293 M rad Akron, Ohio VOR.

(2) TALLMADGE, OHIO(VHF) INT: 293 M rad Akron, Ohio VOR; N crs Akron, Ohio ILS lclzr. (Depict on Akron AL chart only.)

(3) MIDDLESBORO, KY(VHF) INT: 141 M rad London, Ky. VOR; 013 M rad Knoxville, Ky. VOR.

(4) LAKEVIEW, TENN(VHF) INT: 063 M rad Crossville, Tenn. VOR; 013 M rad Knoxville, Tenn. VOR.

MODIFIED:

(1) SMOKY JUNCTION, TENN(VHF) INT: 201 M rad London, Ky. VOR; 321 M rad Knoxville, Tenn. VOR.

(2) CLINTON, TENN(VHF) INT: 063 M rad Crossville, Tenn. VOR; 321 M rad Knoxville, Tenn. VOR.

(3) LONE ROCK, GA(VHF) INT: 009 M rad Columbus, Ga. VOR; 080 M rad LaGrange, Ga. VOR.

CANCELLED:

(1) DERBY, OHIO(LF) INT.
(2) CHIPPEWA, OHIO(LF) INT.
(3) WALTER, OHIO(LF) INT.
(4) TALLMADGE, OHIO(LF) INT.

HOLDING PATTERNS: The following holding patterns have been established or modified and shall become effective on 2 June 1960:

ESTABLISHED:

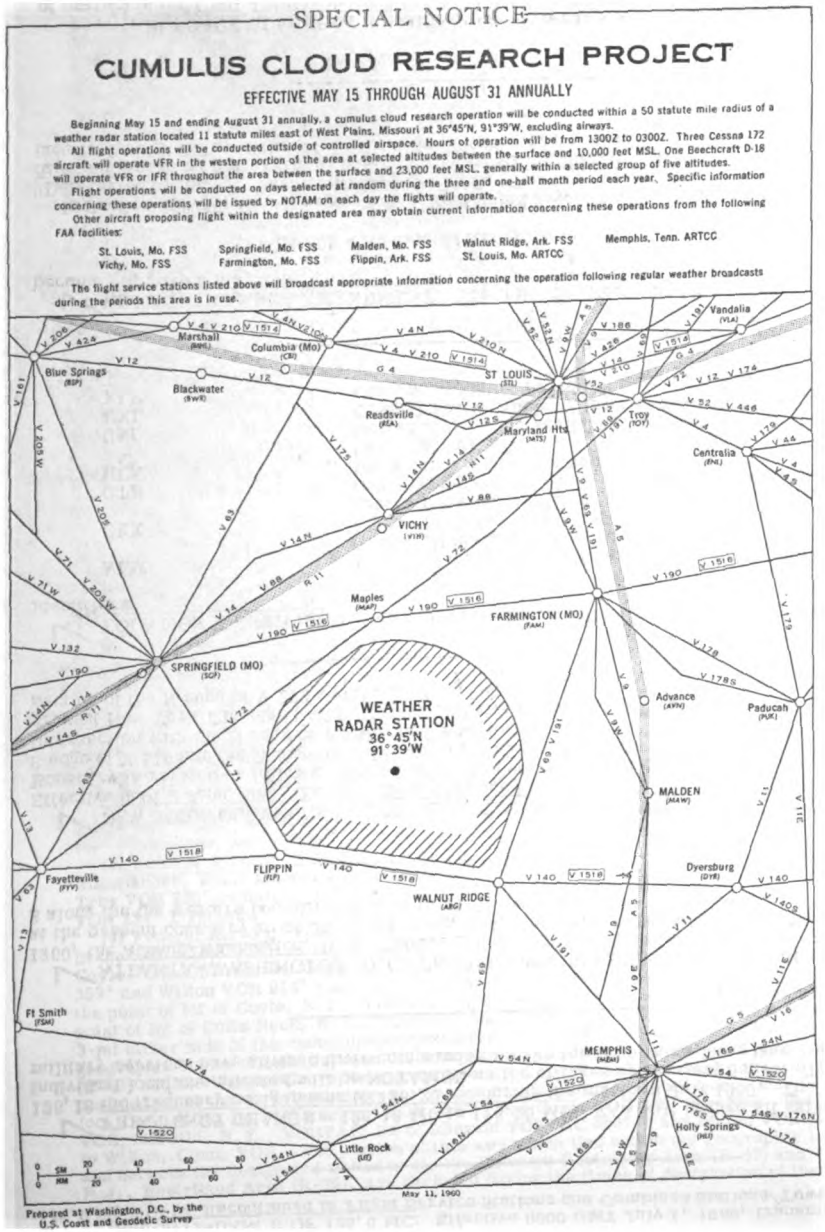
(1) LAKEVIEW, TENN(VHF) INT: direction of holding - NE on 013 M rad Knoxville, Tenn. VOR; direction of turns-left; time - 2 mins.

MODIFIED:

(1) EUREKA, N C(VHF) INT: direction of holding - NE on 196 M rad Rocky Mount, N.C. VOR; direction of turns-right; time - 1 min; MHA - 1500'.

PREFERRED ROUTES CORRECTIONS: Airman's Guide Volume 15 Number 3.

(1) Page 122, Newark to Metro. Wayne Co. should read: SSB V232 FTZ V188 V26 V224 V133.



(2) Page 123, Newark to Willow Run should read: SSB V232 FTZ V188 V103 V90.

(3) Page 123, New York(LaGuardia) to Metro. Wayne Co. should read: BCH V116 V14N V188 V26 V224 V133.

(4) Page 123, New York(LaGuardia) to Willow Run should read: BCH V116 V14N V188 V103 V90.

(5) Page 124, add - Pittsburgh-St. Louis: or Kilgore V210.

MEA, MCA, MOCA, MRA, INTERSECTIONS AND REPORTING POINTS: (1) Correct the MEAs in Amendment 60, effective date of June 2, 1960 to read as follows: V-68, Floresville Int., Tex., to Essen Int., Tex., MEA 2500', MOCA 2000', MRA 3000' to Floresville Int., MRA 4000' Essen Int: Essen Int to Burnell Int., Tex., MEA 4000, MOCA 1600'; Burnell Int. to Corpus Christi, Tex., VOR 1400'. (2)Effective June 2, 1960, the MEA on V-100 from Ft. Dodge, Iowa VOR to Sioux City, Iowa VOR is 3000'. (3) Continuous navigation signal coverage between Dunoir, Wyoming VOR and Sheridan, Wyoming VOR on V-1500 is 30,000'. (4) Correct the MEAs in Amendment 60 effective date of June 2, 1960 to read as follows: V1533, Red Bluff, Calif., VORTAC to Klamath Falls, Ore., VORTAC MEA 13,500', MOCA 10,000'.

AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about 1 month, making former prints obsolete for aviation use. Keep orders to a minimum until new edition is printed.

Bellingham	Pocatello	Yellowstone Park	WAC 139
Boise	Portland	San Francisco Local	WAC 193
Duluth	Salt Lake City	Seattle Local	WAC 268
Klamath Falls	Seattle	JN 29	WAC 308
Mt. Shasta	Spokane	APC 3073	WAC 407

NEW EDITIONS

A new edition or new chart for the charts listed below is now available. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION".

Standard Aeronautical Charts - dates shown are release dates.

Attention: Pilots

Attention, Pilots!

CHECK YOUR AERONAUTICAL CHARTS AND MAKE SURE THAT EACH OF THE OBSTRUCTIONS LISTED BELOW IS CARRIED!
IF ANY ARE MISSING, INSERT THEM NOW, DON'T DELAY! ONLY YOU CAN MARK YOUR CHARTS - IT IS YOUR RESPONSIBILITY!

This list covers recent obstructions (television tower, smoke stacks, etc) which are 500 feet or more above the ground. It will be carried in the Airman's Guide at frequent intervals Newly added or changed information will be indicated by arrows. Towers under construction are carried in Notam section until completed.

The Coast and Geodetic Survey sectional charts show all known dangerous obstructions at the time a particular chart is issued. As these charts are published at intervals of six months to a year, dangerous obstructions built during the interim between issues must be placed on the charts by the user. The position, height and top elevation above MSL of these new obstructions can be taken from the list given below. New Obstructions will be carried in this list until six months after the issuance of the sectional charts depicting the obstruction data and then deleted.

REVISIONS TO STANDARD INSTRUMENT APPROACH PROCEDURES

Bearings, headings, courses & radials are magnetic. Elevations & altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are n nautical miles unless otherwise indicated, except visibilities which are in statute miles.

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE RADAR

If a radar instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure authorized for such airport by the Administrator of the FAA. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the radar controller. From initial contact with radar to final authorized landing minimums, the instructions of the radar controller are mandatory except when (A) visual contact is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach. Except when the radar controller may direct otherwise prior to final approach, a missed approach shall be executed as provided below when (A) communication on final approach is lost for more than 5 seconds during a precision approach, or for more than 30 seconds during a surveillance approach; (B) directed by radar controller; (C) visual contact is not established upon descent to authorized landing minimums; or (D) if landing is not accomplished.

TRANSITION				CEILING AND VISIBILITY MINIMUMS

AIRMAN'S GUIDE is issued every two weeks. This issue includes all data on record as of 1200 Z on the above date. For later information consult Teletype NOTAMS.

NOTAMS page 3

Special Notices page 28

IMPORTANT NOTICE: Nation-wide changes in FAA's ATC communications July 7. See p. 41

FEDERAL AVIATION AGENCY

ISSUANCE: The Airman's Guide is issued every two weeks. Every issue contains a NOTAM section; every other issue additionally contains a Radar-Radio Listings section; and once every three months the Airport Directory appears in an issue containing both NOTAMS and the Radar-Radio Listings. See below for contents of these sections.

RETENTION: To enable users to know which issues should be retained, a suitable notice is carried on the front cover indicating which ones are still current.

CONTENTS: The contents (by section or other appropriate breakdown) of each issue are noted by tab and page number on the front cover. The first page of each section carries the Legend for interpreting codified information. Material usually included in each section is as follows:

(1) NOTAMS (including Special Notices): Under appropriate geographical headings (state and/or city, as applicable) there is given the current condition (if there has been a temporary or permanent change concerning which a NOTAM has been issued) of facilities and obstructions, plus any special data (including flight regulations or restrictions). Where NOTAMS cannot be associated with a specific geographical location or where the application is generalized, they are carried in a subdivision of NOTAMS entitled "Special Notices." The Special Notices section follows the NOTAMS and, like the NOTAMS, is separately listed by a tab and page number on the front cover. Inportant or unusual Special Notices are additionally indicated on the front cover in the box provided, giving the subject and page number where the data is to be found. Included as Special Notices are data and/or amendments concerning restricted areas, location identifiers, minimum en route altitudes, civil airways, airway structure during VOR shutdowns, control areas, control zones, reporting points, VOR check points, standard instrument approach procedures, control area/flight advisory area boundaries, civil air regulations, preferential routes, flight test areas, military maneuvers, aeronautical charts, etc. Also included are amendments and changes to the Flight Information Manual as well as to previously issued Airman's Guides.

(2) Radar-Radio Listings: Lists radar facilities, instrument landing systems, and aeronautical radio facilities with (as appropriate) their transmitting and guarded frequencies, identification, station class, range courses, other appropriate data, and remarks.

(3) Airport Directory: This codified directory provides the following data on airports: type, location (with reference to associated town or city), elevation, number of runways, length of longest runway (indicating surfacing), lighting, servicing, availability of weather reports and or Unicom, fuel octanes, and appropriate remarks.

PRICE: See information in box below.

REPORTING INFORMATION TO EDITORS: Data for inclusion in the Airman's Guide should be reported to the editors at the following address: Federal Aviation Agency, Washington 25, D. C., Attention: MS-120. Appropriate instructions for reporting data are contained in FAA's Manual ATM-2-B, entitled "Communications Procedures." However, since some airport data, unlike most other data, may not originate from official sources, the following explanatory information is provided.

The Airman's Guide covers primarily two broad fields of civil airport information: permanent data changes and temporary hazardous conditions. Permanent airport data refers to new airports or changes in field layout, servicing, lighting, restrictions or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions which make airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, thaws or construction; or merely a burned out obstruction light or a runway unusable or partially unusable because of construction.

Since the aeronautical public should be immediately advised of such hazardous conditions, reporters should utilize the FAA Flight Service Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest FAA service station for dissemination as a NOTAM and for further transmission to the editors of the Airman's Guide. If this is not feasible, the item should be reported directly to the Federal Aviation Agency, Washington 25, D. C., Attention: MS-120.

Permanent airport data changes should be reported to the appropriate FAA Regional Office for coordination before they are included in the Airman's Guide.

NOTE: The Federal Government disclaims responsibility for non-Federal air navigation facilities, including airports.

Abbreviations

The editors are now in the process of making changes in the contractions and abbreviations used in the Airman's Guide. We are doing this in order to conform to the new, standardized material contained in the FAA publication entitled CONTRACTIONS. This publication, which is dated July 1959 and issued in the ATM Manual series, is available from the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C., at 75 cents per copy.

Many of the abbreviations and contractions used in the Airman's Guide are already in conformity with the CONTRACTIONS publication. However, from among those which have changed, we have selected a few which we frequently use in the Airman's Guide. They appear in the list which follows.

adjt	adjacent	dptr	departure	jctn	junction

LEGEND

(7-21) -- Month and day the information was reported.

** -- New or revised airport or miscellaneous data. Pilots should inscribe this information on charts and records.

* -- New or revised radio or radar data. Pilots should inscribe this information on charts and records.

NOTE: Because of space limitations, such "permanent" data will usually be cited only once. Temporary data, however, will be continuously cited until no longer in effect.

ALABAMA: ALBERTVILLE ARPT: 150' lgtd tmpry twr erected approx 1 mi SE at lat 34-16-12, long. 86-12-36. Will be dismantled about Aug 15. (3-5)
ANNISTON RADIO: About June 6, VOR will be shut down until aprx June 11 - class chg to L-VOR and freq chg to 108.8 mc. (5-4)
BIRMINGHAM RADIO: Caution - E course LF rng has severe multiples. About June 13, TACAN will be shut down until aprx June 23 - eqpmt installation. (5-16)
BIRMINGHAM ARPT TOWER: About July 18, freq 126.18 mc will be chgd to 126.2 mc.
**BIRMINGHAM MUN ARPT: Due non-visibility twr unable to ctl gnd tfc on Hayes ramp. Due to comsng apch lgt system rnwy 5, ILS minimum day & ngt rnwy lowered to 200'-1/2.
ELBA ARPT: New arpt reported. Lctn 1.5 mi W; lat 31-25, long. 86-05; No. of rnwys: 2; Lngst rnwy & facils: h30-B*L4-; Rmks: Unattended. Trees E. (4-7)
GADSDEN ARPT: 150' unlgtd tmpry twr erected approx 7 mi NE at lat 34-04-00, long. 86-01-31. Will be dismantled about Aug 15. (3-5)
HUNTSVILLE RADIO: About May 23, VOR will be shut down until aprx May 28 - freq chg to 108.2 mc and class chg to L-VOR. (5-5)
MOBILE RADIO: VOR radials 018° clockwise thru 028° unusable. (4-29) DMET operg test basis; channel 80. (7-10)
MOBILE, BATES FLD TOWER: About July 18, freq 126.18 mc will be chgd to 126.2 mc.
MOBILE, BROOKLEY AFB SPECIAL NOTICE: Due to concentrated opern of hi-performance jet acft, all tfc other than that for Brookley, should remain clear of the Brookley Ctl Zone during VFR flgt below 2700', unless otherwise cleared by the Brookley Ctl Twr.
MOBILE-BROOKLEY AFB RADIO: USAF VOR radials 212° thru 222° clockwise unusable - acct severe scalloping. (7-10)
MOBILE-BROOKLEY AFB RADAR APPROACH CONTROL: About July 18, freq 126.18 mc will be chgd to 126.2 mc. (4-25)
MONTGOMERY SPECIAL NOTICE: Due to extsv jet tfc, all acft are cautioned to maintain cont rdo ctc with appropriate ctl twr when operg in Danelly Fld or Maxwell AFB ctl zone.
MUSCLE SHOALS RADIO: DMET operg test basis; channel 112. (5-5)
ST. ELMO ARPT: 250'(258'MSL) lgtd tmpry twr being erected 24 nmi ESE(132°T) at lat 30-13-54, long. 87-55-41. (4-18)
TUSCALOOSA RADIO: DMET operg test basis; channel 82. (7-1)
TUSCUMBIA, TRI CITIES ARPT: 503'(962'MSL) lgtd stack being erected 6.5 nmi W(282°T) at lat 34-44-35, long. 87-50-58. (12-10)
TUSKEGEE RADIO: DMET operg on test basis; channel 120. (11-5)
WETUMPKA, ELMORE FLD: E/W rnwy clsd, paving.
ARIZONA: BENSON SPECIAL NOTICE: Pilots cautioned to avoid flying over or near Apache Powder Co, nitro-glycerin plant approx 4 mi SSW of St. David because of potential explosion hazard. (11-6)
BUCKEYE RADIO: About June 13, VOR/DME will be shut down until aprx June 28 - reconstr and freq chgs: 110.6 mc/channel 62. (5-20)
CLIFTON, GREENLEE COUNTY ARPT: N/S rnwy usable with ctn, weeds. (5-4)
COCHISE RADIO: DMET operg on test basis; channel 41. (10-11)
GILA BEND RADIO: DMET operg test basis; channel 113. (1-27)
GILA BEND ARPT: New arpt reported. Lctd 2.0 SE. 2 rnwys, longest runway and facilities 40-S5; Fuel F3.
**MARICOPA SPECIAL NOTICE: CAUTION - DO NOT MISTAKE FOR LNDG AREA: Space Surveillance Stn at lat 33-06-31, long. 112-01-46 4 mi N Maricopa. 1200' W and parallel to hwy. Site is strip 300' x 1800' with paved portion lengthwise thru cntr 100' in width and studded with 6' steel posts. This permanent hazard lctd 22 nmi S Phoenix-Sky Harbor Arpt. (12-12)
*PEACH SPRINGS RADIO: May 18, VORTAC comsnd. TACAN channel 117. Class: M-VOR TACW.

PHOENIX SPECIAL NOTICE: Hi Density Jet Tfc: Pilots on other than IFR clearance should either avoid or use extreme caution when traversing the following areas within which Luke AFB hi-density tfc is operg. Normal trng hrs are from 0600-1800 MST Mon thru Fri. Hi-density tfc will be operg VFR on R83, V94, V66 and R9 within a 10 mi radius of the Gila Bend VOR & btn the Gila Bend VOR & a point 52 nmi W on R9 and V66 at alts below 2000' and at 5000', 6000', 7,000', 15,000', 16,000' and above 25,000' MSL. On R83 and V94 btn a point 10 nmi S of the Hassayampa VOR & the Gila Bend VOR at & below 4000' MSL & 25,000' and above. All provisions of Special Air Regulation #421 apply within the following area: G5 & V16 W of Phoenix btn 112° - 10' W and 112°-35' W. (6-1)
**PHOENIX, AIRHAVEN ARPT: Abandoned.
PHOENIX, DEER VALLEY ARPT: 5000' exten E end E/W rnwy closed. (5-5)
PRESCOTT RADIO: May 19, TACAN shut down until aprx June 19 - reconstr. (5-19)
SCOTTSDALE, THUNDERBIRD ACADEMY ARPT: N/S & NW/SE rnwys clsd. (4-7)
TUCSON SPECIAL NOTICE: High Density Jet Traffic: Pilots on other than IFR clearance should either avoid or use extreme caution when traversing the following area at an alt above 19,000' MSL. Hi-density jet tfc operg at and above 20,000' MSL within the area from Douglas VOR to Cochise VOR to the Cortaro Int. to the Robles Int. to the Kinsley Int to the Douglas VOR. Hrs of opern, cont daily. (6-4)
TUCSON RADIO: VORTAC unusable beyond 25 mi, 320° clockwise thru 080° at MOCA.
TUCSON ARPT SPECIAL NOTICE: Target towing by jet acft during dalgt hrs under VFR conditions on wk-ends and intermittently thru week on a direct route from Ajo, Ariz. descending from 20,000' so as to reach 5500' prior to joining ctl area vicinity San Pedro, Ariz thence direct to San Xavier mission, thence direct to Tucson arpt. Ctc Tucson rdo or ctl twr for info concerning towing activity. (2-10)
**TUCSON, DOWNTOWN ARPT: Delete; private fld. (5-4)
TUCSON MUN ARPT: 6' obstacle exists on jet arresting barriers at the ends of rnwy 12 and 30. (1-7)
WINSLOW RADIO: TACAN operg on test basis; channel 81. About May 24, VORTAC will be comsnd. TACAN channel 81. Class M-BVORTAC. (5-13) About July 11, VORTAC and DME will be shut down until aprx July 26 - freq chg of VOR to 110.0 mc; TACAN channel to 37 and DME channel to 20. (5-13)
WINSLOW MUNICIPAL ARPT: Rnwy 17-35 open days. (4-26)
YUMA-MCAAS/YUMA CO. ARPT: Rnwy 17-35 clsd. Hi-density jet tfc vncty of arpt. Hvy constr in progress both sides rnwy 3-21. Constr on txwys. Lgts on rnwy 3-21 only. 2-way rdo rqrd. (4-6) Tetrahedron uncontrollable not to be used as rnwy-in-use indicator.
ARKANSAS: BENTON, SALINE CO. ARPT: Rnwy lgts and unicom inop. No fuel avbl. (2-23)
*BLYTHEVILLE AFB RADIO: USAF H facil recomsnd. Freq: 311 kc. Ident: BYH. Lctd lat 36-03, long. 89-56. Class: HW. (5-12)
BRINKLEY, FEDERER MEMORIAL ARPT: Clsd for constr. (5-16)
EL DORADO RADIO: DMET operg test basis; channel 108. (7-13) VOR 034° radial rough & scalloping above 10,000'; Hampton Int on V1522 formed by El Dorado 034° and Texarkana 082° unusable above 10,000'. (1-27)
FAYETTEVILLE RADIO: DMET operg on test basis; channel 96.
FAYETTEVILLE, DRAKE ARPT: Constr work in progress on txwy and ramps. N/S txwy W side hard surface rnwy; use hard surface rnwy only; open trenches within 50' both ends hard surface rnwy. (5-10)
FORREST CITY, HUTCHERSON FLYING SERVICE: New arpt reported, lctd 3.0 mi S; one 3000' N/S hard surfaced rnwy, elev: 248', rnwy lgts, green & white rotg bcn. 80 & 100 oct fuel avbl. UNICOM 122.8 mc. (2-16)
FT SMITH RADIO: About June 22, TACAN will be shut down until aprx July 1 - eqpmt installation. (5-12)
FT SMITH MUN ARPT TOWER: About July 18, freq 126.18 mc will be chgd to 126.2 mc. (4-27)

ARKANSAS: LITTLE ROCK, ADAMS FLD TOWER: About Jul 18, 126.18 will be chgd to 126.2mc.
LITTLE ROCK, ADAMS FLD: North E/W txwy clsd acct constr. (5-23)
MARIANNA ARPT: New arpt reported. Lctd 1.0 mi W; elev: 240'; one sod rnwy-2600'; storage; minor A & P rprs; 80 oct fuel avbl. (3-24)
PINE BLUFF, GRIDER ARPT: Rnwy end identification lgt system decmsnd-modification.
TEXARKANA RADIO: TACAN operg on test basis; channel 118. (9-15)
TEXARKANA ARPT: Men & eqpmt on fld; flagmen stationed where vehicles cross rnwys.

CALIFORNIA: AGNEW RADIO: VOR MRA V 110 between Mission and Livermore Ints increased 6000'-acct scalloping. (4-9)
ARCATA RADIO: VHF/DF coverage 40 nmi at MEA excp 030°-040°, 11,000'; 040°-060°, 12,000'; 060°-090°, 13,500'. (8-9)
BAKERSFIELD RADIO: About June 6, TACAN will be shut down until aprx July 7-reconstr.
BAKERSFIELD, MEADOWS FLD TOWER: ILS lclzr, glide slope and LMM shut down until aprx July 1- relctn. Lclzr will be moved 3370' NW of present site. Glide slope will be moved 2400' NW and 800' SW of opposite side NW/SE rnwy; LMM will be 3347' SE of end NW/SE rnwy. OM will be 5.16 smi from SE end NW/SE rnwy. (5-17)
**BAKERSFIELD, MEADOWS FLD: Rnwy 7-25 clsd all operns, excpt tkofs rnwy 25 for acft 12,500 lbs and under. (4-19) Rnwy 12-30 open, length 5700' x150', 60,000 lbs single wheel-loading. 900' overrun end of rnwy 30. (5-9)
BLUE CANYON ARPT: Use at pilots discretion, may be covered with snow. (4-27)
BLYTHE RADIO: DMET oper test basis; channel 121. (5-12)
★BURBANK, LOCKHEED AIR TERMINAL TOWER: VHF/DF coverage beyond tolerance and unusable 015° clockwise to 075°, 25 nmi at 18,000'; 075°-090°, 30 nmi below 9000'; 090°-265° below 6000'; 265°-290° below 9000'; 290°-015° below 13,000'. (1-15) Freq 348.6 mc operg. (5-18)
**BUTTON WILLOW-KERN COUNTY #15 ARPT: Low intensity rnwy lgts comsnd Apr 4. 4-5)
CAMARILLO RADIO: All LF rng courses have multiples. (6-17)
CHINO ARPT TOWER: Twr unmanned; on standby basis indef. (7-16)
CHINO ARPT: Caution hvy acft intermittent flgt tests on rnwy 3-21. (4-12)
CLEAR LAKE HIGHLANDS, PEARCE FLD: Closed.
CORONA MUN ARPT: New arpt reported, lat 33-53, long. 117-36; lctn: 2.5 NW. One oil strip 2000' x 40'. No lgtg, fuel: F3. Attended 0800-1700. P-line W. Minor rprs. (3-21)
CRESCENT CITY RADIO: VOR apch radial 310° unusable due scalloping. (5-12) About July 1, rcvr 3023.5 kc will oper on req. (5-13)
**DAGGETT ARPT: 20 lgtd wind mast lctd 2290' ENE of int rnwy 3 and 7, 600' SE of cntrline of rnwy 3 and 940' N cntrline rnwy 7. (3-30)
EL CENTRO RADIO: TACAN operg test basis; channel 86. (9-21) About June 3, VORTAC will be comsnd. TACAN channel 86. Class M-BVORTAC. (5-16)
ELSINORE, SKYLARK FLD: Caution, glider in vcnty of fld, parachute jumpers drop zone btn end of rnwy and the lake. (8-4)
FAIRFIELD-TRAVIS AFB RADIO: LF rng has splits and multiples beyond 20 mi. (8-27)
FILLMORE RADIO: VOR usable 285°-315° 25 nmi, from 315°-355° 30 nmi. TACAN unmontrd tmprly. (5-17)
FORTUNA RADIO: VOR has lgt to moderate scalloping beyond 26 nmi. (5-16)
**FREMONT, CENTER FLD: Caution- extsv glider activity conducted every Wed thru Sun.
★FRESNO RADIO: DMET operg test basis; channel 76. (4-25) VOR class chgd: H-BVOR.
FRESNO AIR TERMINAL TOWER: ILS LMM unusable beyond 10 mi. (2-24) About June 1, ILS LMM and MM will be shut down until aprx July 5- relctn to 0.68 smi from the apch end of rnwy. (4-8)
FRIANT RADIO: Mar 1, constr began on VOR. Freq: 115.6 mc. Ident: FRA. Lctd at lat 37-06-16, long. 119-35-42. Mag var.: 16° 23' E. Elev: 2350' MSL. Montrg category (1) Ctld from Fresno CS/T. Class: M-BVOR. (3-28)
FULLERTON MUN ARPT: Due non-visibility twr unable to ctl tfc on extreme S, E/W txwy in an area 200' either E or W of ctl twr. Caution: acft parked close aproximity all txwys. Caution when operg VFR conditions S and SW Fullerton in vcnty Los Alamitos NAS acct mil jet and reciprocating acft tfc. (7-7)
GAVIOTA RADIO: DMET operg on test basis; channel 70. (10-1)
GORMAN RADIO: About June 6, VORTAC will be shut down until arpx June 21- Freq chg to 116.1 mc /TACAN channel chgd to 108. (5-5) Durg this period, following route structure & MEAs in efct: Unusable Awys: V 137 Cuyama Int- PMD; V299 Chatsworth Int- BFL; V299W FIM-GMN. Unusable Reporting Points: Castaic, Grapevine, Whitman, Sandberg, Shafter and Victory. Usable Awys (Tmprly redesignated as follows with published MEAs and MCAs unless otherwise indicated): V23 Saugus Int-BFL, MEA 9000'. (5-13)

CALIFORNIA: HAYWARD MUN ARPT: All VFR flgts exercise extreme caution when arriving, departing or operg in vcnty. Extsv simulated and actual IFR apchs on all apch navaids to Oakland Intl Arpt pass in the proximity of Hayward Mun Arpt. NW/SE taxi strip on E side of arpt designated as ramp area twr unable to ctl tfc. 65' twr under constr 800 yds 065° from int rnwys 28L and 22. (5-18)
HEMET, RYAN ARPT: Controlled parachute jumps under VFR conditions from 7000' over NW corner occasionally daily; operns accelerated on week ends. (1-14)
HERLONG SPECIAL NOTICE: Caution within a 10 mi radius. Hvy demolition activities being conducted between 0800 and 2400 PST Mon thru Fri. Danger of fragments below 8,000' MSL. (3-29)

WYOMING: BOYSEN RESERVOIR RADIO: About May 23 through June 2, VOR voice will be discontd. About June 2, voice ctl and montrg of 122.1 mc will be provided from Worland FSS. (5-20) About June 23, TACAN will be shut down until aprx July 23, reconstr. (5-12)

**CASPER SPECIAL NOTICE: Civil jet trng being conducted periodically seven days wk durg dalgt hrs within the unctld airspace bounded on the N by V26 btn Ross Int and RAP, V89 btn RAP and CDR, V182 btn CDR and DGW, V247 btn DGW and the Ross Int at alts 10,000 to 23,000'MSL inclusive. All acft contemplating VFR flt thru this area are advised to monitor one of the following FSS: Casper, Wyo; Chadron, Nebr; Rapid City, S. D. Durg trng periods, these stns will include an advisory message at the end of each wea bcst.

CASPER RADIO: TACAN operg test basis; channel 109. About June 1, VORTAC will be comsnd. TACAN channel 109; class H-BVORTAC. (5-5)

CASPER AIR TERMINAL TOWER: ILS glide slope has moderate to severe path roughness above 7300' and beyond 6 nmi. Not to be used for auto pilot apchs. (12-5)

CHEYENNE RADIO: May 17, VOR shut down until aprx May 31, reconstruction. During this period, following route structure and MEA will be in effect: Unusable awys: V19 DEN-Wheatland Int; V19E DGW-CYS; V89 DEN-CDR; V89E CYS-BFF; V138 RKR-SNY; V138S CYS-SNY; V138N RKR-CYS. Unusable reporting points: Tie Siding, Buford, Egbert, Pine Bluff, Carpenter, Bear Creek, Nunn, Silver Crown, Millbrook, Meadows, Albin and New Raymer. Usable awys (tmpry redesignated as follows with published MEAs and MCAs unless otherwise indicated): V4N GLL-LAR, 11,000'; V207 GLL-BFF, 7500'; V89E GLL-CYS via GLL VOR R327° and 327° brg to CYS LFR, 9000'; V118 LAR-CYS via LAR VOR R090° and 090° brg to CYS LFR, 11,000'; V132 AKO-CYS via AKO VOR R295° and 295° brg to CYS LFR, 7300'. Reporting points: Ft Morgan, Colo. DEN R070° and AKO R295° MRA 8000'. (5-16)

CHEYENNE MUN ARPT: Ramp area N and NE of hangars on N side of arpt and ramp area within 100' radius of twr structure uncontrolled, not visible from twr. Caution, vcnty of fld due to military jet acft operns and practice inst apchs durg hrs 0700-2200 MST. Twr ctld jet arresting barrier in opern rnwys 8 and 26. (12-19)

CODY MUN ARPT: Rnwy 9-27 clsd. (8-30)

DOUGLAS RADIO: DMET operg test basis; channel 23. (3-18)

DUNOIR RADIO: DMET operg test basis; channel 81. (4-17) About June 2, VOR voice ctl will be provided from Worland FSS. (5-4)

EVANSTON ARPT: New arpt reported; 5 mi NNW; elev 6600'; one dirt strip N/S 2800' length, soft when wet. (3-2)

LARAMIE RADIO: About July 1, freq 3023.5 kc will oper on req. (5-13)

ROCK SPRINGS RADIO: ILS glide slope has light to moderate roughness between OM and LFR. (1-16) About June 13, TACAN will be shut down until aprx July 13, reconstruction. (5-17) During this period, following route structure and MEAs in effect: Unusable awys: V6N FBR-CKW; V4 MLD-CKW; V4N and V6N RKS-CKW; V187 RKS-Yampa Int; J32V, J84V SLC-RKS; J84V RKS-BFF. Unusable reporting points: Superior, South Pass, Sweetwater, Green River, Hiway, Dinosaur and Yampa. Usable awys: V6 between FBR and CKW with MEA of 11,000'. (5-13)

ROCK SPRINGS MUN ARPT: Rnwy 3-21, 200' SW end clsd, flagged, unlgtd, rnwy 7-25, 800' W end from threshold lgts and 500' from W end of hard surface clsd, unflagged, due to 6' unlgtd FAA detector obstn 50' inside of threshold lgts on W end of rnwy 7-25, to permit 40 to 1 safety glide margin; full length avbl for tkof. (5-16)

SHERIDAN RADIO: DMET operg on test basis; channel 100. (6-4) Soon, VORTAC will be comsnd; TACAN channel 100, class H-BVORTAC. (5-12)

WORLAND RADIO: About June 1, FSS will be comsnd; freqs tsmtg and rcvg: 121.5, 126.7, 135.9, 243.0, 255.4, 272.7 mc. Tsmtg: 120.7, 122.2, 135.0 mc; rcvg: 122.1 mc. (5-4)

WORLAND MUN ARPT: Rnwy 16-34 clsd, constr. Tmpry parallel 4000' dirt strip W side rnwy 16-34 usable excp when wet. (4-25)

PUERTO RICO: SAN JUAN, ISLA GRANDE ARPT SPECIAL NOTICE: Effective 0400Z July 1, 1960, altimeter setting procedures within 100 nmi are revised as follows: A QNH altimeter setting and a system of alts shall be used below 24,000'MSL. At and above 24,000' the standard altimeter setting of 29.92 inches, 1013.2 millibars and a system of flt levels shall be used. (5-17)

SAN JUAN-ISLA GRANDE ARPT TOWER: About July 18, freq 126.18 mc will be changed to 126.2 mc. (5-6) May 13, twr tmpryly relctd on NW corner of old trml bldg; renovation of twr structure.

SAN JUAN, ISLE GRANDE ARPT: Tmpry twr lctd on NW corner of old trml bldg, due non-visibility tmrpy twr unable to observe tfc on S portion CG Navy ramp, extreme E end rnwy 9, apch area rnwy 27. 174' metal bldg lctd aprx 1000' SE of threshold rnwy 27, lgtd ngts by two steady red lgts. (5-13)

SAN JUAN, PUERTO RICO INTL ARPT: Access taxiway to ANG parking apron lgtd; ditch at W side of ANG access taxiway; use extreme caution while taxiing day and night. Transient facils avbl 1130-2000Z Mon-Fri but no parking space avbl. Caution, unlgtd perm jet blast fence 8' high, 20' long erected 10' W of W side of taxiway to ANG ramp. High intensity rnwy end identifier lights lctd aprx 30' each side of apch end rnwy 7 comsnd. Men and eqpmt working vcnty of apch end rnwy 25; 20' derricks will be erected, area obstn lgtd. (1-7)

SAN JUAN-RAMEY AFB RADIO: Soon, CM twr tsmtg freq 278 kc and rcvg 3023.5 kc will be decmsnd. (8-10)

VIRGIN ISLANDS: ST THOMAS, CHAROLTTE AMALIE, TRUMAN RADIO: No coverage possible from north and east quads all VHF and UHF voice air/ground channels -- due terrain. (3-10)

ST CROIX, CHRISTIANSTED HAMILTON ARPT: Caution, acft making right hand turn after tkof to E. Men and eqpmt on E end of rnwy where 1200' extension under constr; rnwy lgts E end tmpry lctd with exposed electric cables across E end on surface of rnwy. No runoff area avbl on E end.

WASHINGTON, D.C. AREA-SPECIAL NOTICE: Aircraft operating VFR be alert for all types of tfc from Washington Nat'l Arpt, Bolling AFB, Anacostia NAS, Andrews AFB, Hyde Field and Washington - Virginia Airport. Suggested arrival and departure routes are issued as a guide for all acft operg VFR to maintain a safe, orderly flow of air tfc in the Washington, D.C. area. WASHINGTON NATIONAL ARPT: Northwest: Arrivals proceed well right of Potomac River until Cabin John. Departures proceed well right of Potomac River until past Herndon FM. West: Arrivals proceed well right of U.S. Route 29 until past Falls Church. Departures proceed well right of U.S. Route 29 until past Centerville. Southwest: Arrivals proceed on the right side of Potomac River until past Mount Vernon, then via the river to the Washington Range. Departures proceed well right of Potomac River until past Occoquan River. Southeast: Arrivals proceed via Charlotte Hall-Waldorf-Fort Washington. Departures proceed via Fort Washington-La Plata. Caution: Jet Penetration Route 187° radial of Andrews VOR crossing Andrews LFR at 1500'. East: Arrivals proceed from Shadyside via Andrews LFR to Fort Washington, avoid Andrews AFB Ctl Zone. Caution: Jet departures from Andrews AFB make their climb out on the 060° radial of the Andrews VOR. Northeast: Arrivals proceed well right of the Washington-Baltimore Parkway until past Beltsville, then NW of the city to Chain bridge. Departures proceed well right of the Washington-Baltimore Parkway until past Beltsville Airport. All acft flying in VFR conditions departing or arriving Washington National are requested to remain well clear of the Andrews AFB Ctl Zone, Bolling AFB and the Anacostia NAS VFR Corridors. ANACOSTIA/BOLLING AIRPORTS: VFR air tfc operg to and from Anacostia and Bolling AFB shall proceed to and from the local tfc patterns via established air corridors. North Corridor: Two miles wide extending from the Anacostia N boundary along the SE bank of the Anacostia River to a point on the E bank abeam of the Riverdale Rdo Bcn. Departures from both fields proceed via the corridor at 1500' MSL. Arrival tfc from N and NE enter the corridor E of the Anacostia River and abeam of the Riverdale Rdo Bcn at 2000' MSL. South Corridor: Two miles wide aligned along a 165/345° magnetic track from the Bolling Rdo Bcn to a point 1-1/2 miles E of Fort Washington Inlet. Departures will proceed at 1500' MSL until past Fort Washington. Arrivals will maintain 2000' MSL. Military pilots are requested not to exceed 160 knots IAS, while in the corridors. (9-9)

JET ACROBATIC AREAS - VICINITY WASHINGTON, D.C. - Acrobatic maneuvers by jet aircraft are conducted daily, VFR daylight hours only, between the altitudes of 10,000' and 20,000' MSL inclusive, within the following areas:

Area #1: The uncontrolled portion of that airspace which is bounded on the N by V-174; on the E and SE by B-47 and V-140; and on the S by V-156.

Area #2: The uncontrolled portion of that airspace which is bounded on the N by V-156; on the E by V-140; on the S by V-290; and on the W by V-103.

REGULATIONS OF THE ADMINISTRATOR PART 570: Rules of Washington National Airport-"570.49"-No pilots other than those possessed of at least a private pilot rating or the equivalent shall operate aircraft on the airport."

SIMULTANEOUS VOICE TRANSMISSIONS FROM A SINGLE LOCATION: At several FAA facilities, simultaneous voice transmissions are made from a single location. For example, the New York .FSS controls the transmitters at Idlewild, La Guardia, Newark, Colts Neck, Solberg and Wilton L/MF or VOR facilities.

To provide a uniformly brief announcement, generally for broadcast purposes, the name of the controlling facility, followed by the word AREA will be used, e.g., THIS IS NEW YORK AREA RADIO, etc.

Call from aircraft will be answered using the name of the station as stated by the pilot, e.g., a pilot calling "Newark Radio" will be answered by the New York FSS, "THIS IS NEWARK RADIO, etc."

The word "AREA" signifies that the transmission from the named (controlling) location is emanating simultaneously from one or more remotely controlled facilities, having a different name or names, as indicated in the ANRA Section of the AIRGI and/or applicable RF Charts.

A NOTAM will be issued from those facilities affected by the foregoing when the change to this procedure is made.

PENETRATION OF RESTRICTED AREAS: Unauthorized flight is not permitted within a Restricted Area during the time of use and between the altitudes noted in the tabulation on the back of Sectional Aeronautical Charts issued by the U.S. Coast and Geodetic Survey or in the Flight Information Manual. Application for flight authorization should be made to the controlling agency.

"SHUT DOWN" OR "UNUSABLE" NAVIGATIONAL FACILITIES: Navigational Facilities which are notamed as being "shut down," or radials of a VOR notamed as "unusable" should not be utilized for navigational purposes. Pilots planning IFR flights should check all available information during pre-flight planning to ensure their proposed flight plan will not require use of facilities during the period of "shut down," as Air Traffic Control will be unable to approve such flight plans. During periods of prolonged "shut down," "revised MEA's and/or alternate routes are established for designated airways, utilizing adjacent facilities. This information is contained in appropriate NOTAMS and the Airman's Guide.

TRANSCRIBED WEATHER BROADCASTS: Equipment is being provided at selected FAA FSS by which meterological and Notice to Airmen data will be recorded on tapes and broadcast continuously over the low-frequency (200-400 kc) navigational aid (L/MF range or H facility.)

Broadcasts are made from a series of individual tape recordings. The first three tapes identify the station, give general wea conditions in the area, pilot reports (PIREP) and radar reports, when available, and winds aloft data. The remaining tapes contain weather at selected locations within a 400 mile radius of the central point. Changes, as they occur, are transcribed onto the tapes.

Transcribed weather broadcasts are presently being made at the following locations as indicated:

Location	Freq.
Chicago, (Joliet), Ill.	350 kc, 257 kc
Indianapolis, Ind.	266 kc
Los Angeles, Calif.	332 kc
New York, N.Y.	209 kc
Washington, D.C.	332 kc
Boston, Mass.	382 kc
Cleveland, Ohio	344 kc
Denver, Colo.	379 kc
Fort Worth, Texas	365 kc
Pittsburgh, Penna.	254 kc
Boise, Idaho	359 kc
Cincinnati, Ohio	335 kc
Wichita, Kansas	332 kc
Milwaukee, Wisconsin	242 kc
Minneapolis, Minnesota	266 kc

*Operating on test basis.

INTERFERENCE TO AIRCRAFT COMMUNICATIONS AND NAVIGATION EQUIPMENT: Several reports have recently been received involving interference to aircraft communications navigation and integrated flight instrumentation systems. This interference has been traced directly to passenger operated portable recorders and radio receivers. The interference, in some cases, resulted in the oscillation of the glide slope and VOR indicator needles. While all reports received to date have come from the airlines, it is recognized that many unreported cases may exist as any aircraft equipped with electronic devices is susceptible to this type of interference.

Due to the seriousness of interference of this nature and pending further investigation and resolution of the problem, the Federal Aviation Agency strongly urges that action be taken by all aircraft operators to preclude the use of such portable electronic devices during flight. To assist in the resolution of this problem, detailed reports of any instances of interference of this nature should be forwarded to the Federal Aviation Agency, Washington 25, D.C. (Attention: W-200).

(This does not apply to hearing aids)

[Indicates new or revised Special Notices]

FILE FLIGHT PLANS BEFORE TAKE-OFF. Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing only

change to this procedure is made.

SPECIAL NOTICES

✓ Indicates new or revised Special Notices

MILITARY CLIMB CORRIDORS: ALL FLIGHTS desiring to traverse these areas must obtain prior approval from the Controlling Agency and maintain continuous listening watch on the appropriate frequency while traversing the corridor. The list of corridors, controlling agencies and frequencies follows:

Corridors	Controlling Agency	Frequencies
Alexandria (England AFB), Louisiana	England AFB	363.8;118.2;122.5G
Anchorage (Elmendorf AFB), Alaska	Anchorage Apch Ctl	122.9G;122.6G; 119.1;348.6
Burlington (Ethan Allen AFB), Vermont	Burlington Apch Ctl	118.3;122.5G;363.8
Camp Springs (Andrews AFB), Maryland	Andrews Apch Ctl	120.0;122.5G; 363.8
Columbus (Lockbourne AFB), Ohio	Columbus Apch Ctl	123.7;122.5G;274.3
Duluth Mun. Arpt., Minnesota	Duluth Apch Ctl	118.3;257.8; 122.5G
Falmouth (Otis AFB), Massachusetts	Otis RAPCON	124.7; 122.5G
Glasgow (Glasgow AFB), Montana	VFR Glasgow AFB Tower	126.2;236.6;122.5G
	IFR Great Falls ARTCC	123.9;301.4;307.2
Goldsboro (Seymour Johnson AFB), North Carolina	Seymour Johnson Apch Ctl	126.2;122.5G

G - Guards

FILE FLIGHT PLANS BEFORE TAKE-OFF: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communs channels. These channels should be reserved for essential in-flight communs. All pilots will benefit by following this practice.

EN ROUTE OPERATIONS: Pilots are urged to follow IFR procedures even when operating VFR. See page 52, Item 9 and page 73 - Position Reporting, in the Flight Information Manual, Volume 13, dated December 1959.
Check in regularly with FAA Flight Service Stations. The life that might be saved could be your own.

CLOSING OF VFR FLIGHT PLANS: Pilots are urged to file VFR arrival reports with a Flgt Serv Station whenever it is practical to do so. This procedure is necessary in order to reduce congestion on control tower communs channels. All pilots will benefit by following this practice.

Failure to close a flight plan may result in a civil penalty because it is a violation of the Civil Air Regulations. More important, needless expense and trouble involved in unnecessary search and rescue missions can be avoided by the proper closing of flight plans.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

RADIO INTERFERENCE(General): You can do your part toward reducing radio interference to aeronautical services from non-aeronautical sources which may be noted during flight if such is reported promptly to a FAA facility (preferably after landing) or to any FCC field office. Reports should state the frequency or channel affected, description of the interference, and the geographical area where the interference was observed. If known, reports should give the apparent cause of the interference such as radio stations, call letters when such can be identified, industrial plants, diathermy machines, power lines, television receivers, etc. Do not report interference caused by normal frequency congestion, i.e., signals from other aircraft using the frequency."

IDENTIFICATION OF AIRCRAFT: Pilots are requested to exercise care that the identification of their aircraft is clearly transmitted in each contact with an ATC facility. Also, pilots should be certain that their aircraft are clearly identified in ATC transmissions before taking action on an ATC clearance. Garbled aircraft identifications in radiotelephone transmissions should never be taken for granted but should always be checked.

FLYING BENEATH AIRSHIPS: All airships operating in the Atlantic Ocean area have the capability of either towing sonar or picking up sea water as ballast. Either operation creates an invisible hazard to other aircraft in that a wire cable extends from the airship to the water in both cases. Therefore, other aircraft should remain well clear of all airships and should not, under any circumstances, fly beneath them when over water.

CIVIL USE OF MILITARY FIELDS: U.S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Directorate of Operations DCS/O, Hqs USAF, Washington 25, D.C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Office of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

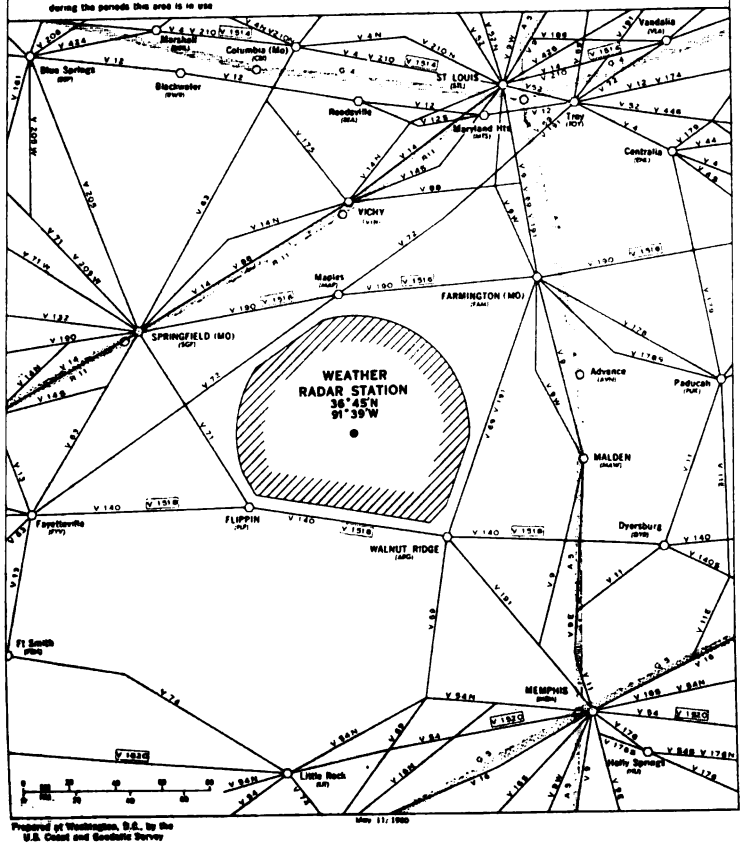
When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

SPECIAL NOTICE

CUMULUS CLOUD RESEARCH PROJECT

EFFECTIVE MAY 15 THROUGH AUGUST 31 ANNUALLY

Beginning May 15 and ending August 31 annually, a cumulus cloud research operation will be conducted within a 50 statute mile radius of a weather radar station located 11 statute miles east of West Plains, Missouri at 36°45'N, 91°39'W, excluding airways.



All flight operations will be conducted outside of controlled airspace. Hours of operation will be from 1300Z to 0300Z. Three Cessna 172 aircraft will operate VFR in the western portion of the area at selected altitudes between the surface and 10,000 feet MSL. One Beechcraft D-18 will operate VFR or IFR throughout the area between the surface and 23,000 feet MSL, generally within a selected group of five altitudes.

Flight operations will be conducted on days selected at random during the three and one-half month period each year. Specific information concerning these operations will be issued by NOTAM on each day the flights will operate.

Other aircraft proposing flight within the designated area may obtain current information concerning these operations from the following FAA facilities:

St. Louis, Mo. FSS — Springfield, Mo. CE/T — Malden, Mo. FSS — Walnut Ridge, Ark. FSS — Memphis, Tenn. ARTCC
Vichy, Mo. FSS — Farmington, Mo. FSS — Flippin, Ark. FSS — St. Louis, Mo. ARTCC

The flight service stations listed above will broadcast appropriate information concerning the operation following regular weather broadcasts during the periods the area is in use.

Prepared at Washington, D.C., by the U.S. Coast and Geodetic Survey

May 11, 1960

USAF HIGH ALTITUDE AIR REFUELING AREAS (SAC/TAC)

USAF jet aircraft have implemented, on a continuing basis, high altitude refueling operations in the areas described below, and at the altitudes and times specified for each area. During the scheduled refueling period, other IFR traffic will not be cleared through an active refueling area unless the refueling aircraft and the aircraft proposing to traverse the area can be provided radar separation by the FAA. Additional refueling areas on the east coast will be published in the near future. Effective date of changes (which are indicated by ✓) is May 22, 1960.

ALTIMETER SETTINGS - VFR FLIGHTS: In order to maintain proper separation between IFR and VFR cruising altitudes, it is essential that VFR pilots keep altimeters corrected in accordance with altimeter setting issued by nearest weather reporting station. Current altimeter settings are available to VFR pilots from FAA Flight Service Stations, Airport Traffic Control Towers, and aviation broadcasts.

CAUTION-AIRCRAFT ARRESTING BARRIERS AT JOINT USE MILITARY/CIVIL AIRPORTS: Aircraft Arresting Barriers are installed at some joint use military/civil airports. Pilots, particularly those of the light propeller driven category of aircraft are advised to operate with caution while operating near or over a lowered barrier. Aircraft operations at minimum practical power settings and taxi speeds are recommended until clear of the arresting barrier system.

✓ NAVIGATIONAL WARNING - USAF OPERATION "OIL BURNER": USAF (Strategic Air Command)is conducting low level navigational flights in jet aircraft in both VFR and IFR weather conditions within 10 statute miles either side of the centerline of the routes on the following pages, and at the alts specified therein. At the termination of the low level flights, the acft climb to alts between 4000 and 22, 000 feet MSL for simulated bomb runs on a target, which is located in the vicinity of a Radar Bomb Scoring site. The low alt simulated bomb run is referred to as a "Short Look;" the intermediate alt one as a "Long Look." "Oil Burner" flights are conducted during both the hours of daylight and darkness, only during the times specified for each route.

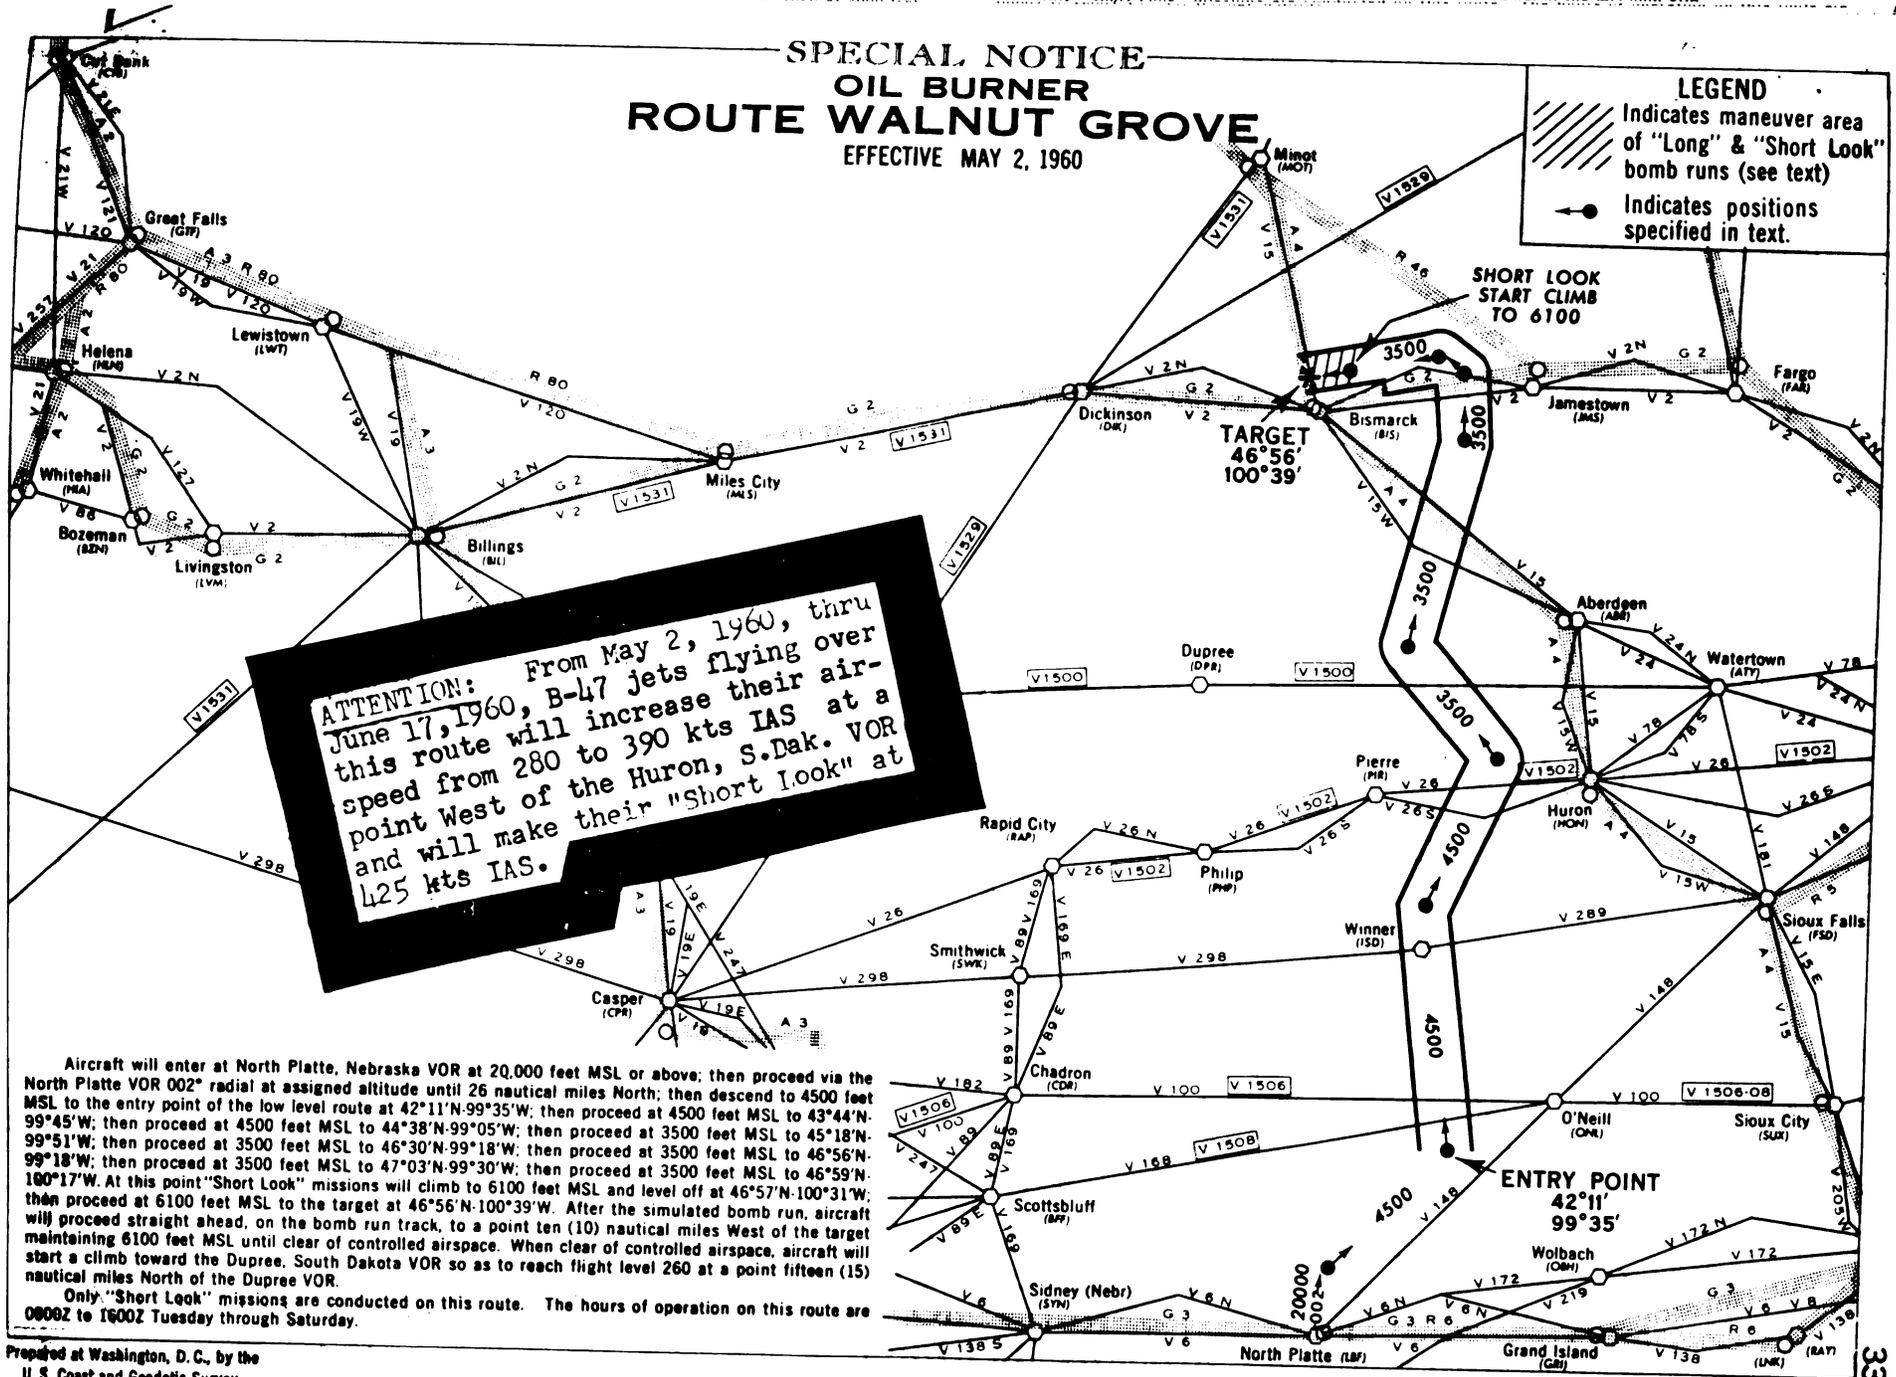
SPECIAL NOTICE
OIL BURNER
ROUTE IVORY TOWER
EFFECTIVE MAY 5, 1960

ATTENTION: From May 5, 1960, thru June 17, 1960, B-47 jets flying over this route will increase their air speed from 280 to 390 kts IAS at a point South of the Eufaula, Ala., VOR and will make their "Short Look" at 425 kts IAS.

Aircraft will enter at Augusta, Georgia VOR at 23,000 feet MSL or above; then proceed via the Augusta VOR 180° radial at assigned altitude until 20 nautical miles South, then start a descent to 2000 feet MSL. At 30 nautical miles South, aircraft will start a right standard rate turn to a true course of 247° to 32°49'N-82°26'W; then start a right standard rate turn to a true course of 092° at 33°06'N-82°30'W to the entry point of the low level route at 33°05'N-82°14'W, and at 2000 feet MSL, turn right to intercept the 180° radial of the Augusta VOR to 32°46'N-82°08'W. Aircraft will then make a nine nautical mile radius right turn to 32°35'N-82°16'W at 2000 feet MSL; then proceed at 2000 feet MSL Southwest along the South edge of Victor Airway 70 to 32°10'N-83°25'W; then at 2000 feet MSL, make a nine nautical mile radius right turn to 32°09'N-83°30'W; then at 2000 feet MSL, proceed direct to 32°09'N-84°25'W; then at 2000 feet MSL, make a nine nautical mile radius left turn to 32°07'N-84°32'W, then at 2000 feet MSL proceed direct to 31°53'N-84°54'W; then at 2000 feet MSL, make a nine nautical mile radius right turn to 31°51'N-85°01'W, then at 2000 feet MSL proceed direct to 31°54'N-85°46'W; then at 2000 feet MSL, make a nine nautical mile radius left turn to 31°54'N-85°49'W; then at 2000 feet MSL proceed direct to 31°34'N-87°18'W; then at 2000 feet MSL make a nine nautical mile radius right turn to 31°36'N-87°28'W; then at 2000 feet MSL proceed direct to 31°53'N-87°46'W; then at 2000 feet MSL make a nine nautical mile radius left turn to 31°55'N-87°55'W; then proceed at 2000 feet MSL to 31°43'N-88°43'W. At this point, "Short Look" missions will start a climb so as to reach 5000 feet MSL at 31°39'N-88°55'W; then at 5000 feet MSL proceed direct to the target at 31°36'N-89°04'W.

After the simulated bomb run, aircraft will proceed straight ahead, on the bomb run track, and climb to 6000 feet MSL. Upon reaching 6000 feet MSL, aircraft will make a right turn to a true course of 106° and maintain 6000 feet MSL until past the 180° radial of the Meridian, Mississippi VOR; then start a climb to 22,000 feet MSL proceeding direct to the intersection of the McComb, Mississippi VOR 068° radial and the Meridian VOR 160° radial; then continue climbing in a non-standard, one minute holding pattern (making all turns to the left) Southwest of the intersection on the 068° radial of the McComb VOR.

Only "Short Look" missions are conducted on this route. The hours of operation on this route are 0000Z to 1600Z Tuesday through Saturday.



(24 May 1960)

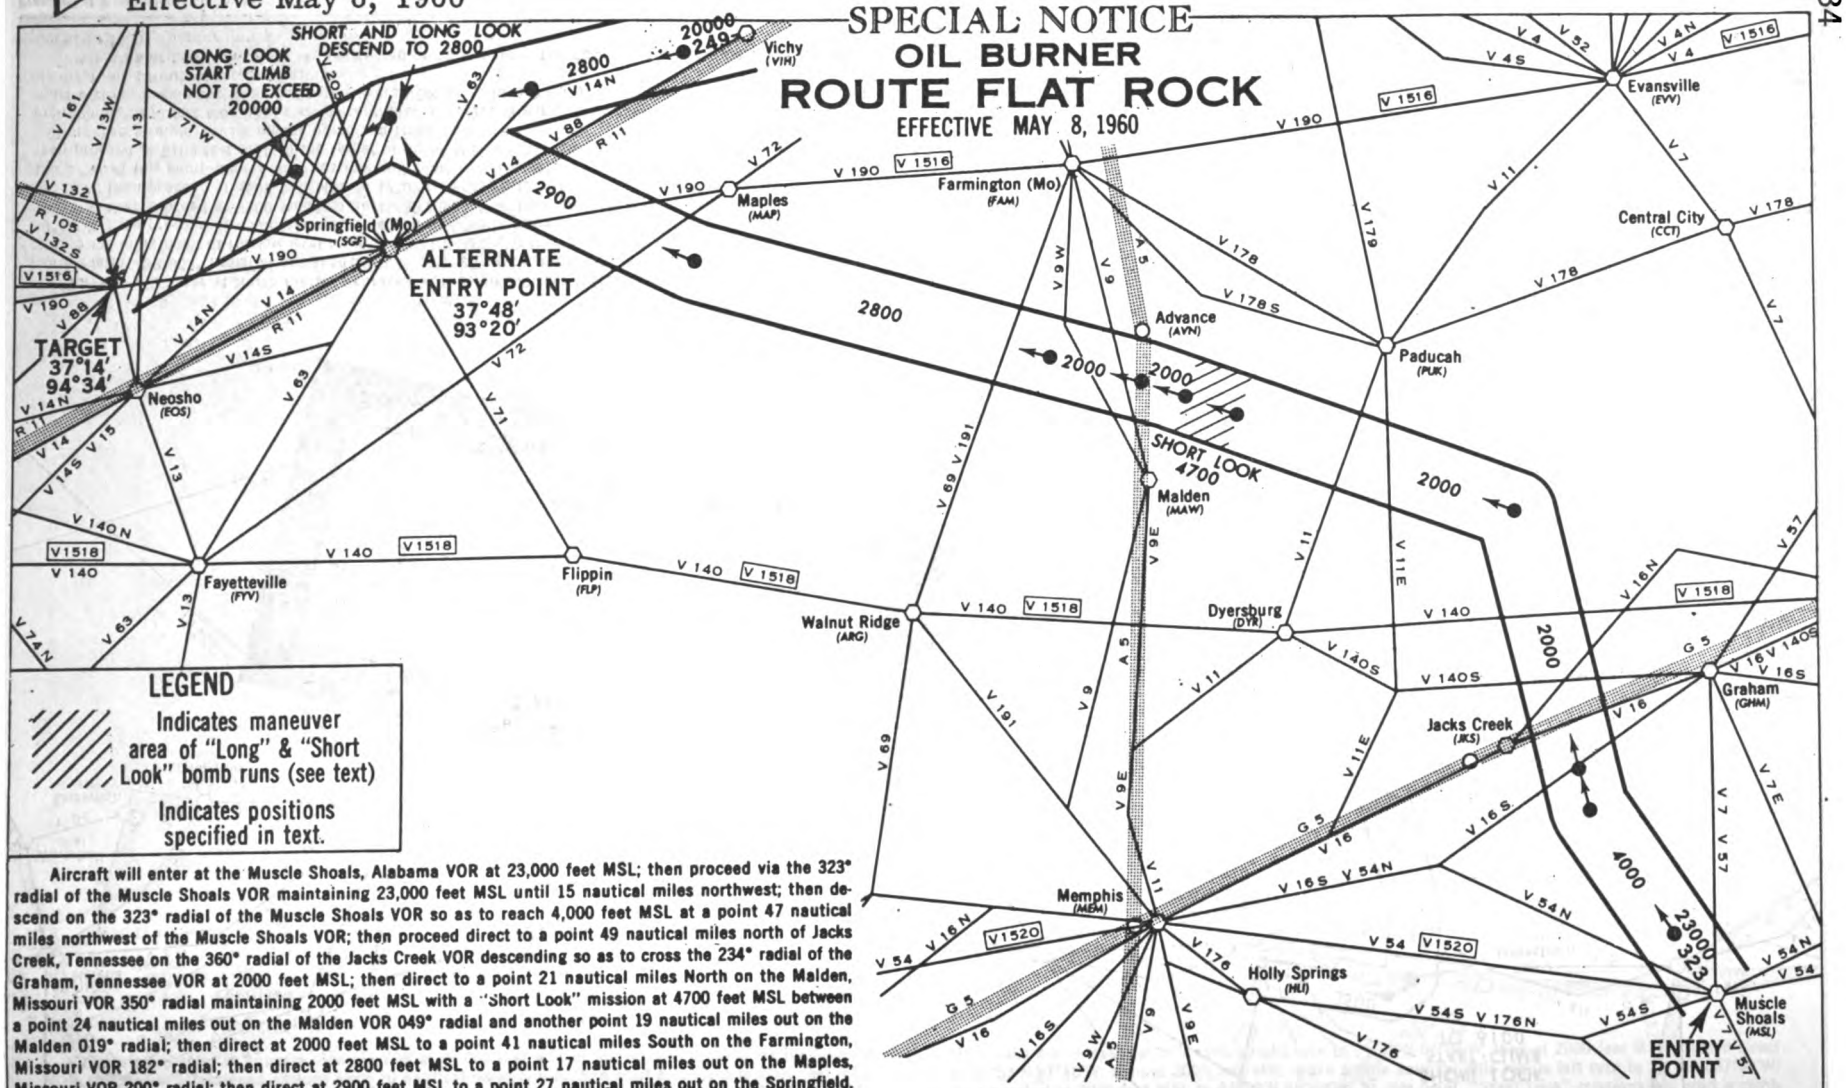
Prepared at Washington, D.C., by the U.S. Coast and Geodetic Survey

SPECIAL NOTICE

OIL BURNER
ROUTE WALNUT GROVE

EFFECTIVE MAY 2, 1960

ATTENTION: From May 2, 1960, thru June 17, 1960, B-47 jets flying over this route will increase their airspeed from 280 to 390 kts IAS at a point West of the Huron, S.Dak. VOR and will make their "Short Look" at 425 kts IAS.



Aircraft will enter at North Platte, Nebraska VOR at 20,000 feet MSL or above; then proceed via the North Platte VOR 002° radial at assigned altitude until 26 nautical miles North; then descend to 4500 feet MSL to the entry point of the low level route at 42°11'N-99°35'W; then proceed at 4500 feet MSL to 43°44'N-99°45'W; then proceed at 4500 feet MSL to 44°38'N-99°05'W; then proceed at 3500 feet MSL to 45°18'N-99°51'W; then proceed at 3500 feet MSL to 46°30'N-99°18'W; then proceed at 3500 feet MSL to 46°56'N-99°18'W; then proceed at 3500 feet MSL to 47°03'N-99°30'W; then proceed at 3500 feet MSL to 46°59'N-100°17'W. At this point "Short Look" missions will climb to 6100 feet MSL and level off at 46°57'N-100°31'W; then proceed at 6100 feet MSL to the target at 46°56'N-100°39'W. After the simulated bomb run, aircraft will proceed straight ahead, on the bomb run track, to a point ten (10) nautical miles West of the target maintaining 6100 feet MSL until clear of controlled airspace. When clear of controlled airspace, aircraft will start a climb toward the Dupree, South Dakota VOR so as to reach flight level 260 at a point fifteen (15) nautical miles North of the Dupree VOR.

Only "Short Look" missions are conducted on this route. The hours of operation on this route are 0800Z to 1600Z Tuesday through Saturday.

EFFECTIVE MAY 8, 1960

LEGEND

Indicates maneuver area of "Long" & "Short Look" bomb runs (see text)

Indicates positions specified in text.

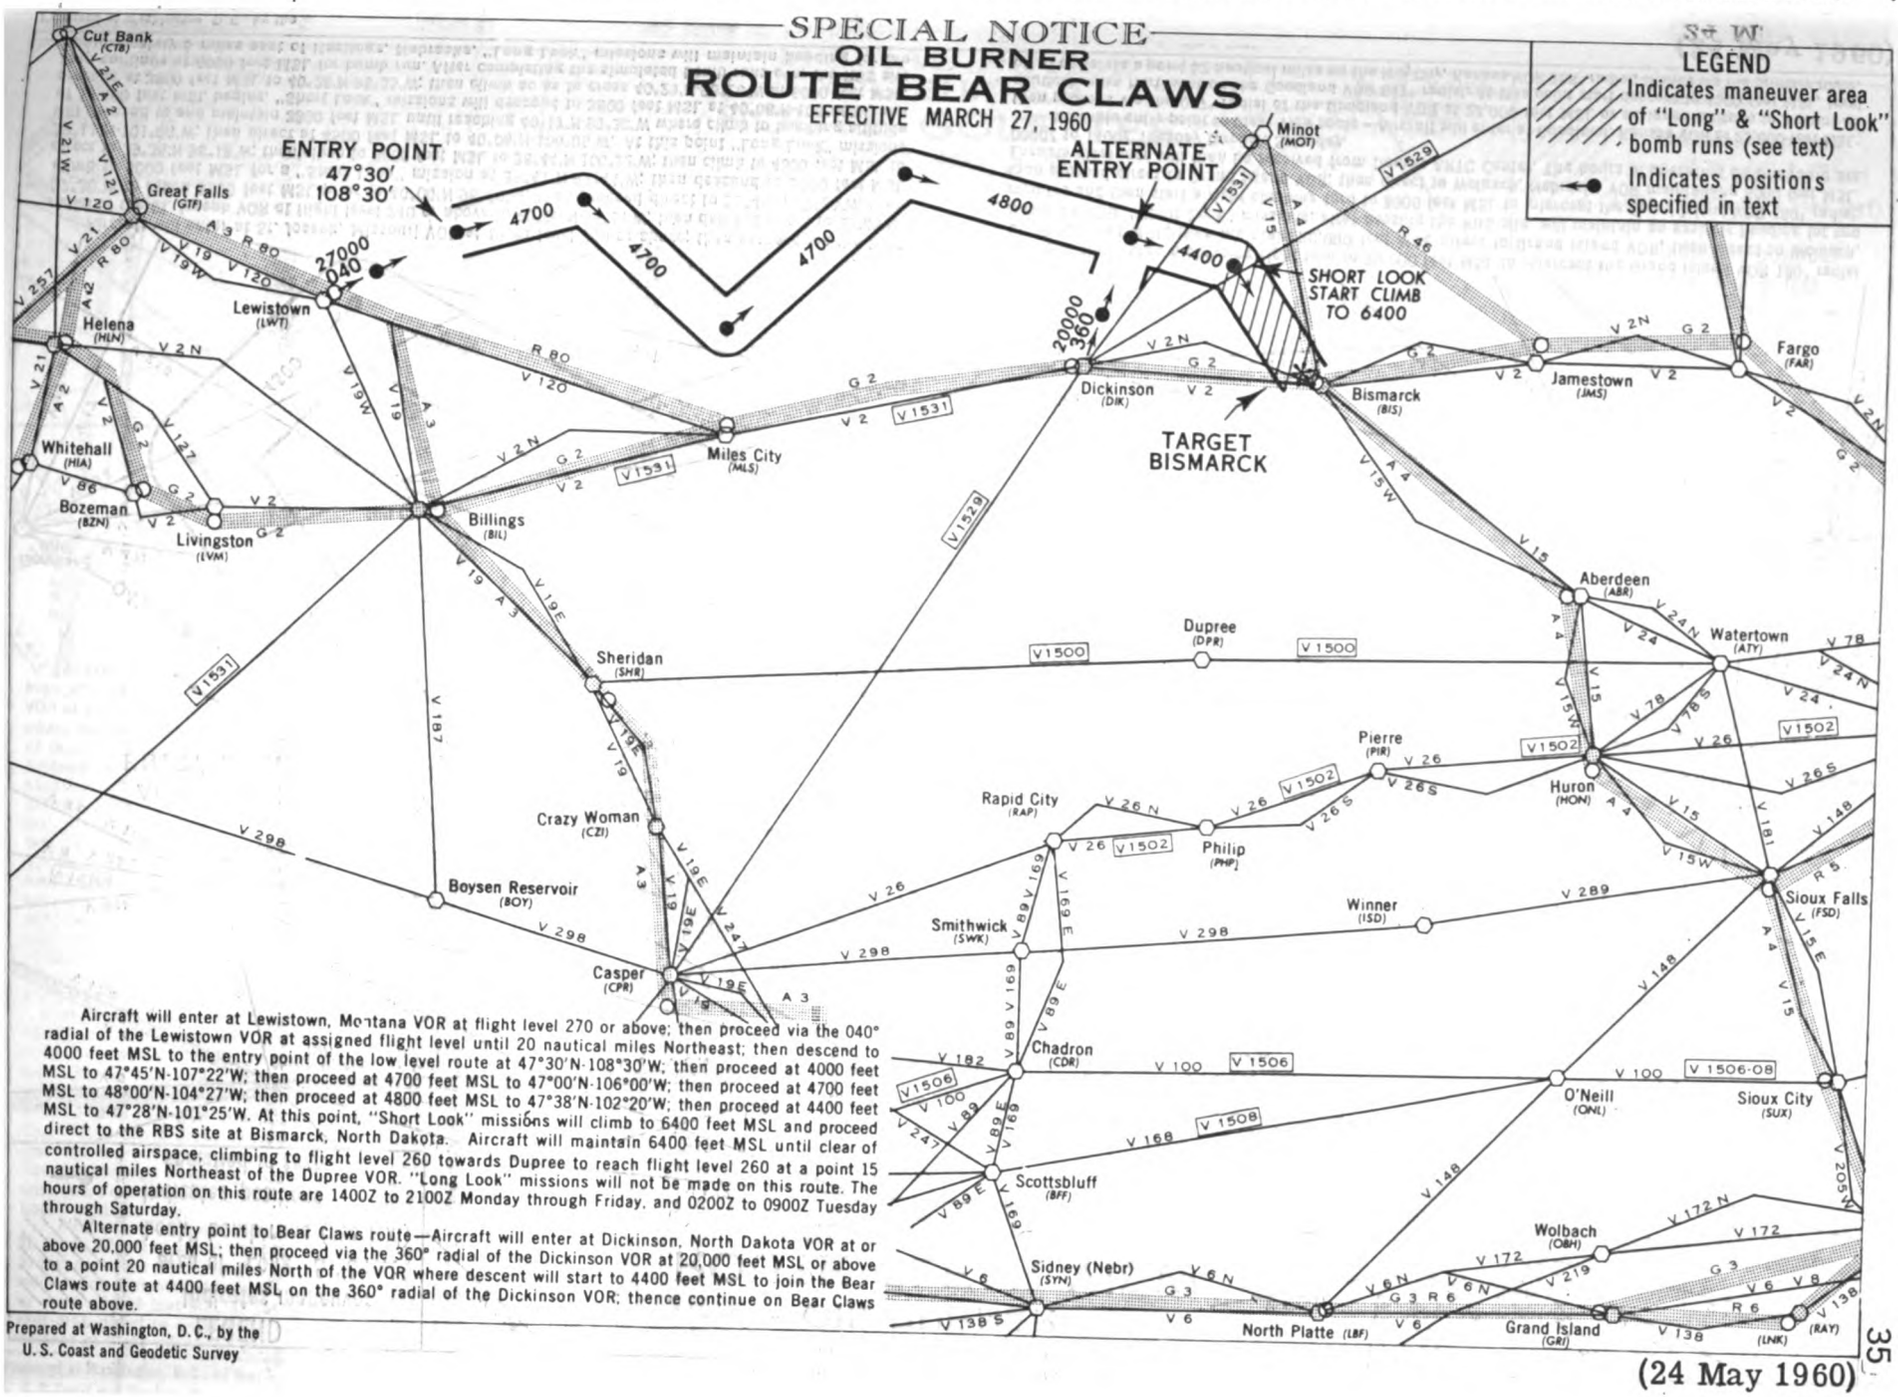
Aircraft will enter at the Muscle Shoals, Alabama VOR at 23,000 feet MSL; then proceed via the 323° radial of the Muscle Shoals VOR maintaining 23,000 feet MSL until 15 nautical miles northwest; then descend on the 323° radial of the Muscle Shoals VOR so as to reach 4,000 feet MSL at a point 47 nautical miles northwest of the Muscle Shoals VOR; then proceed direct to a point 49 nautical miles north of Jacks Creek, Tennessee on the 360° radial of the Jacks Creek VOR descending so as to cross the 234° radial of the Graham, Tennessee VOR at 2000 feet MSL; then direct to a point 21 nautical miles North on the Malden, Missouri VOR 350° radial maintaining 2000 feet MSL with a "Short Look" mission at 4700 feet MSL between a point 24 nautical miles out on the Malden VOR 049° radial and another point 19 nautical miles out on the Malden 019° radial; then direct at 2000 feet MSL to a point 41 nautical miles South on the Farmington, Missouri VOR 182° radial; then direct at 2800 feet MSL to a point 17 nautical miles out on the Maples, Missouri VOR 200° radial; then direct at 2900 feet MSL to a point 27 nautical miles out on the Springfield, Missouri VOR 352° radial; then direct at 2800 feet MSL to a point 25 nautical miles out on the Springfield, Missouri VOR 300° radial.

At this point "Short Look" missions will proceed to the target at 37°14′N-94°34′W, maintaining 2800 feet MSL to a point 38 nautical miles out on the Neosho, Missouri VOR 013° radial, then climb so as to reach 3500 feet MSL by a point 32 nautical miles out on the Neosho, Missouri VOR 004° radial, to start a climb to 4700 feet MSL three miles north of the Joplin, Missouri low frequency beacon (Waco intersection) and cross the target at 4700 feet MSL.

"Long Look" missions will start a climb at a point 25 nautical miles out on the Springfield VOR 300° radial to a predetermined altitude, above the RBS site as filed in the flight plan. This altitude will never exceed 20,000 feet MSL.

After completing the simulated bomb runs, both "Short Look" and "Long Look" missions will proceed to Bartlesville, Oklahoma VOR, maintaining bombing altitude. Normally aircraft will be routed by ATC via the Tulsa, Oklahoma VOR.

The hours of operation on this route are 0200Z to 1400Z Tuesday through Saturday.



Alternate Entry Point-Aircraft will enter at Vichy, Missouri, VOR at or above 20,000 feet MSL, then proceed via the 249° radial of the Vichy VOR at 20,000 feet MSL or above to a point 15 nautical miles southwest of Vichy VOR where descent will start to 2,800 feet MSL, reaching 2,800 feet MSL at a point 46 nautical miles out on the 034° radial of the Springfield, Missouri, VOR thence via the 249° radial of Vichy VOR to a point 27 nautical miles out on the 352° radial of the Springfield VOR at 37°48′30″N-93°20′W thence continue on Flat Rock route.

ROUTE BEAR CLAWS
EFFECTIVE MARCH

LEGEND
Indicates maneuver area

Aircraft will enter at Lewistown, Montana VOR at flight level 270 or above; then proceed via the 040° radial of the Lewistown VOR at assigned flight level until 20 nautical miles Northeast; then descend to 4000 feet MSL to the entry point of the low level route at 47°30'N-108°30'W; then proceed at 4000 feet MSL to 47°45'N-107°22'W; then proceed at 4700 feet MSL to 47°00'N-106°00'W; then proceed at 4700 feet MSL to 48°00'N-104°27'W; then proceed at 4800 feet MSL to 47°38'N-102°20'W; then proceed at 4400 feet MSL to 47°28'N-101°25'W. At this point, "Short Look" missions will climb to 6400 feet MSL and proceed direct to the RBS site at Bismarck, North Dakota. Aircraft will maintain 6400 feet MSL until clear of controlled airspace, climbing to flight level 260 towards Dupree to reach flight level 260 at a point 15 nautical miles Northeast of the Dupree VOR. "Long Look" missions will not be made on this route. The hours of operation on this route are 1400Z to 2100Z Monday through Friday, and 0200Z to 0900Z Tuesday through Saturday.

Alternate entry point to Bear Claws route—Aircraft will enter at Dickinson, North Dakota VOR at or above 20,000 feet MSL; then proceed via the 360° radial of the Dickinson VOR at 20,000 feet MSL or above to a point 20 nautical miles North of the VOR where descent will start to 4400 feet MSL to join the Bear Claws route at 4400 feet MSL on the 360° radial of the Dickinson VOR; thence continue on Bear Claws route above.

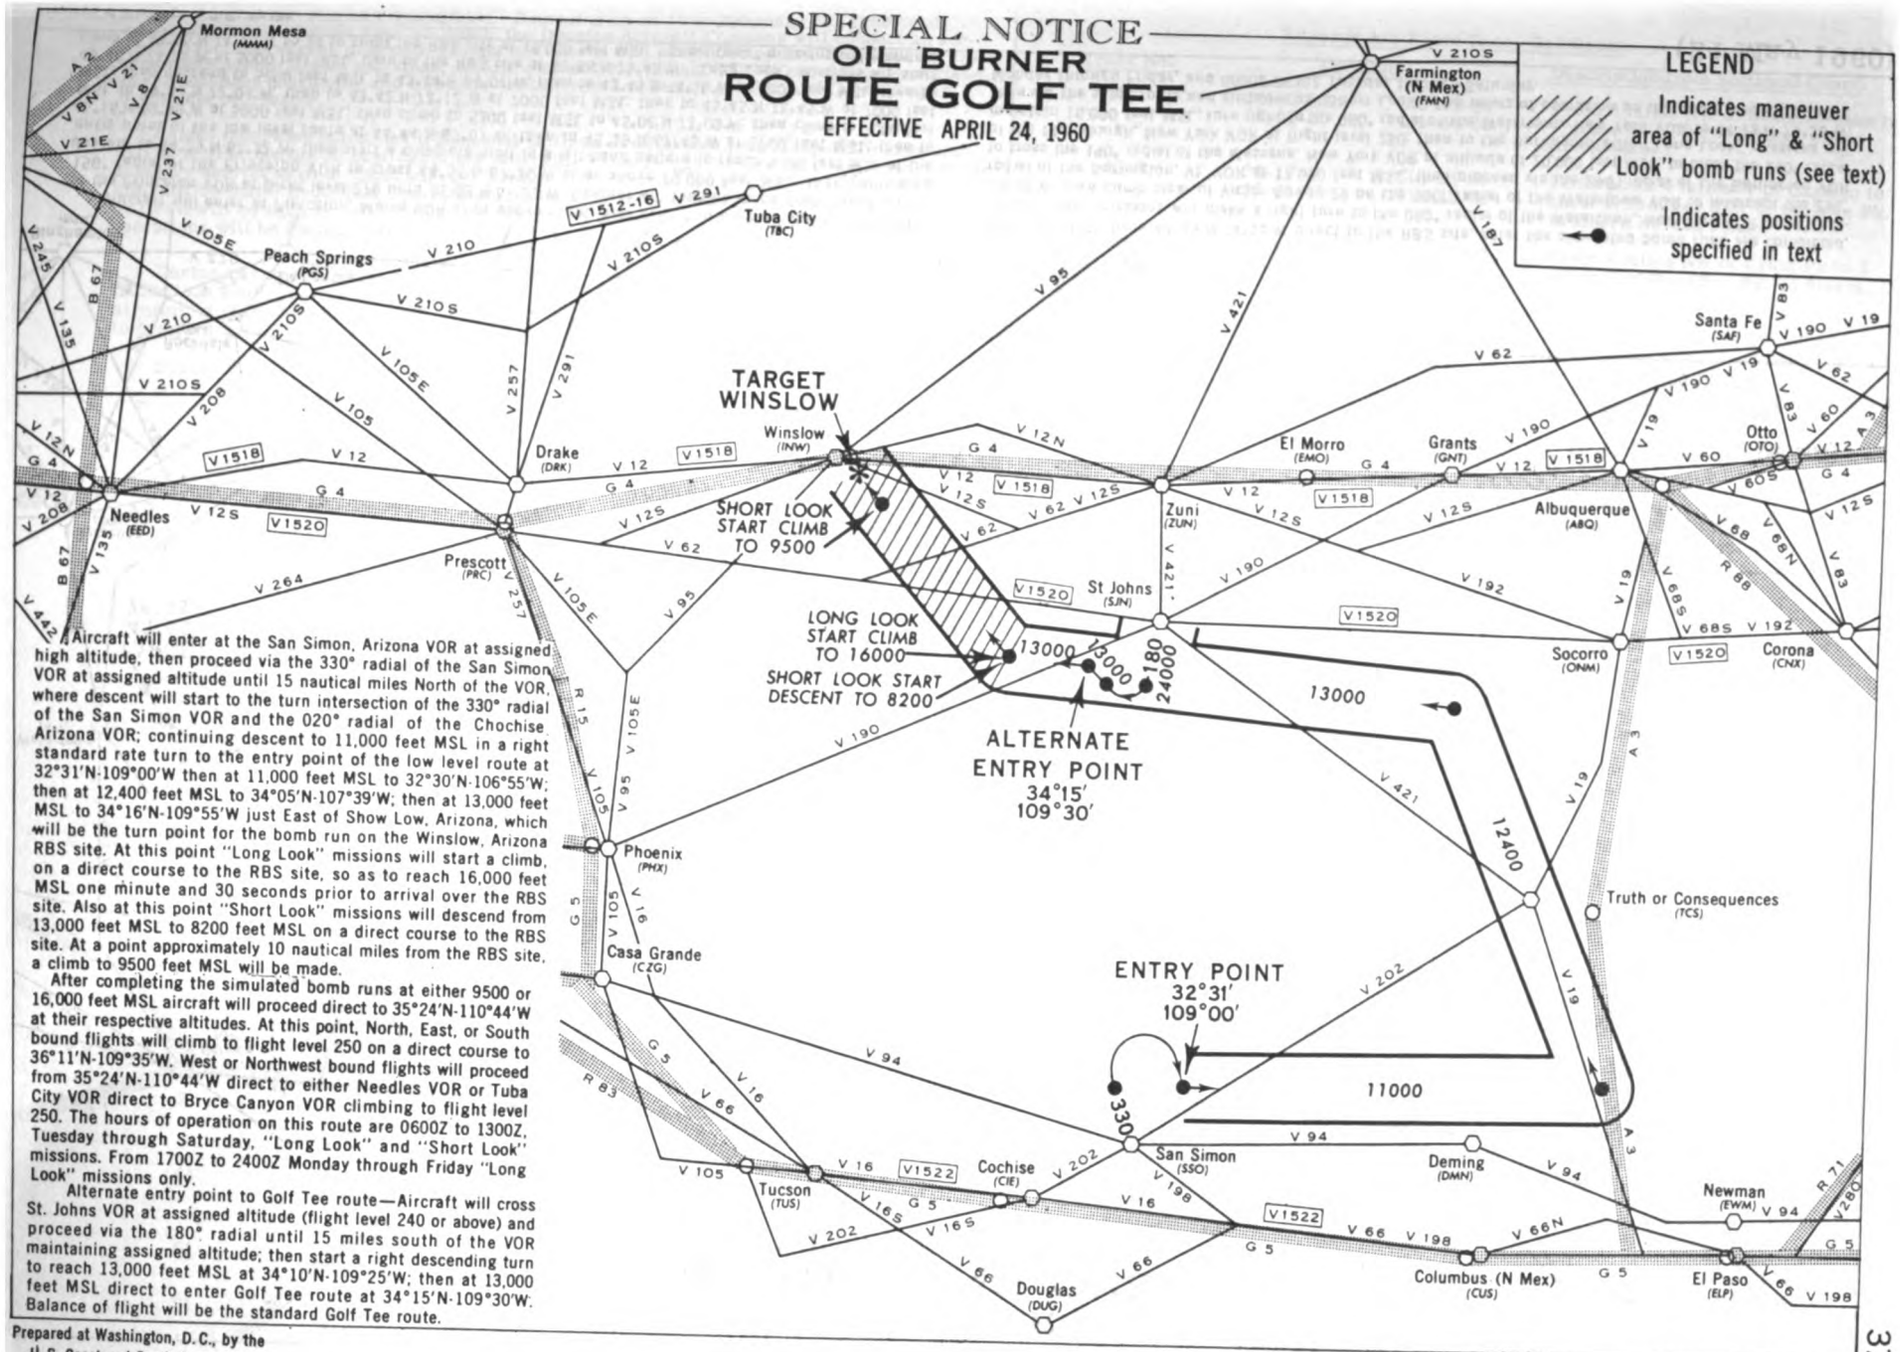
ROUTE CLEAR VIEW

EFFECTIVE APRIL 24, 1960

Aircraft will enter at St. Joseph, Missouri VOR at flight level 240 or above; then proceed via the 293° radial of the St. Joseph VOR at flight level 240 or above to 40°06'N-95°14'W; then descend direct to 39°43'N-97°30'W to reach 3200 feet MSL prior to 40°00'N-96°00'W, then proceed direct to 39°43'N-97°30'W, then climb to 6000 feet MSL for a "Short Look" mission at 39°41'N-97°41'W; then descend to 2900 feet MSL direct to 39°35'N-98°18'W; then climb to 3800 feet MSL to 38°44'N-100°22'W; then climb to 4500 feet MSL to 39°11'N-101°00'W; then direct at 4500 feet MSL to 40°08'N-100°06'W. At this point "Long Look" missions will descend to and maintain 3800 feet MSL until reaching 40°17'N-99°30'W where climb to bombing altitude of 17,500 feet MSL begins. "Short Look" missions will descend to 3800 feet MSL at 40°08'N-100°06'W, and proceed at 3800 feet MSL to 40°28'N-98°35'W; then climb so as to cross 40°29'N-98°26'W at 6000 feet MSL; then continue at 6000 feet MSL for bomb run. After completing the simulated bomb runs over the RBS site approximately 5 miles east of Hastings, Nebraska, "Long Look" missions will maintain heading for two minutes; then make a climbing right turn to 20,000 feet MSL to intercept the Grand Island VOR 180° radial at 20,000 feet MSL; then maintain 20,000 feet MSL direct to Grand Island VOR; then direct to Wolbach, Nebraska VOR. "Short Look" missions, after passing the RBS site, will maintain an easterly heading for two minutes and then start a right climbing turn to 8000 feet MSL to intercept the Grand Island VOR 180° radial; then proceed direct to Grand Island VOR; then direct to Wolbach, Nebraska VOR maintaining 8000 feet MSL. Enroute clearance will then be received from Denver ARTC Center. The hours of operation on this route are 0000Z to 1400Z Tuesday through Saturday.



Alternate entry point to Clear View route—Aircraft will enter at Goodland, Kansas VOR at 23,000 feet MSL; then proceed via the 047° radial of the Goodland VOR at 23,000 feet MSL or assigned altitude to a point 35 nautical miles Northeast on the Goodland VOR 047° radial. At this point start descent to 4500 feet MSL, level off at or before a point 52 nautical miles on the Hill City, Kansas VOR 358° radial; thence via the primary route.

(24 May 1960)

SPECIAL NOTICE
OIL BURNER
ROUTE GOLF TEE
EFFECTIVE APRIL 24, 1960

Aircraft will enter at the San Simon, Arizona VOR at assigned high altitude, then proceed via the 330° radial of the San Simon VOR at assigned altitude until 15 nautical miles North of the VOR, where descent will start to the turn intersection of the 330° radial of the San Simon VOR and the 020° radial of the Chochise, Arizona VOR; continuing descent to 11,000 feet MSL in a right standard rate turn to the entry point of the low level route at 32°31′N-109°00′W then at 11,000 feet MSL to 32°30′N-106°55′W; then at 12,400 feet MSL to 34°05′N-107°39′W; then at 13,000 feet MSL to 34°16′N-109°55′W just East of Show Low, Arizona, which will be the turn point for the bomb run on the Winslow, Arizona RBS site. At this point "Long Look" missions will start a climb, on a direct course to the RBS site, so as to reach 16,000 feet MSL one minute and 30 seconds prior to arrival over the RBS site. Also at this point "Short Look" missions will descend from 13,000 feet MSL to 8200 feet MSL on a direct course to the RBS site. At a point approximately 10 nautical miles from the RBS site, a climb to 9500 feet MSL will be made.

After completing the simulated bomb runs at either 9500 or 16,000 feet MSL aircraft will proceed direct to 35°24′N-110°44′W at their respective altitudes. At this point, North, East, or South bound flights will climb to flight level 250 on a direct course to 36°11′N-109°35′W. West or Northwest bound flights will proceed from 35°24′N-110°44′W direct to either Needles VOR or Tuba City VOR direct to Bryce Canyon VOR climbing to flight level 250. The hours of operation on this route are 0600Z to 1300Z, Tuesday through Saturday, "Long Look" and "Short Look" missions. From 1700Z to 2400Z Monday through Friday "Long Look" missions only.

Alternate entry point to Golf Tee route—Aircraft will cross St. Johns VOR at assigned altitude (flight level 240 or above) and proceed via the 180° radial until 15 miles south of the VOR maintaining assigned altitude; then start a right descending turn to reach 13,000 feet MSL at 34°10′N-109°25′W; then at 13,000 feet MSL direct to enter Golf Tee route at 34°15′N-109°30′W. Balance of flight will be the standard Golf Tee route.

OIL BURNER

ROUTE HANG OVER

EFFECTIVE NOVEMBER 23, 1959

Aircraft will enter at Princeton, Maine VOR at or above flight level 270; then proceed via the 190° radial of the Princeton VOR at flight level 270 until 45°08'N-67°39'W. Descent will then be made Southbound on the 190° radial of the Princeton VOR to cross 44°56'N-67°36'W at or above 20,000 feet MSL; then continuing descent to 44°39'N-67°32'W; then start a complete orbit in a left-hand pattern to reach 5000 feet MSL at the entry point of the low level route at 44°44'N-67°07'W; then to 45°19'N-67°49'W at 5000 feet MSL; then to 45°16'N-69°30'W at 5000 feet MSL; then climb to 5300 feet MSL to 45°08'N-71°09'W; then climb to 7000 feet MSL to 44°03'N-72°04'W; then to 43°42'N-73°12'W at 7000 feet MSL; then to 43°45'N-73°45'W at 7000 feet MSL; then descend to 5000 feet MSL to 43°44'N-74°07'W; then to 43°45'N-74°15'W at 5000 feet MSL; then to 43°46'N-74°25'W at 5000 feet MSL; then to the RBS site at 43°58'N-75°43'W. "Long Look" missions will start climb at 43°45'N-74°15'W so as to cross the RBS site at 16,000 feet MSL. "Short Look" missions will maintain 5000 feet MSL from 43°45'N-74°15'W direct to the RBS site. After the simulated bomb runs are completed, "Short Look" missions will make a right turn to the 060° radial of the Watertown, New York VOR to 44°13'N-75°38'W; then climb clear of Victor Airway 29 on the 060° radial of the Watertown VOR to intercept the 296° radial of the Burlington, Vt. VOR at 17,000 feet MSL; then proceed via the 296° radial of the Burlington VOR to cross the 190° radial of the Massena, New York VOR at altitude of 20,000 feet MSL; to cross the 240° radial of the Plattsburgh, New York VOR at flight level 280; then to the Burlington VOR. "Long Look" missions will maintain 16,000 feet MSL, turn right to the 060° radial of the Watertown, New York VOR to 44°13'N-75°38'W; then via the same route and altitudes as "Short Look". The hours of operation on this route are 1830Z-2400Z Monday through Friday, and 0000Z-0630Z Tuesday through Saturday.

(24 May 1960)

Prepared at Washington, D.C., by the U.S. Coast and Geodetic Survey

Edwards Air Force Base, California

Track No.	Location	Lat.	Long.	Description from Sectional Chart

		34-52-30	119-49-35	From 8 miles NW of Meiners Oaks to

B-66 GUST SURVEY PROGRAM: Beginning on or after February 25, 1960, and terminating on or before June 30, 1960, the Douglas Aircraft Company will conduct an aircraft structural survey program. Flight operations will be conducted in a B-66 type aircraft, with USAF identification markings, at altitudes of 200, 600 and 1,000 feet above the surface, during daylight hours only and when the visibility is 5 miles or greater and the ceiling is 3,000 feet or greater.

Unless otherwise noted, all tracks will be flown at 360 knots true airspeed or less and will be approximately 30 nautical miles in length. FAA Flight Service Stations, within whose advisory service area a "gust survey" track exists will, prior to each flight, broadcast information that "B-66 Gust Survey" operations are in progress and the specific tracks to be flown will be enumerated. NOTAM's specifying date, time, place and duration of the operations will be disseminated.

During any special flight activities which require preoccupation by the pilot with cockpit duties that would prevent adequate vigilance outside the cockpit, competent observers in the aircraft, a chase aircraft or other equivalent arrangement will be provided and maintained to insure adequate vigilance for other aircraft.

Tracks to be flown by base of operations are listed below:

Kirtland Air Force Base, New Mexico

Track No.	Location Lat.	Location Long.	Description from Sectional Chart
11A	32-51-05 33-19-25	105-35-00 105-47-15	3 miles from Sacramento Lookout Sta. to 3.25 miles from Sierra Blanca Pk. (12003').
11B	32-54-00 33-20-00	105-51-00 105-38-00	Rotated 49° clockwise with respect to Track 11A.
22A	38-00-00 38-22-00	106-44-00 106-17-45	7 miles from 13725' Pk. near Half-moon Pass to 4.5 miles from Ouray Pk. (13955)
22B	37-56-00 38-21-00	106-22-00 106-43-00	Rotated 102° clockwise with respect to Track 22A.
52	36-40-00 36-10-05	108-40-35 108-35-50	6 miles from Shiprock Airport to about 5.5 miles ENE of Sheep Springs.
62	37-31-35 38-00-00	105-53-50 106-06-15	4 miles from Alamosa to 5.5 miles from Saguache.
71	34-29-15 34-51-00	105-02-40 105-39-00	Over Joffre (11 miles SE of Vaughan) to 6 miles SSE of Santa Rosa.

Shaw Air Force Base, South Carolina

Track No.	Location Lat.	Location Long.	Description from Sectional Chart
11	35-02-30 34-46-30	82-41-00 83-13-30	7 miles WNW of Brevard south of Tower to 6 miles NNE of Clayton.
21	35-15-20 34-57-00	82-51-00 83-20-00	From 9 miles north of Pickens to 8 miles west of Walhalla.
31	33-55-00 33-52-30	78-01-00 78-36-30	From southern edge of Southport on heading to Conway, to 4 miles NE of Crescent Beach.
41	33-45-20 33-42-30	78-01-00 78-36-40	From 9 miles south of Cape Fear River outlet to 15 miles east of Myrtle Beach.
61	34-31-30 34-02-00	80-32-30 80-34-00	From 2 miles SE of Kershaw to 7 miles NW of Shaw AFB.
81	34-07-40 34-10-30	77-57-40 78-33-30	From 3 miles south of Wilmington on W bank of Cape Fear river to 6 miles SSW of Lake Waccamaw.

Edwards Air Force Base, California

Track No.	Location Lat.	Location Long.	Description from Sectional Chart
11	34-32-00 34-52-30	119-23-00 119-49-35	From 8 miles NW of Meiners Oaks to 7 miles SW of New Cuyama in San Rafael Mts.
23	36-19-40 36-20-00	118-04-50 118-42-25	From about 3 miles W of Cartago to about 3.25 miles SSW of Calhoun Pk. in Sierra Nevada range
23B	36-10-00 36-29-00	118-12-00 118-40-00	From 4 miles NW of Craig Pk to 2 miles E of Paradise Pk. in Sierra, Nevada range.
32	34-03-00 33-58-30	120-30-00 119-54-25	From 3.5 miles W of San Miguel I to about 3.75 miles beyond Santa Rosa I.
44	33-15-45 32-45-25	118-21-15 118-20-20	9 miles S of Long Pt. light to 4 miles S of Pyramid Head light.
51	35-04-00 35-10-00	117-19-00 117-56-00	From California City to the western tip of Harpers Dry Lake.
63	35-40-45 36-08-50	119-43-10 119-57-20	3.5 miles from Lost Hills Kern Co. Airport to about 4 miles WNW of Westlake Farms Airport.

Gust Plus Maneuver Round-Robin Flight (Edwards AFB)

Leg. No.	Distance (Nautical Miles)	Maximum S Speed (KTAS)	Description from Sectional Chart
1.	50	340	From Edwards AFB to 10 miles NE of the Fillmore Omni.
2.	15	500	From 7 miles SW of the Oxnard Rdo Bcn to the eastern point of Santa Cruz Island
3.	43	420	From the eastern point of Santa Cruz Island to the western point of San Miguel I.
4.	20	500	From the western point of San Miguel Island to 15 miles SW of Gaviota Omni.
5.	50	500	From 15 miles NW of the Gaviota Omni to 6 miles W of the Belridge (pvt.) Airport, and
	40	360	From 6 miles W of the Belridge (pvt.) Airport, via a point 5 miles W of the Lost Hills Airport to 7 miles E of Avenal Airport.
6.	70	340	From 10 miles east of Porterville to 10 miles S of Bishop.
7.	51	420	From 10 miles S of Bishop to the center of Owens Lake.
8.	88	260	From the center of Owens Lake to the Edwards AFB.

60. Flight between legs will be conducted in accordance with the Civil Air Regulations, Part 60. During the low-level operations, all airports will be avoided by 3 miles or more.

(Continued)

Patterson Air Force Base, Ohio

Track No.	Location Lat.	Location Long.	Description from Sectional Chart
61	39-52-40 39-27-00	83-18-45 82-58-25	Over London reporting point to crossing of route 23, 7 miles north of Chillicothe.
91	39-06-00 39-36-30	84-03-00 84-03-00	3 miles N of Williamsburg to 2 miles W of Spring Valley.
101	39-02-10 39-03-50	83-02-40 83-41-15	Crossing of Scioto River 1 mile SE of Jasper to intersection of route 62.
41	41-34-40 41-49-00	82-52-00 83-27-00	10 miles NW of Sandusky over tip of Lake Erie to point 14 miles west of Carleton omni.

RADAR - On page 30 of Flight Information Manual Volume 13, dated December 1959, add subtopic No-Gyro Vector or Approach - Aircraft Under Radar Control: A pilot under radar control will occasionally experience circumstances wherein his directional gyro or other stabilized compass is inoperative or inaccurate. When this occurs, he should so advise air traffic control and request a no-gyro vector or approach. Pilots of aircraft not equipped with a directional gyro or other stabilized compass who desire radar handling may also request a no-gyro vector or approach. Prior to commencing such vector/approach the pilot will be advised to make all turns at standard rate, and that turn instructions should be executed immediately upon receipt. For example, "Turn Right"; "Stop Turn." When a surveillance or precision approach is made the pilot will be advised after his aircraft has been turned onto final approach to make turns at half standard rate.

GOOD OPERATING PRACTICES-IFR RADAR DEPARTURE SERVICE AVAILABLE- On page 53 of Flight Information Manual Volume 13 dated December 1959, delete paragraph 12.

RADAR WEATHER ADVISORY SERVICE- On pages 31 and 32 of Flight Information Manual Volume 13 dated December 1959, under Radar Advisory Service Air Defense Command delete listings under Michigan, Oregon and Washington.

ILS SENSITIVITY ADJUSTMENTS: At a number of facilities in the United States, ILS localizer course width will be reduced from 5 degrees to 4 degrees in the near future. Individual facility NOTAM's will be published as these changes occur.

NEW AIR TRAFFIC CONTROL ADVISORY SERVICE: IFR aircraft operating in accordance with an ATC authorized cruising level of VFR conditions-on-top are required by CAR 60.44 to be flown at the altitudes/flight levels specified in CAR 60.32 for VFR flight. Noncompliance by pilots with the cruising level requirements of CAR 60 compromises intended segregation between aircraft operating at VFR and IFR altitudes/flight levels. Beginning April 5, 1960, pilots of IFR aircraft operating in accordance with an air traffic control authorized cruising level of VFR conditions-on-top and reporting at an altitude/flight level incorrect for direction of flight will be advised by air traffic control facilities of the appropriate level/s for direction of flight. Controllers will provide this advisory service on a "workload permitting" basis. The provision, or lack of provision of this service should not be construed to relieve or diminish pilot responsibility for operation at the correct altitudes flight levels for direction of flight.

NAVIGATIONAL WARNING: The following are low level "FAIRBALL" routes used by the USAF when conducting low level navigation flights in jet aircraft at 500 to 2,000 feet above the terrain. At the termination of the low level flight, aircraft will climb to altitudes between 14,000 to 20,000 feet MSL. Aircraft will fly hemispheric rules. Flights will be operated at random intervals and under VFR conditions during daylight hours only.

Route 2-J-2: Start at 43-22-30N, 94-04-00W, (entry-call Mason City Radio), 43-28N, 91-00W, 42-21N, 90-54-30W; 40-25N, 92-07-30W; 40-22N, 92-31W(end nav. leg) to target 40-14N, 93-36W. Note: for a bomb run only, entry reporting will be 41-00N, 91-45W(call Ottumwa Radio); remainder of route is identical with above.

Route 2-K-1: Start at 31-00N, 95-04W (entry-call Lufkin Radio), 31-55N, 95-24; 31-52N, 97-23W; 32-02N, 98-24W; 32-53N, 98-40W; 34-51N, 98-55W;(end nav. leg), terminate operations over Chickasha, Okla. Note: for a bomb run only, entry reporting point will be 34-00 N, 98-48W (call-Wichita Falls Radio); remainder of route is identical with above.

Route 2-M-1: Start at 31-45N, 91-49W (entry-call Alexandria Radio), 31-35N, 94-20W; 34-00N, 95-02W; 34-27N, 94-38W; 34-35N, 93-20W(end nav. leg), to target-Little Rock. Note: for a bomb run only, entry reporting point will be 34-27N, 94-38W, (call-Fort Smith Radio), remainder of route is identical with above.

Route 2-P-1: Start at 39-11N, 86-52W (entry-call Terre Haute Radio), 38-02N, 86-31W; 38-18N, 87-55W; 39-23N, 90-37W; 38-52N, 92-18W (end nav. leg). 38-44N, 92-44W; start climb to target-Clinton, Mo. Note: for a bomb run only, entry reporting point will be 38-52N, 92-18W (call-Columbia Radio), remainder of route is identical with above.

Route 2-R-2: Start at 35-38N, 99-11W; to start climb point 36-12N, 98-14W; to termination 36-45N, 98-11W. Entry reporting point- Sayre Radio.

Route 2-R-3: Start at 36-22N, 92-14W; to 36-26N, 93-50W. Entry reporting point-Springfield Radio.

Route 2-S-1: Start at 29-29, 91-46, (entry reporting point-Baton Rouge VOR); to turning point 28-00, 91-30; to turning point 27-00, 92-30; to turning point 27-50, 94-00; to navigation termination point, bomb run entry point, and LONG LOOK start climb (if applicable) 27-50, 95-45; to SHORT LOOK start climb (if applicable) 28-11, 96-34; to target at Matagorda Island 28-13-30, 96-39-00. After bombs away, proceed to 28-21-30, 96-42-00, then right turn to Palacios VOR. On SHORT LOOK mission do not exceed 5000' MSL until past Port O'Connor, Texas. On LONG LOOK do not descend below 18,000' MSL until past Port O'Connor, Texas.

Route 2-T-1: Start at 42-00N, 96-12W; to target 42-51N, 97-29W. (Entry reporting point-Sioux City Radio).

Route 2-T-2: Start at 42-30N, 97-49W to target 41-26.5N, 96-36W. (Entry reporting point Point-O'Neil Radio).

Route 8-P-1: Start at 43-42N, 69-50W; terminate at 44-20N, 68-04W.

Route 8-P-2: Start at 43-42N, 69-50W; 43-53N, 69-07W; terminate at 44-20N, 68-04W.

Route 8-R-1: Start at 18-05N, 67-54W; 17-56N. 67-11W; 17-56N, 66-18W; 18-00N, 66-00W. Entry reporting point San Juan ARTCC.

Route 15-A-1: Cross Salt Flat VOR at flight altitude (entry point - Call Salt Flat Radio), descend to start low level 30-50N, 103-00W; 30-10N, 102-10W; 30-30N, 100-05W; 32-00N, 99-15W; 33-05N, 99-30W; 34-25N, 100-30W. Start climb 34-39N, 100-56W; level off 35-01N, 101-33W, target Amarillo.

Route 15 - A - 3: Cross Douglas VOR at flight altitude (entry point - Call Douglas Radio), descend to start low level 43-00N, 103-00W; 41-30N, 101-30W; 39-25N, 102-10W; 38-00N, 101-40W, 36-00N, 100-45W. Start climb 35-50N, 101-00W; level off 35-25N, 101-36W, target Amarillo.

Route 15-B-2: Cross Peach Springs VOR at flight altitude (entry point-Call Las Vegas Radio), descend to start low level 37-07N, 114-30W; 38-45N, 116-30W; 39-40N, 115-10W; 41-00N, 114-50W; 42-10N, 113-55W; 43-10N, 114-25W. Start climb 43-18N, 115-02W; level off 43-30N, 115-52W, target Boise.

Route 15-C-1: Start descent Reno VOR, entry point 40-11N, 121-05W. Start climb 40-47N, 121-04W, target 41-55N, 121-04W.

Route 15-D-2: Entry at 32-37N, 102-37W to target at 32-34N, 101-08W.

Route 15-D-3: Start descent at Hudspeth VOR, Texas to start low level point at 31-08N, 105-10W to start climb at 30-48N, 104-46W to target at 30-18N, 104-02W.

Route 15-E-1: Start descent 44-28N, 100-40W, entry point 44-34 1/2N, 101-30W. Start climb 44-43N, 103-28W, target 44-44 1/2N, 103-36W.

Route 15-F-1: Fairchild Air Force Base to 47-26N, 118-16W, target 47-52N, 119-07W.

Route 15-G-1: Cross Ukiah, California VOR at flight altitude (entry point) - (Call Ukiah Radio), descend to start low level 39-06N, 124-17W to 39-08N, 124-45W; 40-24N, 125-29W; 42-20N, 125-35W; 43-08N, 126-00W to climb point 43-32N, 124-48W to start climb for Long Look at 43-43N, 124-17W or to start climb for Short Look at 43-54N, 123-20W to target 43-58N, 123-05W, S of Eugene, Oregon.

Route 15-H-1: Entry at 43-21N, 117-18W to 42-24-30N, 118-36W.

Route 15-H-2: Entry at 42-31N, 120-14W to 42-44N, 119-38W to 43-34N, 118-12W.

Route 15-M-2: 36-18 1/2N, 121-54W to target, 35-19N, 120-52W, to target 36-18 1/2N, 121-54W. Route will be flown in both directions.

Route 15-R-1: Entry at 33-00N, 103-00W; to 34-00N, 102-28W; to target at 34-38-30N, 102-43W.

Route 15-T-1: Entry at 32-58N, 111-23W; to 32-54N, 109-50W.

IMPORTANT NOTICE - NEW FREQUENCY ASSIGNMENTS

Commensurate with FAA's efforts to improve the overall air traffic control communications system and to relieve congestion on the existing communications channels, an additional five megacycles of spectrum space is being made available to the aeronautical user effective July 1, 1960. In order to obtain maximum utilization of these additional radio frequencies, FAA is initiating a program of new frequency assignments within the band 118-135 MC/S at 0800 GMT on July 7, 1960.

This implementation invloves several hundred frequency changes throughout the United States, not including Alaska and Hawaii. To facilitate the users' transition to the new frequencies and to provide the greatest advance notice of the specific changes, we are presenting the following tabulation in terms of location, traffic control function, new frequency to be activated July 7, 1960, and existing frequency. Further, note also that many frequencies now assigned (shown in the "old frequency" column) have either been changed or will serve a different function.

LEGEND: H - High Altitude 24,000' and above
I - Non-Radar Sectors 23,000' and below
Ir - Radar Sectors 23,000' and below
A - Center Area Discrete 23,000' and below

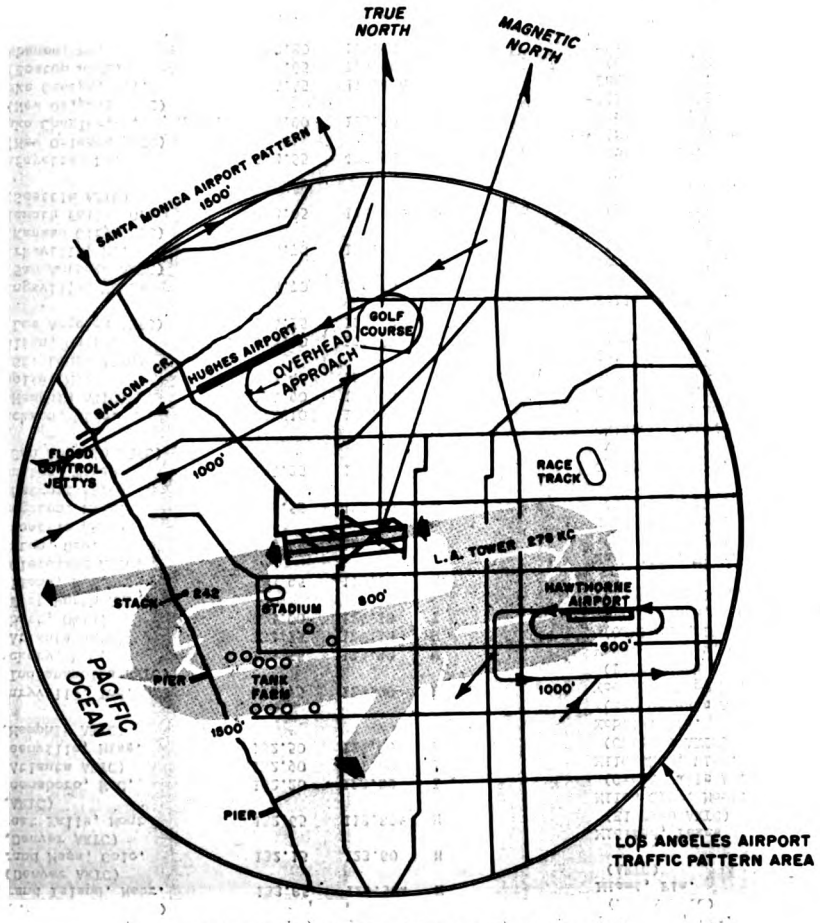
* - Old frequency to be retained as Function A.

SPECIAL CIVIL AIR REGULATION SR-438: PART 60 - AIR TRAFFIC RULES LOS ANGELES INTERNATIONAL AIRPORT TRAFFIC PATTERN AREA RULES became effective April 4, 1960. Scope and applicability - All aircraft operating within the airspace of the Los Angeles International Airport Traffic Pattern Area shall be operated in accordance with the following rules unless otherwise authorized by air traffic control. As used in these rules, the Los Angeles International Airport Traffic Pattern Area shall include the airspace described by a five mile horizontal radius from the geographical center of that airport and extending upwards from the surface to, but not including 2,000'. Additionally, large aircraft as used in this regulation shall mean those aircraft of 12,500 pounds or more maximum certificated take-off weight.

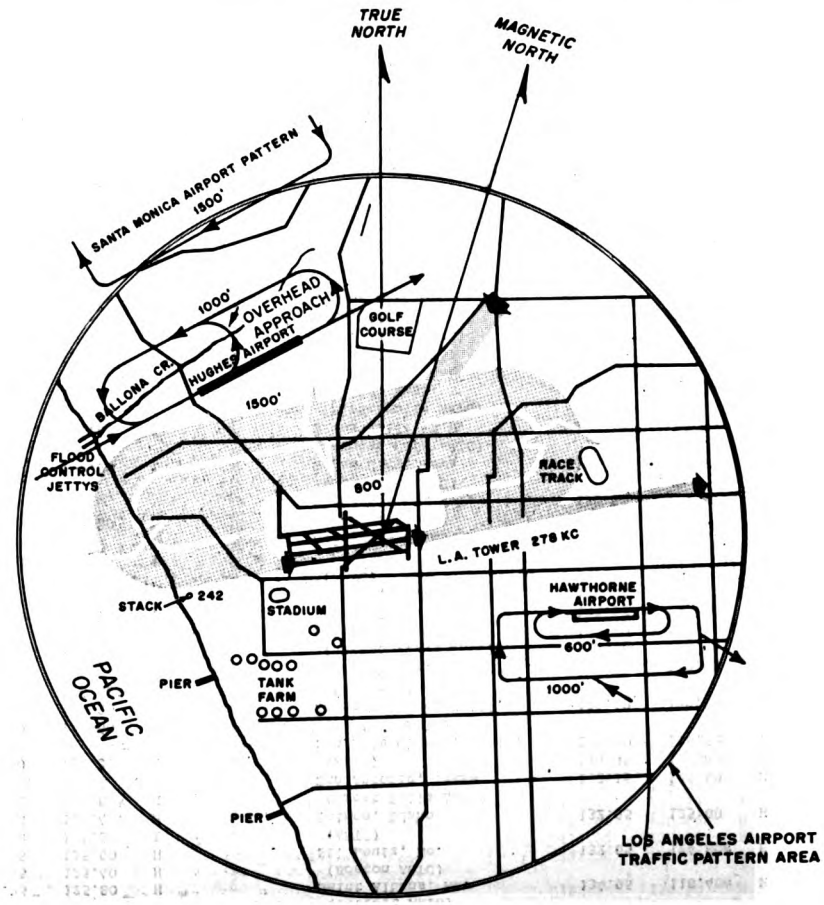
(a) General Rules

(1) Avoidance of Traffic Pattern Area - En route aircraft shall be flown so as to avoid the Los Angeles International Airport Traffic Pattern Area.



(2) Communications - Two-way radio communication shall be established with the Los Angeles International airport traffic control tower prior to entering the traffic pattern area for a landing at Los Angeles International Airport and prior to take off from the airport, except that an aircraft not equipped with functioning two-way radio may take off or land at the Los Angeles International Airport if prior authorization from the Los Angeles International Airport traffic control tower has been obtained.

(3) Aircraft Operating Within the Traffic Pattern Area - All aircraft taking off from or landing at the Los Angeles International, Hawthorne or Santa Monica Airports shall be operated within the Los Angeles Airport Traffic Pattern Area in conformance with the traffic pattern rules as prescribed herein, including the altitudes and directions of flight therefor.



NOTE: For the convenient reference of the pilot, there is attached to this regulation a chart which depicts approximate flight paths of the traffic patterns for such airports.

(b) Traffic pattern rules for Los Angeles International Airport

(1) Traffic pattern entry- All fixed-wing aircraft, except those operating on IFR flight plans, landing at the Los Angeles International Airport, shall enter the Traffic Pattern Area in the northeast, southeast or southwest sectors of that area and at an angle of approximately 45 degrees to the downwind leg of the runway in use, and unless the VFR distance-from

APPROXIMATE FLIGHT PATHS
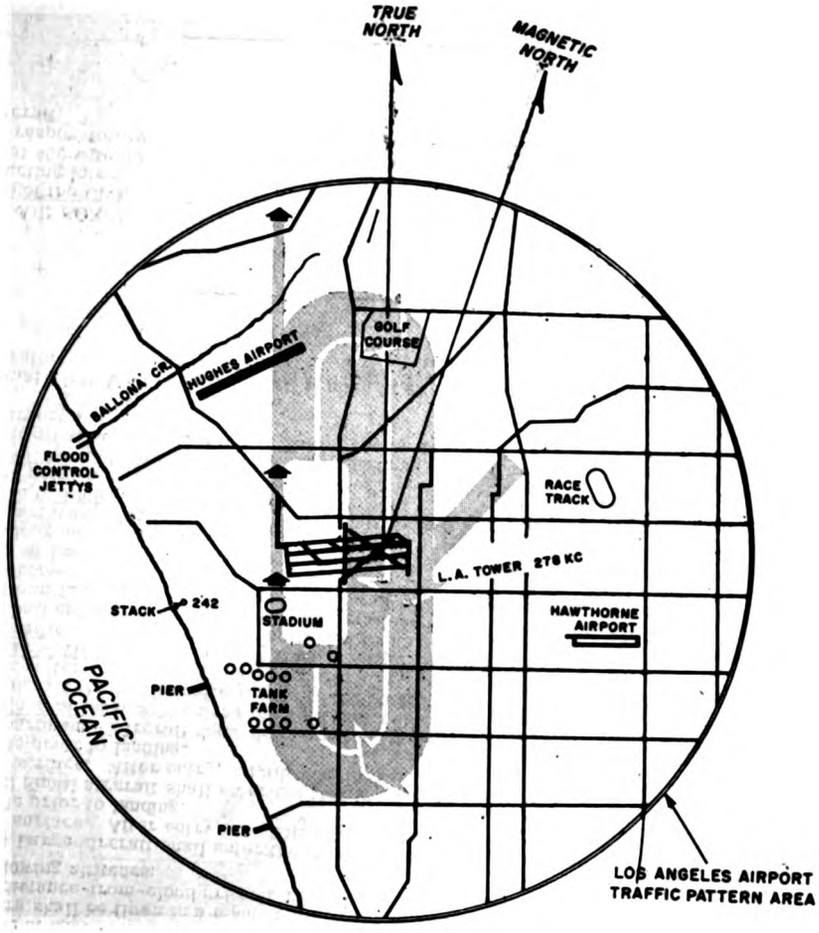
TRAFFIC PATTERN NO. 7 R / 7 L

(24 May 1960)

(ii) Aircraft taking off to the East shall climb to at least 1500' as rapidly as practicable, (iii) Aircraft taking off to the North or South shall climb straight ahead to 1500' as rapidly as practicable before proceeding on course.

(4) Special operating rules for large fixed-wing aircraft- When the applicable aircraft per-

cloud criteria require otherwise, at the following altitudes:



(i) Large aircraft shall enter the traffic pattern area at an altitude of at least 1500' above the surface. After entry, an altitude of at least 1500' shall be maintained as long as practicable prior to landing.

(ii) Small aircraft shall enter the traffic pattern area at an altitude below 1200' but not less than 1000' above the surface. After entry, an altitude between 800 and 1000' shall be maintained as long as practicable prior to landing.

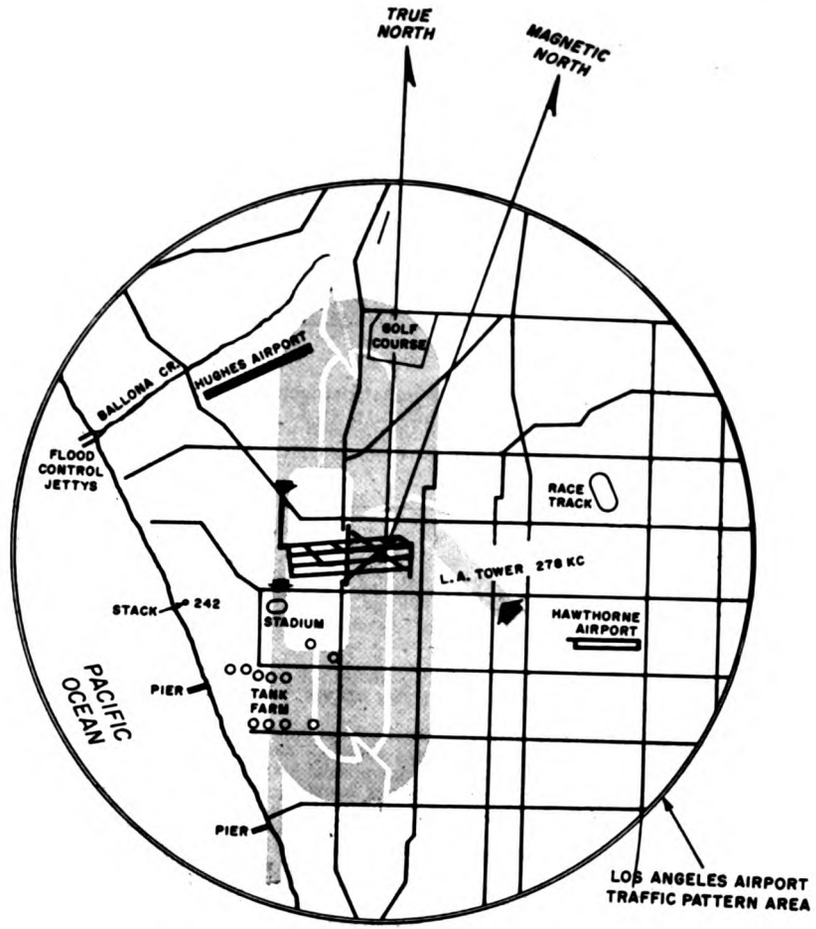
(2) Helicopters - Helicopters shall cross the traffic pattern at approximate right angles to the upwind or downwind leg of the Los Angeles Airport traffic pattern at an altitude below that being utilized by fixed-wing aircraft in the pattern. Thereafter, approach to land shall be made in a manner which will avoid the flow of fixed-wing aircraft.

(3) Departures - Unless the VFR distance-from-cloud criteria require otherwise, fixed-wing aircraft shall be flown so as to conform to the following:

(i) Aircraft taking off to the West shall climb as rapidly as practicable on the departure runway heading until past the shoreline. Such aircraft shall not recross the shoreline at less than 1500'.

APPROXIMATE FLIGHT PATHS
TRAFFIC PATTERN NO. 34

APPROXIMATE FLIGHT PATHS



(ii) Aircraft taking off to the East shall climb to at least 1500' as rapidly as practicable.

(iii) Aircraft taking off to the North or South shall climb straight ahead to 1500' as rapidly as practicable before proceeding on course.

(4) Special operating rules for large fixed-wing aircraft - When the applicable aircraft performance limitations permit, all landings and take-offs shall be made in a westerly direction when the surface wind velocity is less than five knots and the runways are dry. If this direction of take off or landing is not considered by a pilot to be suitable for the safety of the particular flight operations involved, the pilot may use another direction for take off or landing. In such case, a written report of the reasons for such operation shall be forwarded within 48 hours to the Chief, Flight Standards Division, Federal Aviation Agency, Region Four, Los Angeles, California.

(i) Final approach - When approaching to land on a runway served by a functioning instrument landing system, large aircraft equipped with functioning instrument landing system equipment shall remain at or above the glide slope altitude between the outer marker and the middle marker.

NOTE: Precision radar advisory service is available to assist pilots to conform with this

APPROXIMATE FLIGHT PATHS
TRAFFIC PATTERN NO. 16

requirement.
(c) Traffic pattern rules for Hawthorne Airport
(1) Entry- All fixed-wing aircraft landing at Hawthorne Airport shall enter the Los Angeles International Airport Traffic Pattern Area in the southeast sector of that area and at an angle of approximately 45 degrees to the downwind leg of the Hawthorne traffic pattern. Helicopters shall be flown in a manner which avoids the flow of fixed-wing aircraft. Unless the VFR distance-from-cloud criteria require otherwise, fixed-wing aircraft shall be flown at the following altitudes:

(i) Large aircraft shall enter the traffic pattern area at an altitude of at least 1200' above the surface. After entry, an altitude of at least 1000' shall be maintained as long as practicable prior to landing.
(ii) Small aircraft shall enter the traffic pattern area at an altitude of at least 1000' above the surface. After entry, an altitude of at least 600' shall be maintained as long as practicable prior to landing.
(2) Departures - Aircraft departing from the Hawthorne Airport shall climb as rapidly as practicable to at least 600' unless the VFR distance-from-cloud criteria require otherwise and shall depart the traffic pattern area to the South.
(d) Traffic pattern rules for Hughes Airport
(1) Entry - All aircraft landing at Hughes Airport shall enter the Los Angeles International Airport Traffic Pattern Area in the northeast or northwest sectors of that area. Fixed-wing aircraft shall enter traffic on a flight path parallel to the Hughes Airport runway. Helicopters shall be flown in a manner that avoids the flow of fixed-wing aircraft. Unless the VFR distance-from-cloud criteria require otherwise, fixed-wing aircraft shall enter traffic at an altitude of at least 1000'. When entry is made at 1000' the altitude of 1000' shall be maintained as long as practicable.
(2) Departures - Aircraft departing from the Hughes Airport shall climb as rapidly as practicable to 1000'.
(e) Traffic pattern rules for Santa Monica Airport- Aircraft operating in that portion (downwind leg) of the Santa Monica Airport traffic pattern which may extend into the Los Angeles traffic pattern area shall be flown so as to remain within one and one-half miles of the Santa Monica Airport.

This Special Civil Air Regulation shall remain in effect until superseded or rescinded by the Administrator.

AIR FORCE BLACKOUT TRAINING: A waiver to the provisions of section 60.23(A) of part 60 of the Civil Air Regulations has been granted to the Air Defense Command and they are conducting Interceptor Training against target acft without navigation lights at and above flight level 400 within the continental limits of the U.S.A. during hours of darkness. ADC assumes responsibility for radar separation between target and interceptor aircraft and all other aircraft.

✓ ATLANTA/JACKSONVILLE CENTERS BOUNDARIES: Effective 0001 EST 30 June the Atlanta/Jacksonville Centers Boundaries are amended as follows: beginning at the present boundary at lat 33-00-00, long. 82-50-00; thence E to 33-00-00, 82-33-35; S to 32-25-25, 82-39-05.

(24 May 1960)

SPECIAL NOTICE

Temporary Controlled Firing Area – Jordan Narrows, Utah

Firing to cease upon approach of aircraft over firing area.

Designated Altitude – Surface to 15,000 ft. above terrain.

Time of use – Sunrise to sunset only during period of June 5-19, 1960 inclusive

Activity – Artillery firing

Using Agency – Utah National Guard

Firing to be conducted in accordance with the following:

1. Visual surveillance will be continuously maintained over the entire area by safety officers during firing operations to detect approaching aircraft and communication will be established with gun positions to order cessation of firing upon the approach of aircraft.

2. Firing will be conducted only when there are no clouds below 16,000 ft. greater than 2/10 coverage and when visibility is at least 10 miles.

3. No projectile shall enter or pass through any clouds.

4. All firing to be conducted to the west.

5. Radar surveillance of the Jordan Narrows Valley will be provided during all periods of firing.

FLIGHT ADVISORY SERVICE IN SPECIFIED AREAS: This service has been established as a means of providing an increased degree of safety for civil turbojet air carrier flights while operating within defined flight advisory areas. The service is performed by certain selected radar equipped facilities and provides the civil turbojet air carrier pilot with information to assist him in avoiding other pertinent traffic. Areas where radar is used to provide advisory service are referred to as "radar advisory areas." Areas within which advisory service is provided without the use of radar are referred to as "nonradar advisory areas." The following procedures applicable to said areas are designated by the Administrator of the Federal Aviation Agency as standing air traffic control instructions:

A. The procedures applicable to all aircraft operating VFR or operating on an ATC clearance to climb or descend in VFR conditions or to maintain VFR-on-top with respect to the radar advisory areas or nonradar advisory areas are defined as follows:

NOTE: The radar advisory areas and nonradar advisory areas and the flight levels comprising these areas are depicted on charts entitled "Flight Information Publication - En Route - High Altitude (U.S.)," published by the Aeronautical Chart and Information Center, Air Photographic and Charting Service(MATS) USAF, and "High Altitude - En Route " published by the U.S. Coast and Geodetic Survey, Washington, D.C.

These charts are available to users through the U.S. Coast and Geodetic Survey.

1. Radar Advisory Areas
   a. No additional operational restriction, control or communication requirement is placed on civil or military flights conducted under visual flight rules (VFR flights or flights cleared to climb or descend in VFR conditions or cleared to maintain VFR-on-top) provided such flights when operated within the areas specified as radar advisory areas from flight level 240 to flight level 390 inclusive are equipped with a functioning radar beacon transponder. Basic Mark X equipped military flights operating within radar advisory areas will adjust transponders to operate on Mode 3. Unless otherwise instructed by air traffic control, Mark X SIF equipped flights will adjust transponder to Mode 3, Code 62, except that ADC flights will adjust transponder to Mode 3, Code 00. Those military flights operating on a mode other than Mode 3 will adjust transponder to operate on Mode 3 and the assigned mode simultaneously. Civil turbojet transponders will be adjusted to reply on Mode A, Code **40.** Other civil aircraft will adjust transponder to reply on Mode A, Code 62.
   b. Any aircraft not equipped with a functioning beacon operating VFR, or cleared to climb or descend in VFR conditions, or cleared to maintain VFR-on-top from flight level 240 to flight level 390, inclusive desiring to operate within radar advisory areas must obtain specific authorization from the appropriate ARTC center prior to the time of entering such areas. ATC clearance to climb or descend in VFR conditions or ATC clearance to maintain VFR-on-top does not constitute specific authorization to operate within or across radar advisory areas without a functioning beacon.
   c. In the event of two-way communications failure which precludes obtaining authorization to operate within radar advisory areas, the pilot may proceed across these routes maintaining an appropriate VFR cruising altitude as specified in CAR 60 or AFR 60-16 for the direction of flight.

2. Nonradar Advisory Areas
   The following operational procedures apply to aircraft operating VFR, as well as those cleared by ATC to climb or descend in VFR conditions or cleared to maintain VFR-on-top, while between flight levels 270 and 310 inclusive with desire to fly across or within those areas specified as nonradar advisory areas.
   a. Specific authorization must be obtained directly from the appropriate ARTC center or through the nearest FSS prior to entering these specified areas. ATC clearance to climb or descend in VFR conditions or ATC clearance to maintain VFR-on-top does not constitute specific authorization to operate within or across nonradar advisory areas.
   b. Request for specific authorization to proceed VFR or VFR-on-top on or across these segments must include a position report, type of aircraft, and estimated time of entry and exit from these segments. Unrestricted authorization will be granted, except that when conflict with a civil turbojet air carrier flight is indicated, aircraft operating VFR-on-top will be advised of the civil jet traffic and said approval will restrict operation to specific flight level(s), time or place as appropriate to preclude conflict with civil jet traffic.

B. These services should not be considered as providing positive separation. Within the limitation of the service, civil turbojet air carrier aircraft will be provided with traffic information and radar vectors to avoid observed traffic. Consequently, these services do not relieve pilots of their responsibilities to see and avoid other aircraft.

C. Radio and radar failure procedures applicable to civil air carrier turbojet flights while operating within radar advisory areas follow:

1. In the event of a ground radar failure the pilot will continue in accordance with ATC clearance remaining on the facility's frequency unless otherwise advised;
2. In the event of loss of communication with a USAF(ADC) radar facility on the designated control frequency the pilot should attempt to re-establish communication with the facility on 121.5 mc. If unable, he should utilize either direct center frequency, the nearest FSS, or company radio.

The above procedures are applicable to the following jet routes and areas:

1. VOR/VORTAC Jet Route No. 1 (Los Angeles, Calif., to Seattle, Washington)
2. VOR/VORTAC Jet Route No. 2 (Houston, Texas to Lake Charles, La.) (Houston, Texas to New Orleans, La. Effective 5 May 1960.)
3. VOR/VORTAC Jet Route No. 3 (Oakland, Calif., to Spokane, Wash.)
4. VOR/VORTAC Jet Route No. 4 (Los Angeles, Calif., to Phoenix, Ariz.
5. VOR/VORTAC Jet Route No. 8 (Tulsa, Okla., to New York, N.Y.)
6. VOR/VORTAC Jet Route No. 12 (Baltimore, Md., to Pittsburgh, Pa.)
7. VOR/VORTAC Jet Route No. 14 (Cleveland, Ohio to Idlewild, N.Y..
8. VOR/VORTAC Jet Route No. 16 (Portland, Ore., to Pullman, Mich.,; Albany, N.Y. to Boston, Mass.) Nonradar advisory area from 60 nmi W of Dillon, Mont., VOR to 90 nmi E of Dillon.
9. VOR/VORTAC Jet Route No. 21 (Omaha, Neb., to Duluth, Minn.) (Dallas, Tex., to San Antonio, Tex.)
10. VOR/VORTAC Jet Route No. 22 (Lake Charles, La.,to intersection with J55V).
11. VOR/VORTAC Jet Route No. 24 (Phoenix, Ariz., to Albuquerque, N.M.)
12. VOR/VORTAC Jet Route No. 25 (Dallas, Tex., to Tulsa, Okla.)
13. VOR/VORTAC Jet Route No. 26 (Amarillo, Tex., to Appleton, Ohio.)
14. VOR/VORTAC Jet Route No. 29 (Houston, Tex., to Memphis, Tenn.)
15. VOR/VORTAC Jet Route No. 31 (Dallas, Tex., to Chicago, Ill.)
16. VOR/VORTAC Jet Route No. 33 (Shreveport, La., to the Int. with J31V and Kansas City, Mo., to Des Moines, Iowa.)
17. VOR/VORTAC Jet Route No. 34 (Cleveland, Ohio to Pittsburgh, Pa.)
18. VOR/VORTAC Jet Route No. 35 (New Orleans, La., to St. Louis, Mo.)
19. VOR/VORTAC Jet Route No. 37 (New Orleans, La., to Spartanburg, S.C.)
20. VOR/VORTAC Jet Route No. 42 (Dallas, Tex., to New York, N.Y.)
21. VOR/VORTAC Jet Route No. 45 (Alma, Ga., to St. Louis, Mo.)
22. VOR/VORTAC Jet Route No. 49 (Alma, Ga., to Spartanburg, S.C.)
23. VOR/VORTAC Jet Route No. 52 (Dallas, Tex., to Atlanta, Ga.) via Texarkana, Ark., VOR; Greenwood, Miss., VOR; Birmingham, Ala., VOR. (Dallas, Tex-Birmingham, Ala., extension to J52V.
24. VOR/VORTAC Jet Route No. 53 (Miami, Fla., to the Int. of J53V and J81V;Spartanburg,S.C., to Pittsburgh, Pa.)
25. VOR/VORTAC Jet Route No. 55 (From the intersection with J22V to Kenton, Del.)
26. VOR/VORTAC Jet Route No. 58 (San Francisco, Calif., to New Orleans, La.) Nonradar advisory area from 20 nmi W of Pioche, Nev., VOR to 90 nmi SE of Alamosa, Colo., VOR.)
27. VOR/VORTAC Jet Route No. 60 (Los Angeles, Calif., to New York, N.Y.) Nonradar advisory area from 25 nmi SW of Bryce Canyon, Utah VOR to 70 mi WSW of Denver, Colo., and from 120 nmi ENE of Denver, Colo., VOR to 50 nmi WSW of Wolbach, Neb., VOR.
28. VOR/VORTAC Jet Route No. 62 (Idlewild, N.Y., to Nantucket VOR.)
29. VOR/VORTAC Jet Route No. 64 (Los Angeles, Calif., to Chicago, Ill.) Nonradar advisory area from 20 nmi SW of Alamosa. Colo., VOR to 25 nmi SW of Hill City, Kansas VOR.
30. VOR/VORTAC Jet Route No. 67 (Idlewild, N.Y., to U.S.-Canadian Border.)
31. VOR/VORTAC Jet Route No. 69 (Spartanburg, S.C., to Gordonsville, Va.)
32. VOR/VORTAC Jet Route No. 71 (Appleton, Ohio to Front Royal, Va.
33. VOR/VORTAC Jet Route No. 75 (Miami, Fla., to U.S.-Canadian Border)
34. VOR/VORTAC Jet Route No. 77 (Miami, Fla., to U.S.-Canadian Border)
35. VOR/VORTAC Jet Route No. 78 (Los Angeles, Calif., to New York, N.Y.)

(24 May 1960)

36. VOR/VORTAC Jet Route No. 79 (Miami, Fla., to Idlewild, N. Y.)
37. VOR/VORTAC Jet Route No. 80 (Denver, Colo., to New York, N. Y.) Nonradar advisory area that portion of JR-80 from 120 nmi ESE of Denver, Colo., VOR to 25 nmi W of Hill City, Kansas VOR.
38. VOR/VORTAC Jet Route No. 81 (The intersection of J81V and J53V to Barracuda Int.)
39. VOR/VORTAC Jet Route No. 82 (Chicago, Ill., to Boston, Mass.)
40. VOR/VORTAC Jet Route No. 84 (Oakland, Calif., to the U.S.-Canadian Border) nonradar advisory areas from 50 nmi E of Rock Springs, Wyo. to 150 nmi E of Rock Springs and from 40 nmi E of Scottsbluff, Nebr., to 50 nmi W of Wolbach, Nebr. Advisory Service on Jet 84 Victor will be provided flight level 270 and above from 100 nmi W to 40 nmi E of Scottsbluff, Nebr.
41. VOR/VORTAC Jet Route No. 85 (Miami, Fla., to the U.S.-Canadian Border.)
42. VOR/VORTAC Jet Route No. 87 (Houston, Tex., to Northbrook, Ill.)
43. VOR/VORTAC Jet Route No. 89 (Northbrook, Ill., to Miami, Fla.)
44. Control 1150 (West Palm Beach, Fla., to Wilmington, N.C.)
45. VOR/VORTAC Jet Route No. 90 (Seattle, Wash., to Chicago, Ill.)

AREAS

1. That area 20 n mi either side of a line from Des Moines, Iowa VOR; intersection of Des Moines, Iowa 060° & Northbrook, Ill., 274° M radials; Northbrook, Ill., VOR; Pullman, Mich., VOR; Waterville, Ohio VOR; Joliet, Ill., VOR; Des Moines, Iowa VOR plus the area bounded by this line.
2. Duluth, Minnesota to the U.S.-Canadian Border via the Duluth 047° M radial(direct route between Duluth & Lakehead, Canada.)
3. Spokane, Washington to the U.S.-Canadian Border via the Spokane 028° M radial (direct route between Spokane & Cowley, Canada.)
4. Los Angeles, Calif., VOR; intersection of Los Angeles, Calif. 170° & Long Beach, Calif., 208° M radials; thence via the Long Beach, Calif 208° M radial(Control Area Extension 1177) for a distance of 180 n mi.
5. Los Angeles, Calif. VOR; thence via the Los Angeles, Calif 236° M radial (Control Area Extension 1316) for a distance of 180 n mi.
6. Los Angeles, Calif. VOR; Santa Barbara, Calif. VOR; thence via the Santa Barbara, Calif. 232° M radial (Control Area Extension 1176) for a distance of 180 n mi.
7. Oakland, Calif. VOR; thence via the Oakland, Calif. 218° M radial (Control Area Extension 1173 over Sunset Intersection) for a distance of 150 n mi.
8. Oakland, Calif. VOR; thence via the Oakland, Calif 250° M radial(Control Area Extension 1173 over Francis Intersection) for a distance of 150 n mi.
9. Seattle, Wash. VOR; intersection of Seattle, Wash. 175° & Portland, Oregon 332° M radials; Portland, Oregon VOR; Newport, Oregon VOR; thence via the Newport, Oregon 216° M radial (Control Area Extension 1419) for a distance of 110 n mi.
10. Honolulu, Hawaii VOR; Koko Head, Hawaii VOR; thence via the Koko Head, Hawaii 039° M radial for a distance of 118 n mi.
11. Honolulu, Hawaii VOR; Koko Head, Hawaii VOR; thence via the Koko Head, Hawaii 054° M radial for a distance of 114 n mi.
12. Honolulu, Hawaii VOR; intersection of Honolulu, Hawaii 168° and Molokai, Hawaii 257° M radials; Molokai, Hawaii VOR; thence via the Molokai, Hawaii 056° M radial for a distance of 101 n mi.
13. Honolulu, Hawaii VOR: thence via the Honolulu, Hawaii 250° M radial for a distance of 87 n mi.
14. Honolulu, Hawaii VOR; intersection of Honolulu, Hawaii 168° and Koko Head, Hawaii 243° M radials; thence via the Koko Head, Hawaii 243° M radial for a distance of 107 n mi.
15. Honolulu, Hawaii VOR: thence via the Honolulu, Hawaii 168° M radial for a distance of 99 n mi.
16. Honolulu, Hawaii LFR; thence NW via Red Airway 87 for a distance of 183 n mi.
17. Newark, New Jersey LFR; via the Newark LFR SE crs. (Control Area Extension 1147) to the Tuna Intersection.
18. Miami, Florida VOR; via the Miami VOR 118° M radial for a distance of 92 n mi (boundary of the Miami Oceanic Control Area)
19. Seattle, Washington VOR to the U.S.-Canadian Border via the Seattle VOR direct radial to the Victoria (Patricia Bay), B. C., Canada RR.
20. Boston, Mass., Terminal Area-- That area within 20 nmi to either side of J-16-V between Albany, N.Y., & Boston, Mass.
21. New York City, N.Y., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
    a. Bridgeport, Conn. Int. via Poughkeepsie, N.Y., VOR to Albany, N.Y., VOR.
    b. Idlewild, N.Y., VORTAC via Huguenot, N.Y., VOR; Wilkes-Barre, Pa., VOR; to Philipsburg, Pa., VORTAC.
22. Baltimore, Md., Terminal Area -- That area within 20 nmi to either side of a direct crs from Baltimore, Md., VOR via Harrisburg, Pa., VOR to Philipsburg, Pa., VOR
    Baltimore, Md., Terminal Area-- Effective 5 May 1960
    a. That area within 20 nmi from the sides and within the triangle formed by a direct course from the Baltimore, Md., VOR to the Idlewild, N.Y., VOR to the Salisbury, Md., VOR; to the Baltimore, Md., VOR.
    b. That area within 20 nmi to either side of the center line of Control Area Extension 1148.
23. St. Louis, Mo., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
    a. Int. of J-80-V & Terre Haute, Ind., 268° M radial; via the Int. of Terre Haute VOR 268° & St. Louis VOR 057° M radials; to St. Louis VOR.
    b. St. Louis, Mo., VOR via Troy, Ill., VOR; V-12 Bible Grove, Ill., VOR; to Int. of Bible Grove VOR 040° M radial and J-80-V.
    c. Maryland Heights, Mo., VOR via V-12 Readsville, Mo., VOR; to Int. of Readsville VOR 302° M radial and J-80-V.
    d. Springfield, Ill., VOR via V-69 to Gillespie, Ill. Int.
    e. Marion, Ill., Int. via V-179 and V-4 to St. Louis, Mo., VOR.
    Effective 17 December 1959.
24. Los Angeles, Calif., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
    a. Los Angeles, Calif., VOR via V-208 Thermal, Calif., VOR; V-432 to Rice, Calif. VOR.
    b. Los Angeles, Calif., VOR via V-201 Palmdale, Calif., VOR; V-12 to Hector, Calif., VOR.
    c. Los Angeles, Calif., VOR via Int. of V-299 and Palmdale, Calif, 265° M radial; to Int. of Palmdale, Calif., 265° M radial and J-1-V.
    d. Los Angeles, Calif., VOR via V-25 Santa Barbara, Calif., VOR; to Int. of Santa Barbara VOR 336° M radial and J-1-V
    e. Peach Springs, Ariz., VOR via Twenty-Nine Palms, Calif., VOR; V-264 and V-16 to Los Angeles, Calif., VOR.
25. Oakland, Calif., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
    a. San Francisco, Calif., VOR via V-199 to Red Bluff, Calif., VOR.
    b. Pedro, Calif., Int. via V-27-W Salinas, Calif., VOR; to Int. of Salinas VOR 102° M radial and J-1-V.
    c. Oakland, Calif., VOR via V-195 Benecia, Calif., Int.; Linden, Calif., VOR; to Int. of Linden VOR 100° M radial and J-58-V.
26. Dallas, Tex., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
    a. Wichita Falls, Tex., VOR via Bridgeport, Tex., VOR to Dallas, Tex., VOR.
    b. Texarkana, Ark., VOR via V-278 to Dallas, Tex., VOR.
    c. Dallas, Tex., VOR via V-18 Quitman, Tex., VOR; V-54 to Texarkana, Ark. VOR.
    d. Dallas, Tex., VOR via the Int. of the Dallas VOR 230° and the Waco, Tex., VOR 344° M radials; to the Waco, Tex., VOR.
    e. Dallas, Tex., VOR via the Int. of the Dallas VOR 178° and the Waco, Tex., VOR 028° M radials; to the Waco, Tex., VOR.
27. Atlanta, Ga., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
    a. Nashville, Tenn., VOR to Crossville, Tenn. VOR.
    b. Spartanburg, S.C., VOR via V-20-N to Norcross, Ga., VOR.
    c. Atlanta, Ga., VOR via V-454 and V-185 to Spartanburg, S.C., VOR.
28. Miami, Fla., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
    a. Orlando, Fla., VOR via J-81-V to Miami, Fla., VOR.

b. Lakeland, Fla., VOR via V-7, V-35, V-35-W, V-157-W, and V-51 to Biscayne, Bay, Fla., VOR.
c. West Palm Beach, Fla., to Biscayne Bay, Fla., VOR.

29. Detroit, Mich., Terminal Area -- That area within the United States which is 20 nmi to either side of a line drawn from the Pullman, Mich., VOR via direct Lansing, Mich., VOR; direct Salem, Mich., VOR; via Salem VOR 109° M radial to the U.S. - Canadian border; plus that area within the United States which is S of the above described line and N of J-60-V.

30. Denver, Colo., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
a. Denver, Colo., VOR via V-160 to a point 100 nmi NE of Denver VOR.
b. Denver, Colo., VOR via V-148 Thurman, Colo., VOR; thence via Thurman VOR 028° M radial to a point 68 nmi NE of Thurman VOR.
c. Kiowa, Colo., VOR via V-19 Pueblo, Colo., VOR thence via J-13-V to the northern edge of the currently depicted Category "B" area of J-64-V.
d. Roggen, Colo., Int. via V-220 to Kremmling, Colo., VOR.
e. Kiowa, Colo., VOR via Kiowa VOR 250° M radial to a point 80 nmi SW of Kiowa VOR.

31 From the Miami, Florida, VOR via the Marathon, Florida, Rdo Bcn; thence via Ctl Area Extension 1234 for a distance of 56 nmi--bndry of the Havana, Cuba Ctl Area.

32. Houston, Tex., Terminal Area--That area within 20 nmi to either side of a direct crs from the:
a. Houston, Tex., VOR via the Int of the Houston 036° and the Lake Charles, La, 265° M radials to the Lake Charles VOR (V-222N).
b. Houston, Tex., VOR via the Int of the Houston VOR 082° and the Lake Charles, La., VOR 233° M radials to the Lake Charles VOR (V20S).
c. Houston, Tex., VOR via the Int of the Houston VOR 315° and the Leona, Tex., VOR 162° M radials; to the Leona, Tex., VOR.
d. Houston, Tex., VOR via the Int of the Houston VOR 345° and the Leona, Tex., VOR 132° M radials; to the Leona, Tex., VOR.

33. San Antonio, Tex., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
a. San Antonio, Tex., VOR via the Int of the San Antonio VOR 048° and the Austin, Tex., VOR 166° M radials to the Austin, Tex., VOR.
b. San Antonio, Tex., VOR via the Int of the San Antonio VOR 353° and the Austin, Tex., VOR 248° M radials; to the Austin, Tex., VOR.

34. New Orleans, La., Terminal Area-- That area within 20 nmi to either side of a direct course from the:
a. New Orleans, La., VOR via the Int. of the New Orleans, La., VOR 320° and the Alexandria, La., VOR 098° M radials; to the Alexandria, La., VOR. (Overlies V-114-N.)
b. New Orleans, La., VOR via the Int. of the New Orleans, La., VOR 030° and the McComb, Miss., VOR 142° M radials; to the McComb, Miss., VOR. (Overlies V-9-E).
c. McComb, Miss., VOR to the Int. of the McComb, Miss., VOR 222° and the New Orleans, La., VOR 320° M radials. (Overlies V-194).
d. New Orleans, La., VOR via the Int. of the New Orleans, La., VOR 094° and the Mobile, Ala., VOR 219° M radials; to the Mobile, Ala., VOR. (Overlies V-240).
e. Mobile, Ala., VOR to the Int. of the Mobile, Ala., VOR 258° and the New Orleans, La., VOR 030° M radials. (Overlies V-20-N.).
f. Alexandria, La., VOR to the Baton Rouge, La., VOR. (Overlies V-114).
g. Baton Rouge, La., VOR via the Int. of the Baton Rouge, La., VOR 126° and the New Orleans, La., VOR 269° M radials; to the New Orleans, La., VOR.
Effective 5 May 1960.

35. Tampa, Fla., Terminal Area - That area within 20 nmi to either side of a direct course from the:
1. St. Petersburg, Florida VOR direct to the Orlando, Fla., VOR. (Overlies V-152).
2. St. Petersburg, Fla., VOR via the Int. of the St. Petersburg, Fla., VOR 038° and the Orlando, Fla., VOR 257° M radials; to the Orlando, Fla., VOR. (Overlies V152N).
3. St. Petersburg, Fla., VOR via the Lakeland, Fla., VOR; to the Orlando, Fla., VOR. (Overlies V-152S).
Effective 5 May 1960.

DISCONTINUANCE OF 135.0 MC: Effective 0800 GMT July 1, 1960, transmitting 135.0 mc will be discontinued in Flight Service Stations and Combined Stations/Towers.

FREQUENCY CHANGE - 126.18 MC to 126.20 MC: FAA will change all existing 126,18 mc frequency assignments to 126.20 mc during the month of July 1960. The individual locations affected will be NOTAMED as the changes are accomplished. The military services have advised their commands to make the change not later than July 1, 1960.

DISCONTINUANCE OF CONTINUOUS GUARD ON 3023.5 kc: Effective July 1, 1960 at the following locations, 3023.5 kc will be available "on request".

Glens Falls, New York
Martinsburg, West Virginia
Philipsburg, Pennsylvania
Youngstown, Ohio
Utica, New York
Dalhart, Texas
Memphis, Tennessee
Butler, Missouri
Cedar Rapids, Iowa
Chanute, Kansas
Des Moines, Iowa
Jackson, Michigan
Jamestown, North Dakota
Russell, Kansas
St. Louis, Missouri
Columbus, New Mexico
Crescent City, California
Idaho Falls, Idaho
Laramie, Wyoming
Oakland, California
Redmond, Oregon
Sacramento, California

VOR/DMET or TACAN EQUIPPED AIRCRAFT: The FAA has implemented new procedures and separation standards for the control of VOR/DMET or TACAN equipped aircraft. In order that ATC can apply these standards, pilots of aircraft so equipped are requested to include the statement "TACAN (or DMET) Equipped" in the remarks section of their flight plan.

PREFERRED ROUTES BETWEEN METROPOLITAN AREAS - Effective May 12, 1959 a complete list of preferred routes between major metropolitan areas will be published at periodic intervals in the Airman's Guide. The effective date of the published list and the date the next complete list is scheduled for publication will be provided.

Pilots are requested to use the preferred routes when filing IFR flight plans whenever possible. These routes have been developed to increase the efficiency of the air traffic control system.

1. Pilots can normally expect to receive clearance via the routes listed, thereby simplifying flight planning.
2. Considerable reduction in air/ground communication will ensue.
3. Departure and en route delays will be reduced.

Only those routes which are essential to achieve the above objectives have been included. Frequent review will be made to maintain accuracy of these routes on a national basis. Necessary revisions will be published in each issue of the Airman's Guide. Pilots are requested to make ink corrections to the last published list and retain and use, until a complete revised list is published.

VOR RECEIVER CHECK POINTS: The following means are available for checking the accuracy of VOR receivers: radiated test signals, airborne check points and ground check points. Pertinent details on the radiated signals and a tabulation of the check points (by facility, including complete location of the check points) will be found on pages 15-25 of the Flight Information Manual, Vol. 13, dated December 1959. As required, amendments to the radiated signals or check points are carried in the Airman's Guide under the heading "Flight Information Manual Corrections." Likewise, the radiated signals and the list of airports at which check points are located (tabulated by city and airport but without the specific details on the check points) are carried in the Airman's Guide from time to time.

(24 May 1960)

Van Nuys Airport, California
Los Angeles, California

FLIGHT ASSISTANCE FOREIGN EXCHANGE AND INTERPHONE SERVICE: As an aid to substantial groups of pilots operating from airports not within local calling distance of an FAA Flight Service Station, leased telephones services are provided to the nearest FAA station. One such service, entitled "Foreign Exchange" (FX), permits dialing a local number which will connect to the distant FSS at the cost of a local call. Another is "Interphones" a private line extension to the nearest FAA station and is normally located in the operations office at an airport where it is available to all pilots. Fixed base operators at the same airport may lease extension service on these lines for the convenience of pilots at the cost of a local telephone extension.

The locations provided with the above services follows:

FOREIGN EXCHANGE Location	Number	FSS Providing Service
Charlotte, North Carolina	ED 2-7262	Hickory, North Carolina

✓ RESTRICTED AREA AMENDMENTS: The following Restricted Area Amendments shall become effective on 30 June 1960:

(Part 608)

(1) In Section 608.30, the Hammond Bay, Mich., Restricted Area (R-424) is amended to read: Description by geographical coordinates - beginning at lat 45-56-30, long. 83-53-30; thence to 45-34-00, 83-03-00; 45-23-00, 83-18-00; 45-46-00, 84-08-00; thence to point of beginning. Designated altitudes - surface to 45,000' MSL. Time of designation - sunrise to sunset. Controlling agency- Commanding Officer, 507th Fighter Group, Kincheloe AFB, Michigan.

(2) In Section 608.30, the Upper Lake Huron, Michigan, Restricted Area (R-91) is revoked.

(3) In Section 608.30, the Upper Lake Huron, Michigan, No. 2 Restricted Area (R-491) is amended to read: Description by geographical coordinates - from lat 45-17-00, long. 83-10-00; E to 45-17-00, 82-30-30; S to 44-07-00, 82-14-45; W to 44-07-00, 83-01-00; NNE to 44-30-00, 82-51-00; N to 44-45-00, 82-50-00; NW to 44-55-00, 83-10-00; N to point of beginning. Designated altitudes - surface to 50,000' MSL. Time of designation- sunrise to sunset. Controlling agency - Commanding Officer, 412th Fighter Group, Wurtsmith AFB, Oscoda, Michigan.

(4) In Section 608.30, the Sault Ste. Marie, Michigan, Kincheloe AFB Restricted Area/ Military Climb Corridor (R-562) is amended by deleting "from a point 8 smi to point 10 smi from the TVOR." and "from a point 10 smi to a point 12 smi from the TVOR." and substituting therefor "from a point 8 smi to a point 9 smi from the TVOR." and "from a point 9 smi to a point 12 smi from the TVOR.", respectively.

(5) In Section 608.31, the Duluth Municipal Airport, Minnesota, Restricted Area/Military Climb Corridor (R-548) is amended to read: Description - the airspace based on the 004° T radial of the Duluth TVOR, extending from a point 5 smi N of the airport to a point 32 smi N of the airport, having a width of 2.5 smi E and 1.5 smi W of the 004° T radial at the beginning and a width of 2.3 smi on each side of the 004° T radial at the outer extremity. Designated altitudes - 3,400' MSL to 16,400' MSL from 5 smi N of the airport to 6 smi N of the airport. 3,400' MSL to 25,400' MSL from 6 to 7 smi N of the airport. 3,400' MSL to 27,000' MSL from 7 to 10 smi N of the airport. 7,400' MSL to 27,000' MSL from 10 to 15 smi N of the airport. 11,400' MSL to 27,000' MSL from 15 to 20 smi N of the airport. 16,400' MSL to 27,000' MSL from 20 to 25 smi N of the airport. 20,400' MSL to 27,000' MSL from 25 to 32 smi N of the airport. Time of designation - continuous. Controlling Agency: FAA Airport Traffic Control Tower, Duluth Municipal Airport.

(6) In Section 608.45, the Klamath Falls, Oregon, (Kingsley Field) Restricted Area/ Military Climb Corridor (R-587) is added to read: Description - That area centered on the 325° T radial of the Klamath Falls VORTAC extending from 10 smi NW of the airport to 32.5 smi NW of the airport, having a width of 2.5 smi at the beginning and a width of 4.5 smi at the outer extremity. Designated altitudes - 6,100' MSL to 19,100' MSL from 10 smi NW of the airport to 11 smi NW of the airport. 6,100' MSL to 27,000' MSL from 11 to 15 smi NW of the airport. 10,100' MSL to 27,000' MSL from 15 to 20 smi NW of the airport. 14,100' MSL to 27,000' MSL from 20 to 25 smi NW of the airport. 19,100' MSL to 27,000' MSL from 25 to 30 smi NW of the airport. 23,100' MSL to 27,000' MSL from 30 to 32.5 smi NW of the airport. Time of designation - continuous. Controlling agency - Klamath Falls Approach Control.

(7) In Section 608.54, the Chincoteague Inlet, Virginia, Restricted Area (R-45) is amended to read: Description by geographical coordinates - beginning at lat 37-56-45, long. 75-27-30; thence SE to 37-51-30, 75-17-15; southerly 3 nmi from the shoreline to 37-38-45, 75-31-20; N to 37-50-24, 75-31-20; thence NE to point of beginning. Designated altitudes - unlimited. Time of designation - continuous. Controlling agency- National Aeronautics and Space Administration, Wallops Island Station, Chincoteague, Virginia.

(8) In Section 608.63, the Salinas, Puerto Rico, Restricted Area (R-371) is amended by deleting "Surface to 8000' MSL" and "Continuous" and substituting therefor, respectively, "Surface to 5000' MSL" and "Sunrise to Sunset, June 15 thru August 15, and Sunrise to Sunset, Saturday and Sunday, August 16 thru June 14.".

✓ CHART CORRECTION Notice No. 3-60: (1) On Washington Sectional Chart 51st edition, dated January 28, 1960, change radial bearing from 049° to 094° on VOR airway No. 143 E of Front Royal VOR. (2) On Birmingham Sectional Chart, 49th edition, dated February 15, 1960, move 90° figure and arrow on compass rose of Columbus, Mississippi VOR 10° clockwise; or change 90° to 80°.

ON REQUEST REPORTING POINTS: The following on-request reporting points have been established, modified, cancelled or renamed as indicated effective 30 June 1960:

ESTABLISHED:

(1) SPRING VALLEY, N Y(LF) INT: S crs. Poughkeepsie, N.Y. LFR; 270 M rad Wilton, Conn. VOR.

(2) HARBORVIEW, OHIO(VHF) INT: 015 M rad Waterville, Ohio VOR; back crs. Toledo, Ohio ILS lclzr.

(3) DEERFIELD, OHIO(VHF) INT: 134 M rad Akron, Ohio VOR; 048 M rad Navarre, Ohio VOR.

(4) AKRON-CANTON, OHIO OUTER MARKER.

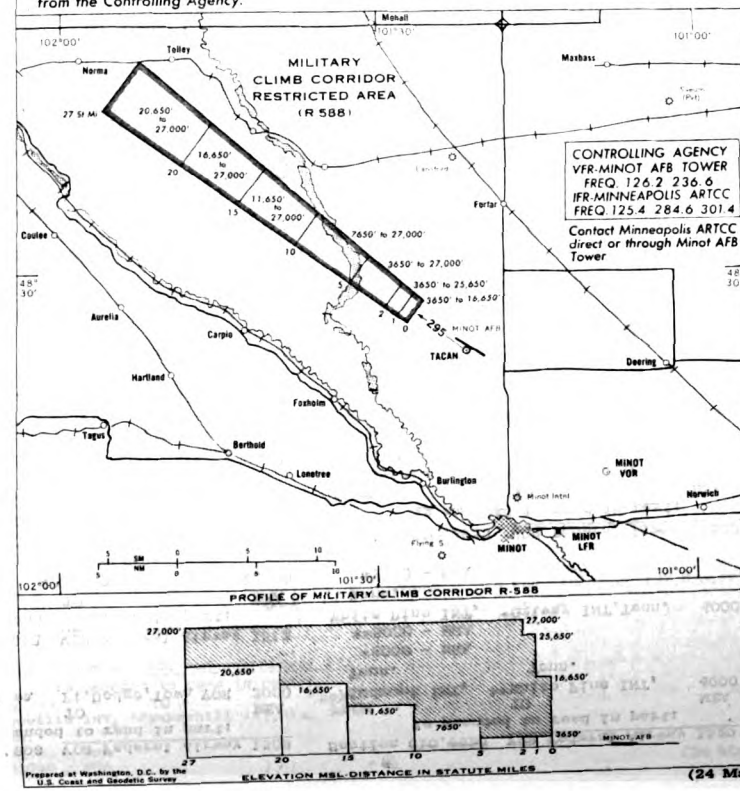
SPECIAL NOTICE



NORTH DAKOTA

MINOT (MINOT AFB)
MILITARY CLIMB CORRIDOR

EFFECTIVE 0001 E.S.T. JUNE 2, 1960

(This Special Notice will not normally be revised or reissued.)
Refer to Aeronautical Charts for current information)

Pilots of Century Series aircraft on active air defense missions are unable to see and safely avoid other aircraft during the climb phase of a scramble. In the interest of safety, the Dept. of Defense and the FAA have agreed to establish restricted corridors to segregate such operations from other air traffic. ALL FLIGHTS through these areas should obtain prior approval from the Controlling Agency.

(24 May 1960)

REVISIONS TO STANDARD INSTRUMENT APPROACH PROCEDURES

Bearings, headings, courses & radials are magnetic. Elevations & altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE RADAR

If a radar instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure authorized for such airport by the Administrator of the FAA. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the radar controller. From initial contact with radar to final authorized landing minimums, the instructions of the radar controller are mandatory except when (A) visual contact is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach. Except when the radar controller must direct otherwise prior to final approach, a missed approach shall be executed as provided below when (A) communication on final approach is lost for more than 5 seconds during a precision approach, or for more than 30 seconds during a surveillance approach; (B) directed by radar controller; (C) visual contact is not established upon descent to authorized landing minimums; or (D) if landing is not accomplished.

RADAR TERMINAL AREA MANEUVERING SECTORS AND ALTITUDES

FEDERAL AVIATION AGENCY

AIRMAN'S GUIDE

ISSUANCE: The Airman's Guide is issued every two weeks. Every issue contains a NOTAM section; every other issue additionally contains a Radar-Radio Listings section; and once every three months the Airport Directory appears in an issue containing both NOTAMS and the Radar-Radio Listings. See below for contents of these sections.

RETENTION: To enable users to know which issues should be retained, a suitable notice is carried on the front cover indicating which ones are still current.

CONTENTS: The contents (by section or other appropriate breakdown) of each issue are noted by tab and page number on the front cover. The first page of each section carries the Legend for interpreting codified information. Material usually included in each section is as follows:

(1) NOTAMS (including Special Notices): Under appropriate geographical headings (state and/or city, as applicable) there is given the current condition (if there has been a temporary or permanent change concerning which a NOTAM has been issued) of facilities and obstructions, plus any special data (including flight regulations or restrictions). Where NOTAMS cannot be associated with a specific geographical location or where the application is generalized, they are carried in a subdivision of NOTAMS entitled "Special Notices." The Special Notices section follows the NOTAMS and, like the NOTAMS, is separately listed by a tab and page number on the front cover. Important or unusual Special Notices are additionally indicated on the front cover in the box provided, giving the subject and page number where the data is to be found. Included as Special Notices are data and/or amendments concerning restricted areas, location identifiers, minimum en route altitudes, civil airways, airway structure during VOR shutdowns, control areas, control zones, reporting points, VOR check points, standard instrument approach procedures, control area/flight advisory area boundaries, civil air regulations, preferential routes, flight test areas, military maneuvers, aeronautical charts, etc. Also included are amendments and changes to the Flight Information Manual as well as to previously issued Airman's Guides.

(2) Radar-Radio Listings: Lists radar facilities, instrument landing systems, and aeronautical radio facilities with (as appropriate) their transmitting and guarded frequencies, identification, station class, range courses, other appropriate data, and remarks.

(3) Airport Directory: This codified directory provides the following data on airports: type, location (with reference to associated town or city), elevation, number of runways, length of longest runway (indicating surfacing), lighting, servicing, availability of weather reports and or Unicom, fuel octanes, and appropriate remarks.

PRICE: See information in box below.

REPORTING INFORMATION TO EDITORS: Data for inclusion in the Airman's Guide should be reported to the editors at the following address: Federal Aviation Agency, Washington 25, D. C., Attention: MS-120. Appropriate instructions for reporting data are contained in FAA's Manual ATM-2-B, entitled "Communications Procedures." However, since some airport data, unlike most other data, may not originate from official sources, the following explanatory information is provided.

The Airman's Guide covers primarily two broad fields of civil airport information: permanent data changes and temporary hazardous conditions. Permanent airport data refers to new airports or changes in field layout, servicing, lighting, restrictions or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions which make airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, thaws or construction; or merely a burned out obstruction light or a runway unusable or partially unusable because of construction.

Since the aeronautical public should be immediately advised of such hazardous conditions, reporters should utilize the FAA Flight Service Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest FAA service station for dissemination as a NOTAM and for further transmission to the editors of the Airman's Guide. If this is not feasible, the item should be reported directly to the Federal Aviation Agency, Washington 25, D. C., Attention: MS-120.

Permanent airport data changes should be reported to the appropriate FAA Regional Office for coordination before they are included in the Airman's Guide.

NOTE: The Federal Government disclaims responsibility for non-Federal air navigation facilities, including airports.

Abbreviations

The editors are now in the process of making changes in the contractions and abbreviations used in the Airman's Guide. We are doing this in order to conform to the new, standardized material contained in the FAA publication entitled CONTRACTIONS. This publication, which is dated July 1959 and issued in the ATM Manual series, is available from the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C., at 75 cents per copy.

Many of the abbreviations and contractions used in the Airman's Guide are already in conformity with the CONTRACTIONS publication. However, from among those which have changed, we have selected a few which we frequently use in the Airman's Guide. They appear in the list which follows.

adjt	adjacent	dptr	departure	jctn	junction

RADAR - RADIO LISTINGS

FSS = Flight Service Station (FAA) (Formerly ATCS)

VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES:
Category I = Course alignment and signal level are monitored continuously. Category II = (No longer in use; formerly applied to VAb). Category III = Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an FSS, and located too distant from FSS to be monitored with a VHF receiver will fall into Category III. NOTE: Category I, II, III shown by (1), (2), (3) before name in Location Column.

LEGEND

NOTE: The Federal Government disclaims responsibility for non-Federal air navigation facilities.

(A) = Air Force facility
(N) = Navy facility
(P) = Private facility
(S) = State facility
(0700-2300) = Hours of operation local time
(3) = Monitoring category
→ = New or revised data
[redacted] = Information deleted

RADIO CLASS DESIGNATIONS

Identification of VOR/VORTAC/TACAN Stations by Class: (Operational Limitations)

Class	Normally Anticipated Altitude Service	Normally Anticipated Interference-free Distance Service
H-VOR	75,000' MSL	180 smi (156.31 nmi)
M-VOR	30,000' MSL	90 smi (78.16 nmi)
L-VOR	15,000' MSL	45 smi (39.08 nmi)

AC . . . . . Approach Control Tower, FAA (transmits on voice channel or associated ranges and ILS in addition to frequencies listed
B . . . . . Scheduled Broadcast Station (broadcasts weather at 15 and 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C . . . . . Control Tower, FAA
CI . . . . . Control Tower (City, County, Private, etc.)
CM . . . . . Control Tower (Military, listing only civil frequencies available)
CONSOLAN . . . LF/MF long range navigation aid; aircraft must have BFO oscillator
D . . . . . Distantly controlled
DME . . . . . Distance Measuring Equipment
DMET . . . . . TACAN compatible DME
FM . . . . . VHF fan marker (100 watts)
GCA . . . . . Ground Controlled Approach System
H . . . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH . . . . . Non-directional radio beacon (homing), power 2000 watts or more
ILS . . . . . Instrument Landing System (voice on localizer channel)
J . . . . . L-MF (200-415 kc) voice facility on other than range frequency
LFM . . . . . VHF fan marker, low powered (5 watts)
LMM . . . . . Compass locator station when installed at middle marker site
LOM . . . . . Compass locator station when installed at outer marker site
MA . . . . . Range (adcock, vertical radiators), power less than 50 watts
MH . . . . . Non-directional radio beacon (homing) power less than 50 watts
ML . . . . . Range (loop radiators), power less than 50 watts
MM . . . . . VHF middle marker
MRA . . . . . Range (adcock, vertical radiators), power 50 watts or more, but less than 150 watts
MRL . . . . . Range (loop radiators), power 50 watts or more, but less than 150 watts
OM . . . . . VHF outer marker
RA . . . . . Range (adcock, vertical radiators), power 150 watts or more
RL . . . . . Range (loop radiators), power 150 watts or more
S . . . . . Simultaneous range, homing signal and/or voice
T . . . . . Teletype
TACAN . . . . . UHF omni-directional bearing and distance type facility
TX . . . . . Principal teletype
V . . . . . Additional VHF voice feature on other than range frequency
VOR . . . . . VHF omni-directional range (omni-range)
VORTAC . . . . . Combination of VOR and TACAN
W . . . . . Without voice facilities on range frequency
Z . . . . . VHF station location marker at a range station

NOTES

1. Range courses are magnetic in-bearings
2. All FAA MH facilities operate continuously unless cited as follows: (on req)
3. All FAA ranges operate continuously. Those which are not manned continuously are cited in the remarks column with hours of operation in parentheses, e.g., (0600-2400)
4. VHF/LMF ranges listed with the same identifier are controlled by the same FSS. Due to space limitations the DTV and communication frequencies which are listed with the LF/LMF facility are not repeated with the VOR facility.

RADAR AVAILABLE

PAR = Precision Approach Radar. ASR = Airport Surveillance Radar.
ARSR = Air Route Surveillance Radar

FAA RADAR UNITS - Operate continuously at the locations listed below. Available to all pilots, civil and military. Contact associated FAA control tower on any frequency guarded for initial instructions, or in an emergency any FAA facility for information on nearest Radar Control. Weather minimums, associated runway and GCA procedures are listed in the Airman's Guide.

RADAR APPROACH CONTROL (RAPCON) - At certain USAF locations, approach control and the ASR portion of RAPCONS is operated by the FAA and service is available to all aircraft.

RADAR AIR TRAFFIC CONTROL CENTER (RATCC) - At certain US Navy locations, approach control and the ASR portion of the RATCCS is operated by the FAA and service is available to all aircraft.

RADAR BEACONS - Secondary radar beacon ground equipment is normally associated with a surveillance radar system and is used for target reinforcement and identification of aircraft equipped with a radar beacon transponder, either military or civil. One of two types of ground equipment is now available for operation at all FAA operated RAPCON facilities, some FAA air route traffic control centers, and at all ADC long range radar facilities.

AIR TRAFFIC CONTROL RADAR BEACON SYSTEM (ATCRBS) - ATCRBS is similar to and compatible with the military coded radar beacon equipment (Mark X (SIF)). Civil Mode A is identical to military Mode 3. Civil and Military transponders will be adjusted to reply in Mode A (military Mode 3) as follows:

1. Civil turbojet aircraft transponders - reply on Code 40 at all times while in flight, unless otherwise advised.
2. Civil aircraft (other than turbojet powered) and military aircraft - reply on Code 02 when operating on IFR flight plan unless otherwise advised by ground radar facilities.
3. Civil aircraft (other than turbojet powered) and military aircraft - reply on Code 62 while operating VFR or VFR-on-top unless advised otherwise by air traffic control (ATC). Code 62 will also be used by such aircraft when operating VFR or VFR-on-top within radar advisory areas between flight levels 240 and 390, inclusive. (See ACIC En Route - High Altitude charts for radar advisory areas and procedures relating thereto.)
4. Under no circumstances shall civil aircraft operate on Code 00.
5. Civil and military transponders will be operated in "STANDBY" while taxiing for take-off and after landing, or when requested by ATC. This action is necessary to eliminate undesirable interference and clutter on certain radar displays. Therefore, departing pilots should turn transponder to "ON" as late as practicable before commencing take-off, and landing pilots should turn transponder to "STANDBY" as soon as practicable after completing landing roll.
6. Civil and military pilots, when filing a domestic IFR flight plan, shall make known the fact that their aircraft are equipped with a functioning transponder by adding the word "transponder" immediately following the aircraft identification. An aircraft with a transponder not having coding capability (Basic Mark X) will be indicated by adding the words "no code" in the "Remarks" section of the flight plan.
7. Aircraft departing from within a United States domestic control area to points outside the United States will comply with 6 above. Transponder equipped aircraft entering a United States domestic control area from outside the United States will, when making the first radio report to the United States air traffic control center, advise of availability of such equipment by adding the words "transponder" or "no code transponder," as appropriate, to its identification.

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground approaches - Precision and Surveillance.

PRECISION APPROACHES - Aircraft are guided to final approach to the designated instrument runway. The final approach glide path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway.

SURVEILLANCE or ASR APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide slope desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR, the weather minimums for a surveillance approach are usually higher than for a precision approach.

RADAR ARRIVAL AND DEPARTURE CONTROL - Radar is utilized by certain radar equipped facilities to control the flight paths of arriving or departing IFR aircraft for the purpose of expediting the flow of traffic. Aircraft operating on IFR flight plans will be afforded a minimum of three miles horizontal separation unless standard non-radar vertical, lateral or longitudinal separation exists. This should not be confused with GCA which is an instrument approach aid, NOTE: Radar arrival and departure control available all locations, unless otherwise cited.

FAA OPERATED RADAR UNITS

NOTE: Transmitting frequencies below 118 mc are not guarded; others listed plus 3023.5 kc are guarded unless otherwise shown under Remarks. Frequency 122.5 mc is guarded unless either 122.6 mc or 122.7 mc is shown. (Guarding frequencies not applicable to ARSR facilities) Emergency frequency 121.5 mc transmits and guards at all locations.

ILS localizer identifier is preceded by International Morse Code "I" (two dots). Time interval between the "I" designator and the first letter of the assigned characteristic will be 0.6 second. * -Automatic voice identification. **-Distance from markers to approach end ILS runway. NOTE: The service area of compass locators is 15 miles.
(L5) - Instrument Approach (neon) (L7) - Hi-intensity Approach Lights W - Without voice BC - Back course BC-restricted = Not suitable for approaches

SEE p. 34

V = 122.2, 126.7, 135.0, 135.9 mc transmitted. # = Guards same VHF and UHF freqs facility transmits except 122.2, 135.0, 120.7 mc. (1) = 3023.5 kc guarded. (2) = 3023.5 kc; 122.5 mc. (3) = 3023.5 kc; 122.1, 126.7, 135.9 mc. e.g. (3)-135.9 guards every frequency in group (3) except 135.9 mc. (g) = Tower equipped with 121.9 mc or (g.7) = Tower equipped with 121.7 mc for control of ground traffic. EMERGENCY FREQUENCY (121.5 mc) transmits and guards at all ATCS, Towers (FAA and Military), Centers and DF Stations; this frequency is not tabulated in the list above. * = Automatic voice identification. NOTE: FIRST FREQUENCY LISTED IS THE NAVIGATIONAL AID CHANNEL; OTHERS ARE COMMUNICATIONS CHANNELS.

** -- New or revised airport or miscellaneous data. Pilots should inscribe this information on charts and records.

* -- New or revised radio or radar data. Pilots should inscribe this information on charts and records.

NOTE: Because of space limitations, such "permanent" data will usually be cited only once. Temporary data, however, will be continuously cited until no longer in effect.

ALABAMA: ALBERTVILLE ARPT: 150' lgtd tmpry twr erected approx 1 mi SE at lat 34-16-12, long. 86-12-36. Will be dismantled about Aug 15. (3-5)

ANNISTON RADIO: About June 6, VOR will be shut down until aprx June 11- class chg to L-VOR and freq chg to 108.8 mc. (5-4)

BIRMINGHAM RADIO: Caution - E course LF rng has severe multiples. About June 13, TACAN will be shut down until aprx June 23 - eqpmt installation. (5-16)

BIRMINGHAM ARPT TOWER: About July 18, freq 126.18 mc will be chgd to 126.2 mc.

**BIRMINGHAM MUN ARPT: Due non-visibility twr unable to ctl gnd tfc on Hayes ramp. Due to comsng apch lgt system rnwy 5, ILS minimum day & ngt rnwy lowered to 200'-1/2.

ELBA ARPT: New arpt reported. Lctn: 1.5 mi W; lat 31-25, long. 86-05; No. of rnwys: 2; Lngst rnwy & facils: h30-B*L4; Rmks: Unattended. Trees E. (4-7)

GADSDEN ARPT: 150' unlgtd tmpry twr erected approx 7 mi NE at lat 34-04-00, long. 86-01-31. Will be dismantled about Aug 15. (3-5)

MOBILE RADIO: VOR radials 018° clocksise thru 028° unusable. (4-29) DMET operg test basis; channel 80. (7-10)

MOBILE, BATES FLD TOWER: About July 18, freq 126.18 mc will be chgd to 126.2 mc.

MOBILE-BROOKLEY AFB RADIO: USAF VOR radials 212° thru 222° clockwise unusable - acct severe scalloping. (7-10)

MOBILE-BROOKLEY AFB RADAR APPROACH CONTROL: About July 18, freq 126.18 mc will be chgd to 126.2 mc. (4-25)

MOBILE, BROOKLEY AFB SPECIAL NOTICE: Due to concentrated opern of hi-performance jet acft, all tfc other than that for Brookley, should remain clear of the Brookley Ctl Zone during VFR flgt below 2700', unless otherwise cleared by the Brookley Ctl Twr. (1-12)

MONTGOMERY SPECIAL NOTICE: Due to extsv jet tfc, all acft are cautioned to maintain cont rdo ctc with appropriate ctl twr when operg in Danelly Fld or Maxwell AFB ctl zone.

MUSCLE SHOALS RADIO: DMET operg test basis; channel 112. (5-5)

ST. ELMO ARPT: 250'(258'MSL) lgtd tmpry twr being erected 24 nmi ESE(132°T) at lat 30-13-54, long. 87-55-41. (4-18)

TUSCALOOSA RADIO: DMET operg test basis; channel 82. (7-1)

TUSCUMBIA, TRI CITIES ARPT: 503'(962'MSL) lgtd stack being erected 6.5 nmi W (282°T) at lat 34-44-35, long. 87-50-58. (12-10)

TUSKEGEE RADIO: DMET operg on test basis; channel 120. (11-15)

WETUMPKA, ELMORE FLD: E/W rnwy clsd, paving.

ARIZONA: BENSON SPECIAL NOTICE: Pilots cautioned to avoid flying over or near Apache Power Co., nitro-glycerin plant approx 4 mi SSW of St. David because of potential explosion hazard. (11-6)

BUCKEYE RADIO: About Aug 8, VOR/DME will be shut down until aprx Aug 23 - reconstr and freq chgs: 110.6 mc/ channel 62.

CLIFTON, GREENLEE COUNTY ARPT: N/S rnwy useable with caution, weeds. (5-4)

COCHISE RADIO: DMET operg on test basis; channel 41. (10-11)

DRAKE RADIO: About June 27, VOR will be shut down - freq chg to 110.4 mc. & class to L-VORW. Following route structure and MEAs will be in efct: Unusable Awys: V12-1518 EED-INW; V291 DRK-Canyon Int.; V12S PRC-INW. Unusable Reporting Points: Canyon, Cornville, Mt. Hope, Perkins, and Sheridan Ints. Usable Awys: (Tmpry redesignated with published MEA's and MCA's unless otherwise indicated.) V257 PRC-BCE via PRC 348° radial & BCE 168° radial; MEA PRC-Floyd Int. 11,000' N, 10,000'S; V105E PRC-PGS via PRC 359° radial and PGS 113° radial; PRC-Drake Int. 13,000'N, 8000S MCA PRC 12,000'N Drake Int-PGS 13,000' MEA. V12S-1520 EED-PRC MEA 10,000'; V62-1520 PRC Clints Well Int. 12,000' MEA; V105 PRC-Hackberry Int. 11,000'; V95 Clints Well Int-INW. 12,000'S, 9000' N MEA. Usable Reporting Points: Anita Int. - PRC 348° radial & TBC 241° radial; Clints Well Int. - PRC 080° radial & INW 210° radial; Drake Int, -PRC 359° radial; & PGS 113° radial; Floyd Int. -PRC 348° radials & PGS 081° radial.

GILA BEND RADIO: DMET operg test basis; channel 113. (1-27)

GILA BEND ARPT: New arpt reported. Lctd 2.0 SE. 2 rnwys, longest rnwy & facils 40-S5. Fuel: F3.

**MARICOPA SPECIAL NOTICE: CAUTION - DO NOT MISTAKE FOR LNDG AREA: Space Surveillance Stn at lat 33-06-31, long. 112-01-46 4 mi N Maricopa. 1200' W and parallel to hwy. Site is strip 300' x 1800' with paved portion lengthwise thru cntr 100' in width and studded with 6' steel posts. This permanent hazard lctd 22 nmi S Phoenix-Sky Harbor Arpt. (12-12)

PHOENIX SPECIAL NOTICE: Hi Density Jet Tfc: Pilots on other than IFR clearance should either aovid or use extreme caution when traversing the following areas within which Luke AFB hi-density tfc is operg. Normal trng hrs are from 0600-1800 MST Mon thru Fri. Hi-density tfc will be operg VFR on R83, V94, V66 and R9 within a 10 mi radius of the Gila Bend VOR & btn the Gila Bend VOR & a point 52 nmi W on R9 and V66 at alts below 2000' and at 5000', 6000', 7000', 15,000', 16,000' and above 25,000' MSL. On R83 and V94 btn a point 10 nmi S of the Hassayampa VOR & the Gila Bend VOR at & below 4000' MSL & 25,000' and above. All provisions of Special Air Regulation #421 apply within the following area: G5 & V16 W of Phoenix btn 112° - 10'W and 112°-35'W. (6-1)

**PHOENIX, AIRHAVEN: Reopened to all tfc. Caution rnwy ruf, soft spots. (6-3)

PHOENIX, DEER VALLEY ARPT: 5000' extension E end E/W rnwy clsd. (5-5)

PRESCOTT RADIO: May 19, TACAN shut down until aprx June 19 - reconstr. (5-19)

SCOTTSDALE, THUNDERBIRD ACADEMY ARPT: N/S & NW/SE rnwys clsd. (4-7)

TUCSON SPECIAL NOTICE: High Density Jet Traffic: Pilots on other than IFR clearance should either avoid or use extreme caution when traversing the following area at an alt above 19,000' MSL. Hi-Density jet tfc operg at and above 20,000' MSL within the area from Douglas VOR to Cochise VOR to the Cortaro Int. to the Robles Int. to the Kinsley Int. to the Douglas VOR. Hrs of opern cont daily. (6-4)

TUCSON RADIO: VORTAC unusable beyond 25 mi, 320° clockwise thru 080° at MOCA.

**TUCSON, DOWNTOWN ARPT: Delete; private fld. (5-4)

TUCSON ARPT SPECIAL NOTICE: Target towing by jet acft during dalgt hrs under VFR conditions on wk-ends and intermittently thru week on a direct route from Ajo, Ariz. descending from 20,000' so as to reach 5500' prior to joining ctl area vcnty San Pedro, Ariz thence direct to San Xavier mission, thence direct to Tucson arpt. Ctc Tucson rdo or ctl twr for info concerning towing activity. (2-10)

TUCSON MUN ARPT: 6' obstacle exists on jet arresting barriers at the ends of rnwy 12 & 30.

WINSLOW RADIO: TACAN operg on test basis; channel 81. About June 15, VORTAC will be comsnd. TACAN channel 81. Class: M-BVORTAC. About July 11, VORTAC and DME will be shut down until aprx July 26, freq chg of VOR to 110.0 mc; TACAN channel to 37 and DME channel to 20. (5-13)

WINSLOW MUNICIPAL ARPT: Rnwy 17-35 open days. (4-26)

YUMA-MCAAS/YUMA CO. ARPT: Rnwy 17-35 clsd, use as txwy only. Rnwy 3R-21L clsd. Hi-density jet tfc vcnty of arpt. Hvy constr in progress apch end of rnwy 21R lctd at int rnwys 21R and 17-35. 11,000' of rnwy 3L-21R usable. Caution on txwys. Navy chain type arresting gear lctd 9200' from apch end of rnwy 21R and 11,000' from apch end of 3L. Lgts on rnwy 3L-21R only. Tetrahedron uncontrollable not to be used as rnwy-in-use indicator.

ARKANSAS: BENTON, SALINE CO. ARPT: Rnwy lgts and unicom inop. No fuel avbl. (2-23)

BRINKLEY, FEDERER MEMORIAL ARPT: Closed for construction. (5-16)

EL DORADO RADIO: DMET operg test basis; channel 111. VOR 034° radial rough & scalloping above 10,000'; Hampton Int on V1522 formed by El Dorado 034° and Texarkana VORTAC unusable above 10,000'. About June 30, VOR will be shut down until aprx July 5 freq chgs: VOR to 108.2 mc/ TACAN channel to 19. (5-26)

FAYETTEVILLE RADIO: DMET operg on test basis; channel 96.

FAYETTEVILLE, DRAKE ARPT: Constr work in progress on txwy and ramps, N/S txwy W side hard surface rnwy; use hard surface rnwy only; open trenches within 50' both ends hard surface rnwy. (5-10)

[redacted]: FORREST CITY, HUTCHERSON FLYING SERVICE: New arpt reported, lctd 3.0 S; one 3000' N/S hard surfaced rnwy, elev: 248', rnwy lgts, green & white rotg bcn. 80 & 100 oct fuel avbl. UNICOM 122.8 mc. (2-16)
FT SMITH RADIO: About June 22, TACAN will be shut down until aprx July 1-eqpmt installation. (5-12)
FT SMITH MUN ARPT TOWER: About July 18, freq 126.18 mc will be chgd to 126.2 mc.
FT.SMITH MUN ARPT: 140'AGL(685'AMSL) lgtd oil drilling derrick being erected 9015' E of apch end and 2210' S of the cntrline extended of rnwy 25. (5-30)
LITTLE ROCK, ADAMS FLD-TOWER: About July 18, freq 126.18 mc will be chgd to 126.2 mc. (5-4)

MARIANNA ARPT: New arpt reported. Lctd 1.0 mi W; elev: 240'; one sod rnwy -2600'; storage; minor A & P rprs; 80 oct fuel avbl. (3-24)
NORTH LITTLE ROCK MUN ARPT: Clsd, constr. (5-20)
PINE BLUFF, GRIDER ARPT: Rnwy end identification lgt system decmsnd-modification.
TEXARKANA RADIO: TACAN operg on test basis; channel 118. (9-15)
TEXARKANA MUN ARPT SPECIAL NOTICE: Daily demolition activity, lctd approximately 18 mi W, Mon thru Fri from 1200 CST to 1330 CST and 1500 CST to 1615 CST. Shrapnel and shock waves up to 3,000'. (6-2)
TEXARKANA ARPT: Men & eqpmt on fld; flagmen stationed where vehicles cross rnwys.
CALIFORNIA: AGNEW RADIO: VOR MRA V110 between Mission and Livermore Ints increased to 6000'-acct scalloping. (4-9)

Arriving VFR acft should enter the 25 mi radius at 3000' or below to avoid jet acft. (3-30)

**RICHMOND, BYRD FLD SPECIAL NOTICE: Enter rgt tfc patn for rnwy 6, 20 and 33 with left for 2, 15 and 24 unless excpn authorized by RIC twr. Hvy and or fast acft enter tfc patn at 1500', lgt and/or slow at 800'. For noise abatement DC3 and large acft make base leg at least 2 mi from apch end of rnwy unless otherwise directed by RIC twr. (4-26)

RICHMOND, BYRD FLD: Visual mrkgs for clockwise flow of tfc inop. Follow cntrline all txwys; overrun area rnwy 6-24 clsd. (4-26) Sequence flashing lgt system comsnd operg in conjunction with the existing configuration A apch lgt system on rnwy 6; consists of 25 units at 100' intervals starting at apch end of system. (5-9)

ROANOKE RADIO: Stn passage on G5 & R37 must be identified by ADF reversal and /or cone of silence acct close proximity Cloverdale LFM & ROA LFR Z mrkr. (1-15)

SOUTH BOSTON RADIO: DMET operg test basis; channel 41. (2-12)

**TAPPAHANNOCK FLGT STRIP: Clsd; lndg not permitted; dangerous overhead electrical wires across former flt strip. (6-1)

WINCHESTER MUN ARPT: Aprx 1800' x 100' grade: strip on the SE end of rnwy 13-31 usable. Rnwy 2-20 clsd, mrkd with white X. Caution after hvy rain, usable area mrkd with white mrkgs. (4-26)

[redacted]: SPECIAL NOTICE: Constr of power line began from the Tamany sub-stn, 5 mi E of Lewiston, Nex Perce Co. Arpt to above Imnaha, Ore. This line runs via Waha, crosses Eagle Creek, China Creek, Wapshila Creek, Birch Creek, the Salmon Riv, the Snake Riv, and the Imnaha Riv. The line hgts above the canyon floors vary from below 100' to above 3500' MSL. The spans crossing these waters and canyons are as follows: Eagle Creek span 1965' long*; China Creek span 1720' long*; Wapshila Creek span-1225' long; Birch Creek span 1930' long; Salmon Riv span-2055' long*; Snake Riv span 3746' long; Imnaha Riv span 3678' long. *(Marked by 20-inch luminous balls). There are two 5/16 inch diameter high-strength steel strand static cables on the top and three 11/8 inch diameter aluminum power cables sagging below. The static cables will not sag as much as the heavier power cables. (4-27)

BELLEVUE AIRFLD: S 200' rnwy 2-20 clsd lndgs; men, eqpmt working S end of rnwy.

BELLINGHAM RADIO: VOR 281° radial beyond tolerance 13 nmi at 1500' MSL. (9-29)

DEER PARK MUN ARPT: Closed.

EPHRATA AREA SPECIAL NOTICE: Exercise extreme caution while operg in vcnty of the Ephrata VOR due to jet dptrs on 315° heading from Larson AFB & climbing N of awys G2 & V2N. Normally such dptrs maintain 5000' MSL or below until clear of awy structure; however, under VFR conditions higher alts may be used. Larson Apch Ctl operg on 118.1 mc for civil tfc. Apch Ctl also guards 122.5 mc. VFR radar advisory svc available. (10-15)

WASHINGTON: NEAH BAY RADIO: About June 13, LF rng will be shut down until aprx June 17- twr modernization. (5-12)
OLYMPIA RADIO: DMET operg test basis; channel 19. (11-24) Auto voice ident inop. (2-19)
SEATTLE RADIO: LF rng NW course has splits and multiples beyond 20 mi. (10-26) About June 20, LF rng will be shut down until aprx June 24-twr modernization. (5-10) Durg this period, LF rng will oper as H facil on freq 260 kc; voice & ident SEA. (5-31)
SEATTLE AIR ROUTE TRAFFIC CONTROL CENTER: Apr 4, ARSR and IFF bcn unavbl.
SEATTLE, BOEING FLD: All dalgt VFR operns of single-eng acft confined to rnwy 12-30 (short rnwy) E of rnwy 13-31. Tfc patn E of arpt at 1000'. If equipped with retractable lndg gear, drop gear prior to entering tfc patn. Avoid flying over rnwy 13-31 and apchs thereto. All turns when taxiing off rnwy 12-30 made toward trml (E). Multi-eng and jet acft use rnwy 13-31. Multi-eng acft tfc patn W of arpt, 1500'. Jet acft tfc patn W of arpt, 2500'. Be on look out and use caution for multi-eng and jet transports arriving and departing nearby Seattle-Tacoma Intl Arpt and Renton Arpt. Due non-visibility twr unable to ctl tfc on parking apron No. 4 and W of blast fence in front of Boeing Flt Cntr. No turning off acft on asphaltic concrete area btn txwy A-3 and A-4 rnwy 13-31. (5-14) Req first 500' rnwy 13 and 31 not to be used for tkof, due to extreme soil erosion and dust problem caused by prop wash and jet blasts. (7-17)
SEATTLE-TACOMA INTL ARPT TOWER: About June 21, freq 118.5 mc will be chgd to 123.6 mc. (5-27)
SEATTLE, TACOMA INTL ARPT: All acft preparing to tkof rnwy 16 rqrd to conduct runup at least 1000' S of northerly runup apron whenever practical & compatible with safe opern.
SPOKANE RADIO: Rcvr 3023.5 kc intermittently inop due severe lcl interference. (3-20)
SPOKANE AIR ROUTE TRAFFIC CONTROL CENTER: ARSR svc unavbl V2 Rockford Int. to Mullan Pass and V2N Hayden Lake Int. to Mullan Pass. (4-19)
★SPOKANE-FAIRCHILD AFB RADAR APPROACH CONTROL: Efct June 7, freq 262.5 mc chgd to 295.6 mc (on req). Too late for ANRA page.
SPOKANE, FELTS FLD: Men, eqpmt on fld days. (5-18)
**SPOKANE-INTL ARPT: Formerly carried Spokane, Geiger Fld. SW txwy btn rnwy 3 & 7 clsd.
TACOMA-McCHORD AFB-SPECIAL NOTICE: Caution-hvy jet tfc in vcnty, from surface to 25,000'. (9-18)
WEST VIRGINIA: BECKLEY RADIO: Voice reception at Charleston FSS unreliable below 7500' MSL, 40 nmi Beckley VOR from 30° clockwise to 180°. Reception satisfactory with acft over VOR at MEA. (4-12)
CHARLESTON RADIO: LF rng usable only as H facil, with voice. (11-23) June 4, TACAN shut down until aprx July 3-station modernization. (6-4)
CHARLESTON, KANAWHA CO ARPT TOWER: ILS glide slope unusable from MM to touchdown. (5-24) June 7, ILS lclzr and glide slope shutdown until aprx June 15-modernization.
CHARLESTON, KANAWHA CO ARPT: Narrow beam taxiway B mrkd by metal pipe and flags, clsd to airline acft from SE end of rnwy 32 to E side county ramp. Apch lgtg consists of 5 left-hand red neon bars at 100' intervals starting 170' from end of rnwy 23. ANG facils & svcg avbl only 1300-2100Z Tue thru Sat, clsd Sun & Mon; no tie down or overnight parking. (5-3)
CLARKSBURG, BENEDUM ARPT: Rnwy 16-34 open all lgt acft, including Twin Beechcraft; clsd all other acft. (4-15)
ELKINS MUN ARPT: Rnwy 4-22 clsd ngts, rnwy lgts inop; use rnwy 13-31 with caution, lgts poor. (8-31)
MARTINSBURG RADIO: VOR has occasional rapid course deflections of short duration. About July 1, rcvr 3023.5 kc will oper on req. (5-13)
MARTINSBURG MUN ARPT: 3 inch lip on concrete threshold lgt bases, both ends rnwys 17-35. (6-1)
PARKERSBURG RADIO: TACAN test operns tmpry inop.
PARKERSBURG, WOOD COUNTY ARPT: Caution, constr N end of apch to rnwy 21, area mrkd, flagged days; red lgts ngt. Txwy parallel to rnwy 3-21 clsd.
WISCONSIN: GREEN BAY RADIO: About June 13, TACAN will be shut down until aprx July 25- modernization. (5-19)
GREEN BAY, AUSTIN STRAUBEL ARPT: Apch lcts on req until further notice.
LA CROSSE SPECIAL NOTICE: Effective immediately TerVOR-36, Amdt. 2 dated 11/1/58 straight-in day and ngt mins raised to 500-1 for all types of acft. (5-18)
LA CROSSE RADIO: Multiples all courses LF rng usable, excp rgt side separation. (3-25) VOR has courses out of tolerance at MEA due roughness. Usable distance lmtd 30° clockwise thru 60° and 120°-145° 20 mi, all other azimuths 25 mi. (5-16)

WISCONSIN: LONE ROCK RADIO: DMET operg test basis; channel 83.
MADISON, TRUAX FLD TOWER: ILS momentary erratic lclzr course indications may be observed prior intercepting front course on transitions from E. Tsmtr & rcvr 305.4 mc tmpry decmsnd; apch ctl freq 323.8 mc implemented. (7-24) About July 12, freq 126.18 mc will be changed to 126.2 mc. (4-26)
MADISON, TRUAX FLD: Constr of arresting barriers in overrun areas of rnwys 18 and 36 during dalgt hrs, flares at ngt. (5-18)
MILWAUKEE RADIO: TACAN operg test basis; channel 111. (7-27)
MILWAUKEE, GENERAL MITCHELL FLD TOWER: VHF/DF coverage 3500' at 40 nmi all azimuths. ILS MM/LMM shut down-relctn. (9-11) About July 12, freq 126.18 mc will be chgd to 126.2 mc. (4-26) About June 29, dptr ctl freq 124.10 mc will be chgd to 125.50 mc.
MILWAUKEE, GENERAL MITCHELL FLD: Rnwys 13-31 and 7L-25R clsd to jet acft. 4150' rnwy 7L-25R open days only, SW 650' unusable, mrkd. Neon apch lgts inop. Obstn unlgtd p-line 2400' S of rnwy 1-19 extends 60' above rnwy level. New centerline txwy open from trml ramp to E end of fld. S 400' rnwy 1-19 clsd lndgs. Threshold lgts moved 400' N of S end of rnwy 1-19. Glide path touchdown point 2000' N of threshold lgts on rnwy 1. 1420' excavated area S of rnwy 1-19 day mrkd. (12-30)
OSHKOSH RADIO: VOR unusable at Pine Grove Int. above 15,000' MSL & at Nero Int above 14,000' MSL due interference. (1-20)
WAUKESHA COUNTY ARPT: NE SW rnwy clsd; sod removal in progress for leveling rnwy. (5-16) Model Acft radio controlled meet will be held July 16 & 17; E/W rnwy will be closed dalgt hrs of the contest; acft equipped with 122.8 mc rdo freq call for landing conditions on turf rnwy, other acft land at own responsibility. (5-27)
WAUSAU RADIO: June 6, VOR/DME shut down until aprx June 27- freq change to 111.6 mc. (6-6) See page 74 for substitute route structure & MEAs durg shutdown. (6-6)
WOODRUFF, LAKELAND MUN ARPT: N/S rnwy closed, constr. (10-26)
WYOMING: BOYSEN RESERVOIR RADIO: Soon, VOR voice will be discontd. (6-2) About June 8, voice ctl & montrg of 122.1 mc will be provided from Worland FSS. (5-20) About June 23, TACAN will be shut down until aprx July 23-reconstr. (5-12) VORTAC will be shutdown until aprx June 8. (6-2)
**CASPER-SPECIAL NOTICE: Civil jet trng being conducted periodically seven days/week during dalgt hours within the uncontrolled airspace bounded on the N by V-26 between Ross Int and RAP, V-89 between RAP and CDR, V-182 between CDR and DGW, V-247 between DGW and the Ross Int at alts 10,000' to 23,000' MSL inclusive. All acft contemplating VFR flt thru this area are advised to monitor one of the following FSS: Casper, Wyo; Chadron, Nebr; Rapid City, S.D. During training periods, these stations will include an advisory message at the end of each weather broadcast. (10-26)
CASPER RADIO: TACAN operating test basis; channel 109. Soon, VORTAC will be comsnd. TACAN channel 109. Class: H-BVORTAC. (5-5)
★CASPER AIR TERMINAL TOWER: ILS glide slope has moderate to severe path roughness above 7300' and beyond 6 nmi. Not to be used for auto pilot apchs. (12-5) ILS lclzr course width adjusted to 4°. (6-2)
CHEYENNE RADIO: May 17, VOR shut down until approximately May 31-reconstruction. During this period, following route structure and MEA will be in effect: Unusable Airways: V19 DEN-Wheatland Int.; V19E DGW-CYS; V89 DEN-CDR; V89E CYS-BFF; V138 RKR-SNY; V138S CYS-SNY; V138N RKR-CYS. Unusable Reporting Points: Tie siding, Buford, Egbert, Pine Bluff, Carpenter, Bear Creek, Nunn, Silver Crown, Millbrook, Meadows, Albin and New Raymer. Usable Airways: (Temporary redesignated as follows with published MEAs and MCAs unless otherwise indicated): V4N GLL-LAR, 11,000'; V207 GLL-BFF, 7500'; V89E GLL-CYS via GLL VOR R327° brg to CYS LF rng, 9000'; V118 LAR-CYS via LAR VOR R090° & 090° bearing to CYS LF rng, 11,000'; V132 AKO-CYS via AKO VOR R295° & 295° brng to CYS LF rng, 7300'. Reporting Points: Ft. Morgan-Colo. - DEN R070° and AKO R295°, MRA 8000'. (5-16)
CHEYENNE MUN ARPT: Ramp area N and NE of hangars on N side of airport and ramp area within 100' radius of tower structure uncontrolled, not visible from tower. Caution, vicinity of field due to military jet aircraft operations and practice instrument approaches during hours 0700-2200 MST. Tower controlled jet arresting barrier in operation runways 8 and 26. (12-19)
CODY MUN ARPT: Rnwy 9-27 closed. (8-30)
DOUGLAS RADIO: DMET operg on test basis; channel 23. (3-18)

WYOMING: DUNOIR RADIO: DMFT operg on test basis; channel 81. (4-17) Soon, VOR voice ctl will be provided from Worland FSS. (6-2)

EVANSTON ARPT: New arpt reported, 5 mi NNW; elev: 6600'; one dirt strip, N/S 2800' in length, soft when wet. (3-2)

LARAMIE RADIO: About July 1, freq 3023.5 kc will oper on req. (6-13)

ROCK SPRINGS RADIO: ILS glide slope has light to moderate roughness between OM and LF rng. About June 13, TACAN will be shut down until aprx July 13 - reconstr. Durg this period, following route structure & MEAs in efct: Unusable Awys: V6N FBR-CKW; V4 MLD-CKW; V4N and V6N RKS-CKW; V187 RKS-Yampa Int; J32 V, J84V SLC-RKS; J84V RKS-BFF. Unusable Reporting Points: Superior, South Pass, Sweetwater, Green River, Hiway, Dinosaur and Yampa. Usable Awys: V6 between FBR and CKW with an MEA of 11,000'. (5-13) About June 27, VOR will be shut down until aprx July 8 - reconstr. (6-3)

ROCK SPRINGS MUN ARPT: Rnwy 3-21, 200' SW end clsd, flagged, unlgtd; rnwy 7-25, 800' W end from threshold lgts and 500' from W end of hard surface clsd, unflagged, due to 6' unlgtd FAA detector obstn 50' inside of threshold lgts on W end of rnwy 7-25, to permit 40 to 1 safety glide margin; full length avbl for tkof. Present usable length rnwy 3-21 is 5013' and rnwy 7-25, 6188'. (6-3)

★SHERIDAN RADIO: May 27, VORTAC comsnd. TACAN channel 100. Class: H-BVORTAC. Too late for ANRA page. Coverage as follows at MEA: 270° clockwise to 140°, 40 nmi; 140° clockwise to 270°, 20 nmi. (5-27)

★WORLAND RADIO: June 1, FSS comsnd. Freqs tsmtg & rcvg: 121.5, 126.7, 135.9, 243.0, 255.4 mc. Tsmtg: 120.7, 122.2, 135.0 mc; rcvg 122.1 mc. Soon, freq 272.7 mc will be comsnd.

PUERTO RICO: SAN JUAN, ISLA GRANDE ARPT SPECIAL NOTICE: Effective 0400Z July 1, 1960 altimeter setting procedures within 100 nmi; are revised as follows: A QNH altimeter setting and a system of alts shall be used below 24,000' MSL. At and above 24,000' the standard altimeter setting of 29.92 inches/1013.2 millibars/and a system of flt levels shall be used. (5-17)

SAN JUAN-ISLA GRANDE ARPT TOWER: About July 18, freq 126.18 mc will be chgd to 126.2 mc. May 13, twr tmpry relctd on NW corner of old trml bldg - renovation of twr structure.

SAN JUAN, ISLA GRANDE ARPT: Tmpry twr lctd on NW corner of old trml bldg, due non-visibility tmpry twr unable to observe tfc on S portion CG Navy ramp, extreme E end rnwy 9, apch area rnwy 27. 174' metal bldg lctd aprx 1000' SE of threshold rnwy 27, lgtd ngts by two steady red lgts. (5-13)

SAN JUAN, PUERTO RICO INTL ARPT: Access txwy to ANG parking apron lgtd; ditch at W side of ANG access txwy; use extreme caution while taxiing day and ngt. Transient facils avbl 1130-2000Z Mon-Fri but no parking space avbl. Caution, unlgtd perm jet blast fence 8' high 20' long erected 10' W of W side of txwy to ANG ramp. Hi-intensity rnwy end identifier lgts lctd aprx 30' each side of apch end rnwy 7 comsnd. Men, eqpmt working vcnty of apch end rnwy 25; 20' derricks erected, area obstn lgts. Due to extsn of eastern end rnwy & txwy, 39' lgtd dredge eqpmt operg 600' from end of rnwy, top of dredge 32.5' above rnwy at mean high water. (5-25)

SAN JUAN-RAMEY AFB RADIO: Soon, CM twr tsmtg freq 278 kc and rcvr 3023.5 kc will be decmsnd. (8-10)

VIRGIN ISLANDS: ST. CROIX, CHRISTIANSTED HAMILTON ARPT: Caution, acft making rgt hand turn after tkofs to E. Men, eqpmt on E end of rnwy where 1200' extsn under constr; rnwy lgts E end tmpry lctd with exposed electric cables across E end on surface of rnwy. No runoff area avbl on E end.

ST THOMAS, CHARLOTTE AMALIE, TRUMAN RADIO: No coverage possible from N & E quads all VHF and UHF voice air, gnd channels - due terrain. (3-10)

G - Guards

FILE FLIGHT PLANS BEFORE TAKE-OFF: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communs channels. These channels should be reserved for essential in-flight communs. All pilots will benefit by following this practice.

EN ROUTE OPERATIONS: Pilots are urged to follow IFR procedures even when operating VFR. See page 52, item 9 and page 73 - Position Reporting, in the Flight Information Manual, Volume 13, dated December 1959.
Check in regularly with FAA Flight Service Stations. The life that might be saved could be your own.

CLOSING OF VFR FLIGHT PLANS: Pilots are urged to file VFR arrival reports with a Flgt Serv Station whenever it is practical to do so. This procedure is necessary in order to reduce congestion on control tower communs channels. All pilots will benefit by following this practice.

Failure to close a flight plan may result in a civil penalty because it is a violation of the Civil Air Regulations. More important, needless expense and trouble involved in unnecessary search and rescue missions can be avoided by the proper closing of flight plans.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

RADIO INTERFERENCE(General): You can do your part toward reducing radio interference to aeronautical services from non-aeronautical sources which may be noted during flight if such is reported promptly to a FAA facility (preferably after landing) or to any FCC field office. Reports should state the frequency or channel affected, description of the interference, and the geographical area where the interference was observed. If known, reports should give the apparent cause of the interference such as radio stations, call letters when such can be identified, industrial plants, diathermy machines, power lines, television receivers, etc. Do not report interference caused by normal frequency congestion, i.e., signals from other aircraft using the frequency."

IDENTIFICATION OF AIRCRAFT: Pilots are requested to exercise care that the identification of their aircraft is clearly transmitted in each contact with an ATC facility. Also, pilots should be certain that their aircraft are clearly identified in ATC transmissions before taking action on an ATC clearance. Garbled aircraft identifications in radiotelephone transmissions should never be taken for granted but should always be checked.

FLYING BENEATH AIRSHIPS: All airships operating in the Atlantic Ocean area have the capability of either towing sonar or picking up sea water as ballast. Either operation creates an invisible hazard to other aircraft in that a wire cable extends from the airship to the water in both cases. Therefore, other aircraft should remain well clear of all airships and should not, under any circumstances, fly beneath them when over water

CIVIL USE OF MILITARY FIELDS: U.S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission; Army Air Fields are open to civil aircraft on authorization of the Air Field Commander.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Directorate of Operations DCS/O, Hqs USAF, Washington 25, D.C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Office of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

(7 June 1960)

WASHINGTON, D. C. AREA-SPECIAL NOTICE: Aircraft operating VFR be alert for all types of tfc from Washington Nat'l Arpt, Bolling AFB, Anacostia NAS, Andrews AFB, Hyde Field and Washington - Virginia Airport. Suggested arrival and departure routes are issued as a guide for all acft operg VFR to maintain a safe, orderly flow of air tfc in the Washington, D.C. area. WASHINGTON NATIONAL ARPT: Northwest: Arrivals proceed well right of Potomac River until Cabin John. Departures proceed well right of Potomac River until past Herndon FM. West: Arrivals proceed well right of U.S. Route 29 until past Falls Church. Departures proceed well right of U.S. Route 29 until past Centerville. Southwest: Arrivals proceed on the right side of Potomac River until past Mount Vernon, then via the river to the Washington Range. Departures proceed well right of Potomac River until past Occoquan River. Southeast: Arrivals proceed via Charlotte Hall-Waldorf-Fort Washington. Departures proceed via Fort Washington-La Plata. Caution: Jet Penetration Route 187° radial of Andrews VOR crossing Andrews LFR at 1500'. East: Arrivals proceed from Shadyside via Andrews LFR to Fort Washington, avoid Andrews AFB Ctl Zone. Caution: Jet departures from Andrews AFB make their climb out on the 060° radial of the Andrews VOR. Northeast: Arrivals proceed well right of the Washington-Baltimore Parkway until past Beltsville, then NW of the city to Chain bridge. Departures proceed well right of the Washington-Baltimore Parkway until past Beltsville Airport. All acft flying in VFR conditions departing or arriving Washington National are requested to remain well clear of the Andrews AFB Ctl Zone, Bolling AFB and the Anacostia NAS VFR Corridors. ANACOSTIA/BOLLING AIRPORTS: VFR air tfc operg to and from Anacostia and Bolling AFB shall proceed to and from the local tfc patterns via established air corridors. North Corridor: Two miles wide extending from the Anacostia N boundary along the SE bank of the Anacostia River to a point on the E bank abeam of the Riverdale Rdo Bcn. Departures from both fields proceed via the corridor at 1500' MSL. Arrival tfc from N and NE enter the corridor E of the Anacostia River and abeam of the Riverdale Rdo Bcn at 2000' MSL. South Corridor: Two miles wide aligned along a 165/345° magnetic track from the Bolling Rdo Bcn to a point 1-1/2 miles E of Fort Washington Inlet. Departures will proceed at 1500' MSL until past Fort Washington. Arrivals will maintain 2000' MSL. Military pilots are requested not to exceed 160 knots IAS, while in the corridors. (9-9)

JET ACROBATIC AREAS - VICINITY WASHINGTON, D. C. - Acrobatic maneuvers by jet aircraft are conducted daily, VFR daylight hours only, between the altitudes of 10,000' and 20,000' MSL inclusive, within the following areas:

Area #1: The uncontrolled portion of that airspace which is bounded on the N by V-174; on the E and SE by B-47 and V-140; and on the S by V-156.

Area #2: The uncontrolled portion of that airspace which is bounded on the N by V-156; on the E by V-140; on the S by V-290; and on the W by V-103.

REGULATIONS OF THE ADMINISTRATOR PART 570: Rules of Washington National Airport-"570.49"-No pilots other than those possessed of at least a private pilot rating or the equivalent shall operate aircraft on the airport."

SIMULTANEOUS VOICE TRANSMISSIONS FROM A SINGLE LOCATION: At several FAA facilities, simultaneous voice transmissions are made from a single location. For example, the New York FSS controls the transmitters at Idlewild, La Guardia, Newark, Colts Neck, Solberg and Wilton L/MF or VOR facilities.

To provide a uniformly brief announcement, generally for broadcast purposes, the name of the controlling facility, followed by the word AREA will be used, e.g., THIS IS NEW YORK AREA RADIO, etc.

Call from aircraft will be answered using the name of the station as stated by the pilot, e.g., a pilot calling "Newark Radio" will be answered by the New York FSS, "THIS IS NEWARK RADIO, etc."

The word "AREA" signifies that the transmission from the named (controlling) location is emanating simultaneously from one or more remotely controlled facilities, having a different name or names, as indicated in the ANRA Section of the AIRGI and/or applicable RF Charts.

A NOTAM will be issued from those facilities affected by the foregoing when the change to this procedure is made.

PENETRATION OF RESTRICTED AREAS: Unauthorized flight is not permitted within a Restricted Area during the time of use and between the altitudes noted in the tabulation on the back of Sectional Aeronautical Charts issued by the U.S. Coast and Geodetic Survey or in the Flight Information Manual. Application for flight authorization should be made to the controlling agency.

"SHUT DOWN" OR "UNUSABLE" NAVIGATIONAL FACILITIES: Navigational Facilities which are notamed as being "shut down," or radials of a VOR notamed as "unusable" should not be utilized for navigational purposes. Pilots planning IFR flights should check all available information during pre-flight planning to ensure their proposed flight plan will not require use of facilities during the period of "shut down," as Air Traffic Control will be unable to approve such flight plans. During periods of prolonged "shut down, "revised MEA's and/or alternate routes are established for designated airways, utilizing adjacent facilities. This information is contained in appropriate NOTAMS and the Airman's Guide.

TRANSCRIBED WEATHER BROADCASTS: Equipment is being provided at selected FAA FSS by which meterological and Notice to Airmen data will be recorded on tapes and broadcast continuously over the low-frequency (200-400 kc) navigational aid (L/MF range or H facility.)

Broadcasts are made from a series of individual tape recordings. The first three tapes identify the station, give general wea conditions in the area, pilot reports (PIREP) and radar reports, when available, and winds aloft data. The remaining tapes contain weather at selected locations within a 400 mile radius of the central point. Changes, as they occur, are transcribed onto the tapes.

Transcribed weather broadcasts are presently being made at the following locations as indicated:

Location	Freq.
Boise, Idaho	359 kc
Boston, Mass.	382 kc
Chicago, (Joliet), Ill.	350 kc, 257 kc
Cincinnati, Ohio	335 kc
Cleveland, Ohio	344 kc
Denver, Colo.	379 kc
Fort Worth, Texas	365 kc
Indianapolis, Ind.	266 kc
Los Angeles, Calif.	332 kc
Milwaukee, Wisconsin	242 kc
Minneapolis, Minnesota	266 kc
New York, N.Y.	209 kc
Oakland, Calif.	362 kc
Pittsburgh, Pa.	254 kc
Washington, D.C.	332 kc
Wichita, Kans.	332 kc

*Operating on test basis.

INTERFERENCE TO AIRCRAFT COMMUNICATIONS AND NAVIGATION EQUIPMENT: Several reports have recently been received involving interference to aircraft communications navigation and integrated flight instrumentation systems. This interference has been traced directly to passenger operated portable recorders and radio receivers. The interference, in some cases, resulted in the oscillation of the glide slope and VOR indicator needles. While all reports received to date have come from the airlines, it is recognized that many unreported cases may exist as any aircraft equipped with electronic devices is susceptible to this type of interference.

Due to the seriousness of interference of this nature and pending further investigation and resolution of the problem, the Federal Aviation Agency strongly urges that action be taken by all aircraft operators to preclude the use of such portable electronic devices during flight. To assist in the resolution of this problem, detailed reports of any instances of interference of this nature should be forwarded to the Federal Aviation Agency, Washington 25, D.C. (Attention: W-200).

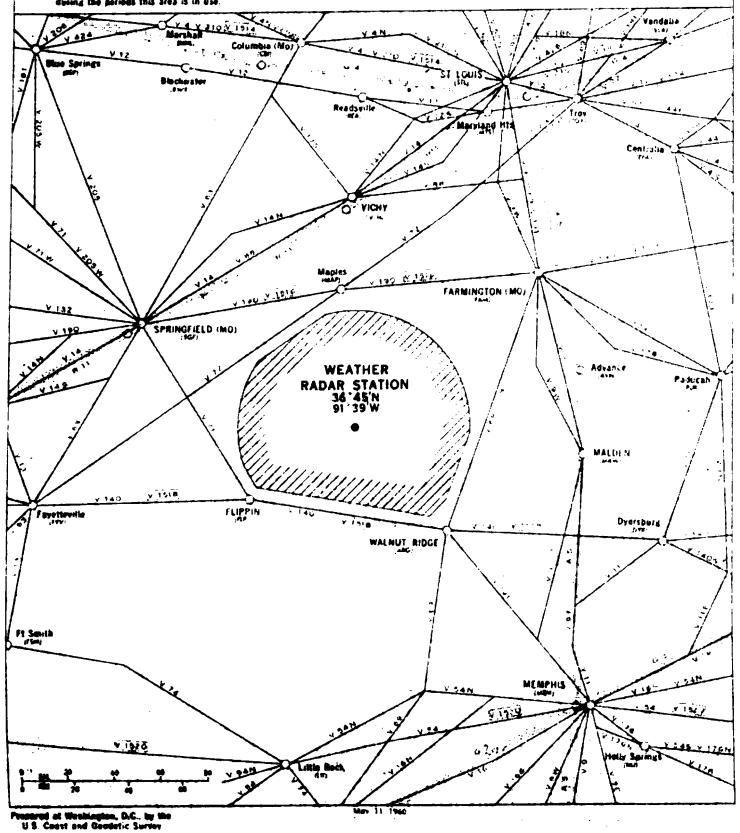
(This does not apply to hearing aids)

SPECIAL NOTICE

CUMULUS CLOUD RESEARCH PROJECT

EFFECTIVE MAY 15 THROUGH AUGUST 31 ANNUALLY

Beginning May 15 and ending August 31 annually, a cumulus cloud research operation will be conducted within a 50 statute mile radius of a weather radar station located 11 statute miles east of West Plains, Missouri at 36°45'N, 91°39'W excluding airways.



All flight operations will be conducted outside of controlled airspace. Hours of operation will be from 1300Z to 0300Z. Three Cessna 337 aircraft will operate VFR in the entire portion of the area at selected altitudes between the surface and 7,000 feet MSL generally within a selected group of five altitudes. One Beech 18 aircraft D IR will operate VFR or IFR throughout the area between the surface and 7,000 feet MSL generally within a selected group of five altitudes.

Flight operations will be conducted on days selected at random during the three and one half month period each year. Specific information concerning these operations will be issued by NOTAM on each day the flights will operate.

Other aircraft proposing flight within the designated area may obtain current information concerning these operations from the following FAA facilities:

St. Louis, Mo. FSS — Springfield, Mo. CS/T — Malden, Mo. FSS — Walnut Ridge, Ark. FSS — Memphis, Tenn. ARTCC
Vichy, Mo. FSS — Farmington, Mo. FSS — Flippin, Ark. FSS — St. Louis, Mo. ARTCC

The flight service stations listed above will broadcast appropriate information concerning the operation following regular weather broadcasts during the periods this area is in use.

Prepared at Washington, D.C. by the U.S. Coast and Geodetic Survey

May 31 1960

USAF HIGH ALTITUDE AIR REFUELING AREAS (SAC/TAC)

USAF jet aircraft have implemented, on a continuing basis, high altitude refueling operations in the areas described below, and at the altitudes and times specified for each area. During the scheduled refueling period, other IFR traffic will not be cleared through an active refueling area unless the refueling aircraft and the aircraft proposing to traverse the area can be provided radar separation by the FAA. Additional refueling areas on the east coast will be published in the near future. Effective date of changes (which are indicated by ✓) is May 22, 1960.

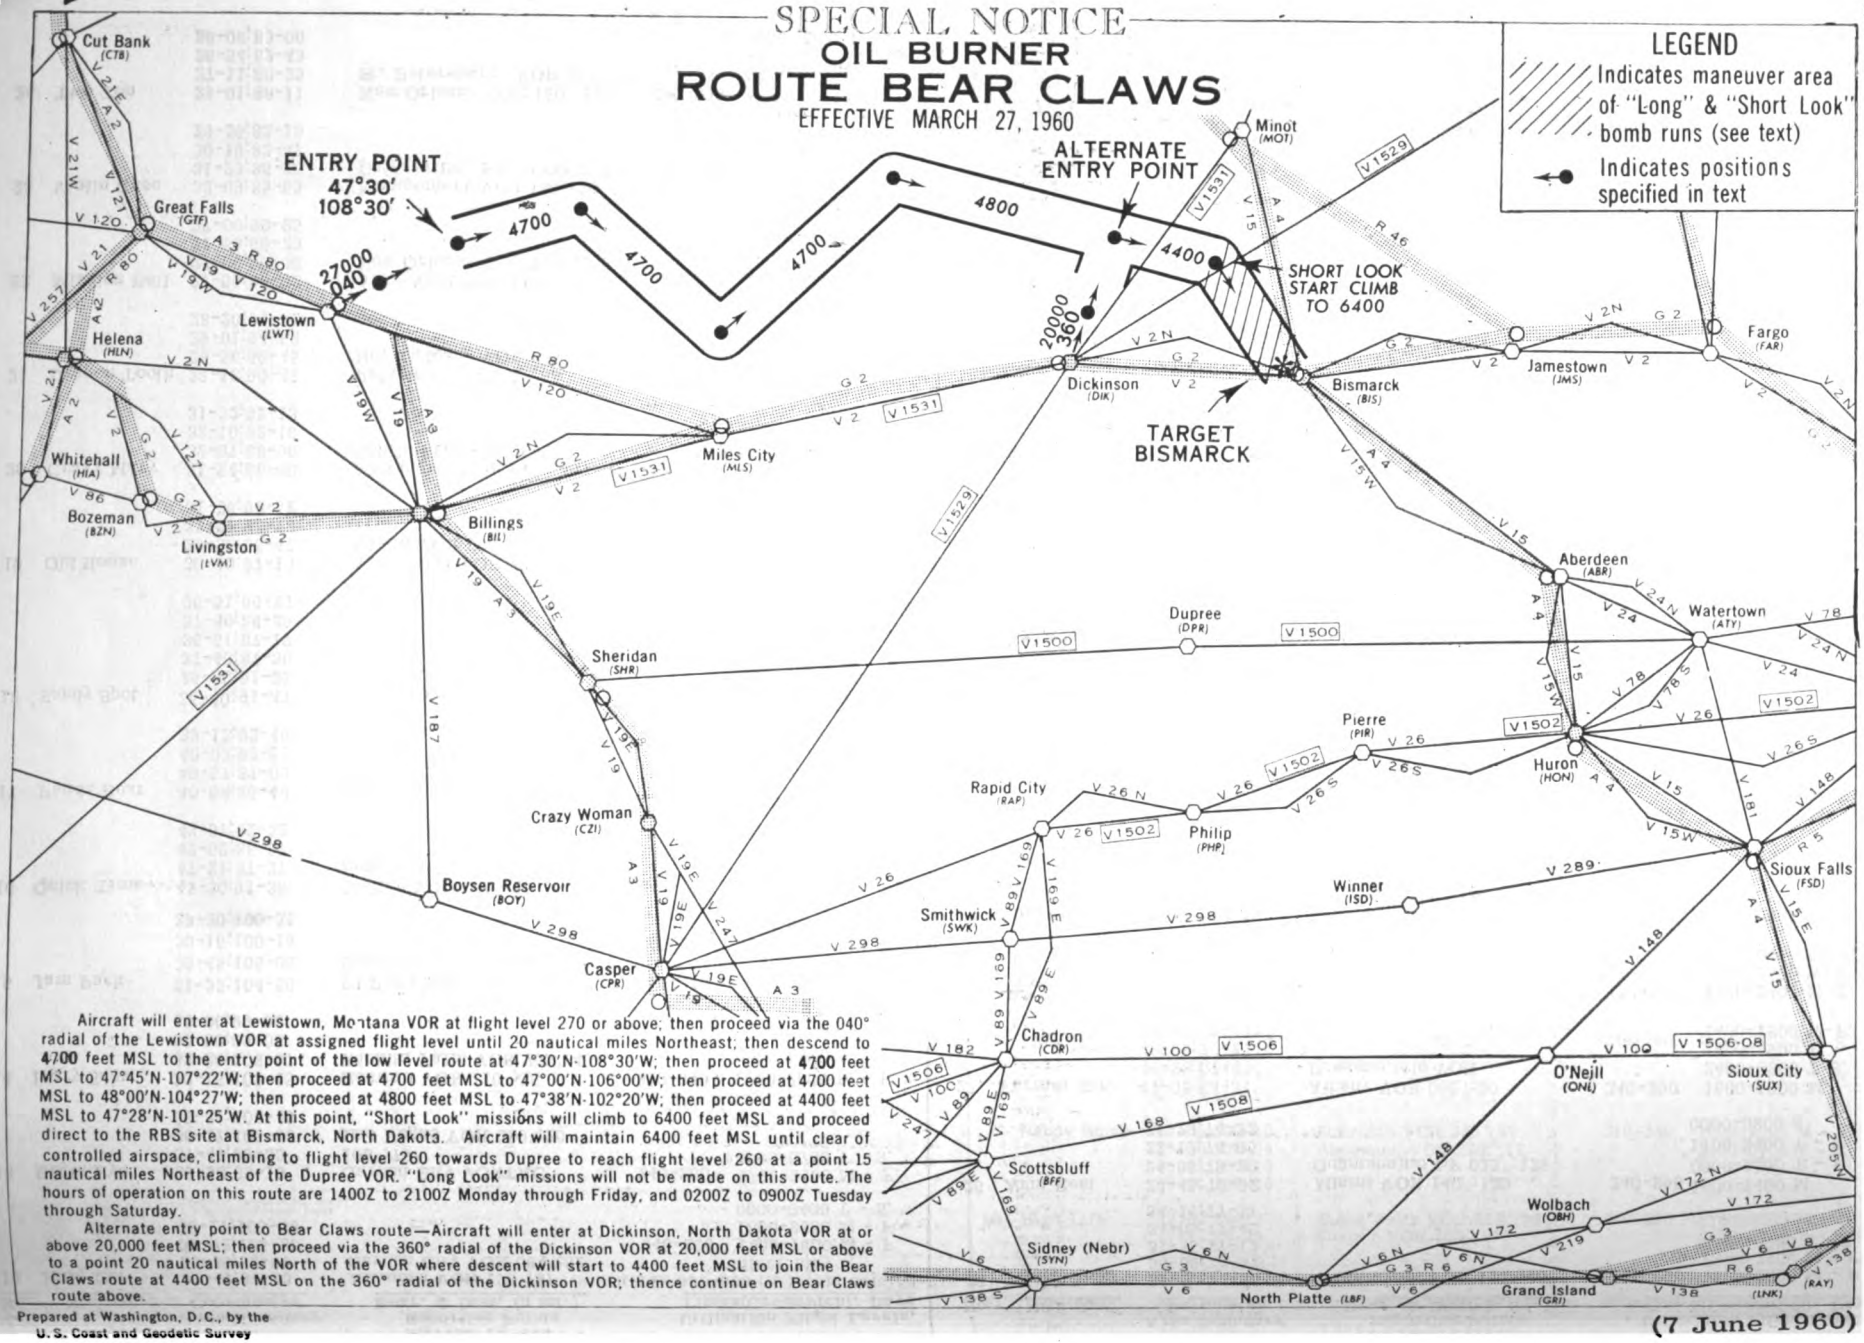
ALTIMETER SETTINGS - VFR FLIGHTS: In order to maintain proper separation between IFR and VFR cruising altitudes, it is essential that VFR pilots keep altimeters corrected in accordance with altimeter setting issued by nearest weather reporting station. Current altimeter settings are available to VFR pilots from FAA Flight Service Stations, Airport Traffic Control Towers, and aviation broadcasts.



CAUTION-AIRCRAFT ARRESTING BARRIERS AT JOINT USE MILITARY/CIVIL AIRPORTS: Aircraft Arresting Barriers are installed at some joint use military/civil airports. Pilots, particularly those of the light propeller driven category of aircraft are advised to operate with caution while operating near or over a lowered barrier. Aircraft operations at minimum practical power settings and taxi speeds are recommended until clear of the arresting barrier system.

NAVIGATIONAL WARNING - USAF OPERATION "OIL BURNER": USAF (Strategic Air Command is conducting low level navigational flights in jet aircraft in both VFR and IFR weather conditions within 10 statute miles either side of the centerline of the routes on the following pages, and at the alts specified therein. At the termination of the low level flights, the acft climb to alts between 4000 and 22,000 feet MSL for simulated bomb runs on a target, which is located in the vicinity of a Radar Bomb Scoring site. The low alt simulated bomb run is referred to as a "Short Look;" the intermediate alt one as a "Long Look." "Oil Burner" flights are conducted during both the hours of daylight and darkness, only during the times specified for each route.

SPECIAL NOTICE

OIL BURNER
ROUTE BEAR CLAWS

EFFECTIVE MARCH 27, 1960

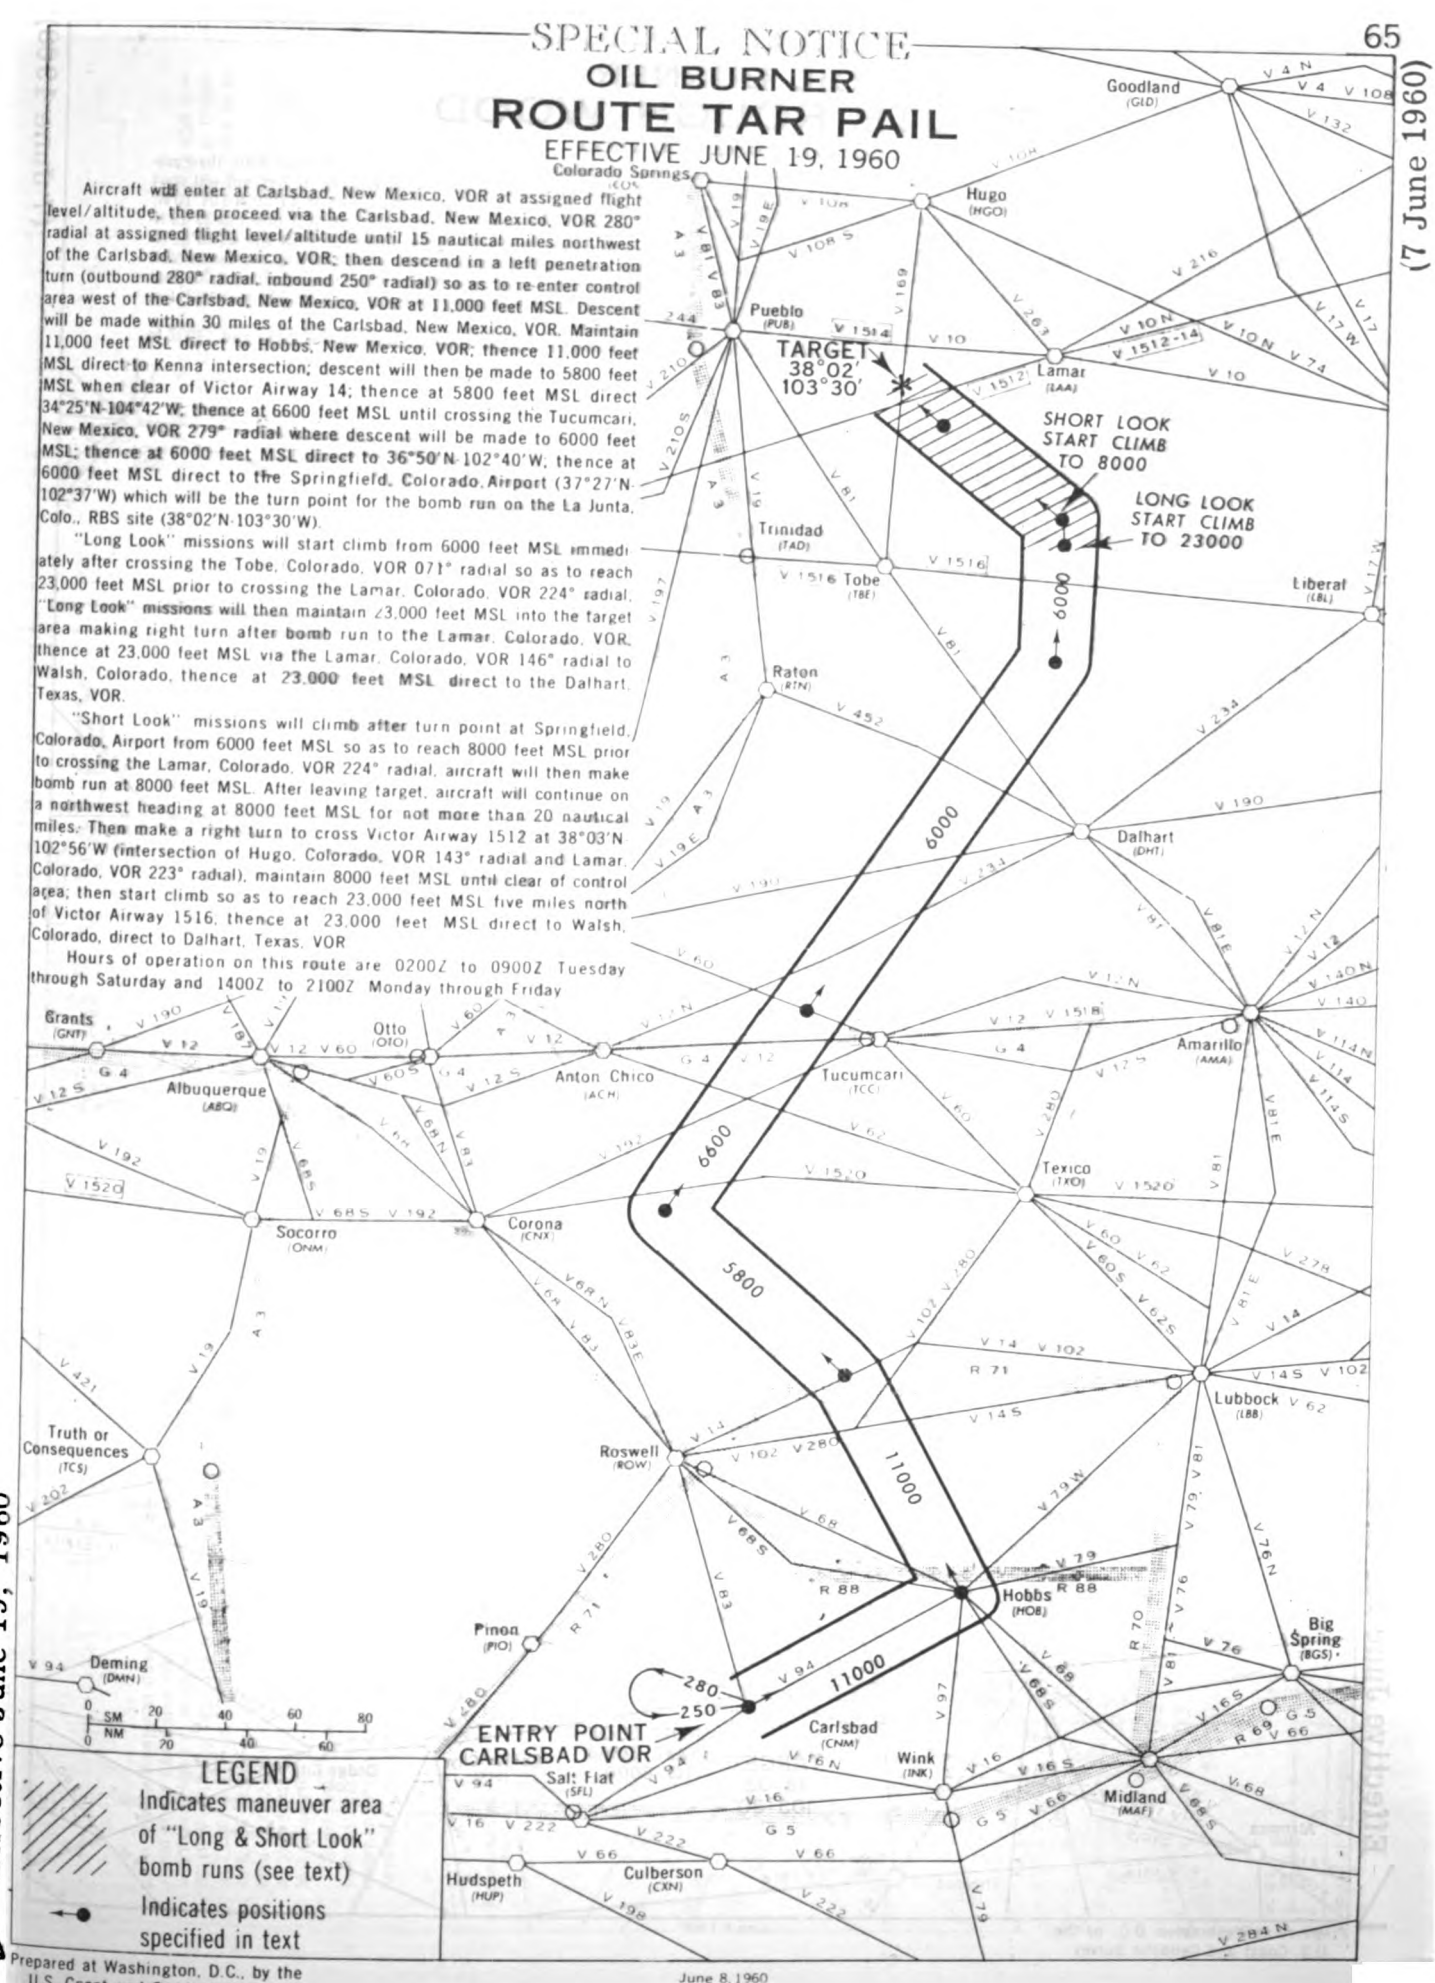
Aircraft will enter at Lewistown, Montana VOR at flight level 270 or above; then proceed via the 040° radial of the Lewistown VOR at assigned flight level until 20 nautical miles Northeast; then descend to 4700 feet MSL to the entry point of the low level route at 47°30'N-108°30'W; then proceed at 4700 feet MSL to 47°45'N-107°22'W; then proceed at 4700 feet MSL to 47°00'N-106°00'W; then proceed at 4700 feet MSL to 48°00'N-104°27'W; then proceed at 4800 feet MSL to 47°38'N-102°20'W; then proceed at 4400 feet MSL to 47°28'N-101°25'W. At this point, "Short Look" missions will climb to 6400 feet MSL and proceed direct to the RBS site at Bismarck, North Dakota. Aircraft will maintain 6400 feet MSL until clear of controlled airspace, climbing to flight level 260 towards Dupree to reach flight level 260 at a point 15 nautical miles Northeast of the Dupree VOR. "Long Look" missions will not be made on this route. The hours of operation on this route are 1400Z to 2100Z Monday through Friday, and 0200Z to 0900Z Tuesday through Saturday.

Alternate entry point to Bear Claws route—Aircraft will enter at Dickinson, North Dakota VOR at or above 20,000 feet MSL; then proceed via the 360° radial of the Dickinson VOR at 20,000 feet MSL or above to a point 20 nautical miles North of the VOR where descent will start to 4400 feet MSL to join the Bear Claws route at 4400 feet MSL on the 360° radial of the Dickinson VOR; thence continue on Bear Claws route above.

Prepared at Washington, D.C., by the U.S. Coast and Geodetic Survey

(7 June 1960)

OIL BURNER
ROUTE TAR PAIL
EFFECTIVE JUNE 19, 1960



(7 June 1960)

Aircraft will enter at Carlsbad, New Mexico, VOR at assigned flight level/altitude, then proceed via the Carlsbad, New Mexico, VOR 280° radial at assigned flight level/altitude until 15 nautical miles northwest of the Carlsbad, New Mexico, VOR; then descend in a left penetration turn (outbound 280° radial, inbound 250° radial) so as to re-enter control area west of the Carlsbad, New Mexico, VOR at 11,000 feet MSL. Descent will be made within 30 miles of the Carlsbad, New Mexico, VOR. Maintain 11,000 feet MSL direct to Hobbs, New Mexico, VOR; thence 11,000 feet MSL direct to Kenna intersection; descent will then be made to 5800 feet MSL when clear of Victor Airway 14; thence at 5800 feet MSL direct 34°25'N-104°42'W; thence at 6600 feet MSL until crossing the Tucumcari, New Mexico, VOR 279° radial where descent will be made to 6000 feet MSL; thence at 6000 feet MSL direct to 36°50'N-102°40'W; thence at 6000 feet MSL direct to the Springfield, Colorado, Airport (37°27'N-102°37'W) which will be the turn point for the bomb run on the La Junta, Colo., RBS site (38°02'N-103°30'W).

"Long Look" missions will start climb from 6000 feet MSL immediately after crossing the Tobe, Colorado, VOR 071° radial so as to reach 23,000 feet MSL prior to crossing the Lamar, Colorado, VOR 224° radial. "Long Look" missions will then maintain 23,000 feet MSL into the target area making right turn after bomb run to the Lamar, Colorado, VOR, thence at 23,000 feet MSL via the Lamar, Colorado, VOR 146° radial to Walsh, Colorado, thence at 23,000 feet MSL direct to the Dalhart, Texas, VOR.

"Short Look" missions will climb after turn point at Springfield, Colorado, Airport from 6000 feet MSL so as to reach 8000 feet MSL prior to crossing the Lamar, Colorado, VOR 224° radial, aircraft will then make bomb run at 8000 feet MSL. After leaving target, aircraft will continue on a northwest heading at 8000 feet MSL for not more than 20 nautical miles. Then make a right turn to cross Victor Airway 1512 at 38°03'N-102°56'W (intersection of Hugo, Colorado, VOR 143° radial and Lamar, Colorado, VOR 223° radial), maintain 8000 feet MSL until clear of control area; then start climb so as to reach 23,000 feet MSL five miles north of Victor Airway 1516, thence at 23,000 feet MSL direct to Walsh, Colorado, direct to Dalhart, Texas, VOR.

Hours of operation on this route are 0200Z to 0900Z Tuesday through Saturday and 1400Z to 2100Z Monday through Friday.

Effective June 19, 1960

Prepared at Washington, D.C., by the U.S. Coast and Geodetic Survey

SPECIAL NOTICE

OIL BURNER
ROUTE ROUGH WOOD
EFFECTIVE JUNE 19, 1960

Aircraft will enter at Philip, South Dakota, VOR at assigned altitude/flight level (between 20,000 feet MSL and flight level 250); then proceed via the Philip VOR 145° radial, maintaining assigned altitude until 10 nautical miles southeast of the Philip VOR where descent will start to 5,000 feet MSL, crossing 43°26'N-101°20'W at or below 13,000 feet MSL, proceeding direct to low-level entry point at 43°10'N-101°10'W; then at 5,000 feet MSL direct to 41°30'N-101°30'W; then at 5,000 feet MSL direct to 40°40'N-102°20'W; then at 5,600 feet MSL direct to 39°19'N-102°29'W; then at 6,200 feet MSL direct to 38°52'N-103°13'W; then at 6,000 feet MSL direct to the La Junta, Colorado RBS site at 38°02'N-103°30'W; aircraft will start climb when crossing the Lamar, Colorado VOR 252° radial and reach 8,000 feet MSL when crossing the Lamar VOR 247° radial; maintain 8,000 feet MSL over the La Junta, Colorado RBS Site; turn left to a direct course to Walsh, Colorado, maintain 8,000 feet until five nautical miles southeast of Victor Airway 169; then climb on a direct course to Walsh, Colorado so as to reach 23,000 feet MSL five miles north of Victor Airway 1516; maintain 23,000 feet MSL direct to Dalhart, Texas, VOR.

"Short Look" missions only authorized over this route. Hours of operation are 0200Z to 0900Z Tuesday through Saturday and 1400Z to 2100Z Monday through Friday.

Effective June 19, 1960.

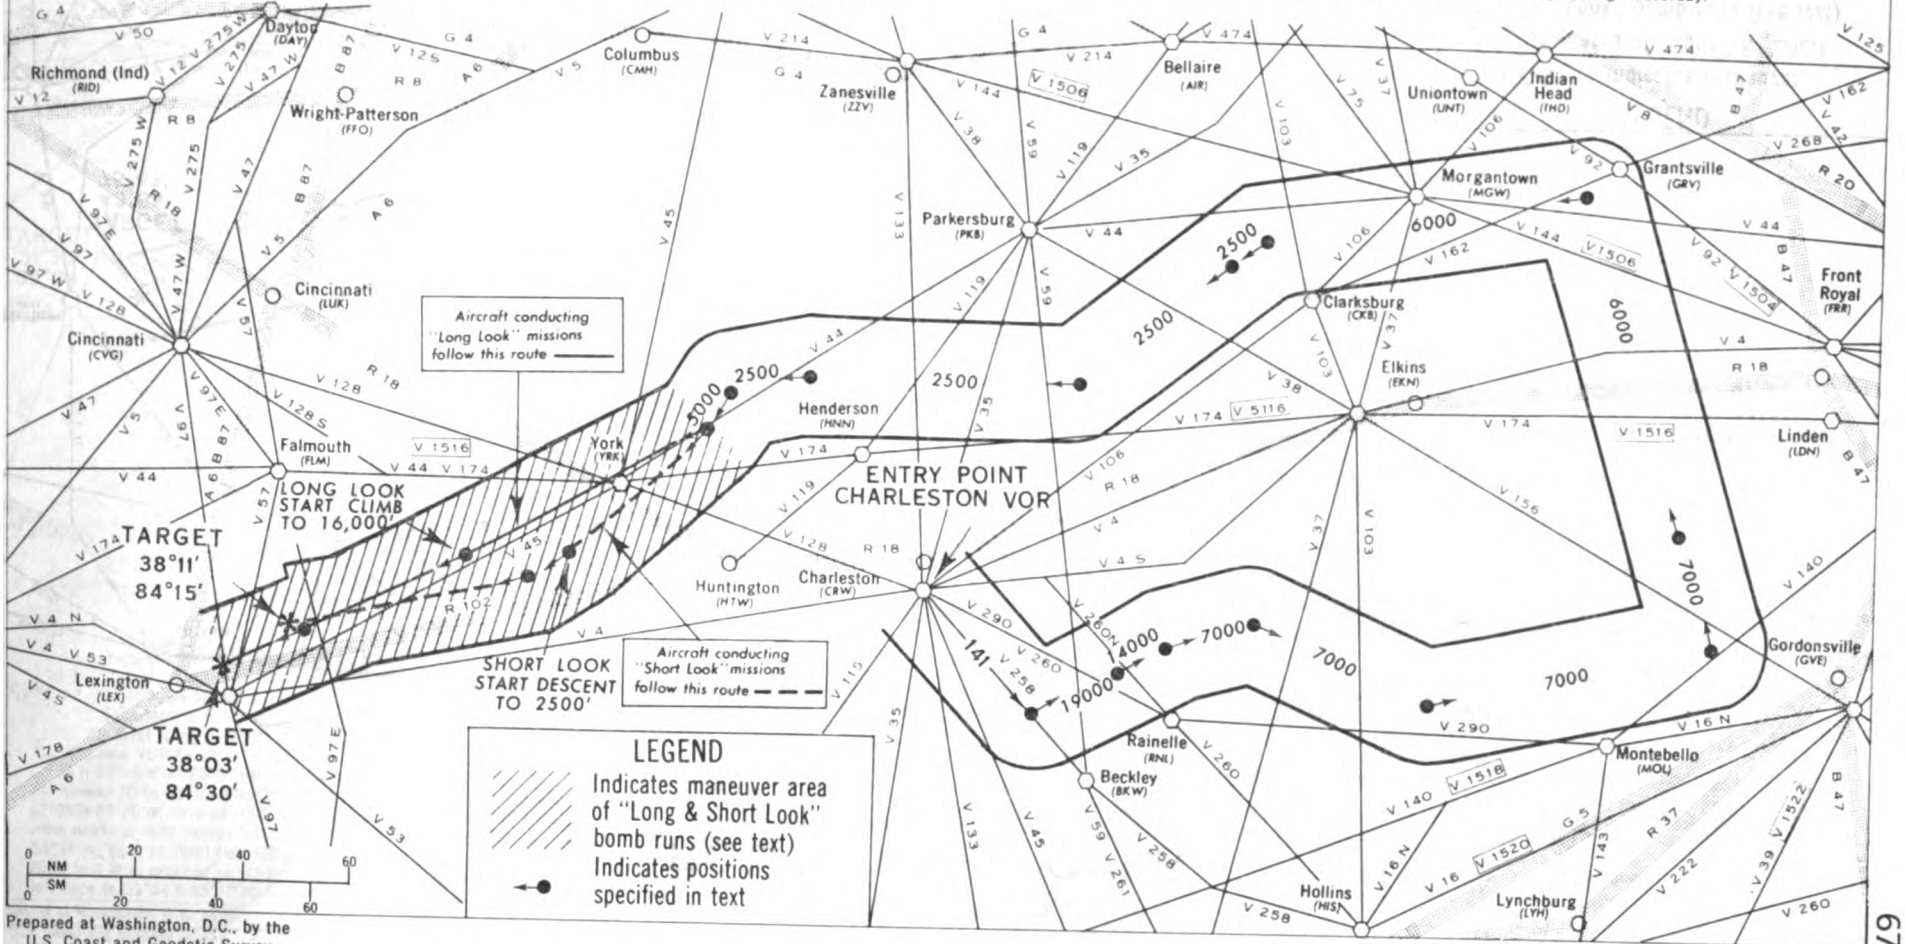
Prepared at Washington, D.C., by the U.S. Coast and Geodetic Survey

June 8, 1960

Effective June 19, 1960

SPECIAL NOTICE

OIL BURNER
ROUTE GREEN VALLEY



EFFECTIVE JUNE 19, 1960

Aircraft will enter at Charleston, W. Va., VOR at or above Flight Level 240; and proceed via the 141° radial of the Charleston VOR to 37°59'N-81°22'W, descending to cross this point at 19,000' MSL. Aircraft will then proceed to 38°08'N-81°00'W at 19,000' MSL. Aircraft will then continue descent to cross 38°12'N-80°49'W at 14,000' MSL; and to cross 38°16'N-80°30'W at 7,000' MSL; then proceeding to 38°01'N-79°49'W at 7,000' MSL; then to 38°11'N-78°41'W at 7,000' MSL; then to 38°32'N-78°49'W at 7,000' MSL; descend to 6,000' MSL immediately after passing 38°32'N-78°49'W, then at 6,000 feet MSL to 39°33'N-79°10'W; then to 39°25'N-80°27'W at 6,000' MSL; then descending to cross 39°21'N-80°34'W at 2,500' MSL; then to 38°59'N-81°11'W at 2,500' MSL; then to 38°59'N-82°14'W at 2,500' MSL; then to 38°51'N-82°33'W at 2,500' MSL; then climbing to cross 38°49'N-82°38'W at 5,000' MSL.

"Short Look" Missions will maintain 5,000' MSL from 38°49'N-82°38'W to 38°26'N-83°09'W; then descend to cross 38°22'N-83°18'W at 2,500' MSL (end of navigation leg). Aircraft will then proceed to cross the target at 38°11'N-84°15'W at 5,000' MSL. After the simulated bomb run, the aircraft will proceed via a 270° heading to cross the Lexington, Ky., VOR 024° radial at 6,000' MSL; then continuing via a 270° heading, cross Lexington VOR 322° radial at 6,000' MSL. The aircraft will then climb on the Lexington VOR 322° radial to cross Louisville, Ky., VOR 070° radial at 11,000' MSL; cross Louisville VOR 050° radial at 17,000' MSL; maintaining this altitude until after crossing Louisville VOR 018° radial; then continuing climb so as to cross Louisville VOR 352° radial at Flight Level 310.

"Long Look" Missions will proceed from 38°49'N-82°38'W; maintaining 5,000' to 38°25'N-83°34'W; then climb to cross 38°10'N-84°11'W at 16,000' MSL; then to the target at 38°03'N-84°30'W at 16,000' MSL. After the simulated bomb run, the aircraft will make a right turn to intercept the Lexington, Ky., VOR 332° radial, still at 16,000' MSL; then climb on the Lexington VOR 332° radial so as to cross Louivsille VOR 070° radial at 17,000' MSL and the Louisville VOR 050° radial at 21,000' MSL; maintaining 21,000' MSL until after crossing the Louisville VOR 018° radial; then continuing climb so as to cross Louisville VOR 352° radial at Flight Level 310.

The hours of operation on this route are 0100Z to 1300Z, Tuesday through Saturday.

Prepared at Washington, D.C., by the U.S. Coast and Geodetic Survey

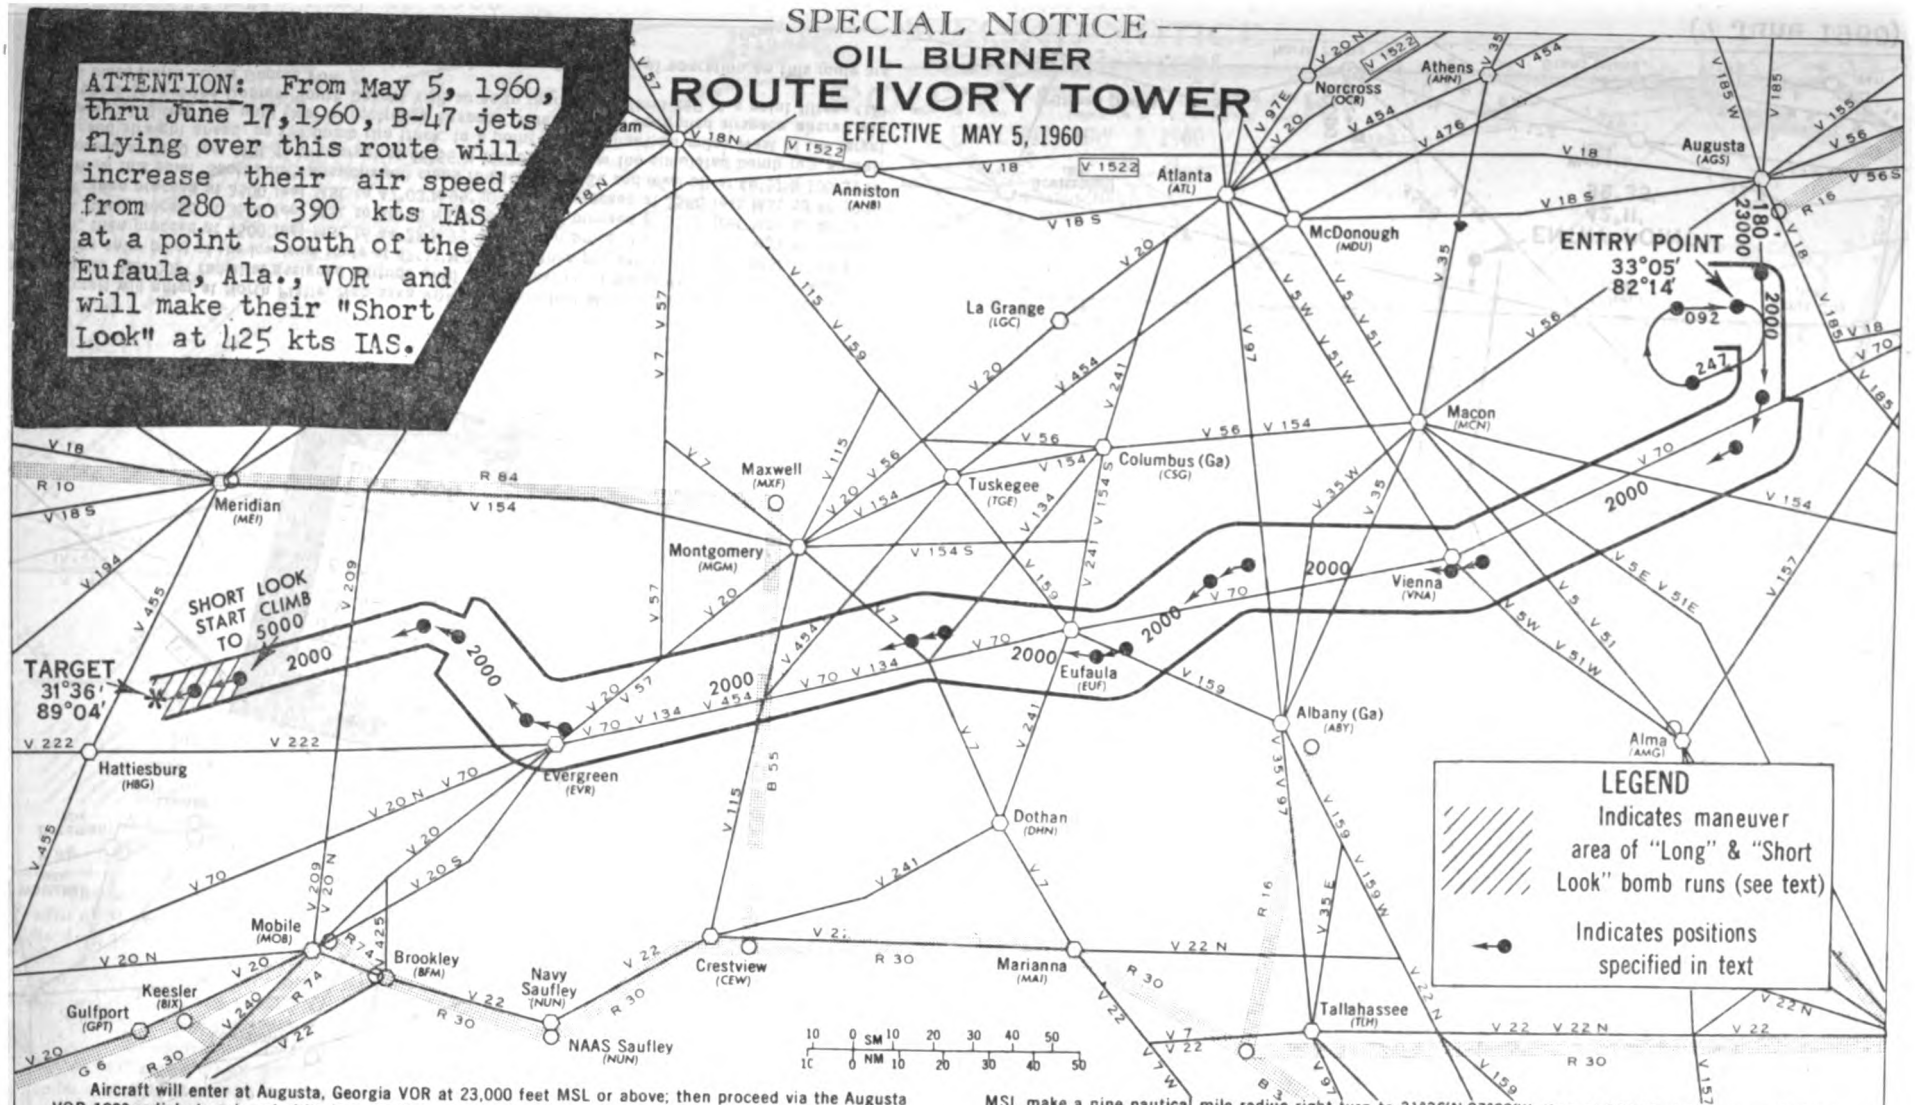
ROUTE HANG OVER



EFFECTIVE NOVEMBER 23, 1959

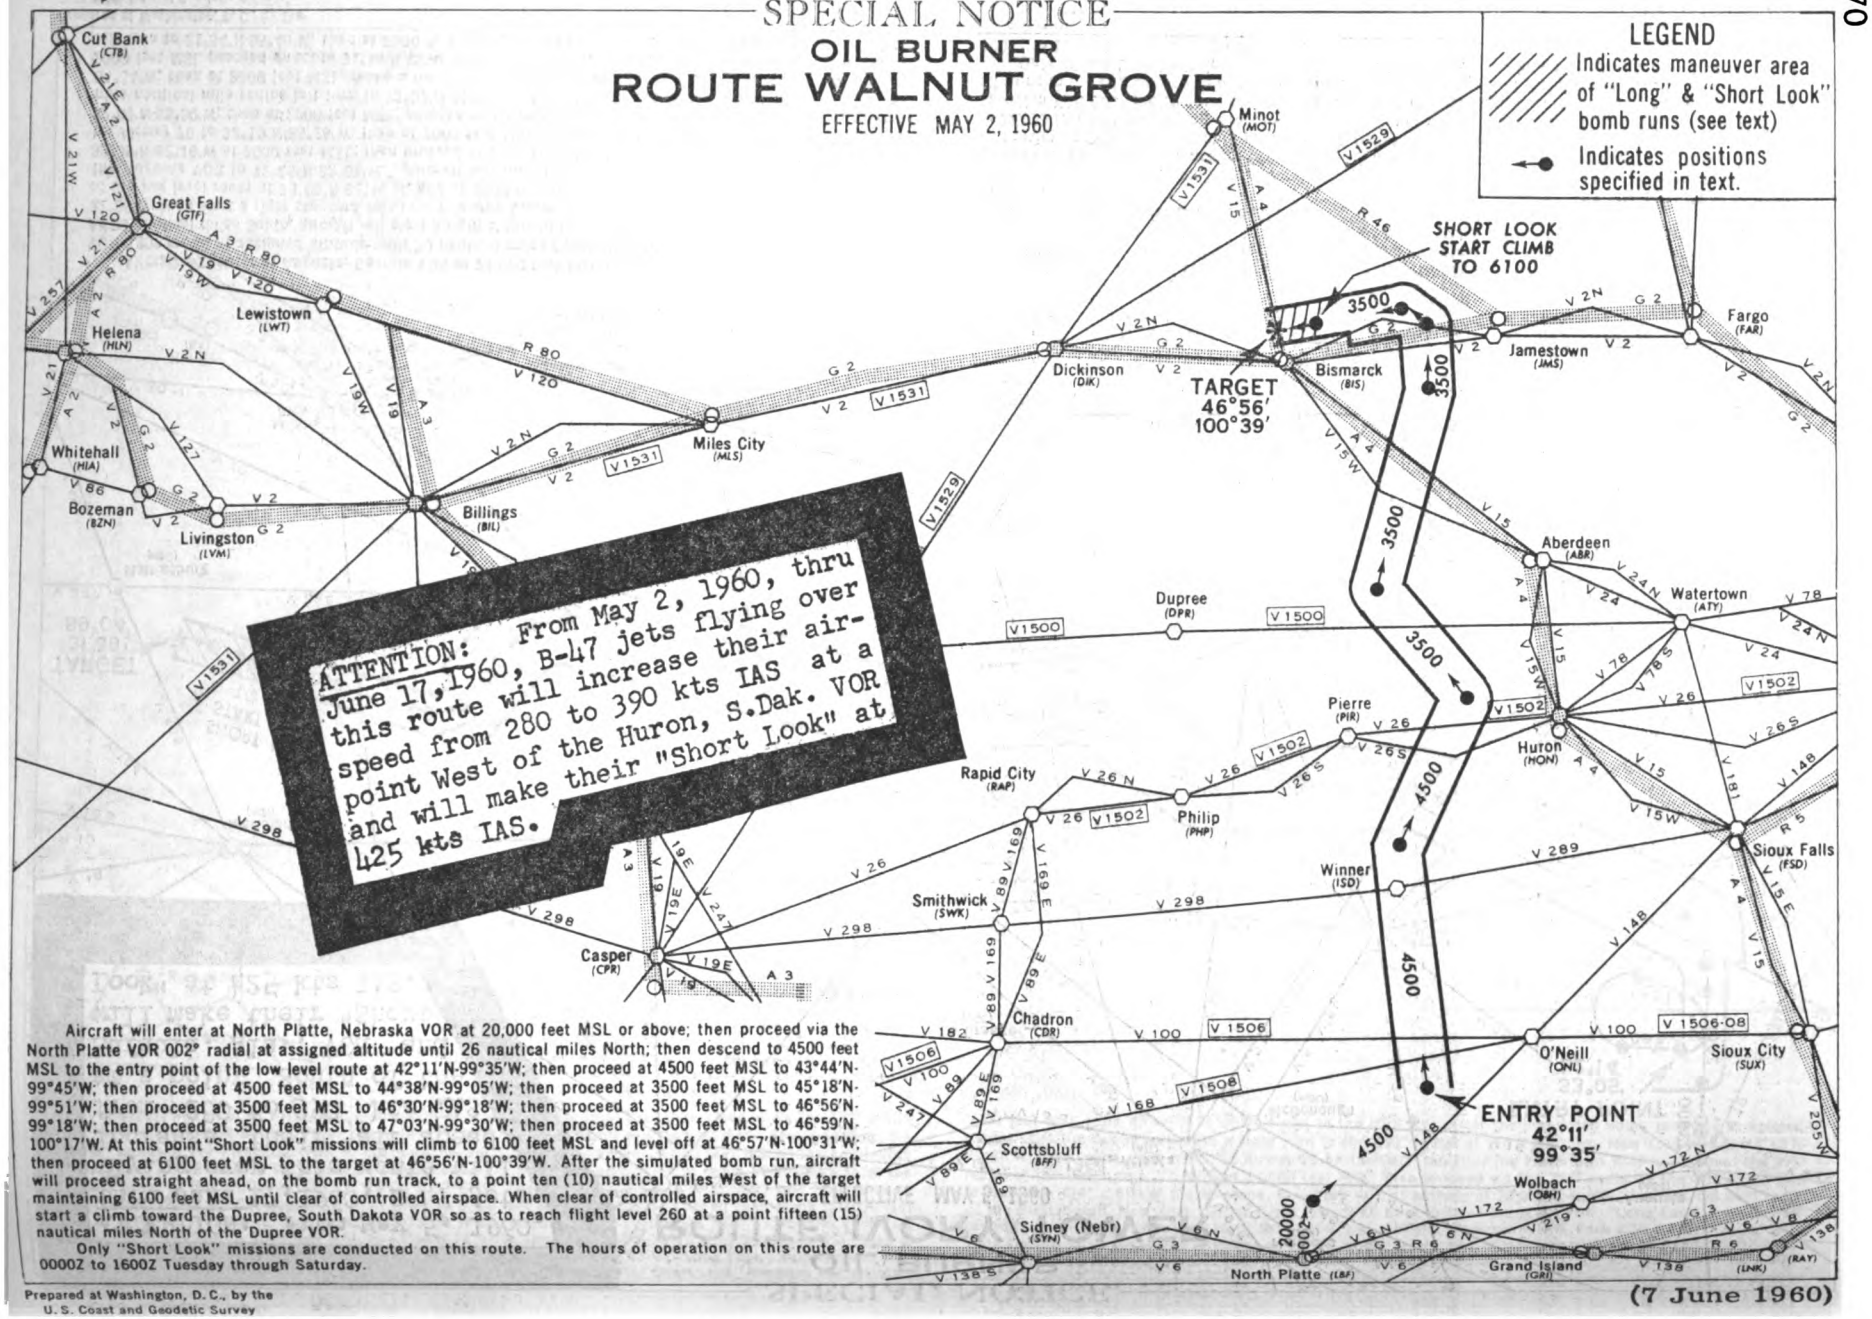
Aircraft will enter at Princeton, Maine VOR at or above flight level 270; then proceed via the 190° radial of the Princeton VOR at flight level 270 until 45°08′N-67°39′W. Descent will then be made Southbound on the 190° radial of the Princeton VOR to cross 44°56′N-67°36′W at or above 20,000 feet MSL; then continuing descent to 44°39′N-67°32′W; then start a complete orbit in a left-hand pattern to reach 5000 feet MSL at the entry point of the low level route at 44°44′N-67°07′W; then to 45°19′N-67°49′W at 5000 feet MSL; then to 45°16′N-69°30′W at 5000 feet MSL; then climb to 5300 feet MSL to 45°08′N-71°09′W; then climb to 7000 feet MSL to 44°03′N-72°04′W; then to 43°42′N-73°12′W at 7000 feet MSL; then to 43°45′N-73°45′W at 7000 feet MSL; then descend to 5000 feet MSL to 43°44′N-74°07′W; then to 43°45′N-74°15′W at 5000 feet MSL; then to 43°46′N-74°25′W at 5000 feet MSL; then to the RBS site at 43°58′N-75°43′W. "Long Look" missions will start climb at 43°45′N-74°15′W so as to cross the RBS site at 16,000 feet MSL. "Short Look" missions will maintain 5000 feet MSL from 43°45′N-74°15′W direct to the RBS site. After the simulated bomb runs are completed, "Short Look" missions will make a right turn to the 060° radial of the Watertown, New York VOR to 44°13′N-75°38′W; then climb clear of Victor Airway 29 on the 060° radial of the Watertown VOR to intercept the 296° radial of the Burlington, Vt. VOR at 17,000 feet MSL; then proceed via the 296° radial of the Burlington VOR to cross the 190° radial of the Massena, New York VOR at altitude of 20,000 feet MSL; to cross the 240° radial of the Plattsburgh, New York VOR at flight level 280; then to the Burlington VOR. "Long Look" missions will maintain 16,000 feet MSL, turn right to the 060° radial of the Watertown, New York VOR to 44°13′N-75°38′W; then via the same route and altitudes as "Short Look". The hours of operation on this route are 1830Z-2400Z Monday through Friday, and 0000Z-0630Z Tuesday through Saturday.

Prepared at Washington, D.C., by the U. S. Coast and Geodetic Survey

(7 June 1960)

Aircraft will enter at Augusta, Georgia VOR at 23,000 feet MSL or above; then proceed via the Augusta VOR 180° radial at assigned altitude until 20 nautical miles South, then start a descent to 2000 feet MSL. At 30 nautical miles South, aircraft will start a right standard rate turn to a true course of 247° to 32°49'N-82°26'W; then start a right standard rate turn to a true course of 092° at 33°06'N-82°30'W to the entry point of the low level route at 33°05'N-82°14'W, and at 2000 feet MSL, turn right to intercept the 180° radial of the Augusta VOR to 32°46'N-82°08'W. Aircraft will then make a nine nautical mile radius right turn to 32°35'N-82°16'W at 2000 feet MSL; then proceed at 2000 feet MSL Southwest along the South edge of Victor Airway 70 to 32°10'N-83°25'W; then at 2000 feet MSL, make a nine nautical mile radius right turn to 32°09'N-83°30'W; then at 2000 feet MSL, proceed direct to 32°09'N-84°25'W; then at 2000 feet MSL, make a nine nautical mile radius left turn to 32°07'N-84°32'W, then at 2000 feet MSL proceed direct to 31°53'N-84°54'W; then at 2000 feet MSL, make a nine nautical mile radius right turn to 31°51'N-85°01'W, then at 2000 feet MSL proceed direct to 31°54'N-85°46'W; then at 2000 feet MSL, make a nine nautical mile radius left turn to 31°54'N-85°49'W; then at 2000 feet MSL proceed direct to 31°34'N-87°18'W; then at 2000 feet MSL make a nine nautical mile radius right turn to 31°36'N-87°28'W; then at 2000 feet MSL proceed direct to 31°53'N-87°46'W; then at 2000 feet MSL make a nine nautical mile radius left turn to 31°55'N-87°55'W; then proceed at 2000 feet MSL to 31°43'N-88°43'W. At this point, "Short Look" missions will start a climb so as to reach 5000 feet MSL at 31°39'N-88°55'W; then at 5000 feet MSL proceed direct to the target at 31°36'N-89°04'W.

After the simulated bomb run, aircraft will proceed straight ahead, on the bomb run track, and climb to 6000 feet MSL. Upon reaching 6000 feet MSL, aircraft will make a right turn to a true course of 106° and maintain 6000 feet MSL until past the 180° radial of the Meridian, Mississippi VOR; then start a climb to 22,000 feet MSL proceeding direct to the intersection of the McComb, Mississippi VOR 068° radial and the Meridian VOR 160° radial; then continue climbing in a non-standard, one minute holding pattern (making all turns to the left) Southwest of the intersection on the 068° radial of the McComb VOR.



Only "Short Look" missions are conducted on this route. The hours of operation on this route are 0000Z to 1600Z Tuesday through Saturday.

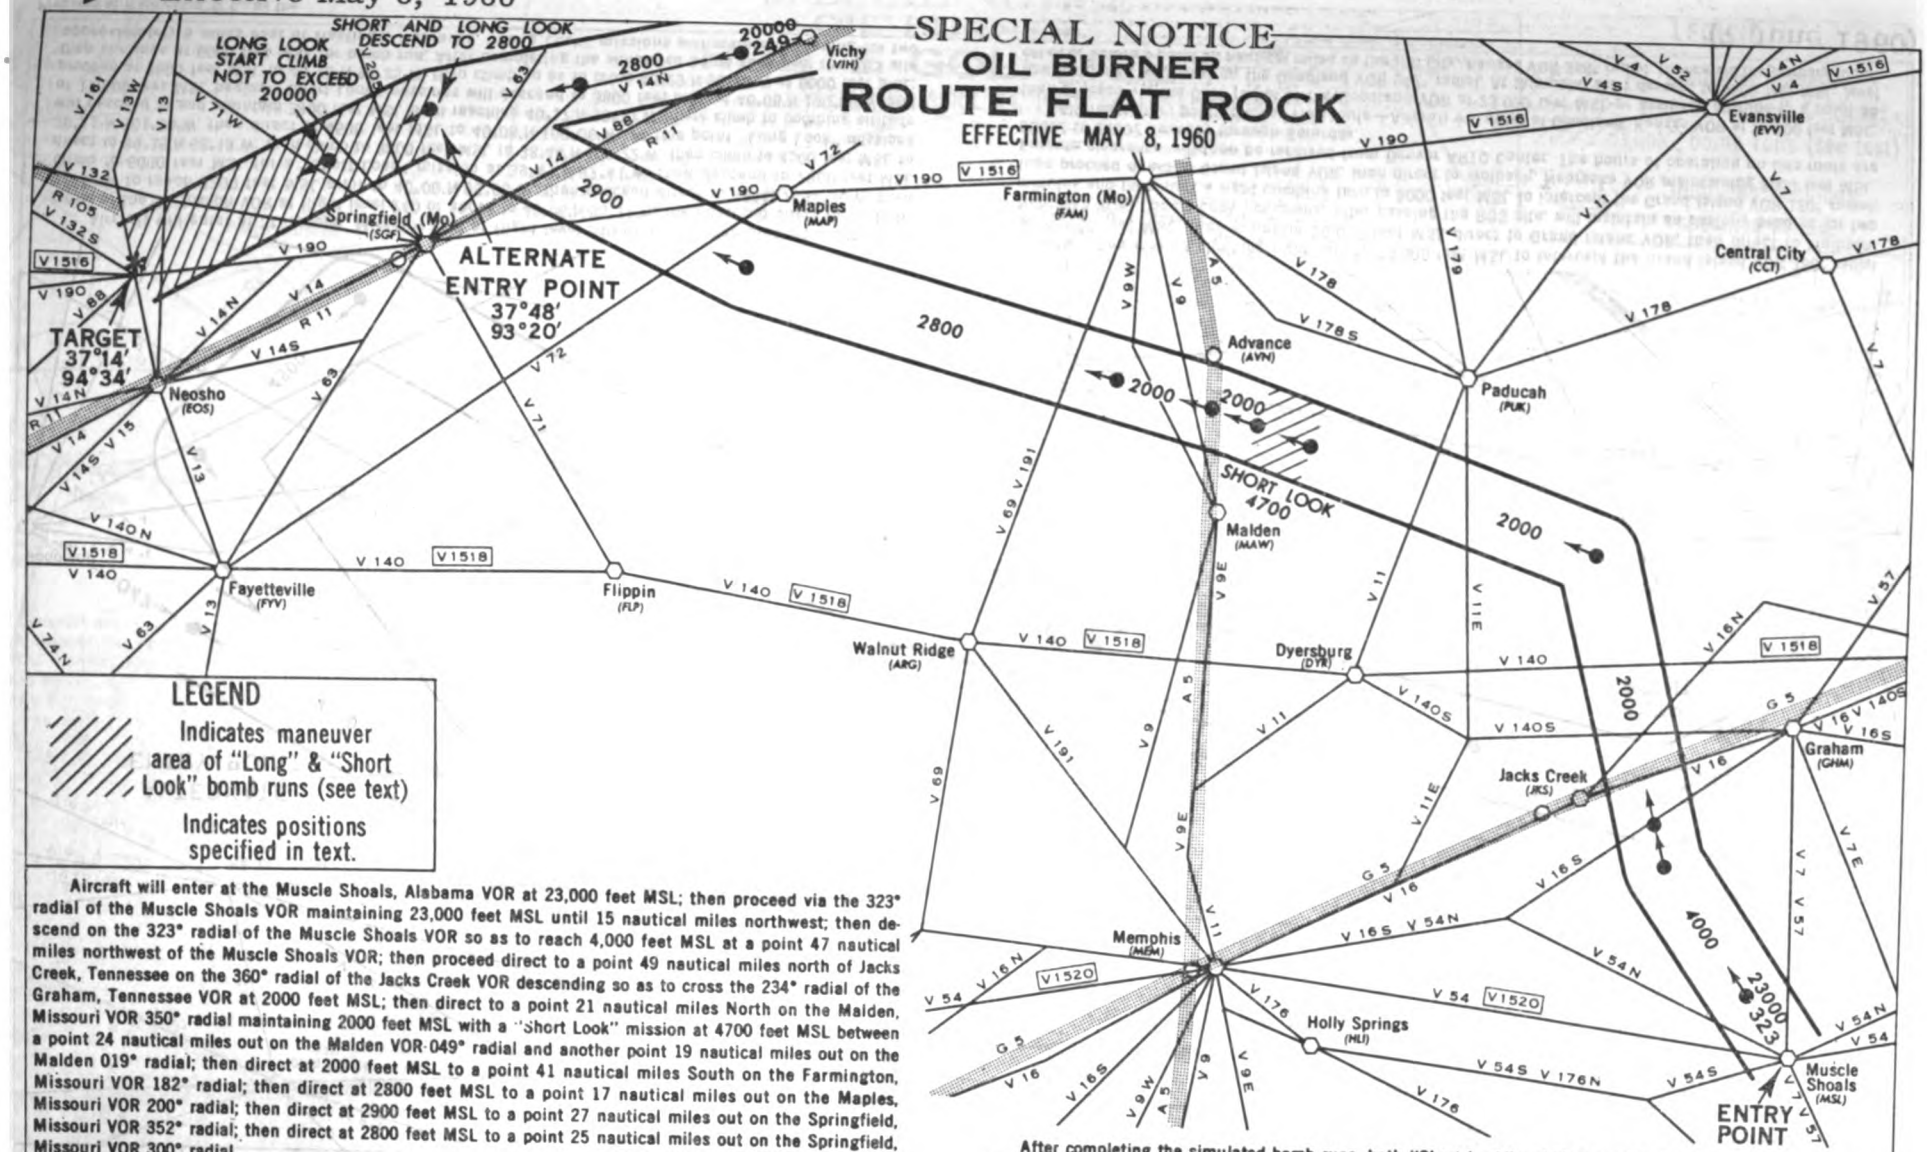
SPECIAL NOTICE
OIL BURNER
ROUTE WALNUT GROVE

EFFECTIVE MAY 2, 1960

Aircraft will enter at North Platte, Nebraska VOR at 20,000 feet MSL or above; then proceed via the North Platte VOR 002° radial at assigned altitude until 26 nautical miles North; then descend to 4500 feet MSL to the entry point of the low level route at 42°11′N-99°35′W; then proceed at 4500 feet MSL to 43°44′N-99°45′W; then proceed at 4500 feet MSL to 44°38′N-99°05′W; then proceed at 3500 feet MSL to 45°18′N-99°51′W; then proceed at 3500 feet MSL to 46°30′N-99°18′W; then proceed at 3500 feet MSL to 46°56′N-99°18′W; then proceed at 3500 feet MSL to 47°03′N-99°30′W; then proceed at 3500 feet MSL to 46°59′N-100°17′W. At this point "Short Look" missions will climb to 6100 feet MSL and level off at 46°57′N-100°31′W; then proceed at 6100 feet MSL to the target at 46°56′N-100°39′W. After the simulated bomb run, aircraft will proceed straight ahead, on the bomb run track, to a point ten (10) nautical miles West of the target maintaining 6100 feet MSL until clear of controlled airspace. When clear of controlled airspace, aircraft will start a climb toward the Dupree, South Dakota VOR so as to reach flight level 260 at a point fifteen (15) nautical miles North of the Dupree VOR.



Only "Short Look" missions are conducted on this route. The hours of operation on this route are 0000Z to 1600Z Tuesday through Saturday.

ROUTE FLAT ROCK
EFFECTIVE MAY 8, 1960

LEGEND

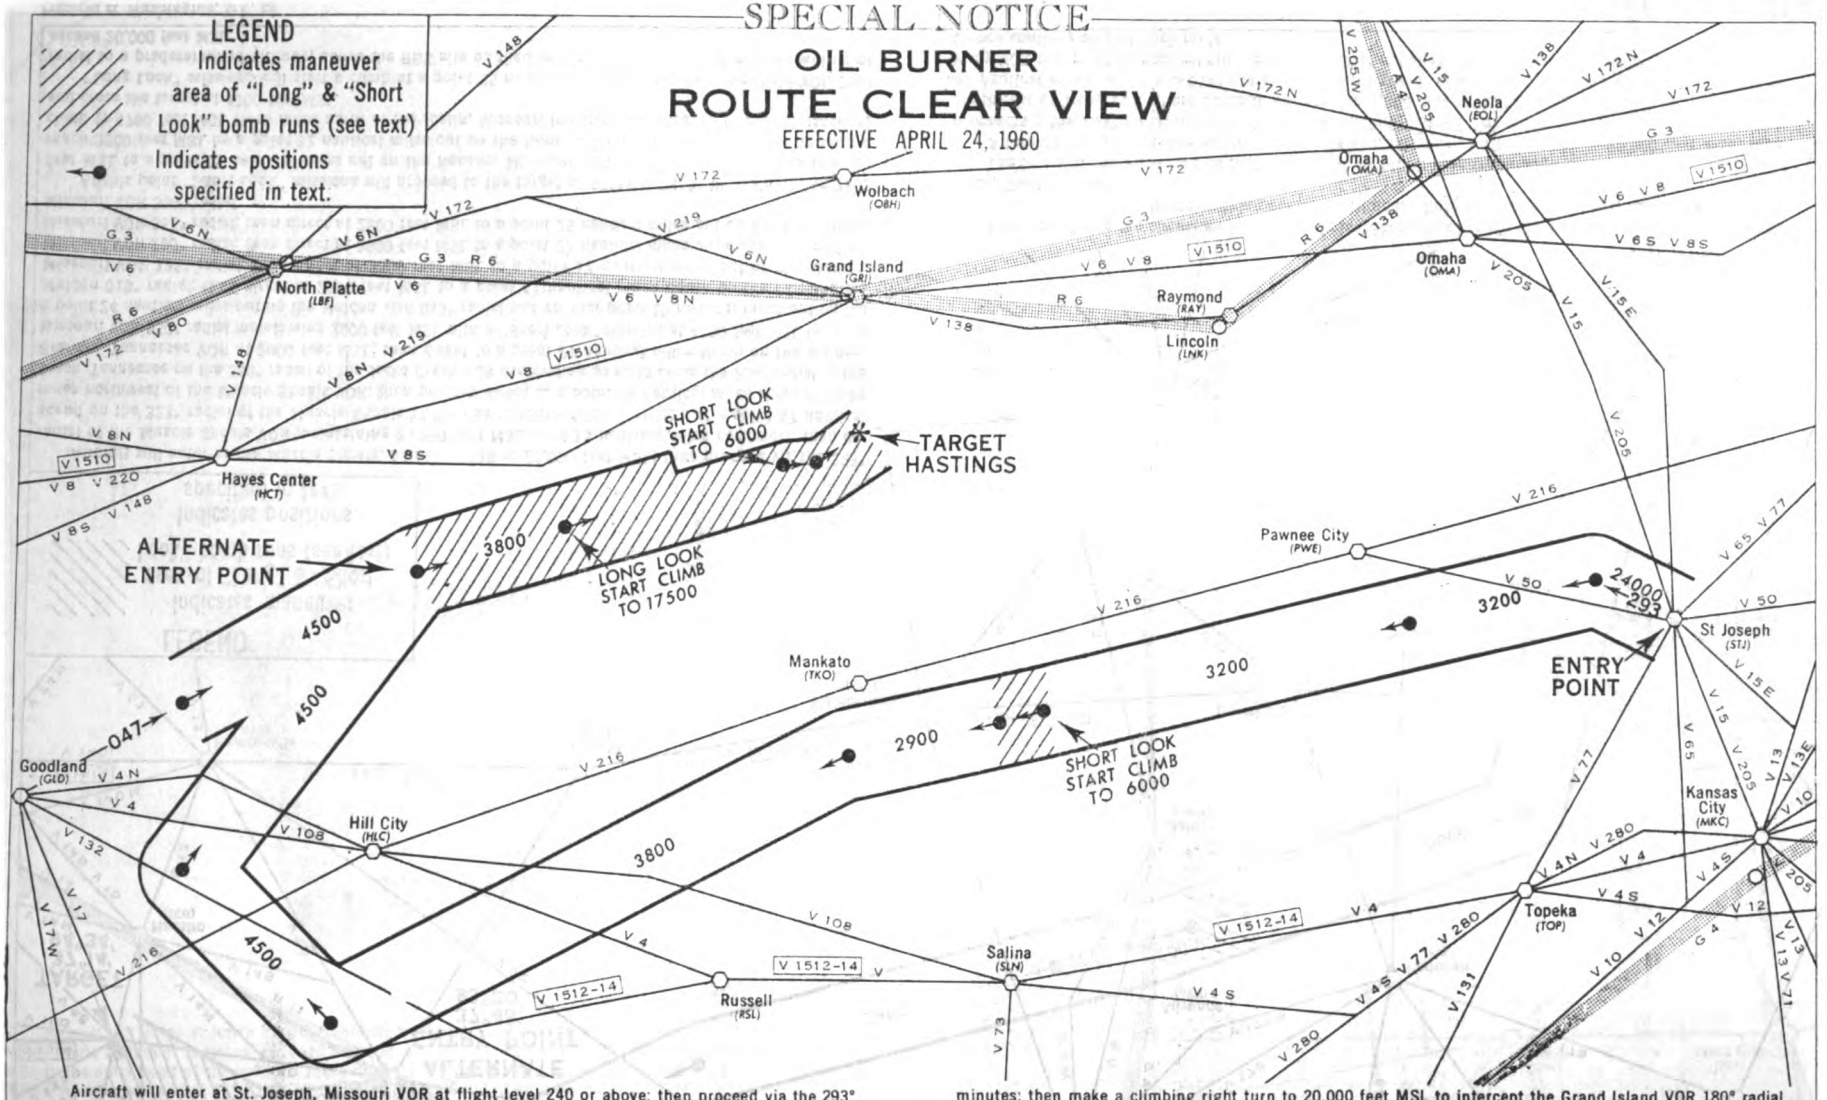
Indicates maneuver area of "Long" & "Short Look" bomb runs (see text)

Indicates positions specified in text.

Aircraft will enter at the Muscle Shoals, Alabama VOR at 23,000 feet MSL; then proceed via the 323° radial of the Muscle Shoals VOR maintaining 23,000 feet MSL until 15 nautical miles northwest; then descend on the 323° radial of the Muscle Shoals VOR so as to reach 4,000 feet MSL at a point 47 nautical miles northwest of the Muscle Shoals VOR; then proceed direct to a point 49 nautical miles north of Jacks Creek, Tennessee on the 360° radial of the Jacks Creek VOR descending so as to cross the 234° radial of the Graham, Tennessee VOR at 2000 feet MSL; then direct to a point 21 nautical miles North on the Malden, Missouri VOR 350° radial maintaining 2000 feet MSL with a "Short Look" mission at 4700 feet MSL between a point 24 nautical miles out on the Malden VOR 049° radial and another point 19 nautical miles out on the Malden 019° radial; then direct at 2000 feet MSL to a point 41 nautical miles South on the Farmington, Missouri VOR 182° radial; then direct at 2800 feet MSL to a point 17 nautical miles out on the Maples, Missouri VOR 200° radial; then direct at 2900 feet MSL to a point 27 nautical miles out on the Springfield, Missouri VOR 352° radial; then direct at 2800 feet MSL to a point 25 nautical miles out on the Springfield, Missouri VOR 300° radial.

At this point "Short Look" missions will proceed to the target at 37°14′N-94°34′W, maintaining 2800 feet MSL to a point 38 nautical miles out on the Neosho, Missouri VOR 013° radial, then climb so as to reach 3500 feet MSL by a point 32 nautical miles out on the Neosho, Missouri VOR 004° radial, to start a climb to 4700 feet MSL three miles north of the Joplin, Missouri low frequency beacon (Waco intersection) and cross the target at 4700 feet MSL.

"Long Look" missions will start a climb at a point 25 nautical miles out on the Springfield VOR 300° radial to a predetermined altitude, above the RBS site as filed in the flight plan. This altitude will never exceed 20,000 feet MSL.



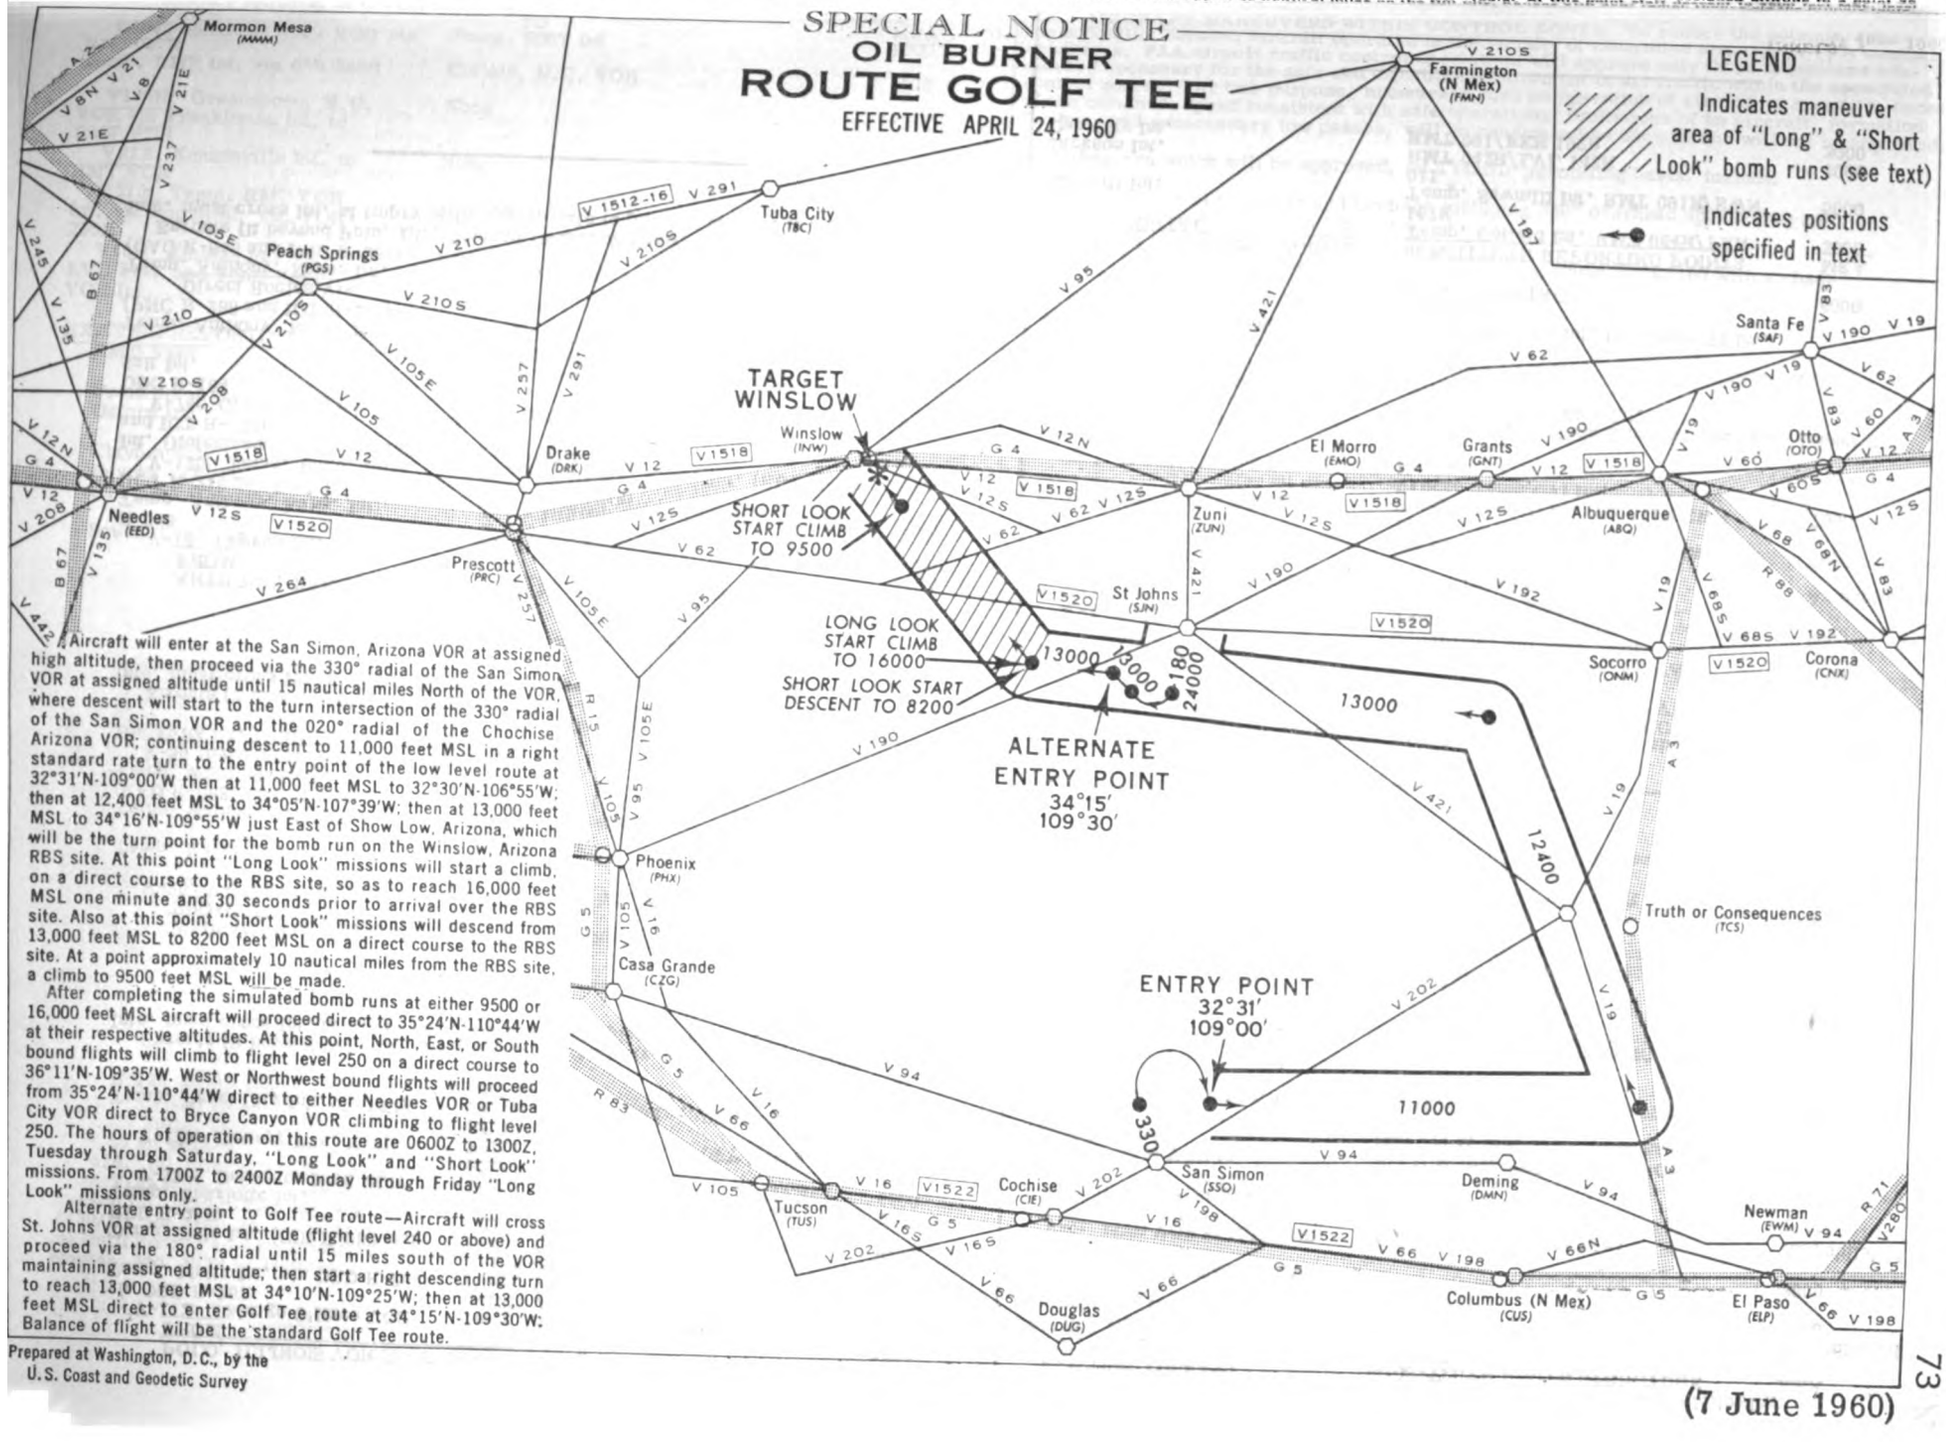
After completing the simulated bomb runs, both "Short Look" and "Long Look" missions will proceed to Bartlesville, Oklahoma VOR, maintaining bombing altitude. Normally aircraft will be routed by ATC via the Tulsa, Oklahoma VOR.

The hours of operation on this route are 0200Z to 1400Z Tuesday through Saturday.

Alternate Entry Point-Aircraft will enter at Vichy, Missouri, VOR at or above 20,000 feet MSL, then proceed via the 249° radial of the Vichy VOR at 20,000 feet MSL or above to a point 15 nautical miles southwest of Vichy VOR where descent will start to 2,800 feet MSL, reaching 2,800 feet MSL at a point 46 nautical miles out on the 034° radial of the Springfield, Missouri, VOR thence via the 249° radial of Vichy VOR to a point 27 nautical miles out on the 352° radial of the Springfield VOR at 37°48′30″N-93°20′W thence continue on Flat Rock route.

Prepared at Washington, D.C. by
U. S. Coast and Geodetic Survey

SPECIAL NOTICE



Aircraft will enter at St. Joseph, Missouri VOR at flight level 240 or above; then proceed via the 293° radial of the St. Joseph VOR at flight level 240 or above to 40°06'N-95°14'W; then descend direct to 39°43'N-97°30'W to reach 3200 feet MSL prior to 40°00'N-96°00'W, then proceed direct to 39°43'N-97°30'W, then climb to 6000 feet MSL for a "Short Look" mission at 39°41'N-97°41'W; then descend to 2900 feet MSL direct to 39°35'N-98°18'W; then climb to 3800 feet MSL to 38°44'N-100°22'W; then climb to 4500 feet MSL to 39°11'N-101°00'W; then direct at 4500 feet MSL to 40°08'N-100°06'W. At this point "Long Look" missions will descend to and maintain 3800 feet MSL until reaching 40°17'N-99°30'W where climb to bombing altitude of 17,500 feet MSL begins. "Short Look" missions will descend to 3800 feet MSL at 40°08'N-100°06'W, and proceed at 3800 feet MSL to 40°28'N-98°35'W; then climb so as to cross 40°29'N-98°26'W at 6000 feet MSL; then continue at 6000 feet MSL for bomb run. After completing the simulated bomb runs over the RBS site approximately 5 miles east of Hastings, Nebraska, "Long Look" missions will maintain heading for two minutes; then make a climbing right turn to 20,000 feet MSL to intercept the Grand Island VOR 180° radial at 20,000 feet MSL; then maintain 20,000 feet MSL direct to Grand Island VOR; then direct to Wolbach, Nebraska VOR. "Short Look" missions, after passing the RBS site, will maintain an easterly heading for two minutes and then start a right climbing turn to 8000 feet MSL to intercept the Grand Island VOR 180° radial; then proceed direct to Grand Island VOR; then direct to Wolbach, Nebraska VOR maintaining 8000 feet MSL. Enroute clearance will then be received from Denver ARTC Center. The hours of operation on this route are 0000Z to 1400Z Tuesday through Saturday.

Alternate entry point to Clear View route—Aircraft will enter at Goodland, Kansas VOR at 23,000 feet MSL; then proceed via the 047° radial of the Goodland VOR at 23,000 feet MSL or assigned altitude to a point 35 nautical miles Northeast on the Goodland VOR 047° radial. At this point start descent to 4500 feet MSL, level off at or before a point 52 nautical miles on the Hill City, Kansas VOR 358° radial; thence via the primary route.

Prepared at Washington, D.C., by the U. S. Coast and Geodetic Survey

(7 June 1960)

SPECIAL NOTICE
OIL BURNER
ROUTE GOLF TEE
EFFECTIVE APRIL 24, 1960

Aircraft will enter at the San Simon, Arizona VOR at assigned high altitude, then proceed via the 330° radial of the San Simon VOR at assigned altitude until 15 nautical miles North of the VOR, where descent will start to the turn intersection of the 330° radial of the San Simon VOR and the 020° radial of the Chochise Arizona VOR; continuing descent to 11,000 feet MSL in a right standard rate turn to the entry point of the low level route at 32°31′N-109°00′W then at 11,000 feet MSL to 32°30′N-106°55′W; then at 12,400 feet MSL to 34°05′N-107°39′W; then at 13,000 feet MSL to 34°16′N-109°55′W just East of Show Low, Arizona, which will be the turn point for the bomb run on the Winslow, Arizona RBS site. At this point "Long Look" missions will start a climb, on a direct course to the RBS site, so as to reach 16,000 feet MSL one minute and 30 seconds prior to arrival over the RBS site. Also at this point "Short Look" missions will descend from 13,000 feet MSL to 8200 feet MSL on a direct course to the RBS site. At a point approximately 10 nautical miles from the RBS site, a climb to 9500 feet MSL will be made.

After completing the simulated bomb runs at either 9500 or 16,000 feet MSL aircraft will proceed direct to 35°24′N-110°44′W at their respective altitudes. At this point, North, East, or South bound flights will climb to flight level 250 on a direct course to 36°11′N-109°35′W. West or Northwest bound flights will proceed from 35°24′N-110°44′W direct to either Needles VOR or Tuba City VOR direct to Bryce Canyon VOR climbing to flight level 250. The hours of operation on this route are 0600Z to 1300Z, Tuesday through Saturday, "Long Look" and "Short Look" missions. From 1700Z to 2400Z Monday through Friday "Long Look" missions only.

Alternate entry point to Golf Tee route—Aircraft will cross St. Johns VOR at assigned altitude (flight level 240 or above) and proceed via the 180° radial until 15 miles south of the VOR maintaining assigned altitude; then start a right descending turn to reach 13,000 feet MSL at 34°10′N-109°25′W; then at 13,000 feet MSL direct to enter Golf Tee route at 34°15′N-109°30′W; Balance of flight will be the standard Golf Tee route.

IOWA CITY, IOWA VOR SHUT DOWN: During shutdown use the following:

FROM	TO	MEA
V-6, V-8: New Sharon Int. via DSM R-079	Temp, Iowa City, Iowa Int. (CID R-154, DSM R-079, CVA R-255)	7000
Temp. Iowa City, Iowa Int. via CVA R-255	Cordova VOR	4000
V-38: Temp. Iowa City, Iowa Int. CID R-154 and MLI R-280	Buffalo Int. Via MLI R-280	2500
V-216: Richland, Iowa Int. via OTM R-042	Temp. Iowa City, Iowa Int. (OTM R-042 and CID R-154)	2500

Enroute flt beyond Polo, Ill, Wausau, Wis, Anthony, Kans. and Iowa City, Iowa tmpry Ints must cross Int at tmpry MRA appropriate to planned route of flt.

✓ MEA, MCA, MOCA, MRA, INTERSECTIONS AND REPORTING POINTS: (1) Until further advised effective immediately the MEA on V-25 from Red Bluff, Calif VORTAC to Klamath Falls, Oregon VORTAC is 13,500 feet and MOCA is 10,000 feet. (2) Effective 6/30/60 an MRA of 3000 feet is established at Plain City Int., Ohio on V-12, V-1512 and V-1514. (3) Effective 6/30/60 the following MEAs are established: V-1504, Big Piney, Wyo. VOR to Hudson Int., Wyo MEA 16,000 feet, MCA 12,500 feet Big Piney VOR, W-bound Hudson Int, Wyo to Casper, Wyo VOR MEA 13,000 feet, MOCA 10,000 feet. (4) Effective 6/30/60, the MEA on V-55E from Dayton, Ohio VOR to Ft. Wayne, Ind VORTAC is 2300 feet. (5) Until further advised effective immediately the MOCA on V-72 from Dogwood, Mo. VOR to Maples, Mo. VOR is 2900 feet.

✓ AIRCRAFT MANEUVERS WITHIN CONTROL ZONES: To reduce the potential for in-flight conflict between aircraft operated in the vicinity of controlled airports in VFR weather conditions, FAA airport traffic control specialists will approve only those maneuvers considered necessary for the safe and expeditious movement of air traffic within the associated control zones. For this purpose, maneuvers such as operation of aircraft at speeds in excess of the minimum speed consistent with safe operational limitations of an aircraft, formation fly-bys, and unnecessary low passes, will be considered as unusual and will not be approved.

Maneuvers which will be approved, on a traffic permitting basis, include:

1. Normal take-offs and landings including 360° overhead approaches and those conducted in formation.
2. Practice instrument approaches including those conducted with a chase plane.
3. Touch-and-go landings.
4. Flight check activities such as short field take-offs and landings, engine out operations, checking of navigational aids, etc.
5. Simulated forced landing patterns including practice flame-out maneuvers.
6. Low passes for prearranged aircraft test or calibration purposes and visual equipment checks, such as gear checks, provided the flights are not conducted at an excessive speed.
7. Jettisoning of fuel tanks or other external stores.

✓ FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual Volume 13 dated December 1959, as follows:

Radiated Test Signals:

FAA and WB Telephone Numbers:
(1) Page 36, Tuscon, Arizona - change WB telephone number to: AX 4-2522*.
(2) Page 36, Fort Smith, Arkansas - change FAA telephone number to: MIssion 6-1791 and WB telephone number to: MIssion 6-5731*.
(3) Page 37, Fort Wayne, Indiana - change FAA telephone number to: SH 2644.
(4) Page 38, Gladwin, Michigan - change FAA telephone number to: GArden 6-9441.
(5) Page 38, Meridian, Mississippi - change WB telephone number to: 48-33725 and FAA telephone number to: 48-21243.
(6) Page 39, Reading, Pennsylvania - change WB telephone number to: FRanklin 6-4103*.
(7) Page 40, Lufkin, Texas - change FAA telephone number to: NE 4-3544.

Flight Test Area:
(1) Page 116 - Wichita (Municipal, Beech, Cessna Arpts & McConnell AFB) Flight Test Area - change expiration date to: April 15, 1961.

IMPORTANT NOTICE - NEW FREQUENCY ASSIGNMENTS

Commensurate with FAA's efforts to improve the overall air traffic control communications system and to relieve congestion on the existing communications channels, an additional five megacycles of spectrum space is being made available to the aeronautical user effective July 1, 1960. In order to obtain maximum utilization of these additional radio frequencies, FAA is initiating a program of new frequency assignments within the band 118-135 MC/S at 0800 GMT on July 7, 1960.

This implementation invloves several hundred frequency changes throughout the United States, not including Alaska and Hawaii. To facilitate the users' transition to the new frequencies and to provide the greatest advance notice of the specific changes, we are presenting the following tabulation in terms of location, traffic control function, new frequency to be activated July 7, 1960, and existing frequency. Further, note also that many frequencies now assigned (shown in the "old frequency" column) have either been changed or will serve a different function.

LEGEND: H - High Altitude 24,000' and above
I - Non-Radar Sectors 23,000' and below
Ir - Radar Sectors 23,000' and below
A - Center Area Discrete 23,000' and below

(7 June 1960)

B-66 GUST SURVEY PROGRAM: Beginning on or after February 25, 1960, and terminating on or before June 30, 1960, the Douglas Aircraft Company will conduct an aircraft structural survey program. Flight operations will be conducted in a B-66 type aircraft, with USAF identification markings, at altitudes of 200, 600 and 1,000 feet above the surface, during daylight hours only and when the visibility is 5 miles or greater and the ceiling is 3,000 feet or greater.

Unless otherwise noted, all tracks will be flown at 360 knots true airspeed or less and will be approximately 30 nautical miles in length. FAA Flight Service Stations, within whose advisory service area a "gust survey" track exists will, prior to each flight, broadcast information that "B-66 Gust Survey" operations are in progress and the specific tracks to be flown will be enumerated. NOTAM's specifying date, time, place and duration of the operations will be disseminated.

During any special flight activities which require preoccupation by the pilot with cockpit duties that would prevent adequate vigilance outside the cockpit, competent observers in the aircraft, a chase aircraft or other equivalent arrangement will be provided and maintained to insure adequate vigilance for other aircraft.

Tracks to be flown by base of operations are listed below:

Kirtland Air Force Base, New Mexico

Track No.	Location Lat.	Location Long.	Description from Sectional Chart
11A	32-51-05 33-19-25	105-35-00 105-47-15	3 miles from Sacramento Lookout Sta. to 3.25 miles from Sierra Blanca Pk. (12003').
11B	32-54-00 33-20-00	105-51-00 105-38-00	Rotated 49° clockwise with respect to Track 11A.
22A	38-00-00 38-22-00	106-44-00 106-17-45	7 miles from 13725' Pk. near Halfmoon Pass to 4.5 miles from Ouray Pk. (13955)
22B	37-56-00 38-21-00	106-22-00 106-43-00	Rotated 102° clockwise with respect to Track 22A.
52	36-40-00 36-10-05	108-40-35 108-35-50	6 miles from Shiprock Airport to about 5.5 miles ENE of Sheep Springs.
62	37-31-35 38-00-00	105-53-50 106-06-15	4 miles from Alamosa to 5.5 miles from Saguache.
71	34-29-15 34-51-00	105-02-40 105-39-00	Over Joffre (11 miles SE of Vaughan) to 6 miles SSE of Santa Rosa.

Shaw Air Force Base, South Carolina

Track No.	Location Lat.	Location Long.	Description from Sectional Chart
11	35-02-30 34-46-30	82-41-00 83-13-30	7 miles WNW of Brevard south of Tower to 6 miles NNE of Clayton.
21	35-15-20 34-57-00	82-51-00 83-20-00	From 9 miles north of Pickens to 8 miles west of Walhalla.
31	33-55-00 33-52-30	78-01-00 78-36-30	From southern edge of Southport on heading to Conway, to 4 miles NE of Crescent Beach.
41	33-45-20 33-42-30	78-01-00 78-36-40	From 9 miles south of Cape Fear River outlet to 15 miles east of Myrtle Beach.
61	34-31-30 34-02-00	80-32-30 80-34-00	From 2 miles SE of Kershaw to 7 miles NW of Shaw AFB.
81	34-07-40 34-10-30	77-57-40 78-33-30	From 3 miles south of Wilmington on W bank of Cape Fear river to 6 miles SSW of Lake Waccamaw.

Edwards Air Force Base, California

Track No.	Location Lat.	Location Long.	Description from Sectional Chart
11	34-32-00 34-52-30	119-23-00 119-49-35	From 8 miles NW of Meiners Oaks to 7 miles SW of New Cuyama in San Rafael Mts.
23	36-19-40 36-20-00	118-04-50 118-42-25	From about 3 miles W of Cartago to about 3.25 miles SSW of Calhoun Pk. in Sierra Nevada range
23B	36-10-00 36-29-00	118-12-00 118-40-00	From 4 miles NW of Craig Pk to 2 miles E of Paradise Pk. in Sierra, Nevada range.
32	34-03-00 33-58-30	120-30-00 119-54-25	From 3.5 miles W of San Miguel I to about 3.75 miles beyond Santa Rosa I.
44	33-15-45 32-45-25	118-21-15 118-20-20	9 miles S of Long Pt. light to 4 miles S of Pyramid Head light.
51	35-04-00 35-10-00	117-19-00 117-56-00	From California City to the western tip of Harpers Dry Lake.
63	35-40-45 36-08-50	119-43-10 119-57-20	3.5 miles from Lost Hills Kern Co. Airport to about 4 miles WNW of Westlake Farms Airport.

Gust Plus Maneuver Round-Robin Flight (Edwards AFB)

Leg. No.	Distance (Nautical Miles)	Maximum S Speed (KTAS)	Description from Sectional Chart
1	50	340	From Edwards AFB to 10 miles NE of the Fillmore Omni.
2	15	500	From 7 miles SW of the Oxnard Rdo Bcn to the eastern point of Santa Cruz Island
3.	43	420	From the eastern point of Santa Cruz Island to the western point of San Miguel I.
4.	20	500	From the western point of San Miguel Island to 15 miles SW of Gaviota Omni.
5.	50	500	From 15 miles NW of the Gaviota Omni to 6 miles W of the Belridge (pvt.) Airport, and
	40	360	From 6 miles W of the Belridge (pvt.) Airport, via a point 5 miles W of the Lost Hills Airport to 7 miles E of Avenal Airport.
6.	70	340	From 10 miles east of Porterville to 10 miles S of Bishop.
7.	51	420	From 10 miles S of Bishop to the center of Owens Lake.
8.	88	260	From the center of Owens Lake to the Edwards AFB.

60. Flight between legs will be conducted in accordance with the Civil Air Regulations, Part 60. During the low-level operations, all airports will be avoided by 3 miles or more.

(Continued)

Patterson Air Force Base, Ohio

Track No.	Location Lat.	Location Long.	Description from Sectional Chart
61	39-52-40 39-27-00	83-18-45 82-58-25	Over London reporting point to crossing of route 23, 7 miles north of Chillicothe.
91	39-06-00 39-36-30	84-03-00 84-03-00	3 miles N of Williamsburg to 2 miles W of Spring Valley.
101	39-02-10 39-03-50	83-02-40 83-41-15	Crossing of Scioto River 1 mile SE of Jasper to intersection of route 62.
41	41-34-40 41-49-00	82-52-00 83-27-00	10 miles NW of Sandusky over tip of Lake Erie to point 14 miles west of Carleton omni.

RADAR - On page 30 of Flight Information Manual Volume 13, dated December 1959, add subtopic No-Gyro Vector or Approach - Aircraft Under Radar Control: A pilot under radar control will occasionally experience circumstances wherein his directional gyro or other stabilized compass is inoperative or inaccurate. When this occurs, he should so advise air traffic control and request a no-gyro vector or approach. Pilots of aircraft not equipped with a directional gyro or other stabilized compass who desire radar handling may also request a no-gyro vector or approach. Prior to commencing such vector/approach the pilot will be advised to make all turns at standard rate, and that turn instructions should be executed immediately upon receipt. For example, "Turn Right"; "Stop Turn." When a surveillance or precision approach is made the pilot will be advised after his aircraft has been turned onto final approach to make turns at half standard rate.

GOOD OPERATING PRACTICES-IFR RADAR DEPARTURE SERVICE AVAILABLE- On page 53 of Flight Information Manual Volume 13 dated December 1959, delete paragraph 12.

RADAR WEATHER ADVISORY SERVICE- On pages 31 and 32 of Flight Information Manual Volume 13 dated December 1959, under Radar Advisory Service Air Defense Command delete listings under Michigan, Oregon and Washington.

ILS SENSITIVITY ADJUSTMENTS: At a number of facilities in the United States, ILS localizer course width will be reduced from 5 degrees to 4 degrees in the near future. Individual facility NOTAM's will be published as these changes occur.

NEW AIR TRAFFIC CONTROL ADVISORY SERVICE: IFR aircraft operating in accordance with an ATC authorized cruising level of VFR conditions-on-top are required by CAR 60.44 to be flown at the altitudes/flight levels specified in CAR 60.32 for VFR flight. Noncompliance by pilots with the cruising level requirements of CAR 60 compromises intended segregation between aircraft operating at VFR and IFR altitudes/flight levels. Beginning April 5, 1960, pilots of IFR aircraft operating in accordance with an air traffic control authorized cruising level of VFR conditions-on-top and reporting at an altitude/flight level incorrect for direction of flight will be advised by air traffic control facilities of the appropriate level/s for direction of flight. Controllers will provide this advisory service on a "workload permitting" basis. The provision, or lack of provision of this service should not be construed to relieve or diminish pilot responsibility for operation at the correct altitudes/flight levels for direction of flight.

NAVIGATIONAL WARNING: The following are low level "FAIRBALL" routes used by the USAF when conducting low level navigation flights in jet aircraft at 500 to 2,000 feet above the terrain. At the termination of the low level flight, aircraft will climb to altitudes between 14,000 to 20,000 feet MSL. Aircraft will fly hemispheric rules. Flights will be operated at random intervals and under VFR conditions during daylight hours only.

Route 2-J-2: Start at 43-22-30N, 94-04-00W, (entry-call Mason City Radio), 43-28N, 91-00W, 42-21N, 90-54-30W; 40-25N, 92-07-30W; 40-22N, 92-31W(end nav. leg) to target 40-14N, 93-36W. Note: for a bomb run only, entry reporting will be 41-00N, 91-45W(call Ottumwa Radio); remainder of route is identical with above.

Route 2-K-1: Start at 31-00N, 95-04W (entry-call Lufkin Radio), 31-55N, 95-24; 31-52N, 97-23W; 32-02N, 98-24W; 32-53N, 98-40W; 34-51N, 98-55W;(end nav. leg), terminate operations over Chickasha, Okla. Note: for a bomb run only, entry reporting point will be 34-00 N, 98-48W (call-Wichita Falls Radio); remainder of route is identical with above.

Route 2-M-1: Start at 31-45N, 91-49W (entry-call Alexandria Radio), 31-35N, 94-20W; 34-00N, 95-02W; 34-27N, 94-38W; 34-35N, 93-20W(end nav. leg), to target-Little Rock. Note: for a bomb run only, entry reporting point will be 34-27N, 94-38W, (call-Fort Smith Radio), remainder of route is identical with above.

Route 2-P-1: Start at 39-11N, 86-52W (entry-call Terre Haute Radio), 38-02N, 86-31W; 38-18N, 87-55W; 39-23N, 90-37W; 38-52N, 92-18W (end nav. leg). 38-44N, 92-44W; start climb to target-Clinton, Mo. Note: for a bomb run only, entry reporting point will be 38-52N, 92-18W (call-Columbia Radio), remainder of route is identical with above.

Route 2-R-2: Start at 35-38N, 99-11W; to start climb point 36-12N, 98-14W; to termination 36-45N, 98-11W. Entry reporting point- Sayre Radio.

Route 2-R-3: Start at 36-22N, 92-14W; to 36-26N, 93-50W Entry reporting point-Springfield Radio.

Route 2-S-1: Start at 29-29, 91-46, (entry reporting point-Baton Rouge VOR); to turning point 28-00, 91-30; to turning point 27-00, 92-30; to turning point 27-50, 94-00; to navigation termination point, bomb run entry point, and LONG LOOK start climb (if applicable) 27-50, 95-45; to SHORT LOOK start climb (if applicable) 28-11, 96-34; to target at Matagorda Island 28-13-30, 96-39-00. After bombs away, proceed to 28-21-30, 96-42-00, then right turn to Palacios VOR. On SHORT LOOK mission do not exceed 5000' MSL until past Port O'Connor, Texas. On LONG LOOK do not descend below 18,000' MSL until past Port O'Connor, Texas.

Route 2-T-1: Start at 42-00N, 96-12W; to target 42-51N, 97-29W. (Entry reporting point-Sioux City Radio).

Route 2-T-2: Start at 42-30N, 97-49W to target 41-26.5N, 96-36W. (Entry reporting point Point-O'Neil Radio).

Route 8-P-1: Start at 43-42N, 69-50W; terminate at 44-20N, 68-04W.

Route 8-P-2: Start at 43-42N, 69-50W; 43-53N, 69-07W; terminate at 44-20N, 68-04W.

Route 8-R-1: Start at 18-05N, 67-54W; 17-56N, 67-11W; 17-56N, 66-18W; 18-00N, 66-00W. Entry reporting point San Juan ARTCC.

Route 15-A-1: Cross Salt Flat VOR at flight altitude (entry point - Call Salt Flat Radio), descend to start low level 30-50N, 103-00W; 30-10N, 102-10W; 30-30N, 100-05W; 32-00N, 99-15W; 33-05N, 99-30W; 34-25N, 100-30W. Start climb 34-39N, 100-56W; level off 35-01N, 101-33W, target Amarillo.

Route 15 - A - 3: Cross Douglas VOR at flight altitude (entry point - Call Douglas Radio), descend to start low level 43-00N, 103-00W; 41-30N, 101-30W; 39-25N, 102-10W; 38-00N, 101-40W, 36-00N, 100-45W. Start climb 35-50N, 101-00W; level off 35-25N, 101-36W, target Amarillo.

Route 15-B-2: Cross Peach Springs VOR at flight altitude (entry point-Call Las Vegas Radio), descend to start low level 37-07N, 114-30W; 38-45N, 116-30W; 39-40N, 115-10W; 41-00N, 114-50W; 42-10N, 113-55W; 43-10N, 114-25W. Start climb 43-18N, 115-02W; level off 43-30N, 115-52W, target Boise.

Route 15-C-1: Start descent Reno VOR, entry point 40-11N, 121-05W. Start climb 40-47N, 121-04W, target 41-55N, 121-04W.

Route 15-D-2: Entry at 32-37N, 102-37W to target at 32-34N, 101-08W.

Route 15-D-3: Start descent at Hudspeth VOR, Texas to start low level point at 31-08N, 105-10W to start climb at 30-48N, 104-46W to target at 30-18N, 104-02W.

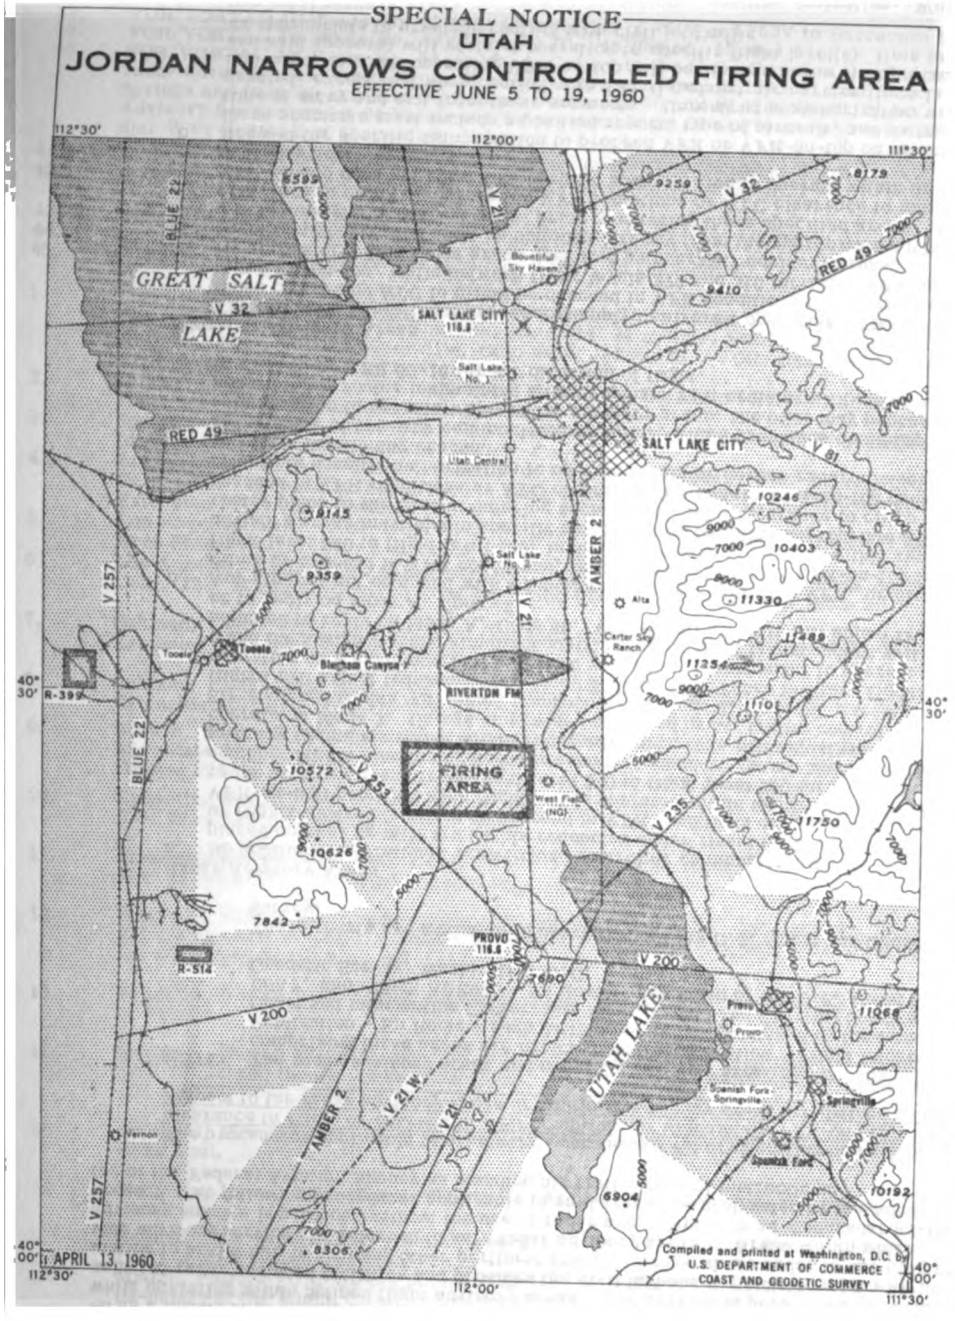
Route 15-E-1: Start descent 44-28N, 100-40W, entry point 44-34 1/2N, 101-30W. Start climb 44-43N, 103-28W, target 44-44 1/2N, 103-36W.

Route 15-F-1: Fairchild Air Force Base to 47-26N, 118-16W, target 47-52N, 119-07W.

Route 15-G-1: Cross Ukiah, California VOR at flight altitude (entry point) - (Call Ukiah Radio), descend to start low level 39-06N, 124-17W to 39-08N, 124-45W; 40-24N, 125-29W; 42-20N, 125-35W; 43-08N, 126-00W to climb point 43-32N, 124-48W to start climb for Long Look at 43-43N, 124-17W or to start climb for Short Look at 43-54N, 123-20W to target 43-58N, 123-05W, S of Eugene, Oregon.

Route 15-H-1: Entry at 43-21N, 117-18W to 42-24-30N, 118-36W.

Route 15-H-2: Entry at 42-31N, 120-14W to 42-44N, 119-38W to 43-34N, 118-12W.



Route 15-M-2: 36-18 1/2N, 121-54W to target, 35-19N, 120-52W, to target 36-18 1/2N, 121-54W. Route will be flown in both directions.

Route 15-R-1: Entry at 33-00N, 103-00W; to 34-00N, 102-28W; to target at 34-38-30N, 102-43W.

Route 15-T-1: Entry at 32-58N, 111-23W; to 32-54N, 109-50W.

(7 June 1960)

SPECIAL NOTICE
UTAH
JORDAN NARROWS CONTROLLED FIRING AREA

Temporary Controlled Firing Area – Jordan Narrows, Utah

Firing to cease upon approach of aircraft over firing area

Designated Altitude – Surface to 15,000 ft. above terrain.

Time of use – Sunrise to sunset only during period of June 5-19, 1960 inclusive

Activity – Artillery firing

Using Agency – Utah National Guard

Firing to be conducted in accordance with the following:

1. Visual surveillance will be continuously maintained over the entire area by safety officers during firing operations to detect approaching aircraft and communication will be established with gun positions to order cessation of firing upon the approach of aircraft.
2. Firing will be conducted only when there are no clouds below 16,000 ft. greater than 2/10 coverage and when visibility is at least 10 miles.
3. No projectile shall enter or pass through any clouds.
4. All firing to be conducted to the west.
5. Radar surveillance of the Jordan Narrows Valley will be provided during all periods of firing.

(7 June 1960)

FLIGHT ADVISORY SERVICE IN SPECIFIED AREAS: This service has been established as a means of providing an increased degree of safety for civil turbojet air carrier flights while operating within defined flight advisory areas. The service is performed by certain selected radar equipped facilities and provides the civil turbojet air carrier pilot with information to assist him in avoiding other pertinent traffic. Areas where radar is used to provide advisory service are referred to as "radar advisory areas." Areas within which advisory service is provided without the use of radar are referred to as "nonradar advisory areas." The following procedures applicable to said areas are designated by the Administrator of the Federal Aviation Agency as standing air traffic control instructions:

A. The procedures applicable to all aircraft operating VFR or operating on an ATC clearance to climb or descend in VFR conditions or to maintain VFR-on-top with respect to the radar advisory areas or nonradar advisory areas are defined as follows:

NOTE: The radar advisory areas and nonradar advisory areas and the flight levels comprising these areas are depicted on charts entitled "Flight Information Publication - En Route - High Altitude (U.S.)," published by the Aeronautical Chart and Information Center, Air Photographic and Charting Service(MATS) USAF, and "High Altitude - En Route " published by the U.S. Coast and Geodetic Survey, Washington, D.C.

These charts are available to users through the U.S. Coast and Geodetic Survey.

1. Radar Advisory Areas
   a. No additional operational restriction, control or communication requirement is placed on civil or military flights conducted under visual flight rules (VFR flights or flights cleared to climb or descend in VFR conditions or cleared to maintain VFR-on-top) provided such flights when operated within the areas specified as radar advisory areas from flight level 240 to flight level 390 inclusive are equipped with a functioning radar beacon transponder. Basic Mark X equipped military flights operating within radar advisory areas will adjust transponders to operate on Mode 3. Unless otherwise instructed by air traffic control, Mark X SIF equipped flights will adjust transponder to Mode 3, Code 62, except that ADC flights will adjust transponder to Mode 3, Code 00. Those military flights operating on a mode other than Mode 3 will adjust transponder to operate on Mode 3 and the assigned mode simultaneously. Civil turbojet transponders will be adjusted to reply on Mode A, Code **40**. Other civil aircraft will adjust transponder to reply on Mode A, Code 62.
   b. Any aircraft not equipped with a functioning beacon operating VFR, or cleared to climb or descend in VFR conditions, or cleared to maintain VFR-on-top from flight level 240 to flight level 390, inclusive desiring to operate within radar advisory areas must obtain specific authorization from the appropriate ARTC center prior to the time of entering such areas. ATC clearance to climb or descend in VFR conditions or ATC clearance to maintain VFR-on-top does not constitute specific authorization to operate within or across radar advisory areas without a functioning beacon.
   c. In the event of two-way communications failure which precludes obtaining authorization to operate within radar advisory areas, the pilot may proceed across these routes maintaining an appropriate VFR cruising altitude as specified in CAR 60 or AFR 60-16 for the direction of flight.

2. Nonradar Advisory Areas
   The following operational procedures apply to aircraft operating VFR, as well as those cleared by ATC to climb or descend in VFR conditions or cleared to maintain VFR-on-top, while between flight levels 270 and 310 inclusive with desire to fly across or within those areas specified as nonradar advisory areas.
   a. Specific authorization must be obtained directly from the appropriate ARTC center or through the nearest FSS prior to entering these specified areas. ATC clearance to climb or descend in VFR conditions or ATC clearance to maintain VFR-on-top does not constitute specific authorization to operate within or across nonradar advisory areas.
   b. Request for specific authorization to proceed VFR or VFR-on-top on or across these segments must include a position report, type of aircraft, and estimated time of entry and exit from these segments. Unrestricted authorization will be granted, except that when conflict with a civil turbojet air carrier flight is indicated, aircraft operating VFR-on-top will be advised of the civil jet traffic and said approval will restrict operation to specific flight level(s), time or place as appropriate to preclude conflict with civil jet traffic.

B. These services should not be considered as providing positive separation. Within the limitation of the service, civil turbojet air carrier aircraft will be provided with traffic information and radar vectors to avoid observed traffic. Consequently, these services do not relieve pilots of their responsibilities to see and avoid other aircraft.

C. Radio and radar failure procedures applicable to civil air carrier turbojet flights while operating within radar advisory areas follow:

1. In the event of a ground radar failure the pilot will continue in accordance with ATC clearance remaining on the facility's frequency unless otherwise advised;
2. In the event of loss of communication with a USAF(ADC) radar facility on the designated control frequency the pilot should attempt to re-establish communication with the facility on 121.5 mc. If unable, he should utilize either direct center frequency, the nearest FSS, or company radio.

The above procedures are applicable to the following jet routes and areas:

1. VOR/VORTAC Jet Route No. 1 (Los Angeles, Calif., to Seattle, Washington)
2. VOR/VORTAC Jet Route No. 2 (Houston, Texas to Lake Charles, La.) (Houston, Texas to New Orleans, La. Effective 5 May 1960.)
3. VOR/VORTAC Jet Route No. 3 (Oakland, Calif., to Spokane, Wash.)
4. VOR/VORTAC Jet Route No. 4 (Los Angeles, Calif., to Phoenix, Ariz.
5. VOR/VORTAC Jet Route No. 8 (Tulsa, Okla., to New York, N.Y.)
6. VOR/VORTAC Jet Route No. 12 (Baltimore, Md., to Pittsburgh, Pa.)
7. VOR/VORTAC Jet Route No. 14 (Cleveland, Ohio to Idlewild, N.Y..
8. VOR/VORTAC Jet Route No. 16 (Portland, Ore., to Pullman, Mich.,; Albany, N.Y. to Boston, Mass.) Nonradar advisory area from 60 nmi W of Dillon, Mont., VOR to 90 nmi E of Dillon.
9. VOR/VORTAC Jet Route No. 21 (Omaha, Neb., to Duluth, Minn.) (Dallas, Tex., to San Antonio, Tex.)
10. VOR/VORTAC Jet Route No. 22 (Lake Charles, La.,to intersection with J55V).
11. VOR/VORTAC Jet Route No. 24 (Phoenix, Ariz., to Albuquerque, N.M.)
12. VOR/VORTAC Jet Route No. 25 (Dallas, Tex., to Tulsa, Okla.)
13. VOR/VORTAC Jet Route No. 26 (Amarillo, Tex., to Appleton, Ohio.)
14. VOR/VORTAC Jet Route No. 29 (Houston, Tex., to Memphis, Tenn.)
15. VOR/VORTAC Jet Route No. 31 (Dallas, Tex., to Chicago, Ill.)
16. VOR/VORTAC Jet Route No. 33 (Shreveport, La., to the Int. with J31V and Kansas City, Mo., to Des Moines, Iowa.)
17. VOR/VORTAC Jet Route No. 34 (Cleveland, Ohio to Pittsburgh, Pa.)
18. VOR/VORTAC Jet Route No. 35 (New Orleans, La., to St. Louis, Mo.)
19. VOR/VORTAC Jet Route No. 37 (New Orleans, La., to Spartanburg, S.C.)
20. VOR/VORTAC Jet Route No. 42 (Dallas, Tex., to New York, N.Y.)
21. VOR/VORTAC Jet Route No. 45 (Alma, Ga., to St. Louis, Mo.)
22. VOR/VORTAC Jet Route No. 49 (Alma, Ga., to Spartanburg, S.C.)
23. VOR/VORTAC Jet Route No. 52 (Dallas, Tex., to Atlanta, Ga.) via Texarkana, Ark., VOR; Greenwood, Miss., VOR; Birmingham, Ala., VOR. (Dallas, Tex-Birmingham, Ala., extension to J52V.
24. VOR/VORTAC Jet Route No. 53 (Miami, Fla., to the Int. of J53V and J81V;Spartanburg,S.C., to Pittsburgh, Pa.)
25. VOR/VORTAC Jet Route No. 55 (From the intersection with J22V to Kenton, Del.)
26. VOR/VORTAC Jet Route No. 58 (San Francisco, Calif., to New Orleans, La.) Nonradar advisory area from 20 nmi W of Pioche, Nev., VOR to 90 nmi SE of Alamosa, Colo., VOR.)
27. VOR/VORTAC Jet Route No. 60 (Los Angeles, Calif., to New York, N.Y.) Nonradar advisory area from 25 nmi SW of Bryce Canyon, Utah VOR to 70 mi WSW of Denver, Colo., and from 120 nmi ENE of Denver, Colo., VOR to 50 nmi WSW of Wolbach, Neb., VOR.
28. VOR/VORTAC Jet Route No. 62 (Idlewild, N.Y., to Nantucket VOR.)
29. VOR/VORTAC Jet Route No. 64 (Los Angeles, Calif., to Chicago, Ill.) Nonradar advisory area from 20 nmi SW of Alamosa, Colo., VOR to 25 nmi SW of Hill City, Kansas VOR.
30. VOR/VORTAC Jet Route No. 67 (Idlewild, N.Y., to U.S.-Canadian Border.)
31. VOR/VORTAC Jet Route No. 69 (Spartanburg, S.C., to Gordonsville, Va.)
32. VOR/VORTAC Jet Route No. 71 (Appleton, Ohio to Front Royal, Va.
33. VOR/VORTAC Jet Route No. 75 (Miami, Fla., to U.S.-Canadian Border)
34. VOR/VORTAC Jet Route No. 77 (Miami, Fla., to U.S.-Canadian Border)
35. VOR/VORTAC Jet Route No. 78 (Los Angeles, Calif., to New York, N.Y.)

(7 June 1960)

36. VOR VORTAC Jet Route No. 79 (Miami, Fla., to Idlewild, N. Y.)
37. VOR/VORTAC Jet Route No. 80 (Denver, Colo., to New York, N. Y.) Nonradar advisory area that portion of JR-80 from 120 nmi ESE of Denver, Colo., VOR to 25 nmi W of Hill City, Kansas VOR.
38. VOR/VORTAC Jet Route No. 81 (The intersection of J81V and J53V to Barracuda Int.)
39. VOR/VORTAC Jet Route No. 82 (Chicago, Ill., to Boston, Mass.)
40. VOR/VORTAC Jet Route No. 84 (Oakland, Calif., to the U. S. -Canadian Border) nonradar advisory areas from 50 nmi E of Rock Springs, Wyo. to 150 nmi E of Rock Springs and from 40 nmi E of Scottsbluff, Nebr., to 50 nmi W of Wolbach, Nebr. Advisory Service on Jet 84 Victor will be provided flight level 270 and above from 100 nmi W to 40 nmi E of Scottsbluff, Nebr.
41. VOR/VORTAC Jet Route No. 85 (Miami, Fla., to the U.S.-Canadian Border.)
42. VOR/VORTAC Jet Route No. 87 (Houston, Tex., to Northbrook, Ill.)
43. VOR/VORTAC Jet Route No. 89 (Northbrook, Ill., to Miami, Fla.)
44. Control 1150 (West Palm Beach, Fla., to Wilmington, N. C.)
45. VOR/VORTAC Jet Route No. 90 (Seattle, Wash., to Chicago, Ill.)

AREAS

1. That area 20 n mi either side of a line from Des Moines, Iowa VOR; intersection of Des Moines, Iowa 060° & Northbrook, Ill., 274° M radials; Northbrook, Ill., VOR; Pullman, Mich., VOR; Waterville, Ohio VOR; Joliet, Ill., VOR; Des Moines, Iowa VOR plus the area bounded by this line.
2. Duluth, Minnesota to the U. S. -Canadian Border via the Duluth 047° M radial(direct route between Duluth & Lakehead, Canada.)
3. Spokane, Washington to the U. S. -Canadian Border via the Spokane 028° M radial (direct route between Spokane & Cowley, Canada.)
4. Los Angeles, Calif., VOR; intersection of Los Angeles, Calif. 170° & Long Beach, Calif., 208° M radials; thence via the Long Beach, Calif 208° M radial(Control Area Extension 1177) for a distance of 180 n mi.
5. Los Angeles, Calif. VOR; thence via the Los Angeles, Calif 236° M radial (Control Area Extension 1316) for a distance of 180 n mi.
6. Los Angeles, Calif. VOR; Santa Barbara, Calif. VOR; thence via the Santa Barbara, Calif. 232° M radial (Control Area Extension 1176) for a distance of 180 n mi.
7. Oakland, Calif. VOR; thence via the Oakland, Calif. 218° M radial (Control Area Extension 1173 over Sunset Intersection) for a distance of 150 n mi.
8. Oakland, Calif. VOR; thence via the Oakland, Calif 250° M radial(Control Area Extension 1173 over Francis Intersection) for a distance of 150 n mi.
9. Seattle, Wash. VOR; intersection of Seattle, Wash. 175° & Portland, Oregon 332° M radials; Portland, Oregon VOR; Newport, Oregon VOR; thence via the Newport, Oregon 216° M radial (Control Area Extension 1419) for a distance of 110 n mi.
10. Honolulu, Hawaii VOR; Koko Head, Hawaii VOR; thence via the Koko Head, Hawaii 039° M radial for a distance of 118 n mi.
11. Honolulu, Hawaii VOR; Koko Head, Hawaii VOR; thence via the Koko Head, Hawaii 054° M radial for a distance of 114 n mi.
12. Honolulu, Hawaii VOR; intersection of Honolulu, Hawaii 168° and Molokai, Hawaii 257° M radials; Molokai, Hawaii VOR; thence via the Molokai, Hawaii 056° M radial for a distance of 101 n mi.
13. Honolulu, Hawaii VOR; thence via the Honolulu, Hawaii 250° M radial for a distance of 87 n mi.
14. Honolulu, Hawaii VOR; intersection of Honolulu, Hawaii 168° and Koko Head, Hawaii 243° M radials; thence via the Koko Head, Hawaii 243° M radial for a distance of 107 n mi.
15. Honolulu, Hawaii VOR; thence via the Honolulu, Hawaii 168° M radial for a distance of 99 n mi.
16. Honolulu, Hawaii LFR; thence NW via Red Airway 87 to a point 40 nmi NW of Point Allen rbn.
17. Newark, New Jersey LFR; via the Newark LFR SE crs. (Control Area Extension 1147) to the Tuna Intersection.
18. Miami, Florida VOR; via the Miami VOR 118° M radial for a distance of 92 n mi (boundary of the Miami Oceanic Control Area)
19 Seattle, Washington VOR to the U. S. -Canadian Border via the Seattle VOR direct radial to the Victoria (Patricia Bay), B. C., Canada RR.
20. Boston, Mass., Terminal Area-- That area within 20 nmi to either side of J-16-V between Albany, N. Y., & Boston, Mass.
21 New York City, N. Y., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
a. Bridgeport, Conn. Int. via Poughkeepsie, N. Y., VOR to Albany, N. Y., VOR.
b. Idlewild, N. Y., VORTAC via Huguenot, N. Y., VOR; Wilkes-Barre, Pa., VOR; to Philipsburg, Pa., VORTAC.
22. Baltimore, Md., Terminal Area -- That area within 20 nmi to either side of a direct crs from Baltimore, Md., VOR via Harrisburg, Pa., VOR to Philipsburg, Pa., VOR
Baltimore, Md., Terminal Area-- Effective 5 May 1960
a. That area within 20 nmi from the sides and within the triangle formed by a direct course from the Baltimore, Md., VOR to the Idlewild, N. Y., VOR to the Salisbury, Md., VOR; to the Baltimore, Md., VOR.
b. That area within 20 nmi to either side of the center line of Control Area Extension 1148.
23. St. Louis, Mo., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
a. Int. of J-80-V & Terre Haute, Ind., 268° M radial; via the Int. of Terre Haute VOR 268° & St. Louis VOR 057° M radials; to St. Louis VOR.
b. St. Louis, Mo., VOR via Troy, Ill., VOR; V-12 Bible Grove, Ill., VOR; to Int. of Bible Grove VOR 040° M radial and J-80-V.
c. Maryland Heights, Mo., VOR via V-12 Readsville, Mo., VOR; to Int. of Readsville VOR 302° M radial and J-80-V.
d. Springfield, Ill., VOR via V-69 to Gillespie, Ill. Int.
e. Marion, Ill., Int. via V-179 and V-4 to St. Louis, Mo., VOR.
Effective 17 December 1959.
24. Los Angeles, Calif., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
a. Los Angeles, Calif., VOR via V-208 Thermal, Calif., VOR; V-432 to Rice, Calif. VOR.
b. Los Angeles, Calif., VOR via V-201 Palmdale, Calif., VOR; V-12 to Hector, Calif., VOR.
c. Los Angeles, Calif., VOR via Int. of V-299 and Palmdale, Calif, 265° M radial; to Int. of Palmdale, Calif., 265° M radial and J-1-V.
d. Los Angeles, Calif., VOR via V-25 Santa Barbara, Calif., VOR; to Int. of Santa Barbara VOR 356° M radial and J-1-V
e. Peach Springs, Ariz., VOR via Twenty-Nine Palms, Calif., VOR; V-264 and V-16 to Los Angeles, Calif., VOR.
25. Oakland, Calif., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
a. San Francisco, Calif., VOR via V-199 to Red Bluff, Calif., VOR.
b. Pedro, Calif., Int. via V-27-W Salinas, Calif., VOR; to Int. of Salinas VOR 102° M radial and J-1-V.
c. Oakland, Calif., VOR via V-195 Benecia, Calif., Int.; Linden, Calif., VOR; to Int. of Linden VOR 100° M radial and J-58-V.
26. Dallas, Tex., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
a. Wichita Falls, Tex., VOR via Bridgeport, Tex., VOR to Dallas, Tex., VOR.
b. Texarkana, Ark., VOR via V-278 to Dallas, Tex., VOR.
c. Dallas, Tex., VOR via V-18 Quitman, Tex., VOR; V-54 to Texarkana, Ark. VOR.
d. Dallas, Tex., VOR via the Int. of the Dallas VOR 230° and the Waco, Tex., VOR 344° M radials; to the Waco, Tex., VOR.
e. Dallas, Tex., VOR via the Int. of the Dallas VOR 178° and the Waco, Tex., VOR 028° M radials; to the Waco, Tex., VOR.
27. Atlanta, Ga., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
a. Nashville, Tenn., VOR to Crossville, Tenn. VOR.
b. Spartanburg, S. C., VOR via V-20-N to Norcross, Ga., VOR.
c. Atlanta, Ga., VOR via V-454 and V-185 to Spartanburg, S. C., VOR.
28. Miami, Fla., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
a. Orlando, Fla., VOR via J-81-V to Miami, Fla., VOR.

b. Lakeland, Fla., VOR via V-7, V-35, V-35-W, V-157-W, and V-51 to Biscayne, Bay, Fla., VOR.
c. West Palm Beach, Fla., to Biscayne Bay, Fla., VOR.

Detroit, Mich., Terminal Area -- That area within the United States which is 20 nmi to either side of a line drawn from the Pullman, Mich., VOR via direct Lansing, Mich., VOR; direct Salem, Mich., VOR; via Salem VOR 109° M radial to the U.S. - Canadian border; plus that area within the United States which is S of the above described line and N of J-60-V.

Denver, Colo., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
a. Denver, Colo., VOR via V-160 to a point 100 nmi NE of Denver VOR.
b. Denver, Colo., VOR via V-148 Thurman, Colo., VOR; thence via Thurman VOR 028° M radial to a point 68 nmi NE of Thurman VOR.
c. Kiowa, Colo., VOR via V-19 Pueblo, Colo., VOR thence via J-13-V to the northern edge of the currently depicted Category "B" area of J-64-V.
d. Roggen, Colo., Int. via V-220 to Kremmling, Colo., VOR.
e. Kiowa, Colo., VOR via Kiowa VOR 250° M radial to a point 80 nmi SW of Kiowa VOR.

31. From the Miami, Florida, VOR via the Marathon, Florida, Rdo Bcn; thence via Ctl Area Extension 1234 for a distance of 56 nmi--bndry of the Havana, Cuba Ctl Area.

32. Houston, Tex., Terminal Area--That area within 20 nmi to either side of a direct crs from the:
a. Houston, Tex., VOR via the Int of the Houston 036° and the Lake Charles, La, 265° M radials to the Lake Charles VOR (V-222N).
b. Houston, Tex., VOR via the Int of the Houston VOR 082° and the Lake Charles, La., VOR 233° M radials to the Lake Charles VOR (V20S).
c. Houston, Tex., VOR via the Int of the Houston VOR 315° and the Leona, Tex., VOR 162° M radials; to the Leona, Tex., VOR.
d. Houston, Tex., VOR via the Int of the Houston VOR 345° and the Leona, Tex., VOR 132° M radials; to the Leona, Tex., VOR.

33. San Antonio, Tex., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
a. San Antonio, Tex., VOR via the Int of the San Antonio VOR 048° and the Austin, Tex., VOR 166° M radials to the Austin, Tex., VOR.
b. San Antonio, Tex., VOR via the Int of the San Antonio VOR 353° and the Austin, Tex., VOR 248° M radials; to the Austin, Tex., VOR.

34. New Orleans, La., Terminal Area-- That area within 20 nmi to either side of a direct course from the:
a. New Orleans, La., VOR via the Int. of the New Orleans, La., VOR 320° and the Alexandria, La., VOR 098° M radials; to the Alexandria, La., VOR. (Overlies V-114-N.)
b. New Orleans, La., VOR via the Int. of the New Orleans, La., VOR 030° and the McComb, Miss., VOR 142° M radials; to the McComb, Miss., VOR. (Overlies V-9-E).
c. McComb, Miss., VOR to the Int. of the McComb, Miss., VOR 222° and the New Orleans, La., VOR 320° M radials. (Overlies V-194).
d. New Orleans, La., VOR via the Int. of the New Orleans, La., VOR 094° and the Mobile, Ala., VOR 219° M radials; to the Mobile, Ala., VOR. (Overlies V-240).
e. Mobile, Ala., VOR to the Int. of the Mobile, Ala., VOR 258° and the New Orleans, La., VOR 030° M radials. (Overlies V-20-N.).
f. Alexandria, La., VOR to the Baton Rouge, La., VOR. (Overlies V-114).
g. Baton Rouge, La., VOR via the Int. of the Baton Rouge, La., VOR 126° and the New Orleans, La., VOR 269° M radials; to the New Orleans, La., VOR.
Effective 5 May 1960.

35. Tampa, Fla., Terminal Area - That area within 20 nmi to either side of a direct course from the:
1. St. Petersburg, Florida VOR direct to the Orlando, Fla., VOR. (Overlies V-152).
2. St. Petersburg, Fla., VOR via the Int. of the St. Petersburg, Fla., VOR 038° and the Orlando, Fla., VOR 257° M radials; to the Orlando, Fla., VOR. (Overlies V152N).
3. St. Petersburg, Fla., VOR via the Lakeland, Fla., VOR; to the Orlando, Fla., VOR. (Overlies V-152S).
Effective 5 May 1960.

DISCONTINUANCE OF 135.0 MC: Effective 0800 GMT July 1, 1960, transmitting 135.0 mc will be discontinued in Flight Service Stations and Combined Stations/Towers.

FREQUENCY CHANGE - 126.18 MC to 126.20 MC: FAA will change all existing 126.18 mc frequency assignments to 126.20 mc during the month of July 1960. The individual locations affected will be NOTAMED as the changes are accomplished. The military services have advised their commands to make the change not later than July 1, 1960.

DISCONTINUANCE OF CONTINUOUS GUARD ON 3023.5 kc: Effective July 1, 1960 at the following locations, 3023.5 kc will be available "on request".

Glens Falls, New York	Jackson, Michigan
Martinsburg, West Virginia	Jamestown, North Dakota
Philipsburg, Pennsylvania	Russell, Kansas
Youngstown, Ohio	St. Louis, Missouri
Utica, New York	Columbus, New Mexico
Dalhart, Texas	Crescent City, California
Memphis, Tennessee	Idaho Falls, Idaho
Butler, Missouri	Laramie, Wyoming
Cedar Rapids, Iowa	Oakland, California
Chanute, Kansas	Redmond, Oregon
Des Moines, Iowa	Sacramento, California

VOR/DMET or TACAN EQUIPPED AIRCRAFT: The FAA has implemented new procedures and separation standards for the control of VOR/DMET or TACAN equipped aircraft. In order that ATC can apply these standards, pilots of aircraft so equipped are requested to include the statement "TACAN (or DMET) Equipped" in the remarks section of their flight plan.

PREFERRED ROUTES BETWEEN METROPOLITAN AREAS - Effective May 12, 1959 a complete list of preferred routes between major metropolitan areas will be published at periodic intervals in the Airman's Guide. The effective date of the published list and the date the next complete list is scheduled for publication will be provided.

Pilots are requested to use the preferred routes when filing IFR flight plans whenever possible. These routes have been developed to increase the efficiency of the air traffic control system.

1. Pilots can normally expect to receive clearance via the routes listed, thereby simplifying flight planning.
2. Considerable reduction in air/ground communication will ensue.
3. Departure and en route delays will be reduced.

Only those routes which are essential to achieve the above objectives have been included. Frequent review will be made to maintain accuracy of these routes on a national basis. Necessary revisions will be published in each issue of the Airman's Guide. Pilots are requested to make ink corrections to the last published list and retain and use, until a complete revised list is published.

VOR RECEIVER CHECK POINTS: The following means are available for checking the accuracy of VOR receivers: radiated test signals, airborne check points and ground check points. Pertinent details on the radiated signals and a tabulation of the check points (by facility, including complete location of the check points) will be found on pages 15-25 of the Flight Information Manual, Vol. 13, dated December 1959. As required, amendments to the radiated signals or check points are carried in the Airman's Guide under the heading "Flight Information Manual Corrections." Likewise, the radiated signals and the list of airports at which check points are located (tabulated by city and airport but without the specific details on the check points) are carried in the Airman's Guide from time to time.

FLIGHT ASSISTANCE FOREIGN EXCHANGE AND INTERPHONE SERVICE: As an aid to substantial groups of pilots operating from airports not within local calling distance of an FAA Flight Service Stations, leased telephones services are provided to the nearest FAA station. One such service, entitled "Foreign Exchange" (FX), permits dialing a local number which will connect to the distant FSS at the cost of a local call Another is "Interphones" a private line extension to the nearest FAA station and is normally located in the operations office at an airport where it is available to all pilots. Fixed base operators at the same airport may lease extension service on these lines for the convenience of pilots at the cost of a local telephone extension.

The locations provided with the above services follows:

FOREIGN EXCHANGE Location	Number	FSS Providing Service
Alamo, Tex.	MU 6-7211	Brownsville, Tex.
Alton, Ill.	HO 5-4112	St. Louis, Mo.

✓ LIST OF PERSONS NOT PERMITTED TO FLY TO OR OVER CUBA IN PRIVATE PLANES: On November 1, 1959, the Secretary of State, under the powers delegated to him by Presidential Proclamation 3004 and pursuant to the provisions of Section 215 of the Immigration and Nationality Act and regulations and rules prescribed thereunder, requested the Attorney General to prevent the departure of certain persons to or over Cuba in private aircraft. Pursuant to this request, the Commissioner of Immigration and Naturalization Service has served "Notice of Prevention of Departure" on the below-listed individuals.

Section 215 of the Immigration and Nationality Act provides that if a plane is used as an instrument for the illegal departure of a person from the United States contrary to such an order, the plane is subject to confiscation in addition to criminal penalties which may be imposed on the violator or persons who aid and abet violators.

The Service continues investigation of all illegal activities in the United States in connection with the present situation in Cuba. From time to time additions to the list may be made. In the meantime, if a person seeking to rent a plane is not well known to you or there is any doubt as to whether he is in any way connected with illegal Cuban activities, you are requested to call the nearest Immigration and Naturalization Service office for advice. You may also obtain this information from the Flight Information Center, Miami, Florida, telephone FRanklin 7-1495, which is operated by the Immigration and Naturalization Service.

Your cooperation in this matter will materially aid the Immigration and Naturalization Service in carrying out its mission and possibly save you the loss of an aircraft.

LIST OF NAMES

NAME	DATE OF BIRTH	PILOT'S LICENSE NO.
ALPIZAR-Perez, Evelio	11/27/39	Student S616495

✓ ON REQUEST REPORTING POINTS: The following on-request reporting points have been modified, cancelled or renamed as indicated effective 30 June 1960:

MODIFIED:

(1) LOCH HAVEN, PA(VHF) INT: 217 M rad Stonyfork, Pa. VOR; 139 M rad Slate Run, Pa. VOR.

(2) BERWICK, PA(VHF) INT: 252 M rad Thornhurst, Pa. VOR; 134 M rad Williamsport, Pa. VOR.

(3) LOPEZ, PA(VHF) INT: 320 M rad Thornhurst, Pa. VOR; 275 M rad Wilkes-Barre, Pa. VOR.

(4) BIG POND, PA(VHF) INT: 138 M rad Elmira, N.Y. VOR; 245 M rad Binghamton, N.Y. VOR.

(5) BUCK HILL, PA(VHF) INT: 304 M rad Stillwater, Pa. VOR; 355 M rad Stroudsburg, Pa. VOR.

(6) PLAIN CITY, OHIO(VHF) INT: 161 M rad Findlay, Ohio VOR; 267 M rad Appleton, Ohio VOR.

(7) MECHANICSBURG, OHIO(VHF) INT: 267 M rad Appleton, Ohio VOR; 122 M rad Rosewood, Ohio VOR.

(8) McCLURE, OHIO(VHF) INT: 251 M rad Waterville, Ohio VOR; 335 M rad Findlay, Ohio VOR.

(9) ELBA, MINN(VHF) INT: 294 M rad Nodine, Minn. VOR; 046 M rad Rochester, Minn. VOR.

(10) FONTAINE, IND(VHF) INT: 233 M rad Ft. Wayne, Ind. VOR; 191 M rad Wolflake, Ind. VOR.

(11) NEWPORT, IND(VHF) INT: 165 M rad Danville, Ill. VOR; 272 M rad Indianapolis, Ind. VOR.

CANCELLED:

(1) BEAUFORT, MO(LF) INT.
(2) COKATO MINN(VHF) INT.
(3) McADOO, PA(VHF) INT.
(4) RICHFIELD, OHIO(VHF) INT.
(5) OXFORD, GA(VHF) INT.

RENAMED AND MODIFIED:

(1) SWISSDALE, PA(VHF) INT: 139 M rad Slate Run, Pa. VOR; 254 M rad Williamsport, Pa. VOR. (Formerly Mill Hall Int.)

(2) DALTON, PA(VHF) INT: 349 M rad Thornhurst, Pa. VOR; 30^ M rad Wilkes-Barre, Pa. VOR. (Formerly Lynn Int.)

(3) GRASSLAKE, PA(VHF) INT: 141 M rad Thornhurst, Pa. VOR; 188 M rad Wilkes-Barre, Pa. VOR. (Formerly Pocono Int.)

✓ HOLDING PATTERNS: The following holding pattern has been established effective 30 June 1960:

ESTABLISHED:

(1) VICTORIA, MINN(VHF) INT: direction of holding - W on 291 M rad Farmington, Minn. VOR; direction of turns-right; time - 1 min.

✓ ON REQUEST REPORTING POINTS: The following on-request reporting points have been modified effective 2 June 1960:

(1) CACTUS, ARIZ(VHF) INT: 058 M Buckeye and 325 M Phoenix radials.
(2) KNOB, ARIZ(VHF) INT: 058 M Buckeye and 350 M Phoenix radials.

(7 June 1960)

Effective July 28, 1960 the following changeover points have been added, revised or cancelled as indicated:

SPECIAL NOTICE

OREGON

KLAMATH FALLS (KINGSLEY FIELD) MILITARY CLIMB CORRIDOR

EFFECTIVE 0001 E.S.T. JUNE 30, 1960

(This Special Notice will not normally be revised or reissued.)
(Refer to Aeronautical Charts for current information)

Pilots of Century Series aircraft on active air defense missions are unable to see and safely avoid other aircraft during the climb phase of a scramble. In the interest of safety, the Dept. of Defense and the FAA have agreed to establish restricted corridors to segregate such operations from other air traffic. ALL FLIGHTS through these areas must obtain prior approval from the Controlling Agency.

AIRMAN'S GUIDE CORRECTIONS: Correct Airman's Guide Volume 15 Number 6 dated 24 May 1960, as follows:

(1) On-Request Reporting Points- page 54 second column under "Modified" disregard items (3) Madison, N.C.; (23) Berwyn, Nebraska.

LOCATION IDENTIFIERS: The following changes affect the use of the location identifiers:

AZA	Atlanta, Ga., Atlanta Airport 2nd ILS (Assignment)
GEG	Spokane, Wash., Spokane International Airport (Name change from Geiger Field)
ZDF	Lowe, Ala., Lowe AAF (Assignment)

RESTRICTED AREA AMENDMENTS: The following Restricted Area Amendments shall become effective on 28 July 1960:

(Part 608)

(1) In Section 608.33, Grandview, Missouri (Richards-Gebaur AFB) Restricted Area/ Military Climb Corridor (R-549) add the following: Description - That area centered on the Richards-Gebaur AFB ILS lclzr S crs., with a width of 2 smi beginning at a point 5 smi S of the airbase and extending to a width of 4.6 smi at 32 smi S of the airbase. Designated Altitudes - That area described above shall include the airspace between the following altitudes only: 3100' MSL to 16,000' MSL from a point 5 smi S of the airbase to a point 6 smi S of the airbase. 3100' MSL to 25,100' MSL from a point 6 smi S of the airbase to a point 7 smi S of the airbase. 3100' MSL to 27,000' MSL from a point 7 smi S of the airbase to a point 10 smi S of the airbase. 7100' MSL to 27,000' MSL from a point 10 smi S of the airbase to a point 15 smi S of the airbase. 11,100' MSL to 27,000' MSL from a point 15 smi S of the airbase to a point 20 smi S of the airbase. 16,100' MSL to 27,000' MSL from a point 20 smi S of the airbase to a point 25 smi S of the airbase. 20,100' MSL to 27,000' MSL from a point 25 smi S of the airbase to a point 32 smi S of the airbase. Time of designation - Continuous. Controlling agency - FAA Radar Facility-Olathe Naval Air Station, Olathe, Kansas.

(2) In Section 608.28, Camp Springs, Maryland (Andrews AFB) Restricted Area/Military Climb Corridor (R-542) is amended to read: Description -That area bases on the 053° radial of the Andrews AFB TVOR, beginning 5 smi NE of the airbase and extending 32 smi NE of the airbase, having a width of 1 smi SE and 2.3 smi NW of the 053° T radial at the beginning and a width of 2.3 smi on each side of the 053° T radial at the outer extremity. Designated altitudes - 2,280' MSL to 15,280' MSL from 5 smi NE of the airbase to 6 smi NE of the airbase. 2,280' MSL 24,280' MSL from 6 to 7 smi NE of the airbase. 2,280' MSL to 27,000' MSL from 7 to 10 smi NE of the airbase. 6,280' MSL to 27,000' MSL from 10 to 15 smi NE of the airbase. 10,280' MSL to 27,000' MSL from 15 to 20 smi NE of the airbase. 15,280' MSL to 27,000' MSL from 20 to 25 smi NE of the airbase. 19,280' MSL to 27,000' MSL from 25 to 32 smi NE of the airbase. Time of designation - Continuous. Controlling Agency: Andrews AFB Approach Control.

PREFERRED ROUTES CORRECTIONS: Airman's Guide Volume 15 Number 3.

REVISIONS TO STANDARD INSTRUMENT APPROACH PROCEDURES

Bearings, headings, courses & radials are magnetic. Elevations & altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE RADAR

If a radar instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure authorized for such airport by the Administrator of the FAA. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the radar controller. From initial contact with radar to final authorized landing minimums, the instructions of the radar controller are mandatory except when (A) visual contact is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach. Except when the radar controller may direct otherwise prior to final approach, a missed approach shall be executed as provided below when (A) communication on final approach is lost for more than 5 seconds during a precision approach, or for more than 30 seconds during a surveillance approach; (B) directed by radar controller; (C) visual contact is not established upon descent to authorized landing minimums; or (D) a landing is not accomplished.

TRANSITION				CEILING AND VISIBILITY MINIMUMS			
From	To	Course and Distance	Minimum Altitude	Condition	Two Engine or Less: 65 Knots or Less	Two Engine or Less: More Than 65 Knots	More Than Two Engine, More Than 65 Knots
		within			Precision approach		
→ 200°	035°	10 mi	2000	S-dn-5L	200-½	200-½	200-½
→ 035°	200°	10 mi	3000	A-dn	600-2	600-2	600-2
→ 0°	360°	30 mi	3000		Surveillance approach		
				T-dn	300-1	300-1	200-½
				C/S-dn-all	400-1	500-1	500-1½
				A-dn	800-2	800-2	800-2

→ All bearings are from the RADAR site with sector azimuths progressing clockwise.

If visual contact not established upon descent to authorized landing minimums or if landing not accomplished . . . . .
→ Rnwy 27: Climb to 2000' on W crs Cleveland LFR and proceed to Elyria FM. Rnwy 9: Climb to 3000' on N side of the E crs of Cleveland LFR to Parkman Int. All runways except 9 and 27: Make a climbing right turn and proceed on the N side of the E crs of the Cleveland LFR to the Parkman Int at 3000'
CAUTION: TV towers approximately 1970' approximately 6 mi ESE of airport.

City and State	Airport Name & Elev.	Fac. Class & Ident.	Procedure No. & Eff. Date	Sup. Amdt. No. Dated
★ Cleveland, Ohio	Cleveland-Hopkins 789'	Cleveland Radar	1, Amdt 6, 30 Jun 60	5, 2 Jun 58

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE ADF

If an instrument approach procedure of the above type is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of the FAA. Initial approaches shall be made over specified routes. Minimum altitudes shall correspond with those established for en route operation in the particular area or as set forth below.

TRANSITION				CEILING AND VISIBILITY MINIMUMS

IMPORTANT NOTICE: Nation-wide changes in FAA's ATC communications July 7. See p. 52

FEDERAL AVIATION AGENCY

AIRMAN'S GUIDE

ISSUANCE: The Airman's Guide is issued every two weeks. Every issue contains a NOTAM section; every other issue additionally contains a Radar-Radio Listings section; and once every three months the Airport Directory appears in an issue containing both NOTAMS and the Radar-Radio Listings. See below for contents of these sections.

RETENTION: To enable users to know which issues should be retained, a suitable notice is carried on the front cover indicating which ones are still current.

CONTENTS: The contents (by section or other appropriate breakdown) of each issue are noted by tab and page number on the front cover. The first page of each section carries the Legend for interpreting codified information. Material usually included in each section is as follows:

(1) NOTAMS (including Special Notices): Under appropriate geographical headings (state and/or city, as applicable) there is given the current condition (if there has been a temporary or permanent change concerning which a NOTAM has been issued) of facilities and obstructions, plus any special data (including flight regulations or restrictions). Where NOTAMS cannot be associated with a specific geographical location or where the application is generalized, they are carried in a subdivision of NOTAMS entitled "Special Notices." The Special Notices section follows the NOTAMS and, like the NOTAMS, is separately listed by a tab and page number on the front cover. Important or unusual Special Notices are additionally indicated on the front cover in the box provided, giving the subject and page number where the data is to be found. Included as Special Notices are data and/or amendments concerning restricted areas, location identifiers, minimum en route altitudes, civil airways, airway structure during VOR shutdowns, control areas, control zones, reporting points, VOR check points, standard instrument approach procedures, control area/flight advisory area boundaries, civil air regulations, preferential routes, flight test areas, military maneuvers, aeronautical charts, etc. Also included are amendments and changes to the Flight Information Manual as well as to previously issued Airman's Guides.

(2) Radar-Radio Listings: Lists radar facilities, instrument landing systems, and aeronautical radio facilities with (as appropriate) their transmitting and guarded frequencies, identification, station class, range courses, other appropriate data, and remarks.

(3) Airport Directory: This codified directory provides the following data on airports: type, location (with reference to associated town or city), elevation, number of runways, length of longest runway (indicating surfacing), lighting, servicing, availability of weather reports and or Unicom, fuel octanes, and appropriate remarks.

PRICE: See information in box below.

REPORTING INFORMATION TO EDITORS: Data for inclusion in the Airman's Guide should be reported to the editors at the following address: Federal Aviation Agency, Washington 25, D. C., Attention: MS-120. Appropriate instructions for reporting data are contained in FAA's Manual ATM-2-B, entitled "Communications Procedures." However, since some airport data, unlike most other data, may not originate from official sources, the following explanatory information is provided.

The Airman's Guide covers primarily two broad fields of civil airport information: permanent data changes and temporary hazardous conditions. Permanent airport data refers to new airports or changes in field layout, servicing, lighting, restrictions or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions which make airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, thaws or construction or merely a burned out obstruction light or a runway unusable or partially unusable because of construction.

Since the aeronautical public should be immediately advised of such hazardous conditions, reporters should utilize the FAA Flight Service Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest FAA service station for dissemination as a NOTAM and for further transmission to the editors of the Airman's Guide. If this is not feasible, the item should be reported directly to the Federal Aviation Agency, Washington 25, D. C., Attention: MS-120.

Permanent airport data changes should be reported to the appropriate FAA Regional Office for coordination before they are included in the Airman's Guide.

NOTE: The Federal Government disclaims responsibility for non-Federal air navigation facilities, including airports.

Abbreviations

The editors are now in the process of making changes in the contractions and abbreviations used in the Airman's Guide. We are doing this in order to conform to the new, standardized material contained in the FAA publication entitled CONTRACTIONS. This publication, which is dated July 1959 and issued in the ATM Manual series, is available from the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C., at 75 cents per copy.

Many of the abbreviations and contractions used in the Airman's Guide are already in conformity with the CONTRACTIONS publication. However, from among those which have changed, we have selected a few which we frequently use in the Airman's Guide. They appear in the list which follows.

adjt	adjacent	dptr	departure	jctn	junction

Usable Reporting Points: Anita Int - PRC 348° radial & TBC 241° radial; Clints Well Int - PRC 080° radial & INW 210° radial; Drake Int-PRC 359° & PGS 113° radial; Floyd Int - PRC 348° radial & PGS 081° radial.

GILA BEND RADIO: DMET operg test basis; channel 113. (1-27)

GILA BEND ARPT: New arpt reported. Lctd 2.0 SE. 2 rnwys, longest rnwy & facils 40-S5. Fuel: F3.

GILA BEND-YUMA SPECIAL NOTICE: The U.S. Army will be conducting hi speed, jet powered, pilotless acft (DRONE) flts within Caution Area C-308 and on a line from Yuma, Ariz. to Fort Huachuca, Ariz. Flts will average three per month for next two yrs and will be conducted under VFR conditions only. Alts in use will be variable and speeds will be sub and supersonic. Actual flt info will be disseminated by Notam from Yuma, Ariz., 72 hrs prior to each flt. (6 13)

**MARICOPA SPECIAL NOTICE: CAUTION - DO NOT MISTAKE FOR LNDG AREA. Space Surveillance Stn at lat 33-06-31, long. 112-01-46, 4 mi N Maricopa. 1200' W and parallel to hwy. Site is strip 300' x 1800' with paved portion lengthwise thru cntr 100' in width and studded with 6' steel posts. This permanent hazard lctd 22 nmi S Phoenix Sky Harbor Arpt.

PHOENIX SPECIAL NOTICE: Hi Density Jet Tfc: Pilots on other than IFR clearance should either avoid or use extreme caution when traversing the following areas within which Luke AFB hi-density tfc is operating. Normal training hours are from 0600-1800 MST Mon thru Fri. Hi-density traffic will be operg VFR on R83, V94, V66 and R9 within a 10 mi radius of the Gila Bend VOR and btn the Gila Bend VOR & a point 52 nmi W on R9 and V66 at alts below 2000' and at 5000', 6000', 7000', 15,000', 16,000' and above 25,000' MSL. On R83 and V94 between a point 10 nmi S of the Hassayampa VOR & the Gila Bend VOR at & below 4000' MSL & 25,000' and above. All provisions of Special Air Regulation #421 apply within the following area: G5 and V16W of Phoenix between 112° - 10'W and 112° - 35' W. (6-1)

**PHOENIX, AIRHAVEN: Reopened to all tfc. Caution rnwy ruf, soft spots. (6-3) Clsd all acft over 6000 lbs gross wt. (6-9)

PHOENIX, DEER VALLEY ARPT: 5000' extsn E end E/W rnwy clsd. (5-5)

**PHOENIX-SKY HARBOR MUN ARPT: Txwy 6 btn txwy 1 and the ramp clsd. (6-6) Acft arresting barriers rnwys 8R-26L comsnd, limited basis avbl for emgcy use. (6-17)

PRESCOTT RADIO: May 19, TACAN shut down until aprx June 30 - reconstr. (6-19)

SCOTTSDALE, THUNDERBIRD ACADEMY ARPT: N/S & NW/SE rnwys clsd. (4-7)

TUCSON SPECIAL NOTICE: High Density Jet Traffic: Pilots on other than IFR clearance should either avoid or use extreme caution when traversing the following area at an alt above 19,000' MSL. Hi-density jet traffic operating at and above 20,000' MSL within the area from Douglas VOR to Cochise VOR to the Cortaro Int. to the Robles Int. to the Kinsley Int. to the Douglas VOR. Hrs of opern, cont daily. (6-4)

TUCSON RADIO: VORTAC unusable beyond 25 mi, 320° clockwise thru 080° at MOCA.

**TUCSON, DOWNTOWN ARPT: Delete; private fld. (5-4)

TUCSON ARPT SPECIAL NOTICE: Target towing by jet acft during dalgt hrs under VFR conditions on wk-ends and intermittently thru week on a direct route from Ajo, Ariz. descending from 20,000' so as to reach 5500' prior to joining ctl area vicinity San Pedro, Ariz thence direct to San Xavier mission, thence direct to Tucson arpt. Ctc Tucson rdo or ctl twr for info concerning towing activity. (2-10)

TUCSON MUN ARPT: 6' obstacle exists on jet arrecting barriers at ends of rnwy 12 & 30.

TUCSON, RYAN ARPT: E/W rnwy under constr, N/S rnwy avbl durg periods when E/W rnwy clsd. Extreme caution when using substitute rnwy. (6-17)

★WINSLOW RADIO: June 17, VORTAC comsnd. TACAN channel 81. Class M-BVORTAC. About July 11, VORTAC and DME will be shut down until aprx July 26 - freq chg of VOR to 110.0 mc; TACAN channel to 37 and DME channel to 20. (5-13) During this period following route structure and MEAs will be in effect: Unusable Awys: V12S Cornville Int-ZUN; V12N INW-ZUN; V95 Ranch Int-FMN. Unusable reporting pts: Castle, Chevelon, Clints Wells &

[redacted]: Milky Ints. Usable Awys (Tmpry redesignated as follows with published MEAs and MCAs unless otherwise indicated): V12-1518-Perkins Int-ZUN via DRK R067° & ZUN R261°, MEA Perkins Int-Winslow Int, 15,000'; Winslow Int-ZUN 13,000'; MCA Winslow Int, 15,000' W-bnd. V62 Milky-ZUN, 12,000'. Usable Reporting Points (Tmpry redesigned): Salt River Int-SJN R233° and 339° brg to INW LF rng; Winslow Int-ZUN R261° and TBC R145°, MRA 13,000'. (6-9)

WINSLOW MUNICIPAL ARPT: Rnwy 17-35 open days. (4-26)

YUMA-MCAAS/YUMA CO. ARPT: Rnwy 17-35 clsd, use as txwy only. Rnwy 3R-21L clsd. Hi-density jet tfc vcnty of arpt. G - Guards

FILE FLIGHT PLANS BEFORE TAKE-OFF: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communs channels. These channels should be reserved for essential in-flight communs. All pilots will benefit by following this practice.

EN ROUTE OPERATIONS: Pilots are urged to follow IFR procedures even when operating VFR. See page 52, Item 9 and page 73 - Position Reporting, in the Flight Information Manual, Volume 13, dated December 1959.
Check in regularly with FAA Flight Service Stations. The life that might be saved could be your own.

CLOSING OF VFR FLIGHT PLANS: Pilots are urged to file VFR arrival reports with a Flgt Serv Station whenever it is practical to do so. This procedure is necessary in order to reduce congestion on control tower communs channels. All pilots will benefit by following this practice.

Failure to close a flight plan may result in a civil penalty because it is a violation of the Civil Air Regulations. More important, needless expense and trouble involved in unnecessary search and rescue missions can be avoided by the proper closing of flight plans.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

RADIO INTERFERENCE(General): You can do your part toward reducing radio interference to aeronautical services from non-aeronautical sources which may be noted during flight if such is reported promptly to a FAA facility (preferably after landing) or to any FCC field office. Reports should state the frequency or channel affected, description of the interference, and the geographical area where the interference was observed. If known, reports should give the apparent cause of the interference such as radio stations, call letters when such can be identified, industrial plants, diathermy machines, power lines, television receivers, etc. Do not report interference caused by normal frequency congestion, i.e., signals from other aircraft using the frequency."

IDENTIFICATION OF AIRCRAFT: Pilots are requested to exercise care that the identification of their aircraft is clearly transmitted in each contact with an ATC facility. Also, pilots should be certain that their aircraft are clearly identified in ATC transmissions before taking action on an ATC clearance. Garbled aircraft identifications in radiotelephone transmissions should never be taken for granted but should always be checked.

FLYING BENEATH AIRSHIPS: All airships operating in the Atlantic Ocean area have the capability of either towing sonar or picking up sea water as ballast. Either operation creates an invisible hazard to other aircraft in that a wire cable extends from the airship to the water in both cases. Therefore, other aircraft should remain well clear of all airships and should not, under any circumstances, fly beneath them when over water.

CIVIL USE OF MILITARY FIELDS: U.S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission; Army Air Fields are open to civil aircraft on authorization of the Air Field Commander.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Directorate of Operations DCS/O, Hqs USAF, Washington 25, D.C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Office of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

WASHINGTON, D. C. AREA-SPECIAL NOTICE: Aircraft operating VFR be alert for all types of tfc from Washington Nat'l Arpt, Bolling AFB, Anacostia NAS, Andrews AFB, Hyde Field and Washington - Virginia Airport. Suggested arrival and departure routes are issued as a guide for all acft operg VFR to maintain a safe, orderly flow of air tfc in the Washington, D. C. area. WASHINGTON NATIONAL ARPT: Northwest: Arrivals proceed well right of Potomac River until Cabin John. Departures proceed well right of Potomac River until past Herndon FM. West: Arrivals proceed well right of U. S. Route 29 until past Falls Church. Departures proceed well right of U. S. Route 29 until past Centerville. Southwest: Arrivals proceed on the right side of Potomac River until past Mount Vernon, then via the river to the Washington Range. Departures proceed well right of Potomac River until past Occoquan River. Southeast: Arrivals proceed via Charlotte Hall-Waldorf-Fort Washington. Departures proceed via Fort Washington-La Plata. Caution: Jet Penetration Route 187° radial of Andrews VOR crossing Andrews LFR at 1500'. East: Arrivals proceed from Shadyside via Andrews LFR to Fort Washington, avoid Andrews AFB Ctl Zone. Caution: Jet departures from Andrews AFB make their climb out on the 060° radial of the Andrews VOR. Northeast: Arrivals proceed well right of the Washington-Baltimore Parkway until past Beltsville, then NW of the city to Chain bridge. Departures proceed well right of the Washington-Baltimore Parkway until past Beltsville Airport. All acft flying in VFR conditions departing or arriving Washington National are requested to remain well clear of the Andrews AFB Ctl Zone, Bolling AFB and the Anacostia NAS VFR Corridors. ANACOSTIA/BOLLING AIRPORTS: VFR air tfc operg to and from Anacostia and Bolling AFB shall proceed to and from the local tfc patterns via established air corridors. North Corridor: Two miles wide extending from the Anacostia N boundary along the SE bank of the Anacostia River to a point on the E bank abeam of the Riverdale Rdo Bcn. Departures from both fields proceed via the corridor at 1500' MSL. Arrival tfc from N and NE enter the corridor E of the Anacostia River and abeam of the Riverdale Rdo Bcn at 2000' MSL. South Corridor: Two miles wide aligned along a 165/345° magnetic track from the Bolling Rdo Bcn to a point 1-1/2 miles E of Fort Washington Inlet. Departures will proceed at 1500' MSL until past Fort Washington. Arrivals will maintain 2000' MSL. Military pilots are requested not to exceed 160 knots IAS, while in the corridors. (9-9)

JET ACROBATIC AREAS - VICINITY WASHINGTON, D. C. - Acrobatic maneuvers by jet aircraft are conducted daily, VFR daylight hours only, between the altitudes of 10,000' and 20,000' MSL inclusive, within the following areas:

Area #1: The uncontrolled portion of that airspace which is bounded on the N by V-174; on the E and SE by B-47 and V-140; and on the S by V-156.

Area #2: The uncontrolled portion of that airspace which is bounded on the N by V-156; on the E by V-140; on the S by V-290; and on the W by V-103.

REGULATIONS OF THE ADMINISTRATOR PART 570: Rules of Washington National Airport-"570. 49"-No pilots other than those possessed of at least a private pilot rating or the equivalent shall operate aircraft on the airport."

SIMULTANEOUS VOICE TRANSMISSIONS FROM A SINGLE LOCATION: At several FAA facilities, simultaneous voice transmissions are made from a single location. For example, the New York FSS controls the transmitters at Idlewild, La Guardia, Newark, Colts Neck, Solberg and Wilton L/MF or VOR facilities.

To provide a uniformly brief announcement, generally for broadcast purposes, the name of the controlling facility, followed by the word AREA will be used, e.g., THIS IS NEW YORK AREA RADIO, etc.

Call from aircraft will be answered using the name of the station as stated by the pilot, e.g., a pilot calling "Newark Radio" will be answered by the New York FSS, "THIS IS NEWARK RADIO, etc."

The word "AREA" signifies that the transmission from the named (controlling) location is emanating simultaneously from one or more remotely controlled facilities, having a different name or names, as indicated in the ANRA Section of the AIRGI and/or applicable RF Charts.

A NOTAM will be issued from those facilities affected by the foregoing when the change to this procedure is made.

PENETRATION OF RESTRICTED AREAS: Unauthorized flight is not permitted within a Restricted Area during the time of use and between the altitudes noted in the tabulation on the back of Sectional Aeronautical Charts issued by the U. S. Coast and Geodetic Survey or in the Flight Information Manual. Application for flight authorization should be made to the controlling agency.

"SHUT DOWN" OR "UNUSABLE" NAVIGATIONAL FACILITIES: Navigational Facilities which are notamed as being "shut down," or radials of a VOR notamed as "unusable" should not be utilized for navigational purposes. Pilots planning IFR flights should check all available information during pre-flight planning to ensure their proposed flight plan will not require use of facilities during the period of "shut down," as Air Traffic Control will be unable to approve such flight plans. During periods of prolonged "shut down," "revised MEA's and/or alternate routes are established for designated airways, utilizing adjacent facilities. This information is contained in appropriate NOTAMS and the Airman's Guide.

TRANSCRIBED WEATHER BROADCASTS: Equipment is being provided at selected FAA FSS by which meterological and Notice to Airmen data will be recorded on tapes and broadcast continuously over the low-frequency (200-400 kc) navigational aid (L/MF range or H facility.)

Broadcasts are made from a series of individual tape recordings. The first three tapes identify the station, give general wea conditions in the area, pilot reports (PIREP) and radar reports, when available, and winds aloft data. The remaining tapes contain weather at selected locations within a 400 mile radius of the central point. Changes, as they occur, are transcribed onto the tapes.

Transcribed weather broadcasts are presently being made at the following locations as indicated:

Location	Freq.
Boise, Idaho	359 kc
Boston, Mass.	382 kc
Chicago, (Joliet), Ill.	350 kc, 257 kc
Cincinnati, Ohio	335 kc
Cleveland, Ohio	344 kc
Denver, Colo.	379 kc
Fort Worth, Texas	365 kc
Indianapolis, Ind.	266 kc
Los Angeles, Calif.	332 kc
Milwaukee, Wisconsin	242 kc
Minneapolis, Minnesota	266 kc
New York, N. Y.	209 kc
Oakland, Calif.	362 kc
Pittsburgh, Pa.	254 kc
Washington, D. C.	332 kc
Wichita, Kans.	332 kc

*Operating on test basis.

INTERFERENCE TO AIRCRAFT COMMUNICATIONS AND NAVIGATION EQUIPMENT: Several reports have recently been received involving interference to aircraft communications navigation and integrated flight instrumentation systems. This interference has been traced directly to passenger operated portable recorders and radio receivers. The interference, in some cases, resulted in the oscillation of the glide slope and VOR indicator needles. While all reports received to date have come from the airlines, it is recognized that many unreported cases may exist as any aircraft equipped with electronic devices is susceptible to this type of interference.

Due to the seriousness of interference of this nature and pending further investigation and resolution of the problem, the Federal Aviation Agency strongly urges that action be taken by all aircraft operators to preclude the use of such portable electronic devices during flight. To assist in the resolution of this problem, detailed reports of any instances of interference of this nature should be forwarded to the Federal Aviation Agency, Washington 25, D. C. (Attention: W-200).

(This does not apply to hearing aids)

ROCKY MOUNT, N C VOR SHUT DOWN: During shutdown use the following:
